Excessive speculation in cotton is the second evil attributed to future trading. It is true that future trading makes possible the injurious speculation complained of, but the relationship between the two is no closer than the relationship between any beneficial privilege and the abuse thereof. It is well enough and praiseworthy and wise to remove, in so far as we may, temptations to the frailties of mankind, but if we undertake to prevent injurious speculation by destroying all opportunities to speculate, we shall have to begin by closing practically every avenue of human activity and end by annihilating the human race. The test of a reform is in the net result. A legal and beneficial system of business should not be overthrown for the sake of preventing certain persons from practicing an abuse injurious to both the system and themselves. A true reform, which is a discerning reform, acts on this rule. The use of a bad principle is a wrong; the misuse of a good principle is an injustice. The wrong should be punished by destruction; the injustice by correction.

It is not to be denied that even in the legitimate exchanges a great many contracts for the future delivery of cotton are bought and sold for a purely speculative purpose, but in the frenzy of speculation that has but recently swept the country this is equally true of all other commodities and things. Speculation rampant is no respecter of commodities or issues. It is well, therefore, to consider whether this particular evil complained of may not be due more to the tendency of the time than to the nature of the business. Again, before we condemn speculation in entirety it would be well for us to consider the question as to whether or not there is a distinction between the kinds of speculation—between illegitimate and legitimate speculation, between speculation that is wholly bad and speculation that may be and is beneficial. We believe that there is such a distinction, and our conclusion is this: When a man in no wise incapacitated by reason of ignorance, weakness, or lack of means, or disqualified by reason of a position or relation of trust, buys or sells a commodity or thing or its representative, which is an enforceable contract therefor, because he thinks it is cheap or dear and because he thinks that he can subsequently dispose of his holding at a profit, the speculation is legitimate, not necessarily harmful to the individual, and almost necessarily beneficial to the market for the commodity in which he trades. But when a man not so qualified and incapacitated as specified undertakes to speculate, or when any man merely wagers that a certain event or tendency may or may not occur, or if, having bought or sold a commodity or thing or a contract therefor, he enters into a conspiracy with others or uses some accidental power of his own to depress or advance the price of the commodity or thing beyond its legitimate value to the hurt of the bona fide holders of or traders in such commodity, the speculation is illegitimate, hurtful to the individual and to the market in which he trades. Legitimate speculation as here defined is a benefit to the cotton market in that it supplies a demand for the commodity at a time when the demand for consumption is absent or in abeyance and thereby aids in carrying the temporary surplus of supply over demand. It is further beneficial in that it brings to the future market a larger supply of both buying and selling contracts, which to that extent facilitates both merchant and manufacturer in making quick and advantageous hedges of his specific contract and of his specific purchases and sales. Illegitimate speculation as here defined is wholly demoralizing and bad. It helps no one and injures everyone and should be destroyed.

The evil of excessive and hurtful speculation is somewhat more difficult to reach than the bucket shop evil, but it can be reached and if not destroyed it can be materially lessened. A popular arraignment of speculation in cotton contracts is based upon the charges that men in moderate circumstances have been reduced to poverty and goaded into crime by their losses in speculation; that employees by reason of their losses have been driven to embezzlement and theft; that men in positions of trust have been by reason of losses in cotton speculation or of a desire for gain, tempted into the appropriation of funds belonging to others. We believe that by far the greater number of these disasters proceed from bucket-shop gambling and that with the complete elimination of the bucket shop the number of these unhappy incidents would be comparatively small. But assuming for the sake of this argument that this class of speculators do operate in the legitimate exchanges where a hundred-bale contract is the minimum trade permitted, we still declare that they can be practically eliminated and the problem thereby nearly solved. The result can be largely accomplished by restrictions preventing the broker from executing any order unless the same is accompanied by a cash deposit large enough to be prohibitive to the smaller speculator and restrictive to the larger, and by prohibiting a broker from accepting an order from any employee of any person, firm, corporation, or trust company, unless said order is accompanied by the written consent of such employer.

UNFAIR CONTRACT.

The third evil to be considered is found in the terms of the future contract itself and in the rules of delivery and settlement thereunder, resulting in an injurious effect upon the market and the price of cotton by the delivery of cotton or tender of delivery on such contract

and under such rules. A contract giving an undue advantage to either seller or buyer is not only a contaminating element per se, but it also invites and facilitates the formation and the operations of those combinations of speculators which demoralize a market and injure legitimate traders by the sheer force of speculative activity. Logically this evil should be considered under the head of illegitimate or wrongful speculation as heretofore defined, but in view of the importance of the principle involved, we give it separate consideration. Such a contract not only fails to perform the legitimate functions of a future contract but it puts a premium upon illegitimate usage. It not only fails to afford protection to the legitimate trader but it throws the free-booters of speculation upon his back. It facilitates manipulation and nullifies foresight. A contract that is not fair is a reproach and can not survive. A contract that offers inducements to the speculative seller by giving him an unfair advantage, or to the speculative buyer by giving him an unfair advantage, is contrary to public policy and should be made unlawful if it is not already unlawful. The unfair contract affords a striking instance of the unjust application of a just principle. But the remedy for this wrong application lies not in depriving the individual of his right to contract, but in compelling him to make an honest contract.

The remedy for the evil of the unfair contract is very plain and of easy accomplishment. A law establishing a national standard of classification of the marketable grades of cotton, upon which standard all arbitrations on contract deliveries must be made; prohibiting any contract on which can be delivered unmarketable cotton or useless stuff, or cotton of a value uncertain and not readily ascertainable; and providing that all cotton delivered on contract shall be paid for on the basis of actual differences in the spot value of the grades delivered on the market and at the time of delivery, would effectually and immediately eradicate this evil influence.

DUTY.

Thus it seems plain that the legitimate future contract is in itself entirely legal and honest and has, in the evolution of the cotton trade, become a necessary, if not an indispensable, factor in the proper and advantageous marketing and distribution of the cotton crop and the manufactured product. It also seems plain that the future contract, by reason of its protective and auxiliary functions, has become so assimilated by the cotton trade that it can not be eliminated except at the cost of demoralizing a great industry and crippling a great people. It further seems plain that the evils complained of are not inherent in the system of legitimate contract trading, but merely incident thereto and can be eliminated therefrom with no hurt to the system itself, but with benefit thereto. The conclusion, therefore, follows that it is the duty of not only our legislators, but of our exchanges and of everyone who has at heart the welfare of the South and of the nation, to vigorously attack and destroy the evil, but no less steadfastly to sustain and encourage the good.

The New Orleans Cotton Exchange defends no evil. Our laws and rules represent the best thought of our members up to this time, but we are not yet satisfied. We welcome investigation and will pay earnest heed to all suggestions looking toward the improvement of the cotton contract and the cotton trade. We are convinced that such improvement will not come through destructive legislation, but rather through constructive endeavor. In view of the importance of the issue and of the grave consequences entailed, not only to us but to the country at large, we bespeak for our protest and warning your careful and earnest consideration.

FUNDAMENTAL PRINCIPLES.

These are the fundamentals of the question. If we understand the principles of a proposition and fix these firmly in our minds, the development of the proposition is an easy and a natural process. We must understand these principles before we can be assured as to what the effect of our activities with relation thereto will be. If we understand these fundamental principles, we can see clearly the working of the same in specific instances. If we understand causes, we will not have to guess at effects. If I have made myself clear, this broad and general conclusion is inevitable—that if future trading is abolished, the cotton trade would be demoralized, acute financial conditions would be rendered more acute, the producer would be obliged to take less for his cotton and pay more for the cotton goods he wears. If I have made myself clear, it will require but little stimulation of the logical faculty to perceive that certain specific and intimate misfortunes would follow the destruction of the future-contract market of New Orleans.

PRICES CONTROLLED BY SPINNERS.

First. It would remove the last defense that stands between the spinner's will and the producer's weakness. It is to the spinner's interest to buy his supplies as cheaply as he can and sell his manufactured product for as much as possible. Already the spinner is entrenched behind a more compact and vastly richer organization than is the farmer. Already the spinner has the support of all the great exchanges except the exchange of the South. All the great exchanges except ours are associated and affiliated with the spinning interests and always want to believe and almost always do believe that prices will be lower, and to that end direct their efforts. If therefore we destroy the only future market that looks and works for higher prices, we deliberately surrender the control of the price of cotton to those who it is our interest, our duty, and our salvation to resist.

TRUST CONTROL.

Second. It would make possible and probable the trust control of the cotton crop. An open market, into which the public may come and buy in competition with the special interests, renders trust control impossible. There is no future market for steel, and there is a steel trust; there is no future market for sugar, and there is a sugar trust; there is no future market for meat, and there is a meat trust. There is a future market for corn and wheat, but there is no corn or wheat trust; there is a future market for cotton, but there is no cotton trust. There is no trust control of any commodity that in open market may be bought and sold on contract for future delivery. The reason is plain. The great public is not equipped to buy and store the commodity itself, but it can buy the contract for the commodity, which contract may, if necessary, be enforced. When it appears to the public that the price of the commodity has been pressed too low it comes into the market and buys the contract for delivery. This competition forces the special interests which must have the actual commodity also to buy either the commodity or the contract therefor. The market is thus sustained and advanced and the producer is supplied with a market in which he may sell his present holdings or contract to sell his future crop. If it was

not for the facility of the future market this competition would not be possible; and if it was not for this competition, the special interests could fix prices to suit themselves.

IMPORTANCE.

It is a momentous issue here discussed. It is not a matter for casual legislation. We are tampering with a great trade system and with the welfare of millions of people. At all times we should be careful in dealing with questions of this great consequence. At this time, when conditions are unsettled, when restlessness prevails, when men are rash and impatient under the sting of hard times, and when the near future holds for us great good or harm, as we may elect, it is imperative that we keep our judgment cool and our activities well in hand. We can not afford to take the chance of breaking our hopes by a heedless conflict with the immutable law of sequence, which no king or congress can alter or repeal. We must not be led hither and thither by the cries of individual discontent; we must not permit even the generous impulse of reform to run amuck.

National Defense—Forewarned is Forearmed.

To be prepared for war is to prevent war. America can restore that balance of power in the Pacific without which wars of stupendous magnitude will be inevitable.

SPEECH

OF

HON. RICHMOND P. HOBSON,

OF ALABAMA,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 30, 1908.

Mr. HOBSON said:

Mr. SPEAKER: Under the leave to print granted by the House I desire to have printed in the RECORD the following articles bearing on national defense, which have appeared in the Sunday editions of papers in the Hearst syndicate:

IF WAR SHOULD COME—THE QUESTION OF PREPAREDNESS.

[By Capt. RICHMOND PEARSON HOBSON.]

EDITOR'S NOTE.—In spite of the assurances of Japanese diplomats, war with that nation is by no means improbable. By many clear-sighted statesmen it is even regarded as inevitable.

How are the American people prepared to cope with so stupendous a possibility? Are we adequately equipped and fortified against so formidable an enemy?

Would it be an impossibility, under present conditions, for the Japanese to occupy our Pacific seaboard, lay San Francisco, Seattle, and Los Angeles under tribute, and fortify the coast States so thoroughly and scientifically that their reconquest would cost billions of dollars and perhaps a million lives?

Does not the mere suggestion of so desperate a contingency point urgently to the necessity of swift national action for the adoption of the most complete preparatory plans?

These are questions which concern every American citizen from Maine to California. In order that the readers of the Cosmopolitan may understand the facts about the peril which threatens the country and the measures which must be instantly taken to meet it, we have obtained a highly interesting series of articles by Capt. RICHMOND PEARSON HOBSON, in which the situation is reviewed from the standpoint of an expert. The first of these articles is presented herewith. It will be followed by two others in the next succeeding issues. We venture to say that the facts presented by Captain Hobson will make very clear the duty of Congress to take such vigorous and immediate action as will be likely to avert the danger which is so lucidly and convincingly pointed out.

The sailing of the American fleet from Hampton Roads through the capes of the Chesapeake into the open sea on its voyage to the Pacific was the greatest naval spectacle ever witnessed in the Western World. The tens of thousands of spectators who had come from far and near to witness this event were electrified when the sailors mounted the bulwarks, superstructures, turrets, rigging, and masts, and gave rousing cheers as the President reviewed the departing ships. The multitude in turn spontaneously cheered as the great ships weighed anchor, and one by one stood away in solemn grandeur, in a column extending over 4 miles. The multitude present was but the eye and the voice of the 80,000,000 Americans who gazed upon this event from afar, some with a feeling of misgiving, but all with that confidence and assurance which possesses the American people, undismayed by nature and never yet defeated by man.

This event stirred the people of America, however, not merely with feelings of pride, and of expectancy awakened by the mere fact of undefined danger; beneath the great shouts of applause, pitched in the major of exultation, there was in the depths a

minor chord, expressed in the tears of parents, children, wives, sweethearts, whose dear ones were leaving for the unknown.

The eyes of the whole world also were fixed upon this fleet, and properly so. For the first time in history the yellow men of the Orient and the white men of the Occident gazed together with concentrated interest upon each other and upon a movement of vital moment, not only to their two continents, but to all men and nations—indeed, to civilization itself. And yet few people in any country seem to have comprehended the full significance of what was occurring.

For the first time since the birth of our Republic the monarchies of Europe were looking upon an undefended American coast line. How the members of the Holy Alliance, against whose conspiracy the Monroe doctrine was declared, would have gloated over that sight! What was whispered in Europe's secret councils by the direct successors of those conspirators against the rights of the people as the American fleet passed from the Atlantic to the Pacific, transferring to our Western waters practically the entire naval power of the one nation that has stood for and compelled the progress that has been achieved during the past century, not only in America, but also in Europe? The answer concerns our people more than the price of stocks, the cause of the panic, or the solution of any of the grave internal questions which now perplex the nation.

Leaving the European chancelleries to discuss these events, the American fleet has retraced the course taken by the *Oregon* in 1898, when that gallant ship made the record voyage for a single ship in time of war. Heretofore America has faced eastward, whence our foreign wars have come. Now, and suddenly, we have been compelled by the action of an Asiatic power to leave our European seacoast unprotected and to place practically the entire naval power of the nation between us and Asia. And yet the dangers in the Atlantic have not disappeared; they have not even decreased. Indeed, the "mistress of the sea" is at this moment, and for the first time in history, in league with the Asiatic power that has compelled this change in the policy of our nation. Though England is our mother country, two of our foreign wars have been fought with her. We have no contract with England binding her to respect our territories and rights. Japan has such a contract with England, and contemporaneously with the sailing of our fleet England gathered together, for foreign service, a fleet almost twice as large as ours.

No sudden or even immediate change had taken place in Europe or in our relation with European powers. The change that had taken place was in Asia, or, preferably, in our relation with one of the Asiatic powers, the one that is making itself the master of the Orient. The dangers in the Atlantic are not decreased, but the dangers in the Pacific have increased, and our President was compelled by the logic of events to take this action. It was not a matter of private opinion or personal preference. Conditions, not theories, confronted the nation, and duty laid its compelling hand upon our Chief Executive.

During the past two decades Japan has seized upon and utilized to the utmost the inventions and discoveries made by the white race. And in consequence Japan holds to-day the mighty forces of nature and of organization more completely at her command than any nation of the white race. In naval and military affairs each Western nation has built up a practice of its own, with both good and bad characteristics. Japan, on the other hand, has appropriated the good characteristics of all; and just at the time when Japan is emerging from feudalism she has made her entry into the council chamber of the nations through the gate of war forced open by the mighty power of her military organization.

The feudalism from which Japan is now emerging was rampant in Europe centuries ago. It was never a part of the life of America. This fact makes it difficult for Americans to grasp, without careful consideration, the significance of what is now transpiring. The white nations, on the whole, are three or four hundred years beyond feudalism, and under the leadership of America are swiftly traveling the road toward international confederation and organization that will tend to make war obsolete. But these nations are not yet federated. War is not yet obsolete even among the white nations in their relations with each other, and it behooves them to understand the meaning of Japan's rise in power through victorious handling of the weapons of war. The presence of superior power is absolutely necessary to check the natural course of that nation toward war with foreign powers, now that war within her own body has ceased as a result of the union of the feudal lords behind the Mikado.

No internal question at this moment is comparable in importance to the present and prospective strength of Japan com-

pared with that of our country. The supreme duty of America at this moment is to gauge accurately the possibilities of Japan's military power and to make that power ineffectual by the provision of an unquestionably superior force. No other thing that our Government can do would have so powerful an influence for the establishment of justice and the maintenance of peace in international relationships.

The departure of the fleet was like a flash of lightning. Things heretofore hidden by the darkness were brought momentarily into plain view. On one side of the Pacific was disclosed a great nation, heretofore considered inferior, that had demonstrated superior power on the field of battle, and emerged victor over the most populous nation of Europe. Justly proud of its achievements, and wounded by the condescensions of the Western World; different in color, in traditions, in political institutions, from our country; capable of being either friend or enemy to America as its supposed interest at any moment may dictate; almost as different from us in character and in preparedness and inclination for conflict as in color or in position on the world's map, this people, molded into one body with a common purpose in the heat of the war with Russia, caused and witnessed the most humiliating military and political spectacle ever seen in the Western World, namely, a revelation in the face of a grave danger that the United States is unable to execute a just foreign policy, is unable even to perform the duty imposed by the Constitution of preserving the members of the Union in the full and free exercise of the rights reserved by the several States. The people's representatives neither foresaw the danger nor provided against it. Congress, the press, the two great political parties of the country, did not see, even in this flash of light, that our nation is defenseless, and that the most tempting morsel that ever became a menace to national character or international peace is displayed unprotected before the rising power of the Orient.

The strength of a nation is in the number of its able-bodied men, their availability for action, the average fighting value of the men, and the preparation and efficiency of their organization.

For her soldiers and sailors Japan draws upon a population at home of nearly 50,000,000, a population greater than that of England, Austria-Hungary, or France, and only second to that of Germany in Europe and the United States in America.

By an extensive system of propaganda Japan is preparing to draw upon the 450,000,000 people in China, making, with Japan, for prospective use a total of 500,000,000, more than the combined population of all Europe and both the Americas.

The Japanese population is more available for war at the present moment than the population of any white nation. The people are not only more disposed for war on account of the stage of their civilization and their recent victories, but are more willing than the people of the West to bear the greater burdens of taxation without murmuring against the Government. Furthermore, the women are more ready to do the work while the men are on the battlefield. In the next place, the military forces can be maintained and a campaign properly executed at a cost far below what the same movements would impose upon the white nations.

Since the Russo-Japanese war the world has been compelled to put the fighting value of the average Japanese above that of the average white man. The Japanese has shown himself equally courageous in action and equally skillful in the use of modern weapons, while superior in endurance and more amenable to discipline.

The degree of preparation for war in America is low; it is high in the chief military nations of Europe, but it is higher still in Japan. There they begin with the school children and continue the work throughout life. In the Russo-Japanese war the extraordinary degree of preparation and the efficiency in action of the Japanese organization were the marvel of the world. The character of the yellow man, his patience, his attention to details, his endurance, make him an ideal unit for the organization of a perfect human mechanism of no matter what dimensions. The only safe assumption for a white man to make is that the yellow man, on the average, will be found his superior as a soldier and his equal as a sailor.

I do not hesitate in making this statement. With a knowledge of the Chinese derived from actual experience in China, I am prepared to say that the average Chinaman, properly trained, will make a better soldier than the average Japanese, being equally intelligent, more reliable, of greater strength and endurance, and without fear of death. In estimating the present, as well as the prospective preparation of Japan, it is necessary to take this fact into account, for Japan at this moment is carrying on a systematic instruction of the Chinese in the

arts of war, and when war comes Japan will find a way of drawing upon China for assistance.

The Japanese are masters in the inspection and spying out of the naval and military preparations of other nations. They are past masters in secreting their own preparations and intentions. They have had opportunity, and have made use of it, for learning everything that is going on in America. They have allowed no access to anything going on in Japan. The half has not been told of the preparations for war made by Japan during the past two years and a half, and yet that which is known of their preparations should rouse this nation to a sense of the danger and to a performance of its duty to the States composing the Union and to the great principles of liberty of which our nation is the world's leading exponent.

After the war with Russia, when the one fleet to be feared by Japan had been destroyed, when the vessels captured in the war constituted a substantial increase in the Japanese navy, when the heavy burdens laid upon the people by the war called for economies, especially in view of the fact that by the treaty of Portsmouth the expected war indemnity was denied to the victor, it would have been natural for Japan to rest for a while and recover herself before inaugurating an expensive programme for an increased navy. Instead of doing this, Japan has ordered more than \$100,000,000 worth of new ships of the *Dreadnought* class and large armored cruisers, eleven in number, together with auxiliaries and torpedo boats. Rush orders for these ships were given to English and Japanese shipyards.

Japan was already allied with Great Britain. There was certainly no need of additional ships to cope with Germany, France, or Italy. Why was this done? The only plausible inference is that the purpose was to secure an advantage over America while she was still sleeping. It was a master stroke, proved by the fact that Congress simply discussed the question for two whole years before ordering a single large ship of the new type, and the peace societies of America even increased their agitation in favor of disarmament.

Our people are liable to indulge in a feeling of unwarranted security now that our fleet has arrived safely in the Pacific and has been joined by the two battle ships and the two squadrons of armored cruisers already in those waters, numbering altogether eighteen battle ships and eight armored cruisers, making twenty-six armored vessels. The Japanese now have in Pacific waters eleven battle ships and eleven armored cruisers, making twenty-two armored vessels. It should be noted that the Japanese armored cruisers *Tsu Kuba*, *Okoma*, *Ibuki*, and *Satsuma* carry 12-inch guns, larger than any guns carried by our armored cruisers. These Japanese armored cruisers will certainly be found on the battle line with the regular battle ships. The modern superiority of our fleet will soon disappear. Our own ships will gradually deteriorate because of the lack of docking and repairing facilities, and the Japanese will be constantly adding to their fleet the great new ships as they are completed. The only two of this type that we have in course of construction will probably go into commission in the summer of 1910 and will be on the Atlantic seaboard. The Japanese by that time will certainly have in commission eight, and possibly eleven, more vessels, all of the new type. Conservative estimates have placed one vessel of the new type as equivalent to at least three vessels of the type that compose our fleet.

Assuming that our two new vessels can reach the Pacific in time, Japan will have a superiority of nine new vessels. The total strength of the two fleets, estimated in the average units of the present vessels, will be, United States thirty-two and Japan fifty-five. To bring us up to an equality with Japan, we must order at once and complete in record-breaking time eight battle ships of the *Delaware* class of 20,000 tons. If we order two of this class to complete a squadron of four, with the two already building, and at the same time four of an improved class of 25,000 tons, we can realize the same result at considerable less cost and in the same time. This programme must be regarded as the very minimum demanded by scientific treatment of the subject, for even then all these vessels would have to leave the Atlantic to make our strength equal to Japanese strength in the Pacific. The fact is, Japanese efficiency must be reckoned as gradually becoming greater than ours on account of their superior docking and repairing facilities and because of their presence in home waters. It is not scientific to have simply an equal fleet in the Pacific. We should have an unquestionably superior force, so as to prevent war if possible and to win if conflict is inevitable.

This still leaves the Atlantic ocean absolutely stripped of American war vessels, a condition which Congress can never justify before the American people.

One would have expected that the armies of Japan would decrease after the peace of Portsmouth. On the contrary, five

divisions have since been added to the Japanese army, and today Japan is prepared to put into the field half again as many men as in the war with Russia. This would mean 1,500,000 trained men.

The preparation of war material would naturally have fallen to a normal condition upon the conclusion of peace with Russia. Instead greater activity has resulted. Old works have not only continued in full force and overtime, but new works of great size have been established, and they are kept working day and night. The Japanese have built new steel works and armor-plate factories, new ordnance works for heavy guns, new torpedo factories, new powder factories, new factories for high explosives, also factories for small arms and projectiles; new shipyards have been established, new dry docks built, as well as new building slips, new machine shops, new building and repair works, and new boiler and engine shops; and, besides all this, heavy orders for war material have been placed abroad.

In contrast with this great army of 1,500,000 trained men, containing 1,000,000 seasoned veterans, and with this feverish activity, America has drifted drowsily along and now has but 69,000 men in the Regular Army and only 140,000 raw militiamen, most of the Regulars being now in service in Cuba and the Philippine Islands. There are now available inside of our own country only 9,000 infantry of the Regular Army, less than the police force of New York.

I estimate that Japan could place 500,000 trained men on the Pacific slope within four months, and 1,000,000 men within ten months, against whom we could not marshal over 200,000 men that have ever had any substantial military service. Where great numbers are involved, untrained men can not be effective against veterans. Our Army, therefore, is hopelessly inadequate to cope with Japan even on the Pacific slope, to say nothing of the Hawaiian Islands and the Philippines. So that for security we must depend absolutely upon superiority on the sea.

In addition to the preparation described above, in modern warfare a nation must not neglect to provide money or to secure active assistance, or neutrality where assistance is impossible, on the part of the most important nations likely to be affected by the war. In preparation of this kind Japan has been wonderfully active and successful. She has negotiated great loans at home and abroad, and now has on hand over 600,000,000 yen in specie, mostly in European depositories, and immediately available for military purposes, sufficient to keep 1,000,000 Japanese soldiers in the field for a year.

Although the exact text of the treaties between Japan and France and Japan and Russia is not fully known, there are evidences that by these treaties Japan has secured the neutrality of these two powers through conceding to them, with England's approval, special privileges in certain sections of the opening markets of China.

It is certain, however, that the accumulated wealth of France is pouring into Japanese coffers. But important as these things are, the supreme achievement of diplomacy was an offensive and defensive alliance with Great Britain, which for a century has held undisputed control of the sea. Being an island kingdom, Japan is vitally affected by the attitude of the "mistress of the sea" until such time as she is in control of the situation. This treaty continues until 1915 and renews itself automatically for ten-year periods successively, unless denounced by one of the parties. We must therefore squarely face the natural conclusion that Great Britain will cooperate with Japan, and consequently we must prepare to be masters of our waters in the Atlantic at the same time that we hold the supremacy in the Pacific.

IF WAR SHOULD COME!—THE CONFLICT.

[By Capt. RICHMOND PEARSON HOBSON.]

[EDITOR'S NOTE.—In the last issue of the *Cosmopolitan*, Captain Hobson showed very clearly how thoroughly Japan is prepared for war at the present moment in comparison with the state of affairs in this country.

In the following brilliant article he describes Japan's attack and America's defense, if war should come.

This is no work purely of the imagination. Captain Hobson is one of the greatest living experts in the science of war, and every move described in these pages is the result of careful study. He considers it the most important piece of writing he has ever done.]

In America, every function of government should have the earnest thought of the people. In no function of government is the need of an enlightened and interested public opinion greater than in that of providing for national defense. So vague is our present condition of knowledge upon this important subject that a popular discussion from the platform or in the press brings forth criticism and condemnation, as though such a discussion

tended to bring on war. In truth, the only true way to prevent war is for our people to understand the elements of national defense and the real factors that determine war and peace.

Nothing can have a more beneficial effect at this juncture than a general discussion of the contingencies of war. If there were not a single cloud above the horizon this would still hold true. As it is, the sky is overcast. It is past the eleventh hour. Any other people on earth or in the world's history would, long ere this, have thoroughly investigated the contingency of war with the great powers over the ocean from us and would have adopted precautionary measures to prevent the culmination of war if possible and to insure victory if war must come. As it is, our people, absorbed in developing our resources, have given no heed to the steady approach of the world's great armies. The annihilation of space and the conquest of the ocean have brought the great armies of Europe to our eastern doors; new armies, more portentous than those of Europe, have arisen in Asia and are likewise at our western doors, and to-day America is not only unable to prevent war but is powerless to avert disaster if war comes.

It has been shown how completely Japan is prepared for war. A recent interpellation in the Japanese Parliament as to the nation against which the warlike preparations were being made brought forth the answer from the minister of war that the preparations were "against eventualities in the Pacific," an official confirmation of the universally recognized fact that great war preparations have been going on for a long time. It has been evident for some time that Japan intends to move upon China, but her stupendous efforts in augmenting her navy leave no doubt that America is the objective. The swarming of spies over our country and our possessions, the peremptory attitude of Japan after the trivial incidents in San Francisco, her attitude on the immigration question, all confirm this conclusion. To study the contingency of war with Japan is, therefore, now an urgent public duty. In discussing this contingency, it may be remembered that there is no danger of divulging any secrets, naval or military. Japan and every other nation already know all our secrets, all our elements of weakness and of strength.

No one can forecast the exact date for the beginning of any war, even when war is recognized as inevitable. The only means of approximating it is to determine the time when the aggressive power will have relatively the greatest strength. By this test war is liable to come before our fleet reaches the Far East. If it does not come before that time, it is likely to be postponed until the fleet, or part of it, returns to the Atlantic, or until it deteriorates because of the lack of docking and repairing facilities and the Japanese fleet is reinforced by additional vessels.

Permanent control of the sea in the Pacific will determine the issue of the war. Therefore the destruction of the battle-ship fleet of the enemy will be the supreme objective of both powers. Japanese diplomacy has been invoked to secure the division of the American fleet by bringing danger from Europe through the Anglo-Japanese alliance. The second clause of the treaty of alliance reads as follows:

If, by reason of an unprovoked attack or aggressive action, wherever arising, on the part of any other power or powers, either contractor be involved in war in defense of its territorial rights or special interests mentioned in the preamble, the other contractor shall at once come to the assistance of its ally, and both parties will conduct war in common and make peace in mutual agreement with any power or powers involved in such war.

It is to be noted that an "aggressive action" may occur anywhere. The special interests mentioned in the preamble are those "in the regions of eastern Asia and India." It is impossible for any war against Japan not to endanger that country's interests in the "regions of eastern Asia," and any war would be proclaimed "unprovoked" and "aggressive" on the part of the other party. Therefore the only interpretation permissible is that Great Britain would join with Japan in a war with America.

When America assembled sixteen battle ships in the Atlantic, Great Britain assembled twenty-six battle ships. This was designed to cause a protest from the Atlantic coast States against the stripping of the Atlantic and to result in only a part of the fleet being sent to the Pacific. Our Government wisely proceeded to send the whole commissioned fleet. As new vessels are commissioned in the Atlantic they should be sent straightway to the Pacific, and the whole fleet should be kept together, constantly ready. As soon as practicable this whole fleet should be sent to the Philippines. If it is permitted to reach those waters before a rupture occurs, the Japanese-English purpose will be to bring about its departure for the Atlantic in whole or in part. We should, on the contrary, keep the whole united fleet permanently in Far Eastern waters and build additional fleets for the Atlantic. It is only by having the fleet in the Far

East that we can be sure of forcing a general engagement in case of war. This very fact gives us our only chance of peace and our only hope of victory if war is inevitable.

Should the fleet remain in the Far East, Japan will doubtless wait until it deteriorates because of the lack of docking and repairing facilities, and until she adds the *Ibuki*, the *Kurama*, the *Oki*, and the *Satsuma* to her fleet. Without the last two vessels the Japanese would have twenty-four armored vessels to our twenty-six. While they would have the advantage of being in home waters and of having adequate docking facilities, our fleet would still have a good fighting chance. But when the *Oki* and the *Satsuma* are added, each carrying four 12-inch guns and twelve 10-inch guns, thirty great guns in all—as many as any eight of our vessels, giving the Japanese the equivalent of thirty-two vessels to our twenty-six—the chances will be heavily against us. In spite of all that we can do this Japanese preponderance will exist before the summer is here. For the last three years we have neglected to build big vessels of the new type; and if war comes upon us in these most unfavorable circumstances, our best possible condition will see our fleet of obsolete vessels move out to engage a superior Japanese fleet, headed by two *Dreadnoughts* with their terrible concentration of power. Our only reliance, a reliance that should never be required, would be upon superior skill and greater efficiency.

It is altogether likely that Japan will add two more, and possibly four more, *Dreadnoughts* to her fleet before we can hope to add the *Delaware* and the *North Dakota*. We must therefore proceed with all dispatch not only to build new fleets of *Dreadnoughts* for the Atlantic, but new ones for the Pacific, and these latter must come as fast as the Japanese reinforcements. If the fleet reaches the Far East and remains there, we must be prepared for some time to come to see a general engagement with the odds against us. Should we win the victory, the war would be over. Should the Japanese win, the war would be just begun, for they would have control of the Pacific, and the invasion of the Philippines and of our Pacific coast would begin. There is little doubt that the British would join the Japanese the moment the Japanese gained such control of the Pacific that their armies would be available to cooperate with the British armies in an invasion from Canada. It is probably one of the objects of the peculiar wording of the Anglo-Japanese treaty to give the British a line of retreat or advance, according as defeat or victory perches on the Japanese banner.

Let us now take the case of our fleet being on the Pacific coast when war comes. As before, the permanent control of the sea is supreme and the destruction of the battle-ship fleet of the enemy the objective. In this case the long distance across the ocean becomes a leverage against us. Hawaii is the point without which neither power could take the aggressive, even after a victory that gave control of the sea. If Japan had control of the sea and also held Hawaii, the Pacific slope would at once be open to invasion. If America held Hawaii in force, the Japanese would have to overpower our force there, at great sacrifice, before invasion would be possible. Since Japan is compact, with strongly fortified harbors and a great army, America is forced to adopt the defensive. Even if we held Hawaii and gained control of the sea, we could never do more than destroy Japanese over-sea commerce, which is never a deciding factor in a great war. From the outset, therefore, we must realize that we have nothing to gain and everything to lose by war. Japan has little to lose and from her standpoint everything to gain.

Considering the fact that there are over 100,000 Japanese and only 7,000 Americans in the Hawaiian Islands, we must assume that Japan controls the pivot; and if she should get control of the sea, invasion of the Pacific slope would follow. We should at once place in Hawaii a garrison sufficient to keep the Japanese inhabitants under control and to repel a landing in force, even under the protection of Japanese ships, and we must take no chances of losing the control of the sea.

After hostilities began our fleet should remain on the defensive off our coast and put the enemy at the disadvantage of crossing the ocean before he could get an engagement. On no consideration should we venture farther than Hawaii, and this far only if we were in control and Pearl Harbor entrance can be dredged. This harbor is the most wonderful and most vital sheet of water in the world. Whether in the hands of the white men or the yellow men, it is destined to become the greatest naval station the world has ever seen. If held by the yellow men, America will be helpless against Asiatic invasion. It is our supreme duty to hasten to garrison and fortify the island of Oahu and speedily establish a naval station at Pearl Harbor.

Judging from the circumstances attending the beginning of the Russo-Japanese war, America would know nothing of the

first moves of Japan if war should come. Our first indication would be the simultaneous cutting off of cable communication with the Hawaiian Islands and the Philippines without warning or explanation. The cutting of the cables would be followed within a few hours by the landing of Japanese expeditions. Two of our fastest armored cruisers would probably be dispatched at once to make a reconnaissance of Hawaii. A week would probably elapse before any definite news would come from Manila by way of Hongkong or Saigon or Singapore. This news would probably recite that a Japanese expedition, under heavy escort, had landed probably 100,000 men in the Lingayen Gulf or on eastern Luzon, and that this army was advancing on Subic Bay and Manila. Reports would follow that the Filipinos were flocking to the Japanese colors. From the day America retained the Philippine Islands the Japanese have been in communication with the natives, planning our expulsion. The landing of the Japanese army would be the signal for an uprising.

The first report about Honolulu would probably be brought by the armored cruisers about ten days after they started from the coast, and their report would probably announce that a Japanese expedition had landed probably 15,000 men, with large quantities of arms, ammunition, and supplies; that the Japanese on the island had risen; that the small garrison and the American residents who joined it had been overpowered; that a Japanese army of probably 50,000 men was in camp out of range from the water; that active preparations were in progress to resist any landing that might be attempted, and that the vessels in the expedition had retired.

The seizure of the Philippines and the Hawaiian Islands would be the first move of Japan. Preparations have been completed for this move. The bases for the Philippine invasion will be Kilung, Formosa, and a harbor in the Pescadores Islands, which are being prepared for this purpose. These bases are so near to Luzon that 150,000 men could be thrown into this island long before our fleet could cross the Pacific, and once in the islands, with large quantities of munitions, the army could live on the country.

The first advance of this army would be upon Subic Bay, which would be quickly taken from the rear, and would thereafter be the naval base for the Japanese fleet. I do not believe, however, that the Japanese fleet would remain there. The one supreme objective being control of the Pacific, the Japanese plan would be to lure our fleet to the relief of Manila. The advance of the Japanese army and the siege of Manila would be conducted toward this end, and the dispatches allowed to go out would be planned to stir the American people to the attempt. Should we make the blunder of attempting the relief of Manila, the disintegration and ultimate annihilation of our fleet would be practically assured. It really could not relieve Manila, because we have no transports to convey the necessary troops, and we have no troops if we had the transports. The fleet would find itself in hostile waters over 6,000 miles from a base and unable to force a general engagement. The main Japanese battle-ship fleet would retire to the security of fortified home bases. Our fleet would be compelled to seek one of the inadequate, undeveloped harbors of the Philippines, without any facilities for docking or repairing. The enemy's cruisers would scour the ocean and cut off or cripple the collier coal service. The coal carried by the colliers with the fleet would be quickly exhausted. The fleet would doubtless be subjected to repeated attacks from torpedo boats and to harassment from the enemy's cruisers. Every time a vessel was injured repairs would be impossible. The machinery would rapidly deteriorate for lack of overhauling and the bottoms would foul without a chance for cleaning. The health and esprit of the men would sink steadily to a low level. Disintegration and ultimate defeat would be inevitable.

In case the fleet undertook to find the Japanese fleet and to force an engagement, it would be compelled to force an entrance into one of the fortified harbors of Japan to reach their fleet, incurring dangers and disadvantages that could not end but in disaster. Without troops it would be almost impossible to seize and hold an adequate Japanese harbor for a base from which to conduct a blockade. Thus it may be taken for granted that any attempt to relieve the Philippine Islands after they had been occupied would certainly end in disaster that would give to Japan permanent control of the sea.

The moment this control was secured the invasion of America would begin. The first step would be the gathering of a great army in Hawaii. Two hundred thousand men could be landed there in two weeks, 200,000 more in four weeks, and 200,000 additional men every month for six months. From Hawaii it is but a step to the Pacific coast—about 2,100 miles to San Francisco, about 2,200 miles to Los Angeles, and a few more to

Port Townsend. The choice of these points of invasion would depend on whether the British were in cooperation or not. Judging from the words of the Canadian premier, Sir Wilfrid Laurier, in a speech in the Dominion Parliament on the Japanese immigration question, on February 28, we can not assume that the Japanese would be alone. On the contrary, Sir Wilfrid pictured a Japanese fleet weighing anchor at Vancouver to proceed against a common enemy in the North Pacific. With British cooperation the invasion would take place simultaneously from British Columbia and at points on the coast of California.

Assuming British cooperation, there would be ample transport service, and in a few weeks 250,000 Japanese, with substantial reinforcements of Canadian and British soldiers, would proceed to occupy the cities and country around Puget Sound and then go southward through Portland, Ore., occupying as they went all the territory from the coast to the Cascade Mountains. Branch expeditions would be dispatched to hold the railroads and other passes through the mountains. Simultaneously two expeditions would land, one below Los Angeles, whence the city and the Southern Pacific, the Santa Fe, and the Salt Lake railroads would be seized, the other landing below San Francisco, whence this city and the Union Pacific Railroad would be seized. As reinforcements arrived these expeditions would move northward, occupying the territory from the coast to the Sierra Nevada Mountains, and seizing the mountain passes. The forts defending San Francisco would be taken from the rear, and this city, with its harbor, would become the base for the united armies of invasion after they made a juncture. In the seizure of the coast cities and the mountain passes the Japanese already on the coast would be invaluable, particularly the compact, disciplined Japanese clubs. As the country was occupied it would be thrown open to Chinese and Hindoos, as well as Japanese, and with the ocean open the white population of the slope would soon be overcome.

Simultaneously with the invasion of the slope Alaska would be occupied by Canadians, and there would be an invasion by the British from the Canadian frontier. Porto Rico, Cuba, and Panama would be seized, an unopposed fleet would destroy all the shipyards, and assaults would be made on our cities on the Great Lakes and on the Gulf and Atlantic seaboard. Our vulnerability on these waters is appalling. On the Atlantic coast alone our population aggregates over 15,000,000, with over \$17,000,000,000 worth of property within gunshot of the water. Coast defenses have always proved inadequate. The efficient protection of all these cities depends on the control of the sea. With the enemy in undisputed control of the sea the damage that could be inflicted and the tribute that could be exacted would stagger the world.

On the Great Lakes there are over 7,000,000 people and over \$7,000,000,000 worth of property within gunshot of the water, all without defenses of any kind, while over 200 British light-draft vessels can pass quickly through the Canadian canals to the Lakes.

I do not believe that Great Britain would undertake to join Japan unless Japan soon gained permanent control of the Pacific, so that troops from Japan and India, coming in through Vancouver and on the trans-Canadian railways, could join Canadian and British troops in the invasion from the north. However this may be, Great Britain is held in the offensive-defensive alliance, and it is our duty to investigate the contingency of war with those two powers. This investigation shows that for a long time nothing but the direst adversity could be expected. Upon the outbreak of war the Regular Army would be mobilized and the militia would be called out. Our people would awaken in consternation to find that there were only about 9,000 infantry of the Regular Army in the whole country, and that these few were scattered far and wide. The consternation would be intensified when it was found that only about 60,000 militia were fit for duty, and that these likewise were scattered over the whole country.

The President would probably issue a call for 250,000 volunteers, and the nation would be shocked to find that there was no system prepared for their organization and equipment; that not even uniforms could be supplied to half that number; that facilities were lacking even for their mustering in.

In olden days, when the numbers involved were comparatively small and the time available after the declaration of war was great, preparation in advance was not vital, though it has always been of great importance. Not so to-day. It is too late to prepare after war has come. Formerly vessels could be built in ninety days, and it took an enemy's fleet that long to get over the ocean and inaugurate a campaign. To-day it takes three years to build a battle ship, and an enemy's fleet could

be at our doors in less than two weeks and destroy our shipyards, so that no vessels could be built at all. Likewise with armies. When the numbers are so great it is impossible to perfect the organization overnight. In the Spanish war we called out but a quarter of a million volunteers altogether, but the woes of imperfect organization were so great that they died off like flies in camps at home here in our midst. A great industry or a great business can not be created overnight. Much less can an army.

With the Japanese in control of the sea in the Pacific, it would be impossible to prevent the invasions mentioned above. We could not possibly oppose the three invasions of 200,000 trained soldiers each, the veterans of Port Arthur and Manchuria, with 25,000 trained soldiers in each case. It would simply be slaughter and butchery to attempt resistance. It would take America at least a year to assemble and train an army competent to undertake the expulsion of the invaders. Ere this the host of Japanese, reenforced doubtless by Chinese and Hindus, would be in complete occupation, and with a million and a half veterans in control of the mountain passes they would be impregnable. The transportation and commissary problems, with the deserts and thinly settled stretches east of the coast ranges of mountains, would be stupendous, while the Japanese, besides having a rich country on which to live, would have the open-sea communications with the mother country.

We might as well realize now as later that the Asiatics, in control of the Pacific, could dislodge the Americans on the Pacific slope, and as long as they retained control of the sea we could never successfully contest their supremacy.

A general invasion from Canada by the combined British, Canadian, and Asiatic forces, with both oceans open and with east and west railroads and the waters of the Great Lakes for transportation, while the coasts were held by the unopposed fleets, would present us with a problem almost as hopeless. The invasion would probably reach from the frontier to New York and even to the Chesapeake, east of the Appalachians, and perhaps to the Ohio River, in the Middle West. Our people have been living under the impression of absolute security against invasion. This impression was well founded when the ocean was a great barrier and the only danger was from Europe. Events of recent years, however, have demonstrated the great capacity of Asiatics for war and have at the same time annihilated the time-and-space separation due to the ocean. With Europe and Asia cooperating and in control of the sea in both oceans the question of invasion takes on a new aspect. Japan is planning and preparing to gain control of the population and resources of China. The cooperation of Great Britain, the "mistress of the seas," would make practicable the invasion of America along its northern frontier. No nation could stand up under the weight of numbers the alliance could command.

It is time patriotic Americans were considering the possibility of a war for our very existence. They should realize that everything would hinge on the control of the sea in the Pacific. We must take no chances of having the permanent control of the sea in this ocean. If our fleet were on the Pacific coast at the outbreak of war it should remain on that coast, moving out no farther than Hawaii, and allow the Japanese to occupy the Philippine Islands for the time. Except for cruises by our armored cruisers, we should stand fast and proceed to build a new fleet as big again as our present fleet, and in the meantime should undertake no offensive move except to gain complete control of the Hawaiian Islands and establish a great naval base there. Of course Japan would proceed to build new ships also, but we could ask nothing better than a race in building ships. We should so move that the Japanese fleet could get a general action only by crossing the ocean.

Should war come when the fleet is in the Atlantic, its difficult transfer to the Pacific would begin immediately, but it should hug the coast on the eastern shores of the Pacific and force the Japanese fleet to cross the ocean to get a general engagement. Of course the Philippine Islands, Guam, Hawaii, the Aleutian Islands, Samoa, and Alaska would be seized, but the general invasion of the Pacific coast would not be undertaken while our fleet remained afloat. During the absence of the fleet, however, the coast would be subject to raiding expeditions. It is only too true that, almost without warning, such expeditions could seize Los Angeles, San Francisco, Seattle, Tacoma, and the other cities on Puget Sound, and possibly Portland. It is conservative to state that with our present lack of coast defense these raiding expeditions could be made successfully with our fleet in the Philippines, and some of them could be made successfully with our fleet on the coast. The Japanese have no doubt planned such

expeditions. Quickly executed, with 25,000 men in each expedition, there would be no hope of successful resistance at a single point.

Fabulous ransoms would be exacted, and, if refused, the cities would be looted and laid waste or left in ashes. If the ransoms were paid, all the works of defense would be destroyed, forts would be blown up, naval stations, arsenals, shipbuilding plants, wharves, dry docks, ferry boats, and railroad terminals would all be destroyed. All vessels and shipping would be captured and taken away. The size of the ransom and the extent of the damage that could be inflicted can be appreciated when we understand that in the State of Washington there are \$317,000,000 worth of property within gunshot of the water; in Oregon \$248,000,000; in California the huge sum of \$2,100,000,000, a total of \$2,665,000,000.

If war comes before we have taken more adequate steps for defense, we can only expect humiliation and defeat. The American nation, however, has never yet accepted defeat as final.

JAPAN IS TRYING TO FORCE WAR UPON AMERICA.

[By Capt. RICHMOND PEARSON HOBSON.]

It has been pointed out that Japan, having completed her naval, military, and diplomatic preparations for war with America, has recently been seizing upon incidents, no matter how trivial, to stir up the masses of Japan against America. These efforts have been eminently successful. By gross exaggerations and misrepresentations in the Japanese press the people's hatred and cupidity have been aroused, and this feature of preparation may be regarded as completed. The press campaign in Europe has been equally successful. By adroitly building molehills into mountains out of the local incidents in San Francisco, the press of Japan's ally has produced the impression that America has formed a fierce race hatred against Japan and is treating the subjects of that nation as inferiors; that she has been violating treaty rights, and that a war of recognition as a civilized nation would be justified on the part of Japan. The broad, plain fact that the American people could not possibly change overnight; that as a matter of fact their admiration for the Japanese has steadily grown; that they have a pride in Japan's success something akin to the pride of a sponsor; that they love the Japanese and invite and welcome them into the schools and everywhere else, everywhere, all over the country—these truths count for naught. The impression has been produced in Europe that there are causes that would warrant Japanese reprisals. It is not surprising, therefore, when we remember that Japan is ready and America is not, that the school incidents in San Francisco are seized by Japan to create a crisis and force the American Government into war.

When our Government learned about the inflammatory propaganda in Japan and the pro-Japanese propaganda of distortion in Europe, it took immediate occasion to correct the mistakes and sent a most courteous cablegram to the Japanese Government to the effect that the attitude of love that our people have always held toward the Japanese had in no wise changed; that we were upholding and would scrupulously uphold all our treaty obligations and would protect the rights of Japanese in America; that the friction in San Francisco was purely local, growing largely out of abnormal labor conditions, and that the best offices of the Government would be used to have even these local matters adjusted; but of course, as in all other international incidents arising within individual States, that the regular course required by our institutions would have to be followed, requiring local and State adjustment before action could be taken by the General Government. A more courteous, conciliatory assurance could not have been conceived.

Close upon the heels of this courteous cablegram, the Japanese ambassador in Washington went down to the State Department and left a note. I have been criticised for referring to this note as an ultimatum. It was just as much an ultimatum as Rome ever delivered to an enemy. When Rome was all ready for war she used to issue an ultimatum which she knew the enemy would not accept, and then would inaugurate the war because the enemy would not comply.

The ultimatum has been used by aggressive nations ever since, in the effort to justify themselves or gain moral advantage in the eyes of the world when they proceeded to break the world's peace.

The Japanese note says, in effect, that the matter of our "institutions" was no concern of theirs; that the question would not be discussed. We command you to put those pupils back in those schools. They evidently thought that our President would resent such a demand, involving, as its compliance would have involved, the disregard of institutions the product of a long evolution, the fundamental law of the land.

Supported, as our President would have been in such a position, by the American people, with the Japanese Government supported, as it would have been in its position, by the Japanese people, it was expected that a crisis would be produced from which Japan could bring on a rupture without incurring the condemnation of the public opinion of the world.

But our President was too wise to fall into the trap. He saw what it meant and realized how defenseless we were. Whatever may have been his resentment internally, it never showed externally. He wisely and shrewdly espoused the cause of the Japanese. He sent a member of his Cabinet scurrying across the continent "to investigate" the matter, a most extraordinary procedure in the slow methods of law and diplomacy, and directed an injunction to be secured against the school board of San Francisco, a most extraordinary procedure when the school board was only carrying out a law of California that had been in force for many years. He then wrote that extraordinary essay upon the glories of the Japanese and the infamies of the Californians and, taking advantage of his approaching message to Congress, included the essay in the message and sent it out thirty days in advance, so that the papers all over the world, in Europe and Japan, had the text and printed it when the message was released. The good people reading this text naturally began to question the motive behind Japan's peremptory attitude in face of such a conciliatory attitude by our Government. This checkmated the Japanese for the time. The President then directed the school question to be laid before the United States court in California. The facts were agreed upon and handed up to the court. The court considered them and prepared its decision. It was evident to those who followed the case that the decision would sustain the Californians. They were California's schools; California had the right to decide who could and who could not attend them. There was nothing in the treaty with Japan that granted the right of attendance, and there could be no such grant of right.

The case was an application of the old principle of the right of local self-government.

Just before the decision of the court was expected to be handed down the Japanese foreign minister appeared before the Japanese Parliament and served notice to the world that the decision of the court would determine the attitude of America and therefore the attitude of Japan. The President saw that this decision would be seized upon to have the world believe that the American nation had definitely decided to turn the Japanese pupils out of school. As a matter of fact, San Francisco proposed to supply these pupils with schools as good as the other schools and give them a free education, a privilege denied Japanese pupils in Australia, a privilege for which America received no equivalent in Japan. Furthermore, the schools of Los Angeles and all the other cities of California, the schools of Oregon and Washington and all the other States of the Union invite and welcome Japanese pupils right in the midst of the American pupils. Yet the Japanese Government chose to have a decision of a court as to the rights of American citizens determine the attitude of the nation, while these rights were exercised in only one city in the whole land, and the nation's attitude was really just the opposite. The cordiality and generosity of this attitude would in reality only have been proven the more conclusively by the decision. While the people everywhere had the right to deny to Japanese pupils free education, they exercised this right nowhere, and only in one city out of the whole land did they exercise the right far enough to require separate schools.

The President realized what the statement of the foreign minister meant. He had only recently directed the machinery of the court to be set in motion. He now quickly directed that the motion be stopped in its last stages. The decision was never handed down. It did not matter how important the decision would have been, we did not dare to let it be handed down. The great judicial function of the Government had to be suspended.

The President hurriedly telegraphed to the governor of California not to allow the Japanese question to be discussed in the legislature of California, and the governor prevailed upon the legislature to drop the question. We had come to such a pass that a legislature of a great American Commonwealth did not dare even to discuss a vital question of pressing importance. They had to surrender the right of freedom of speech and to stop the legislative functions of government.

The President then telegraphed to the mayor and school board of San Francisco to come across the continent to see him. They came, and a remarkable change came over them. On the way across the continent, when interviewed in passing through the cities along the route, they stated and repeated again and again that their minds were already made up, that there was

no use of taking the long trip, that they did it out of courtesy to the President, but that they were determined, in this vital question, to stand for their rights first, last, and all the time. When they left the conference at the White House they hastened back to San Francisco and "put those pupils back in those schools."

This was not done because the law required it, for the law was on the other side; it was not done because the principle involved was right, for the principle of intimately mingling two different races in large numbers is wrong; it was not done because the people of San Francisco wished it, for they emphatically did not wish it.

It was done to comply with the ultimatum of Japan, and it had to be done because we were utterly unprepared.

No free nation in the history of the world has ever suffered such deep, real humiliation as we have suffered at the hands of Japan. Every Department of our Government has been compelled to turn aside from its orderly procedure—executive, judicial, legislative—and finally an American city has been compelled to surrender the right of local self-government.

It is time for Americans to pause and take account of where we have drifted. The right of local self-government is the principle for which our forefathers died; it is the principle for which Anglo-Saxons have died for a thousand years; it is the very corner stone upon which the edifice of human liberty has been built. So absorbed are our people in their individual affairs, it is a question whether we are worthy to be intrusted with the holy cause of liberty. Our forefathers of the Revolution prized liberty above life, and in its cause, when less than 3,000,000 in population, they defied the "mistress of the seas." Their immediate sons, receiving the cause as a sacred trust, realized that America is the exponent and champion of human liberty in the world. When still less than 10,000,000 population they decreed that even the people in distant South America and the people of the whole Western Hemisphere shall have a chance for self-government. Here we are now, numbering 90,000,000 of population, stretching across the continent, with wealth unlimited, and yet not only are we unable to guarantee the chance for liberty to the people of South America, not only are we unable to guarantee the chance for liberty to the helpless peoples of our outlying possessions, but we are actually unable to guarantee the principles of liberty in the mainland of America itself. We have negligently drifted to the point where we must disturb the functions of our Government and must compel an American city to surrender the most sacred principle in all the institutions of liberty at the dictation of a power across the Pacific Ocean, a power of an alien race, an oriental absolutism just emerging from medievalism.

Furthermore we must keep on surrendering, no matter what demand is made upon us. It would be the part of folly to refuse and fall into the very traps laid for us and open the way for national disaster and worse humiliation in the end. The whole thing is palpably wrong. It is sinful and wicked. This nation, with so much depending upon her, must not continue like a weakling, unable to make good. How different it would all be if we had done our duty and promptly established our bases and adequately expanded our Navy. Japan would not now be strangling our commerce in Korea, Manchuria, and China and be plotting for the abolition of the open-door policy there; she would not be looking with covetous eyes upon our outlying possessions, she would not be seizing every little trivial incident that occurs in America to stir up animosity between the two peoples; she would not be seeking war; there would have been no Anglo-Japanese alliance, with its menace to our very life as a nation, and we would not be compelled to submit in abject humiliation to surrender what is more sacred than life itself, the trust committed to us by our forefathers. On the contrary, we would then be on a self-respecting solid basis for close friendship with Japan, and would be able to fulfill our duty to the cause of liberty and the cause of peace in the Pacific Ocean and in the world at large.

Japan was loath to drop the school incident even after the pupils had been put back in the schools.

Some time after this action a general meeting of the chambers of commerce of the principal cities of Japan was called, and the united chambers of commerce adopted resolutions condemning treatment of Japanese children in America that refused them educational advantages, and calling upon the chambers of commerce of America to use their good offices in securing justice to these children and avert the grave consequences that might otherwise arise.

These resolutions were simply ridiculous to Americans who knew that at the moment they were adopted not only all the other schools in America but also the schools of San Francisco themselves were open to Japanese pupils on absolutely the same

basis as American pupils. But its designed effect in Europe and in Japan was to nullify the effect produced by the previous announcement of the restoration of the pupils to the schools of San Francisco and to leave the permanent impression that injustice to Japanese children is the regular practice in America.

Similar action was taken to make permanent the impression in the world that America is unduly stringent in the question of Japanese immigration, and semiofficial announcements were made of changes Japan would demand when the renewal of the existing treaty with America came up.

The time for this renewal was years off, and America could not understand why the question was advanced by the Japanese Government when it posed before the world as being so solicitous of "preserving the friendly relations that have always existed between the two countries."

This semiofficial announcement was so couched as to be a defiance of the known determination of the people of the Pacific slope to have some substantial restriction placed upon Japanese immigration, which was fast becoming a menace to their industrial equilibrium, and the purpose was not only to produce the impression in Japan and in Europe that we were maltreating the Japanese and treating them with indignities incompatible with their self-respect as a civilized nation, but also to precipitate exclusion legislation in America that would play into Japan's hands as she sought her pretext of war.

This sensitiveness on the subject of exclusion in America seems ridiculous when we remember that the "indignities" of restriction are drastically enforced in Australia and other British colonies. But the world does not know this. It has never been proclaimed from the Japanese house top. So the semiofficial announcements had this desired effect upon the world and upon the people of Japan.

This fact, however, was soon subjected to the jolt that came with the outbreak in Vancouver. The British and Japanese press were quick to attribute this outbreak to the "influence and instigation of Americans," but it becomes generally known, in spite of the efforts at concealment, that thousands of the best citizens of the city and a number of British soldiers, who could not possibly have been "instigated," took part in the demonstration, and that the whole Japanese quarter was wrecked and a Japanese subject killed, compared to which all the incidents in San Francisco were as naught. In addition the whole structure of Japanese-English plans was rudely shaken when the mayor of the city proclaimed emphatically that the city would not pay a dollar for damages, and the members of the Dominion Parliament from British Columbia publicly announced that the people of his Province would forcibly resist any attempt on the part of the Crown to force Japanese immigration upon them.

Japan to-day stands out ridiculous in the eyes of the world as straining hard at the gnat in San Francisco and swallowing whole the camel at Vancouver. No wonder she has abandoned this path. No wonder we now hear of measures to restrict emigration and then to remove the cause of friction. No wonder the Japanese foreign minister issues his studied pronouncement to try to hush the whole matter up. We heard no such pronouncements before the Vancouver incident. This foreign minister of the honeyed words to-day, when honeyed words are not needed, is the same foreign minister of the ultimatum and the same foreign minister of the declaration concerning the pending decision of the California court. No wonder this foreign minister expressed the hope that his pronouncement "would prevent further misrepresentation and finally result in discrediting those who are constantly circulating false and harmful reports." He must now seek some other source from which to manufacture a pretext for war, and in the meanwhile the victim must be lulled back to sleep, lest she detect in the San Francisco incidents, now abandoned, the true attitude of Japan and proceed accordingly to take precautionary measures that would make Japan's task more difficult.

It seems now that the source for the next effort is to be Chinese disturbances, which Japan is planning to precipitate early next year. How long it will take Japan to get her pretext and force war upon us can not now be foretold, but to offset the possible increase of our Navy by the two large battle ships authorized by the last Congress Japan has now ordered two more *Dreadnoughts* in addition to those already building, one of the new ones to be built at Fairchild's in England, the other to be built in Japan, both of which will be completed before ours, and Japan's stupendous preparations for war continue with feverish activity.

It is easy for the foreign minister to insinuate that the efforts to arouse the American people to a sense of our danger are explicable "only upon the ground of a financial nature," and to

refer to the facts presented as "false and harmful reports," but he can not controvert those facts, nor truthfully deny them.

Let me warn my countrymen who are reading these papers not to drink the soothing syrup proffered by one who is holding a sword in her hand. We are a peaceful, trusting people and our inherent weakness and danger is to assume that because we do not wish to attack any other nation, no other nation wishes to attack us, and thus in false security to neglect the only preparations which could avert such an attack. Let me add that I have been diligent and scrupulously careful in gathering the facts, a task made difficult by Japanese secretiveness, and have only drawn the conclusion warranted by the facts, stating these conclusions without mincing words, as duty dictates they should be stated.

After the successful war with Russia, when every source of aggression has been removed far away, with no possible chance of aggression on the sea, we behold Japan making stupendous, hurried preparations for war, naval, military, and diplomatic preparations designed to gain control of the sea, which will be the vital question in case of war with America, and when these preparations are far advanced we behold the Japanese press stirring up the Japanese masses to animosity against America; we behold the allied press of Europe justifying Japan in undertaking serious measures for "redress" against America, and when the slightest opening occurs, however unjustifiable, however trivial, compared with the wide openings for closing similar "redress" from the British, we behold Japan issuing an ultimatum to America that requires abject humiliation or a rupture.

The avoidance of the rupture by the sagacity and wisdom of our President, and the abandonment of this particular opening on account of the occurrences in Vancouver, can not affect the only conclusions which no patriotic American can consider without apprehension:

First. Japan has prepared and is continuing preparations for war.

Second. These preparations are for war with America.

Third. The preparations are so far completed that Japan has already tried to force war upon unprepared America.

Fourth. Japan should be expected to seize upon the first advantageous opening to try again to force war upon America.

Fifth. The only possible way to avert war is for America to hasten defensive preparations, and while these are incomplete be prepared to submit to humiliations.

JAPANESE DIPLOMACY AND FINANCE POINT TO WAR WITH AMERICA.

[By Capt. RICHMOND PEARSON HOBSON.]

Feverish activity prevails in Japan in accumulating war materials, such activity as is seen only when a nation is on the verge of war. Existing establishments are being enormously enlarged, new establishments are being founded—steel and iron works, and armor plate and torpedo factories, shipyard equipments, docks, building plants, gun factories, powder and high-explosive factories, small arm and ammunition equipment factories.

These establishments at home are working full force overtime, night and day, and tens of millions of dollars worth of additional war material has been ordered abroad in Europe.

Hundreds of millions of dollars of ready specie money have been stored up. The merchant marine has been greatly expanded for over-sea transport service. The Chinese are being taught, trained, and organized in preparation for drawing upon the combined resources of both countries.

It may be pointed out further that these warlike preparations can have no European or Asiatic power as the objective, but are directed against America.

In great wars, however, naval and military preparations are not the only preparation; diplomatic preparations also are required. The great conquerors of history, like Napoleon, Caesar, Alexander, Tamerlane, were as great in diplomacy as in direct war itself, and their greatness and success lay largely in their mastery of the diplomatic factors of preparation. Frequently the outcome of war is settled absolutely by the success or failure of diplomatic efforts to secure the cooperation of other nations.

The aim of such diplomacy is twofold: To bring about as far as possible the isolation of the enemy, and to secure as far as possible the advantageous cooperation of other nations, in naval, military, financial, and moral support.

Japan being an island kingdom, her success or failure in any foreign war will always hinge upon the control of the sea. The invasion of Manchuria, for instance, depends upon Japanese control of the sea. The issue of the war with Russia was not settled by the brilliant victories of Liaoyang and Mukden, but by the naval battle of Tsushima. Japan realized full well that Russian control of the sea would mean Russian victory. Rus-

sia for fifteen years has been in a dual alliance with France, the second naval power in the world. An absolute prerequisite for war with Russia, therefore, was the cooperation of a strong naval power. Japanese diplomacy did not have to look for a field to find such a power. The first naval power of the world was ready at hand and waiting for an opportunity to back a third power against Russia, to check the advance of this rival empire, and weaken this hereditary enemy, particularly when their backing would not involve her own participation. The first Anglo-Japanese alliance was readily arranged, by the terms of which each of the contracting powers would come to the assistance of the other in case the other became engaged with more than one power; in other words, if France joined Russia, Great Britain would join Japan. This alliance eliminated France and secured the isolation of Russia. This completed Japan's diplomatic preparations. The naval and military preparations were already complete. The Russo-Japanese war, therefore, followed close upon the heels of the Anglo-Japanese treaty. War between Russia and Japan was inevitable, and would have come some day, but it is certain that Japan, without the cooperation of the British, would not have taken the aggressive during the continuance of the France-Russian alliance. The British, therefore, are absolutely responsible for the war as it came. The first Anglo-Japanese alliance, though professing peace as its purpose, was a war measure. Such, likewise, is the nature of the second Anglo-Japanese alliance, now in existence and extending till 1915. This treaty modifies the first treaty, so that now the British must join the Japanese if they become involved in war with only one nation.

What nation is Japan's objective in forming this new alliance? Evidently it is a great nation that has no alliance with other nations, for the first treaty would have been adequate for a nation with such alliances. There is but one great nation without alliances—America.

It is blandly sent out from Tokyo and London that the alliance has Russia in view. When Russia was in her full strength, the British had never found it necessary to form an alliance to protect India. When the new Anglo-Japanese treaty was entered into, Russia lay prostrate upon the earth, her army and navy permeated by mutiny, her people rent by revolution.

If there was but little occasion for Great Britain to form the alliance against Russia, there was even less for Japan. The first treaty had proved amply adequate for Russia, when Russia had a fleet at Port Arthur nearly as large as the Japanese navy and another fleet on the way larger than the Japanese navy. With these fleets annihilated, except those vessels in ports that were not captured by the Japanese, and with no prospect of a Russian fleet appearing in the Far East for a generation, why should Japan seek the cooperation of the "mistress of the seas" to keep Russia in check?

The suggestion is ridiculous.

The new alliance is not needed for Germany. The German army and navy have to be kept at home. The German Government has openly avowed that it realizes that Japan can throw the Germans out of Kiao-Chao any day it decides to do so.

The new alliance is not needed for France. Cochin China is as helpless at Kiao-Chao. It is not needed for Italy or any other European powers.

Anybody but a blind man can see that the new Anglo-Saxon treaty, a cast-iron alliance, offensive and defensive, is directed against America.

The purposes of this alliance are not difficult to discover. On the part of Japan it is the first important move to isolate America. It forestalls and prevents any possible aid America might have hoped to receive from Great Britain on account of the ties of races, blood, and language. With the great British naval base at Hong Kong, between Japan and the Philippines, and with a strong British fleet in the Orient, British aid to America is the one thing Japan would fear the most.

The alliance is intended to produce the division of the American fleet between the Atlantic and Pacific, and thus to insure the superiority of the Japanese fleet in this latter ocean, the great desideratum of Japan.

It insures financial aid, for which Japan has need in making her great war preparations, and in prosecuting the war.

On the part of the British, the purposes are equally plain. The Japanese are fast becoming supreme in determining the commercial policies of China and the Far East generally. They can insure, and have doubtless promised, the British commercial ascendancy in the Yangtse Valley, a "sphere of influence" the British have coveted for generations. The alliance would insure the elimination of America, their great competitor, from the oriental markets, and give to the British a partnership in the commercial supremacy of the Pacific.

It may be advanced that the British would refrain from war with the United States on account of the proximity of Canada. Thorough examination will take away the force of this assertion. In the case of the British alone, Canada is open to invasion, but with the British in alliance with a strong military power, Canada becomes a base for the invasion of the United States. Investigation shows that Japan in control of the Pacific Ocean could occupy the Pacific slope and hold it in the face of all the military exertion we might make. The situation would be far more critical in the case of a combined invasion from the Pacific and from Canada at the same time. Both oceans would quickly be swept free of American ships. Canada has about 55,000 trained men with which to keep us in check at first, then the British would pour trained troops into Canada faster than we could arm, equip, and train troops in the Eastern States, at least for one or two years. The British have a standing army of 286,000 men, and total effectiveness amounting to 750,000 men. She has practically an inexhaustible merchant marine with which to supply both oceans with transports. She would draw upon India and the Colonies. The hordes of the Hindoos would join the hordes of the Japanese and Chinese, and from the occupation of the Pacific slope they would soon overflow across the trans-Canadian railroads to supply all the men needed for a general invasion of the United States all along the Canadian frontier.

America, without any preparations whatever, would find herself crushed under the weight of the British Empire and the whole of Asia combined. The best terms we could hope to secure in suing for peace would be to pay an indemnity that would stagger the imagination, and yield up to the British Cuba, Porto Rico, the Panama Canal, the territory on the south side of the St. Lawrence and the Great Lakes, and the Northwest to the latitude below Puget Sound, including the whole of Alaska; to the Japanese and their Asiatic allies the whole of the Pacific slope, the Aleutian Islands, Hawaii, Guam, the Philippines, and Samoa, leaving them free to move down into Lower California, Mexico, Central America, and South America. America's horizon would thus be reduced to that of an inland nation, struggling for existence in the presence of surrounding foes, growing more overpowering as the years pass.

This picture will shock the imagination of Americans who have been listening to the mellow words of British diplomacy intended to be an opiate to our confiding people absorbed in their activities of peace.

I know that the mass of the British people have an affection for America, but it is not that part of the people that determine British foreign policy. It is but recalling a fact that stands out clear in our history to state that the British Government and governing classes resent the marvelous growth of the United States, and have sought and will seek again any opportunity to have this growth checked.

Public opinion in England is a strong factor in shaping British policies, and there would doubtless be great revulsion of feeling among the people to find their country lined up on the side of Asiatics against Americans. It must be recalled that there was strong revulsion of feeling in England against the drastic measures taken against the American colonies, but this did not stop the measures, did not prevent the employment of mercenaries and of the red savages, with scalping knife, for women and children along with men.

The only gauge we can go by at present is the press, and all during the difficulties in California the British press was unanimously on the side of Japan. This siding of a European nation with Asiatics against kindred nations of the white race is not an isolated case. In all the great invasions of Europe—by the Saracens, the Huns, the Ottomans, the Tartars—similar unholy alliances were formed.

Only thirty years ago we find Great Britain securing the cooperation of France to side with the Turk against the Russian. Bands of religion have no more weight than bands of blood. The British hold continental nations together to perpetuate the yoke of the Turks on the necks of Christians, and barbarous massacres in Crete, in Greece, in Armenia count for naught when it is assumed that political "interests" and advantages secured over rival nations are involved.

There is no doubt that with the development of the press, public opinion has grown stronger in England, as well as in all lands, but, at the same time, centralized governments, through control of the press, have gained an equal advantage in molding this public opinion in line with their policies, as public opinion is now being zealously molded in England to side with Japan.

The utmost that could be hoped from the revulsion of feeling in England would be to restrain an actual declaration of war and save the British from the dangers that might arise in Canada if Anglo-Japanese plans should meet a check. In the

meanwhile the British fleets would be mobilized and the exposed States on the Atlantic and Gulf coasts would clamor for protection and prevent our fleet from being concentrated in the Pacific, thus insuring to Japan an easy task in gaining control of the sea. It can be assumed that the British have guaranteed to the Japanese to keep the American fleet in the Atlantic when war approaches. Scarcely have we mobilized our fleet of sixteen battle ships, preparatory to going around to the Pacific, when the British mobilize a fleet of twenty-six battle ships ready for foreign service, giving it out that this overpowering fleet could be sent off on foreign service without exposing the British coasts, this notice being intended for German ears as well as American. While holding itself in a position to protest with uplifted hands against the thought of such a thing, the British are trying to produce, and are producing, uneasiness on the Atlantic seaboard, where the papers are now with one voice protesting against sending all the ships to the other ocean and leaving our great Atlantic cities unprotected.

While Great Britain is mobilizing her fleet in the Atlantic, Japan, by a back handspring, is suddenly taking up honeyed words of friendship and is urging us to send the fleet to the Pacific, and not to forget to have it come over to Japan and give them an opportunity to show their undying love and friendship for America. Great is the contrast with Marquis Ito's spontaneous words when our President announced his intention of sending the fleet, words that were a challenge to the "Grandiose pronouncement of the American President."

While Great Britain pulls, Japan pushes, to cause our fleet, or part of it, to remain in the Atlantic. Of course, a division of the fleet would be fatal. We must keep it together. As a compact mass of high efficiency, it would give good account of itself with a British fleet or a Japanese fleet either. Divided, it would make it useless.

This Anglo-Japanese alliance is made to run till 1915, during the period of incompletion of the Panama Canal, so that the task of transfer from one ocean to the other will require going around the Horn, practically insuring immunity to the ocean not occupied at the outbreak of war. It is doubtless planned by the allies that if the fleet is in the Atlantic, the British will threaten, but not actually become involved, at least for a while, until to do so would be a safe procedure. We are thus forced, for the present, to be exposed to either Japan or England. There can be no doubt as to the one. The integrity of our life is not involved in the Atlantic. We have had an English peril since our infancy. The yellow peril is the one we have not tested. In the Pacific our life is at stake. We must keep the fleet together, and must get it to the Pacific, and keep it there and take no chances with the British until we can build new fleets to eliminate the chances. Let us always encourage and reciprocate "ties of blood," "ties of language," "ties of religion," "ties of institutions," and so forth, but the true way to encourage these ties with the British or any other people is to be independent of them for our security. Let us cherish the "ties of love," "ties of friendship," that from the beginning have bound us to Japan, but the only true way to cherish these is to be independent of them for security. The great question of national defense is not left by any other nation to depend upon others; it must not be so left by the United States.

Thus we find ourselves between Europe and Asia.

Both continents are allied against us now, and both are liable to be allied against us at any time in the future. Therefore, the minimum basic for American defense is to be able to cope with any European power in the Atlantic and with any Asiatic power in the Pacific, both at the same time.

No choice is left us.

The minimum upon which to insure our safety and fulfill the requirements of self-preservation, is to have a navy as large as that of Great Britain and Japan combined.

JAPANESE DIPLOMATIC PREPARATIONS FOR WAR—PREPARATION OF ILL-FEELING BETWEEN PEOPLES AND OF A PRETEXT FOR WAR.

[By Capt. RICHMOND PEARSON HOBSON.]

Japan's diplomatic preparations for war with America are being completed along with naval and military preparations.

The tremendous advantages gained by the Anglo-Japanese alliance are obvious. If the British did not proceed further than the mobilization of their fleet in Europe, remaining within the bounds from which they could retire, and proclaim that the mobilization was for the benefit of Europe, even then the result would be greatly to the advantage of Japan as causing anxiety on the Atlantic seaboard of America, and the retention of the fleet or part of it in the Atlantic, thus facilitating Japanese control of the sea in the Pacific. Already in reply to our assembling a fleet of sixteen battle ships, the British have begun the as-

sembling of a fleet of twenty-six battle ships, and the press up and down the Atlantic and Gulf seaboard has already begun to protest against the approaching departure of our fleet for the Pacific.

We are not justified, however, in assuming that the British will confine themselves simply to the mobilization of their squadrons. We must assume, on the contrary, that they will fulfill the solemn pledges of their treaty and join the Japanese in the prosecution of war against America, and we can not fail to note the recent activities at Esquimaux, where the British would furnish a naval base for operations on the Pacific coast. This transforms the whole face of the Japanese crisis. With the great naval base at Hongkong, added to the developing bases in Formosa and Port Arthur and the four great bases in Japan proper, and with the British Pacific fleet combined with the Japanese navy, the control of the Pacific Ocean is assured to the allies, along with the control of the Atlantic. Our fleet only has to choose between two fleets, both greatly superior, as to which it will engage. Since the invasion of America will come from the Pacific, the allied fleets in the Pacific should be the choice, and the Atlantic and Gulf coasts must be left absolutely exposed until we can build a fleet in the Atlantic to match the British; and a fleet in the Pacific to match the Japanese means war with Great Britain also, and such war will see our flag swept from the ocean, and see America ground down by the hordes from India, China, and Japan, the swarm pouring over the Pacific slope and across Canada, with the British bases of Esquimaux in the Pacific and Halifax in the Atlantic from which to organize the expeditions of invasion from the north.

America's very life is at stake, and the crushing of America would mean the yellow men's conquest of Europe from the Atlantic. The question vitally affects the course of the world.

It must be clear to any student that, with the yellow man capable of developing into the best soldier in the world, capable of enduring hardships and fatigues impossible with the white man, the white race can not hope to meet the yellow race, numbering three to one, in a struggle on land. On the other hand the great endurance of the yellow man goes with a low standard of life, in conditions of poverty and want, with less wealth and resources, so that, for a time at least, the yellow race can not compete with the white race on the sea, where power demands wealth and not number of men.

Thus the safety of the white race is wrapped up in the control of the ocean.

When it is realized that America controls about one-half of the entire banking power of the world, an index of naval possibilities, and is steadily gaining an even larger proportion, it will be seen that she must be looked to as the ultimate bulwark of the white race in its struggle with the yellow race for control of the ocean. Further, the yellow race is now gravitating eastward, across the Pacific, and after crossing America would choose the route across the Atlantic to Europe, rather than the land route by Asia. America is thus the immediate buffer for the whole white race. The world can not but view with alarm the spectacle of the greatest naval power of the white race lending itself to the yellow race to give that race the one advantage upon which the white race must depend for its existence—the advantage in ships, with which to break down the nation that constitutes the white man's breastworks.

We have read of "holy alliances" in history. We now behold an unholy alliance. The British joining the Japanese against America is nothing short of treason to the white race.

National peril has been uppermost in the minds of European nations so long that the annihilation of space and the bringing of the yellow race to their doors does not yet produce the feeling of race peril. The nations of the white race have antagonized each other so long that they see in the rise of Japan an opportunity to gain an advantage over a rival white nation, rather than a common peril for all white nations. It is now common knowledge that the thousands of Chinese students returning from instruction in Japan, already reaching nearly a half million of Chinese pupils in China, are teaching a common hatred of the foreigner. This came out in the propaganda during the boycott of American goods. The yellow man's house is fast becoming united, while the white man's house is divided within itself. Of course, in the end the common peril will be appreciated, and then the nations of the white race will come together, but infinite harm may be done in the meanwhile, and union might come too late. Such a common danger apparently will be necessary to bring their brother nations together. It required common family peril to produce the united clan, it required common tribe peril to produce the united nation, it may require a common national peril to produce the united race. During this process of evolving the larger aggregation, vast

suffering and sacrifice were entailed, kindred families, clans, tribes, perished by the sword at each other's hands. It is the part of higher intelligence to avert similar sufferings on a vast scale. With a united front and in control of the ocean, the white race could check the militarization of China by Japan, striking at the root of the danger and could limit the coming war zone, and upon the lines of American institutions, recognizing the equal rights of others, could ultimately bring about the reconciliation of the races in a united brotherhood of man. But the day of this brotherhood is far away. The day of the united white race is likewise far away. Ours is still the day of the divided nations. Japan has been able to enlist other European nations besides the British in her diplomatic preparations for war with America.

The prestige of victory and the possession of power have given the Japanese a great leverage upon the nations of Europe that have ambition in the Far East, and she has been able to handle these nations as she pleased.

From the British she wished a hard and fast alliance to insure control of the sea. A hard and fast alliance she got. From the French, the bankers, she wishes money, and money she is getting. A new convention has been arranged with France, the net effect of which is to cause millions of French capital to pour into Japan. These millions are going into various avenues, but they will all lead directly or indirectly to swell and buttress the Japanese war chest. From the Russians she wishes relief from embarrassment in Manchuria; a new convention with Russia provides against this embarrassment.

The inducements that Japan gives to secure these treaties are not difficult to understand.

The building of the Panama Canal by America and her demand for the open-door policy in China, measures intended to be, which would surely be, of great advantage to all nations, are taken as the ground for alarm. Japan doubtless represents, in effect, to the European powers that when the canal is completed, with an open-door policy, the other nations could not compete with America, and she calls upon them to join her to throw America out of the Pacific and to divide China into "spheres of influence," promising to the British a preponderance in the Yangtse Valley, which they have coveted for fifty years; promising to France preponderance in the southwestern provinces, bordering on the French colony of Cochin-China, and to Russia preponderance in parts of Manchuria. Of course these features are carefully guarded and only conventional clauses of the conventions are made public—clauses really intended to throw America and the public of the world off guard. Take the convention with France, for instance, in which the two powers agree to uphold the other's "rights" in "adjacent region." This sounds natural and harmless, but it becomes known, particularly in the Far East, that the agreement was that France could occupy Yunnan, Kuangtung, and Kwangsi, important provinces of China in the southwest, and that Japan could occupy Korea, Chilli, Manchuria, Shantung, and Fukien.

It will be noted that the Fukien Province is far down across from Formosa, and that these other provinces are coast provinces and taken in connection with the Liaotung Peninsula, which Japan already controls from Port Arthur, they practically give Japan control of the coast line of China and consequently of Chinese relations with the outside world. It will be noticed also that this list includes Chilli, the province that gives access to and control over Peking, and consequently over the Chinese Government, and it is in this province of Chilli that under Japanese direction the viceroy has organized a great standing army, up-to-date in every way, estimated as already numbering over 70,000 men. It will also be noted that the list includes the peninsular province of Shantung, on which the German colony of Kiaochow is situated, and over which Germany has long cherished designs of control.

It is understood that the conditions with France were made with the knowledge and full consent of Great Britain and Russia. It is clear, therefore, that the four powers, Japan, Great Britain, France, and Russia, have a full understanding, that provides for the elimination of America and Germany from the Far East and for the division of China among themselves. It has all been brought about by Japanese diplomacy and will work into Japan's hands. With the antiwhite propaganda being developed throughout China by Japanese efforts, it ought to be clear to anyone that it would not be long after the division of China when the white nations participating would be eliminated in turn, probably France first and Great Britain last. But with the selfish bait of spoils in China, Japan has led these three great European nations to cooperate with her against Americans in the first great move by Japan toward gaining for herself the control of the Pacific and for the yellow man the supremacy of the world. In order to clinch this co-

operation and precipitate the issue, the Empress Dowager of China has been forced to announce that she will abdicate at the approaching Chinese New Year, and Tokyo dispatches announce that the Emperor of China is an imbecile. Shortly after the Emperor of Korea had been forced to abdicate Japan, standing upon the prostrate form of that helpless country, served notice upon the world that with the approaching abdication of the Empress Dowager there are likely to be disturbances in China that may require Japanese occupation of that Empire similar to the occupation of Korea. In line with this announcement the base at Port Arthur has been rapidly put in readiness for naval and military operations, and Japan is evidently planning early moves, which are expected to arouse the opposition of America and precipitate the conflict, unless it can be precipitated for some plausible pretext in the meanwhile, a pretext that would not alienate the public sentiment of Europe and check the cooperation of the European governments.

The fact has been brought out that Japanese preparations for war with America—naval, military, and diplomatic—have reached an advanced stage. Something further remains, however, before Japan can actually inaugurate hostilities. She must create an anti-American feeling among the masses of Japan to insure popular support in the prosecution of war and she must find some plausible pretext to excuse her in the eyes of the world.

The great agent for such purposes is the press, and for these purposes the Japanese Government has utilized the press of Japan, and, with the aid of her allies, the press of the world with wonderful success.

This task is a difficult one. It is generally known throughout Japan and the world that America first opened up Japan and never fired a gun, but left Japan unmolested, and that we have been her staunchest friend ever since. Not long after the opening up, during the disturbances that accompanied the last days of the shogunate, the Straits of Shimonoski were closed to foreign commerce, which led to the first naval demonstration and bombardment by Great Britain, France, the Netherlands, and America, ending in the exaction of \$3,000,000 from the Japanese Government, the money being divided equally among the four powers. The other powers took their quotas and used them up. America's quota was sent on, \$750,000. By the usages of the world and the example of the other powers, it was ours, but we never touched it. In due time, by a unanimous vote of the American Congress, we voluntarily returned the last dollar to the Japanese Government.

It is generally known that America was among the foremost western nations to abolish the principle of extraterritorial jurisdiction in Japan and thus to place Japan on an equality with the other great civilized nations.

It is generally known that during the war with Russia American sympathy was with Japan and was a substantial assistance in floating Japanese war loans.

The task of persuading the Japanese people that America had suddenly turned against her old friend was therefore a difficult and delicate one. The Japanese Government applied itself to the task with great adroitness. When popular protest ran high in Japan against the terms of the treaty of Portsmouth the cue was given to the press, and America was held responsible for the failure to receive the expected war indemnity. A propaganda was carried on similar to that which followed the war with China, when, in preparing the masses for the coming war with Russia, the press cried out against that country as having despoiled them of the fruits of their victory. The Japanese press, after the return of the envoys from Portsmouth, cried out that America, once their friend, had turned upon them and had deprived them of the fruits of their victory. Such is the universal belief regarding our gracious efforts that brought the bloody war to a close, insuring as it did incalculable advantages to Japan along with the restoration of the peace of the world.

Since then every possible incident, no matter how trivial, has been seized upon and grossly exaggerated to stir up the hatred of the Japanese people against America. No attention has been paid by the Japanese press to the stringent measures inaugurated against Japanese immigrants to other countries. As a matter of fact, the British colonies in South Africa, Australia, and New Zealand have been ten times as stringent as we have been in America. It would have been more consistent for the press of Japan to proclaim that the British were their enemies. Japanese have been excluded from Australia; a Japanese can not enter that country without giving bond that he will leave within a limited time, and while in the country he can not send his children to Australian schools, from which Japanese are entirely excluded. Yet such serious impositions have passed without comment in Japan. In the recent dis-

turbances in British Columbia, where a shipload of Japanese was deported, where in Vancouver without any abnormal conditions the best citizens of the place, joined by 100 British soldiers, attacked the Japanese quarters and over 50 Japanese houses were either partly or wholly destroyed and a Japanese subject was killed, almost no comment was made in Japan, except in excusing the British and palliating the offenses.

The Japanese Government made a plausible request that the city restore the houses. The mayor refused, and the Japanese Government said nothing. What a contrast in San Francisco, where conditions were abnormal, when the property of Americans and other nationalities was injured by the struggles of union and nonunion laborers, and many lives were sacrificed! The injury to Japanese property was only trivial. Altogether it amounted to only a few hundred dollars, unattended by injury to any Japanese subject.

In the famous bath-house incident it is estimated that the injury to Japanese property amounted to \$6. In that famous greenhouse incident, in Oakland, the injury amounted to \$1, the breaking of a windowpane. And yet these trivial incidents were seized upon by the Japanese press to inflame the Japanese people to bring forth mass meetings and thundering demands upon our Government. The press of England and to a lesser degree the press of France echoed the press of Japan, trying to have it appear that a fierce race hatred had sprung up in America against the Japanese.

The San Francisco school incident, however, was the one most exploited, for it served the double purpose of arousing anger among the Japanese masses and of creating an impression in Europe that would justify Japan in taking stern measures for redress.

In the press of Europe there was a clearly visible effort of Anglo-Japanese inspiration to produce the impression that the United States was violating the obligations of the treaty of 1894, whereas there is nothing in that treaty whatsoever that could be construed to require America to insist upon the free education of Japanese children living in the various States. There is infinitely less ground for complaint than there is against the British, who have made no effort to prevent Australia from enforcing her law that absolutely forbids Japanese from attending the public schools. The reason why the treaty was invoked is evident. The violation of treaty obligations is one of the causes assigned in international law as justifying war.

America paid no attention when California many years ago adopted a law that the school boards could provide separate schools for pupils of Mongolian race; the country paid no attention when the law was applied to the Chinese when they swarmed in, and no attention was paid when, with the swarming of the Japanese, the law was applied to them also. From the first the matter has been properly regarded in America as a purely local one. Furthermore, the California law is clearly a wise one. When people are so far apart that they differ in color, it is certain that they will differ widely in their habits and their standards and can not be congenial in intimate association. Nature has set her seal of abhorrence upon the mingling of blood of types so divergent. No good purpose can be served by forcing people of different color into each other's society. The effect is not marked when there are comparatively few of one color, but the universal experience of mankind demonstrates the wisdom of separating the colors when both are numerous. Just when the point is reached where separation becomes advisable is clearly a matter for each locality to settle for itself. Great numbers of Japanese were pouring into San Francisco, and the numbers in the public schools were showing signs of similar increase. Furthermore, the Japanese pupils were older than the American pupils, and anyone who has been to Japan knows how loose the standard of morals is. There is no question that action looking to separation in the schools of mixed sexes was to be expected before the actual number of Japanese pupils would appear to require the action. There is no imputation of self-righteousness when it is pointed out that the Teuton standard of morals is on a different plane from the Japanese, and the participation of the best citizens of Vancouver in the destruction of Japanese houses was, in a measure, an outburst of the old spirit of Puritanism against the presence of the looser morals of the Japanese quarter. The British, in their unholy alliance with the Japanese, may as well take account of forces that are deeper and stronger than the ties of a treaty of expediency to promote "immediate interests." Japanese in large numbers will be no more welcome in Canada than in Australia and the United States. The use of Canada as a base of invasion of the United States by Asiatics might not prove as harmonious as Anglo-Japanese plans contemplate.

While the school incident in San Francisco was treated as a local affair of no general interest, and was practically ignored by the press of the United States, it was seized upon by the British and Japanese press and exploited to the limit. The English press resounded with condemnation of the gross violation by America of the "treaty rights" of Japan; of the wanton manner in which America was subjecting the allies of the British to indignities, treating as an inferior race the nation that had given proof of the highest civilization; and along with the condemnation of America came the praises of the Japanese and the self-control they were displaying under great provocation.

The Japanese press with one voice denounced the Americans as having turned against them, having engendered a violent race hatred, which was taking the form of unrestrained attacks upon Japanese citizens; finally, by official action, persecuting the little Japanese children, turning them out of school, denying them an opportunity for education; the Japanese would not indefinitely submit to being "treated as an inferior race;" a "Japanese treaty was not the fit object for the waste-paper basket;" "America would learn that the Japanese navy was not maintained as an ornament;" the American Government was corrupt from top to bottom, in the cities, in the States, and in Washington, and the whole country needed to be conquered and "given a king;" America is very rich; the Americans were commercial at all times; their naval officers were social stars, but were devoid of patriotism and lacking in efficiency, and would give up immediately before Japanese patriots.

There could not have been a more carefully planned campaign to stir up the anger, hatred, and cupidity of a people to fire them for war.

Of course the Japanese Government "deplored" the unfortunate state of affairs. It wishes to appear "correct" before the eyes of the world, and while actually bringing about the anti-American propaganda, it tried to escape responsibility by laying it on the "yellow press" of Japan, inspired by the "party of opposition." It is singular how the "yellow press" and the "party of opposition" do not appear in any other international incidents, like the one at Vancouver or those in Australia. It is singular how in every other matter of foreign policy the whole press and all parties in Japan are with the Government.

Indeed, Japan has set an example to the world of the co-operation of the press with the Government. In all the course of the war there was not a thing published, as far as could be detected, without the consent and wish of the Government. The Government control of the press in Japan is absolute. In fact, the control of every other activity of the nation is absolute. Japan is an oriental autocracy, an absolutism, such as the white man has never known. The Emperor has come from the sun. A good Japanese can not look upon him. The virtues of the Emperor won all the victories. The central Government has its hand upon every form of business. The merchants of America and Europe need never think they are to have simply the competition of Japanese merchants. They must meet the competition of the Japanese Government. It is the Japanese Government and not the legitimate competition of Japanese merchants that is driving foreign commerce, and particularly American commerce, out of Korea and Manchuria, and is driving American commerce out of China proper. In the light of the true conditions it is almost ridiculous for the Japanese Government to lay the anti-American propaganda upon a "yellow press" in the hands of "the opposition."

The propaganda in Japan was for the purpose of firing the masses of the Japanese for war, and the propaganda in Europe was for the purpose of justifying Japan in the eyes of the world.

They were part of the Anglo-Japanese war preparations, and the energy with which they were pushed showed the advanced stages of these preparations. The crisis through which we passed and are now passing is shown by the way in which the California incidents, and especially the school incident, were seized upon to embarrass and humiliate our Government. The government of no free people in the history of the world has been so humiliated by a foreign power. It was only by wisely accepting the most abject humiliation that our Government has been able therefore to avert a disastrous war for which we are utterly unprepared and for which the Japanese and their allies have completed all the preparations.

THE DEFENSE OF THE PACIFIC.

[By Capt. RICHMOND PEARSON HOBSON.]

The sailing of the fleet for the Pacific has drawn the attention of the people of the nation to the Navy and its relation to national defense and to foreign affairs. The educational benefit can not be overestimated. In other countries the governments

and ministries determine the foreign policies and the naval and military programmes upon which these policies rest. In America all policies and all programmes depend upon the people, who are very busy with the work of developing the country's resources, and with grappling great domestic problems. In our position of isolation it is a difficult task to secure the attention of the people for the consideration of questions of foreign policies and of naval and military programmes, and without the attention of the people it is practically impossible to secure the attention of Congress. The long voyage of the fleet around the Horn would be justified by the educational benefit to the people alone. But it has a deeper significance. It marks the first move of the white man in the struggle with the yellow man for the control of the Pacific.

The popular idea has been that the yellow man, merging slowly into the white man's civilization, would be slow in grasping the situation and in developing the strength necessary for a serious struggle. On the contrary, the yellow man has quickly grasped the whole march of events, has seized upon the white man's art of war, and while the white man slept has swiftly organized vast power on land and on the sea, and is directing the trend of events to get the advantage of controlling the time and manner of the clash.

An analysis of recent events shows that Japan, fully prepared, tried to force America, unprepared, into war, and that our Government was only able to avert a disastrous war by abject compliance with the unwarranted demands of Japan that the Japanese pupils in San Francisco should be put back in the schools with the white pupils. Though the incidents in San Francisco have been dropped since the far more serious incidents in Vancouver, the persistence with which the Japanese Government keep the immigration question to the front, the increase in immigration into the United States, while the Japanese Government pretends to be trying to prevent immigration, the recall of the Japanese ambassador, the semiofficial announcement that a new treaty must be negotiated at once, coupled with the announcement that no treaty would be accepted that excluded Japanese, these things and the rapid spread of unrest in China, all go to show that Japan is determined to bring about war at an early day, and if possible before our fleet can reach the Pacific. The only reasonable course for America to pursue is to proceed with the necessary preparations. Upon the swift progress of preparations for war and a wise and yielding diplomacy, rest the only hope for peace.

We must gain time. Our present policy should be to "spar for wind." We must not allow the kaleidoscopic change of ambassadors and other moves to hurry us on to a crisis. Our Congress should refrain from discussing or considering the Japanese immigration question, and the people of the Pacific slope should possess their souls in patience, no matter how irritating and exasperating the influx of Japanese may become. Our Executive should by diplomatic processes, put off the question of a new treaty at least until the expiration of the existing treaty. The Japanese are not demanding a new treaty with the British about Japanese immigration into Canada, and we can well ask and accept the same arrangements that are made in Japan to check immigration into Canada. We should proceed as fast as possible to undermine the diplomatic structure that Japan has built up so adroitly and successfully.

The most effective work would be to enlighten the people of England and of the British Empire upon the effect of the unholy alliance with Japan, pointing out the unrest in India due primarily to Japan, the obstacles the Japanese are throwing in the way of British commerce in Korea, in Manchuria, and in China, showing that in the end the yellow man will turn upon the British; pointing out that community of interests, that Canada, Australia, and other British colonies have with the United States in the menace of Asiatic immigration. The campaign of enlightenment should extend as far as practicable to France, showing the French how Japanese supremacy in the Pacific would mean the expulsion of France from Cochin China, and to Germany and Russia, and Holland, and Italy, and all the white nations, showing how the interests of all are involved, the welfare and fate of the white race and the white man's civilization hanging in the balance. This work should be carried forward by discreet diplomatic activity and by the American press through its exchanges.

The direct work of preparation, naval and military, should proceed with all possible dispatch. The work of fortifying should be pushed on the Pacific even at the expense of neglect on the Atlantic. Every harbor of the Pacific coast should be strongly fortified, and the militia of the Pacific slope should be increased and trained as much as possible. Pearl Harbor, in the Hawaiian Islands, should be developed into a coaling station and base, strongly fortified. A floating dry dock should

be sent there and all the able-bodied white men in the islands should be organized and drilled and a strong garrison of regulars stationed there, while measures should be taken to prevent the smuggling in of arms for the Japanese. These islands must not fall into the hands of an enemy.

Guam should be fortified and converted into a coaling station as far as practicable. The quickest work, however, should be done in the Philippine Islands. The harbors should be fortified, mined, and heavily garrisoned, especially Manila Bay and Subic Bay. This latter should be speedily developed into a great naval base. The native Filipinos should be organized under American officers into a strong body of home guards. With the object lessons of Formosa and Korea before their eyes, there will be no question of the hearty cooperation of the Filipinos to prevent the Japanese yoke from falling on their necks.

In the last analysis, however, the outcome will rest upon the fleet. Every vessel in the Navy of substantial fighting power should be sent to the Pacific. The battle ships *Mississippi* and *Idaho*, nearly completed, should be sent to join the sixteen battle ships that are on their way. Likewise the armored cruisers *California* and *South Dakota*. Work should be hastened on the battle ships *Idaho*, *New Hampshire*, *Michigan*, and *South Carolina*, and on the armored cruisers *North Carolina* and *Montana*, and these should all be dispatched to join the Pacific fleet. We could thus assemble twenty-seven battle ships and twelve armored cruisers in the Pacific before Japan can force us into war.

Such a fleet, properly handled, would measure up with the Japanese navy and the British Pacific fleet combined. The successful assembling of such a fleet would be the strongest influence in postponing war. While it is being assembled American diplomacy must prevent any crisis, no matter at what cost. A premium should be offered for the completion of the *Delaware* and *North Dakota*, newly authorized battle ships of 20,000 tons, before the time limit set by the contracts, and, if it is then not too late, these should likewise be dispatched to the Pacific. The President should be authorized to purchase abroad as many of this new type of battle ships as can be secured. We should add to the Pacific fleet as many of these new battle ships as Japan possesses and should proceed to build in the shipyards of the Pacific coast as many new vessels as Japan builds and with the lead thus gained fix a standard for the naval activities on the Pacific coast to keep abreast of the needs for the defense of the Pacific Ocean.

To supply this lead in the Pacific, however, requires the stripping of the Atlantic and Gulf coasts, which can not be safely permitted to continue unprotected. We must work out and execute a definite policy in this vital question of national defense. With all our present strength sent to the Pacific, we must begin a rapid programme of construction that will in the shortest time put the Atlantic and Gulf seaboard in a condition of security, which means, upon investigation, that we must have a fleet available in these waters capable of coping with the British fleet. To accomplish this, we should adopt a dual programme of expansion, ordinary and extraordinary. The ordinary programme should authorize the regular annual expenditure of \$50,000,000 for new ships to be built in the United States, the types and number in each type to be determined by the Secretary of the Navy on expert advice. This ordinary programme would keep us abreast of the requirements if we had an even start. In order to catch up from nothing in the Atlantic, an extraordinary programme should be adopted, authorizing the President to purchase abroad or order constructed in America over and above the vessels ordered in the ordinary programme, additional vessels, the cost not to exceed \$50,000,000 per year, as may be required in his judgment for the proper advancement of the work of national defense.

At first thought, some may raise the objection of the great cost. The fact is the greater the cost of naval power the better. It is absolutely a relative matter. We can easily bear the cost, for our men are not taken away from productive work, and our resources are boundless. Whereas Japan and the other military nations that threaten us take their men away from productive works for service in the army, are weaker in resources, and can not easily bear the great cost. It should be a definite policy of ours to build ships ever increasing in size and cost and make the expense of naval power greater and greater. The greater we make the expense the sooner we shall gain the leadership and escape the menace now upon us.

It is true that the improvement of our waterways, the construction of the Panama Canal, and the great question of internal improvement are making heavier demands upon our Treasury. But our resources are equal to all the demands. It is not necessary to play off one good thing against another. In the matter of precedence defense must come first. The nation's

life must be rendered secure, and its tranquillity must be insured before internal improvements can be carried on or the nation can work out its destiny.

As a question of insurance, we have 20,000,000 of American citizens who on our coast line, bays, harbors, rivers, lakes, are living and have their property within gunshot of the water. Forts, mines, torpedoes are useful auxiliaries, but a strong navy is the only real insurance for all these citizens, outnumbering the citizens exposed to naval attack in all Europe combined, and for all this property, greater than the combined property of all the rest of the world similarly exposed. Furthermore, the citizens of the interior send parts of their products to the seaboard and over the ocean, our export property exceeding the export property of any other nation all dependent on a great navy for insurance in transit over the sea and in securing just treatment in the markets beyond. The price of all our great staples is determined by the demands in the world's markets. We have reached a point where we produce world staples far in excess of our consumption. For enduring prosperity we simply must have a chance and a fair chance to send our surplus to foreign markets. At present we are fast losing the most promising markets of the world—those of the Orient. Japan has caused discrimination against our products in Korea, Manchuria, and China, until last year we lost \$25,000,000 of our cotton textile trade alone in these markets, and yet our Government does not dare protest. We have no insurance out there; no fleet with a navy adequate for the nation's defense and security. The cost, while large, would not mean an insurance rate as large as 1 mill on the dollar. The tax would be less than one-tenth of 1 per cent. It should be remembered that as an investment a great navy would save in time war, which is the most expensive thing known to man. We are a peace-loving industrial nation and never have and never would seek war with another power, and if we had a great navy no other power would seek war with us. Without a strong navy other powers will and are seeking war with us. It is a simple question of peace with a strong navy or war without it.

Some have misapprehensions lest our quickening our pace in naval expansion would cause other nations to quicken their paces and give an impetus to militarism. Other nations are already running as fast as they can. They can not quicken their paces. We are the only nation that is sauntering along. Militarism permeates the other nations through and through already. We are the only nonmilitary nation. Giving us more power would add to the influence of peace forces in the world and advance the cause of arbitration, the cause of international organization for substituting law and justice for war and might. At present there is no system of international justice. There is no international police force that the weak can appeal to, else Korea would not have been absorbed. There is no international tribunal to appeal to for an injunction to restrain the strong. Korea made a pitiful appeal to the only semblance of a tribunal, and not a delegation at The Hague would even receive a visit from the Korean delegation. The world at large is still in the position of a frontier country where there is no court, no sheriff. The greater the relative power of peace-abiding citizens, the better for such a community, and the sooner the establishment of law and justice.

Some may superficially fear lest the building of a great navy bring militarism upon us, forgetting that navies, involving only a small fraction of the population and that small fraction being left far away at sea, can not possibly produce militarism. No navy ever usurped civil power or overthrew a government since time began. The thing that produces militarism is a great standing army in the midst of the people. With a strong navy we should never have to have a great standing army; without a strong navy we would speedily drift to the point where we would have to organize the whole nation into an army. It is war, above all things, that throws a people into militarism. With a strong navy we could live in peace. A strong navy, instead of producing militarism, is the one agent that can save us from militarism and permit us to work a wonderful civilization built upon cooperation and mutual service, instead of war and mutual destruction.

Some are timid and are afraid to trust America with the power that goes with a great navy, lest she abuse this power. These parties seem to have no misgivings about other nations having this power. They find no trouble in trusting the British with a navy three times as large as any navy in the world. Yet the British and all other nations have inherited enemies. Their navies are for war. America has no enemy; her Navy is for peace. A monarch abroad may sweep a country into wars of conquest and oppression. In America all wars depend on the people, who are peace abiding and peace loving from the very nature of things. We never have and never could enter upon wars of conquest

and oppression. We know that the safest repository of liberty is in a nation of free men. Likewise the safest repository of power is in a nation of peace-loving men. The 90,000,000 of peaceful citizens in the American nation is the one safe repository for naval power as long as this power is required by individual nations, and giving this power to America will give the influence needed by the peace forces of the world to restrain might and brute force from bringing on wars, and then a system can be evolved providing a substitute for war which would bring permanent peace; it is the short cut to the time when America and all other nations can give up their navies.

Some thoughtlessly imagine that the employment of a great navy is not in keeping with the teachings of Christ. They might as well say that the employment of policemen, of constables, of sheriffs, is against the teachings of Christ. They confound the teachings of Christ with the teachings of Confucius. No reformation ever took place in the realms of Confucianism. No Magna Charta, no Bill of Rights, no Declaration of Independence was ever heard of there. Thousands are killed yearly by the bite of the cobra, and in the spirit of nonresistance the victims do not kill or molest the deadly reptiles in the path. Christ scourged the money changers from the temple; He blighted the fig tree that did not bear fruit; He set the example of a man of action, who went about doing the things that would advance the cause of civilization. Whatever may be the great and glorious purposes the Almighty has for this world, they must be worked out by man and nation, not in nonresisting inactivity that leads to death, but in vigorous, positive action, recognizing the actual conditions in the world, activity that under the great laws of the universe produce steady development in the individual and progress in the civilization of society.

"Not everyone that saith unto me Lord, Lord, shall enter into the Kingdom of Heaven, but he that doeth the will of my Father, which is in Heaven." What practical good man in touch with the conditions in the world would conclude that the Father's will is that America should remain defenseless, become the prey of the yellow man, precipitating endless wars that would engender destroying hatred between the races, prevent the workings of missions, stop the spread of the gospel of love and of peace, and bring about the overthrow of the structure of civilization slowly built up by the white man through so many centuries?

On the other hand, is it not as clear as the noonday sun that the Father's will is that America, a nation without any inherited hatred, kinsman of all nations, that has grown up far from the turmoil that has come down the ages in Europe and Asia, the nation founded upon the equal rights of all, the true basis for permanent peace—that America, the great peace nation, with boundless resources, should reach out her strong arms over the oceans and check the cruel march of war in Asia and elsewhere in the world, secure her own safety and prosperity, and at the same time keep the peace of the world, so that commerce might march onward to build the nations together, so that Christianity might move out and girdle the world, so that man would not go backward toward the savagery of mutual extermination, but move forward on a rising plane, so that the Christian civilization built up in the world might not perish, but go on to nobler heights and embrace and bless the whole world, so that the white man may accomplish his glorious mission of establishing peace on earth and good will among men.

Injunctions.

SPEECH

OF

HON. CHARLES E. LITTLEFIELD,

OF MAINE,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 30, 1908.

Mr. LITTLEFIELD said:

Mr. SPEAKER: It is my intention in the course of this speech to discuss the question of the use and abuse of injunctions, the power of Congress with reference to legislation in connection therewith, the Sherman antitrust law, the circumstances under which it was enacted, its scope from the standpoint of the legislative intent, and its legal basis, the proposed amendments known as the "Hepburn antitrust amendments" and their effect, the concrete legislation now demanded by the American Federation of Labor, and which supersedes all other legislation heretofore insisted upon or demanded by them, concluding with some observations, somewhat personal to myself, calculated to

demonstrate the weight to which the pronouncements of the parties demanding this legislation are entitled, from the standpoint of the results they are able to accomplish in a political campaign.

In the matter of the use and abuse of injunctions in labor controversies so much is repeatedly and insistently said, and so vigorously have the courts been denounced, that I think it may be safely said that the impression generally prevails that there has been and still is more or less abuse of judicial discretion in controversies of that character. I am free to admit that, in a general way, I entertained that impression myself, until I made the investigation to which I shall now refer.

The assertions have hitherto been general and indefinite in character. It seemed to me that at this time it was both wise and proper that the parties making these assertions and engaged in wholesale denunciations of the courts should be required to specify the instances of abuse and call attention to the circumstances under which they claim judicial discretion has been abused and the power of granting injunctions in labor controversies has been oppressively or improperly exercised.

With that in view, on the 5th of February, 1908, when Mr. T. C. Spelling, the attorney representing the American Federation of Labor, appeared before the Judiciary Committee to urge the enactment of the Pearre bill—reference to which will be hereafter made—I took occasion to ask Mr. Spelling if he would be kind enough to specify the cases of injunctions where instances of abuse had occurred, and point out the circumstances connected therewith, also to give a list of cases where injunctions have been unlawfully ordered. Mr. Spelling replied that there were a great many such cases, and that he would furnish the required information or have it done.

This was on the 5th of February, 1908. On the 24th of February Mr. Spelling appeared on the rolls of the Department of Justice as assistant attorney-general, and he has, in my judgment, had plenty of time to furnish the information inquired for, because he has been in attendance before the subcommittee of which I am chairman as simply an onlooker and observer. It is proper to remark that up to to-day Mr. Spelling has not filed a single one of "the great many cases" he claimed existed.

I may say in passing that I understand the employment of Mr. Spelling by the Department of Justice does not necessarily involve his being employed in cases against labor organizations under the Sherman antitrust law.

Mr. Gompers, who appeared before the committee, was also requested to put in all such injunctions in full involving abuses of the judicial power, with reference to the cases complained of. Mr. Gompers appeared on the 24th of February and was requested to file everything he had in that line, but nothing was filed with the committee until about the 6th or 7th of May, when a mass of material, some of it relating to State injunctions, some of it having no connection with injunctions, some of it being injunction orders and opinions relating thereto, was filed. No criticism of any injunction order or decree was filed with this material, and, although I specifically requested the gentlemen representing this body to file with the other data such criticism as they had to make of these injunctions or orders, they absolutely declined to file any criticism whatever.

I shall introduce as an appendix an abstract of the material thus filed, so far as it relates to injunctions and decrees and the action of the courts thereon. This abstract was made by Mr. J. A. Emery, a lawyer of ability and experience, and I rely on the results of his work in my discussion thereof.

The papers thus filed show only twenty-three decisions, orders, or complaints, beginning with an injunction issued December 19, 1893, by Judge Jenkins in the case of *The Farmers' Loan and Trust Company v. The Northern Pacific Railroad* (60 F. R., 803), being the celebrated Jenkins case, involving the Order of Railway Trainmen.

The abstract covers only the Federal cases, as we have no concern whatever with the action of the State courts, as they have no effect whatever on Federal legislation, and it is only proposed Federal legislation that I am considering. Of these twenty-three decisions, two are of the supreme court of the District of Columbia—*Bender v. Union* and *The Bucks Stove and Range Company v. the American Federation of Labor*.

In the *Bucks Stove and Range* case, notice of the motion for preliminary injunction was given two and one-half months before the motion was heard. The motion was fully argued, and the judge held the case under advisement for a month and then made the order for the preliminary injunction, to issue and filed an able and courageous opinion giving his reasons therefor. The case was set down for a hearing about two months after this order, and on the motion to make the injunction permanent the defendants did not contest the decree, which was made final

without argument or criticism, and it is still uncertain whether or not their appeal from the final order will be perfected.

In this case the American Federation of Labor was represented by eminent counsel, Hon. Alton B. Parker appearing for the respondents, and it was probably under his advice that the matter was not contested further, a very significant commentary upon the justice of the order for a preliminary injunction issued by Mr. Justice Gould.

In the *Bender* case, after notice and full argument, the court declined to issue a preliminary injunction. The matter was then carried forward and heard on the pleadings and proofs, on motion for a permanent injunction, which motion the court granted. After full argument the court took the matter under advisement, and then ordered a final writ of injunction to issue. From this decree the respondents entered an appeal. This appeal has since been withdrawn. Such withdrawal operates as a confession by respondents that their case upon the facts was hopeless and unworthy of further contention. If these two cases are characteristic of the twenty-three, they are all above criticism.

Two of these cases (*Boyer v. Western Union Telegraph Co.*, 124 F. R., 246, and *Platt v. Philadelphia and Reading R. R.*, 65 F. R., 660) are denials of petitions for restraining orders by labor unions against employing corporations. These are certainly not instances of abuse of the exercise of judicial discretion in the granting of an injunction, but are rather complaints because the court refused to exercise its discretion in the way desired by the union, and certainly constitute no argument for legislation restricting the power of the courts in that regard.

Another case, that of *Grand Trunk Railroad Company v. Gratiot Lodge et al.*, comprises merely a complaint and order to show cause, no restraining order appearing.

The remaining eighteen cases are injunction orders issued by the circuit courts of the United States from December 10, 1893, the Jenkins case, above referred to, down to and including the restraining order in the case of the *Hitchman Coal and Coke Company v. John Mitchell et al.*, November 27, 1907.

In fifteen of these eighteen cases *ex parte* restraining orders were issued, including two injunctions applied for by receivers (*Ames v. Union Pacific R. R. Co.*, Jan. 27, 1894, and *Farmers' Loan and Trust Co. v. Northern Pacific Co.*, 60 F. R., 803).

Two of these fifteen restraining orders (*Wabash v. Hinshaw*, 121 F. R., 563, and the order issued on the original bill; *Allis-Chalmers Company v. Iron Moulders' Union*) were dissolved and motion for preliminary injunction denied on the hearing on the merits of the case.

In *Kemmerer et al. v. Haggerty* (139 Fed. Rep., 693), also one of these cases, the restraining order was vacated for lack of jurisdiction over the parties, and the court did not therefore go into the merits.

In the celebrated Jenkins case the judge has been vigorously assailed for his action, and in connection therewith was threatened with impeachment proceedings before the Judiciary Committee. In this case the Northern Pacific Railroad Company, having gone into the hands of receivers, two days after their appointment a reduction of from 10 to 20 per cent was ordered in the salaries of employees. The employees threatened to strike to prevent the carrying out of this order, and the receivers applied to the court to restrain the men from executing their threat. Judge Jenkins issued a preliminary injunction containing the following clause:

And from ordering, recommending, approving, or advising others to quit the service of the receivers of the Northern Pacific Railroad on January 1, 1894, or at any other time.

Judge Jenkins subsequently modified the preliminary injunction by striking out this clause. This case was carried on appeal from his refusal to further modify his injunction to the circuit court of appeals. The opinion of the court of appeals was drawn by Mr. Justice Harlan, of the Supreme Court of the United States.

Mr. Justice Harlan discussed the issues in an elaborate and exhaustive opinion. It appears that it was contended on appeal that the circuit court exceeded its powers when it enjoined the employees of the receivers "from combining and conspiring to quit with or without notice the service of said receivers, with the object and intent of crippling the property in their custody or embarrassing the operation of said railroad, and from so quitting the service of said receivers with or without notice as to cripple the property or prevent or hinder the operation of said railroad."

The court held that this clause embodied two distinct propositions—one relating to combinations and conspiracies to quit the service of the receivers, "with the object and intent of crippling the property * * * or embarrassing the operation

of the railroads in their charge; "the other having no reference to combinations and conspiracies to quit, or to the object and intent of quitting, but only to employees "so quitting" as to "cripple the property or prevent or hinder the operation of the railroad."

The court held that the court below (Judge Jenkins) should have eliminated from the writ of injunction the words:

And from so quitting the service of said receivers with or without notice as to cripple the property or prevent or hinder the operation of said railroad—

but upheld the injunction in all other respects.

On the question of the distinction between the two propositions, the court said, after having called attention to the fact that the employees as a body had a right to demand given rates as a condition for their remaining in service and to withdraw from service if it was not granted to them, without reference to the effect upon the property or upon the operation of the road:

But that is a very different matter from a combination and conspiracy among employees, with the object and intent, not simply of quitting the service of the receivers because of the reduction of wages, but of crippling the property in their hands, and embarrassing the operation of the railroad.

In his order modifying the injunction and the reasons given therefor Mr. Justice Harlan simply emphasizes the familiar and well-established distinction between acts done or strikes inaugurated in pursuance of and for the purpose of carrying out a conspiracy and such acts entirely disconnected with such conspiracy.

Of the remaining eleven cases there was no contest in seven of them, nor any demand of any kind made to modify or vacate the restraining order by the defendants.

In the remaining four cases preliminary injunctions in the terms of the restraining order were granted in three instances, after hearing and argument.

The most recent of these instances, that of the Hitchman Coal and Coke Company v. Mitchell and als., requires more than a passing notice. This is the case where an injunction was issued by Judge Dayton of West Virginia, which has been the subject of considerable public criticism, resulting in the publication in the Record of the injunction order; and the judge has been subjected with reference thereto to more or less vigorous aspersion, not only on the part of Members of Congress, but upon the part of men occupying important executive office.

A brief statement of the facts will, in my judgment, show that the action of Judge Dayton in this case was absolutely justifiable, and a proper and necessary exercise of his judicial discretion in the protection of the rights of the parties concerned.

It seems that the Hitchman Coal and Coke Company were the owners of about 5,000 acres of coal; that its plant was equipped with apparatus and facilities which enabled it to produce about 1,400 tons a day; that it necessarily had large contracts for future delivery to practically the full amount of its capacity. That prior to April 1, 1906, they operated their mines by men who were affiliated with the United Mine Workers of America; that on April 1, 1906, a strike was ordered by that association, and that their employees being members thereof went out on a strike by virtue of that order, not because there was any controversy between them and their employers or any dissatisfaction with reference to their employment. On the contrary, they distinctly stated that they had no grievance against the Hitchman Coal and Coke Company, but went out on a strike because coal operators in other sections of the country had refused to accede to certain demands of the association. And although the Hitchman Coal and Coke Company offered to pay them any advance in wages after April 1, 1906, that might be agreed to as a result of the strike in connection with other coal operators if their operators and employees would continue with the work, these members of the United Mine Workers of America were ordered by the gentleman in charge of the union to strike, and did strike, notwithstanding their willingness to agree to accept such proposition.

Under these circumstances the operations of the Hitchman Coal and Coke Company were arbitrarily suspended for about two months, at the end of which time, not being able to get union men, they began to employ men not members of the union, requiring them to contract with them not to join the United Mine Workers of America, and confined their employment to nonunion men. Having found it impossible to rely with confidence upon the United Mine Workers for effective service, they were compelled to avail themselves of nonunion labor and endeavored to protect themselves in its employment by this contract, which under the circumstances was not only a wise precaution, but a clear exercise of their legal rights.

Later, the United Mine Workers of America, by their combination, confederation, and conspiracy, endeavored to compel them to reunite their works, to employ only members of the Mine Workers' Union, to discharge their nonunion labor that they had found it necessary to thus employ in order to continue their operations, and, as the principal and salient feature of this conspiracy, to induce the nonunion employees of the plaintiff, by threats, intimidation or persuasion, to violate the contract they had made with the plaintiffs at the time of their employment not to join the union, and to induce them to join the union in violation of such contracts without the consent and against the protest of the plaintiff.

Under these circumstances Judge Dayton issued his temporary order restraining the defendants from combining and conspiring to interfere with the employees of the plaintiff for the purpose of unionizing the plaintiff's mine without the plaintiff's consent and from inducing their employees to violate their contracts entered into by them when they entered the service of the plaintiff and containing other provisions of a similar character. In other words, he issued a restraining order for the purpose of protecting the plaintiffs in the exercise of their rights to employ such labor as they saw fit to employ and of the making and maintenance of such contracts as expensive experience had shown them the exigencies of their business required, and to prevent them from being compelled by intimidation, threats, or otherwise to discharge their nonunion labor, to reunite their works, to rely again solely upon union labor and thus completely subordinate their investments to the interests of union labor and its absolute control.

It was a perfectly proper exercise of the judicial power, and the plaintiffs were entitled to the protection of the court in that regard.

It was in accordance with well-settled principles and is sustained by the highest authority. The law recognizes the inviolability of the right of contract, and courts of equity will protect that right against conspiracies on the part of third parties to induce one of the parties to break the contract to the injury of the other.

In *Bitterman v. Louisville and Nashville Railroad Company*, 207 U. S., 205, which was a case between the railroad company and a scalper, and involved a contract which made a ticket not transferable by the purchaser, the court held that an actionable wrong is committed by one who "maliciously interferes in a contract between two parties" to induce one of them to break that contract to the injury of the other, and restrained a conspiracy to engage in the sale of such railroad tickets, which involved the inducing, by the scalper, of the violation of the contract upon the part of the purchaser, and held that it was not necessary in order to justify an injunction to restrain the carrying out of such a conspiracy to thus induce one party to violate his contract with another that the conspiracy should "involve the ingredient of actual malice in the sense of personal ill will." The wanton disregard of the rights of the contracting party, causing injury to the party by the violation of the contract, was a sufficient justification for the issuance of the writ restraining the carrying out of such a conspiracy.

This is precisely in point, sustaining Judge Dayton's order upon the crucial point involved in the case.

It was also precisely in line with the remarks made by Judge Gray in his celebrated decision in the anthracite coal strike case, concurred in by every member of the Commission, which included not only Judge Gray, but Carroll D. Wright, John M. Wilson, John L. Spalding, Edgar E. Clark, Thomas H. Watkins, and Edward W. Parker, one of whom, Mr. Clark, was a specific representative on the Commission of organized labor. Judge Gray said:

Our language is the language of a free people and fails to furnish any form of speech by which the right of a citizen to work when he pleases, for whom he pleases, and on what terms he pleases can be successfully denied. The common sense of our people, as well as the common law, forbids that this right should be assailed with impunity. * * * The right thus to work can not be made to depend upon the approval or disapproval of the personal character and conduct of those who claim to exercise this right. If this were otherwise, then those who remain at work might, if they were in the majority, have both the right and power to prevent others who choose to cease work from so doing.

This all seems too plain for argument. Common sense and common law alike denounce the conduct of those who interfere with this fundamental right of the citizen. The assertion of the right seems trite and commonplace, but that land is blessed where the maxims of liberty are commonplaces.

The right to work and the right to employ are very obviously correlative rights. The right that the Hitchman Coal and Coke Company were asserting in their application to Judge Dayton for an injunction was simply the right defined by Judge Gray in this decision, and that was the right to employ whom they liked, when they liked, and how they liked. And

this right, it may be said, has been distinctly sustained by the Supreme Court of the United States in the *Adair* case.

It should be repeated and emphasized that the employees of the Hitchman Coal and Coke Company who were to be displaced by union labor were under specific and express contracts and that a conspiracy to induce the violation of such contracts has always been held to be restrainable as an infringement of a clear legal right. The authorities are innumerable in sustaining this proposition and no authority can be found that denies it, and it should be remembered that Judge Dayton's order in this particular case was expressly predicated upon the knowledge of the defendants of the existence of such contracts and their deliberate purpose to induce their violation.

This was one of the grounds upon which the court proceeded in the case of *Thomas v. Cincinnati, New Orleans and Texas Pacific Company* (62 F. R., 803), in which the able opinion was drawn by Hon. William H. Taft; and the action of Judge Taft in this case is a specific precedent on all fours justifying the action of Judge Dayton in issuing this injunction. He said: "The breach of a contract is unlawful. A combination with that as its purpose is unlawful and is a conspiracy."

While it is true that this temporary restraining order was issued without notice and hearing on the 24th of October, 1907, it was issued only after the filing of a bond under a penalty of \$2,000 on the part of the plaintiff, and the cause was set down for hearing on the first day of the next term of court, to be held in that district on the 14th day of January, 1908, and notice was required to be given upon the plaintiff's motion for a temporary injunction. On this day counsel for the defendants appeared, entered a motion to dismiss as to certain of the defendants not served with process, and asked for a postponement of the hearing as to all the others. The hearing was postponed until the 18th day of March, 1908, when, at the request of counsel for the respondents, the hearing was postponed again until the fourth Tuesday of May, and just as I am preparing this speech I am in receipt of a letter from the clerk of that court informing me that it has been again postponed on the motion of the defendants until the November term, 1908.

No demurrer to the bill has ever been tendered; no suggestion or criticism of the scope of the restraining order has ever been made. The only thing that ever has been done in the case is to have a hearing upon the question as to whether the injunction motion should be delayed and postponed three times at the express request of the respondents, who were the only parties adversely affected thereby.

If the respondents have no complaint as to the scope of this restraining order and have no anxiety to have it heard in order that it may be discharged if ill-founded, what foundation is there for this vicarious, simulated, and sinister indignation that seems to be breaking out in various legislative and executive quarters with reference to the action that Judge Dayton was bound to take.

The contemplation of these salient and uncontrovertible facts must tend to a feeling of humiliating chagrin on the part of those zealous and earnest gentlemen who in season and out of season have been boiling their vicarious and baseless indignation over the action of Judge Dayton in this case. Three times the respondents have been offered an opportunity for a hearing; three times they have declined it and insisted upon a further delay, and now instead of a speedy hearing, they request a delay until November, continuing the restraining order for nearly a year upon their own motion. If they have been oppressed, evidently, up to date, they have not yet discovered it.

What particular advantage would these respondents have derived from a statute giving them a hearing within five days from the time of filing a motion to dissolve? This case is a good illustration of the profound lack of information with reference to this subject and of the indiscriminate criticism to which the court is not infrequently subjected.

This case was the only case specifically referred to by Mr. Samuel Gompers in his hearing before the Judiciary Committee as subject to criticism, although he then did not undertake to make any specific criticism of the action of the judge. As to this, it may well be said that if the list of actions submitted by him are as little open to criticism as is the action of Judge Dayton in this case, there is not one of which either he or his organization have any legitimate right to complain.

While no complaint is made about the action of the judge in the case of the *National Telephone Company v. Kent* in the matter of the restraining order, it is included in the list filed with the committee. This case was referred to by way of criticism in the matter of contempt by Mr. Gompers in the hearing before the committee. It is stated somewhat in detail in the abstract. I can only stop here to say that I hold in my hand a

letter from the attorneys for the respondents, which reads as follows:

WHEELING, W. VA., April 23, 1908.

HON. C. E. LITTLEFIELD, Washington, D. C.

DEAR SIR: Replying to your favor of March 28, 1908, we appeared in the United States circuit court as counsel for the defendants in the case of *National Telephone Company v. Kent et al.* No contempt proceedings grew out of the injunction case. We have no criticism whatever to make of the action of Judge Dayton in awarding the restraining order or in granting the preliminary injunction. Our clients directed us to discontinue their defense and no motion to dissolve or to modify was ever made. The injunction was made permanent as to our clients.

We took no part in the injunction suit brought by the Hitchman Coal Company.

Very truly, yours,

DOVENER & FICKEISEN.

Since the defendants and their counsel have no complaint to make it is hardly necessary to spend time looking for criticism which no one else undertakes to point out.

Upon the strength of these two cases in connection with which Judge Dayton has been criticised, it is proper to say that instead of being a subject of condemnation Judge Dayton has acted the part of a courageous, intelligent, upright judge and should receive the commendation of all good citizens for his proper and judicious administration of the law.

In the remaining three injunctions of the eighteen to which I have referred, in the case of the *Rocky Mountain Bell Telephone Company v. Montana Federation of Labor*, a restraining order was issued after notice of motion and hearing.

In the case of the *Allis Chalmers Company v. Iron Molders' Union* (150 Fed. Rep., 155) a preliminary injunction was granted after filing of supplemental bill and after motion, hearing, and argument.

In the case of *Newport Iron and Brass Foundry Company v. Iron Molders' Union*, September 27, 1904, the record does not disclose whether or not the restraining order was issued before the final decree.

Thus the papers filed with the committee show eighteen restraining orders of the circuit courts of the United States, covering a period of fourteen and a half years, only one of which has been modified by an appellate court.

While I have no complete injunctions that have been issued by Hon. William H. Taft while he was a circuit judge, it is well known that they are generally held in high esteem, and of the orders in the cases filed with the committee there are none which differ substantially from the orders of injunction, so far as I have been able to ascertain, issued by this distinguished judge in *Thomas v. Cincinnati, New Orleans and Texas Pacific Company* (62 Fed. Rep., 803), or *Toledo and Ann Arbor v. Pennsylvania Company et al.* (54 Fed. Rep., 730), so far as these orders appear to be stated in the opinions rendered in the course of the decision.

In the *Thomas v. Cincinnati* case, as an illustration, the defendant, Phelan, was enjoined "from either as an individual or in combination with others, inciting, encouraging, ordering, or in any other manner causing the employees of the receiver to leave his employ with intent to obstruct the operation of his road, and thereby compelling him not to fulfill his contract and carry Pullman cars."

Before leaving the list of the cases filed by Mr. Gompers with the committee, attention should perhaps be called to one other case, that of the *Reinecke Coal Mining Company v. Wood* (112 F. R., 497). Under the circumstances disclosed in that case, the defendants and others had invaded the Hopkins district in great force, establishing armed camps in the vicinity of the non-union mines, which were maintained for many months, and the roads patrolled and the approaches to the mines picketed for the purpose of coercing and intimidating miners to join the union and cause a strike unless the union scale was adopted. Non-union men were constantly threatened and assaulted, and when defensive measures were adopted there were constant collisions and disorders.

The court found that the conditions sought to be brought about were—

Undesired and vigorously repelled by the employers and a vast majority of the employees * * * and said: If this court can not in a case like this protect the rights of a citizen when assailed as those of the complainant have been in this instance, there is a decrepitude in judicial power which would be mortifying to every thoughtful man.

Some of the cases submitted present a greater condition even than that of the *Reinecke Coal Mining Company* case. I do not go so far as to say that all of the eighteen cases of injunctions and restraining orders submitted by Mr. Gompers are parallel in all respects to the *Reinecke Coal Mining Company* case or the *Hitchman Coal and Coke Company* case or the *Western Coal Mining Company v. Puckett* or the *Telephone* case; but in the absence of any specific criticism on their part, I do say that I have not been able to find any out of the eighteen

submitted by them that are the proper subject of legal criticism. If there are any facts involved in any of the cases that subject the action of the court in entering the decrees to proper criticism, these facts have not been called to our attention. And upon the face of the papers submitted to us, instead of the cases showing an abuse of the power of injunction, they would show its reasonable and legitimate exercise, and are only criticisms upon the ground that any use whatever of the power of injunction is understood by the labor organizations to be an abuse of judicial power, a proposition upon which they vigorously insist, as I shall further on show.

Mr. James A. Emery, at my request, has made a careful examination of the Federal Reporter since January 1, 1903, for the purpose of ascertaining how many injunctions of all kinds have been issued by the Federal courts since that date. This investigation discloses that in all there have been issued 328 injunctions, 20 of them only in cases involving labor controversies. In the case of 5 of these 20 there was notice and hearing before the order was issued, leaving only 15 since January 1, 1903, up to date issued without notice and hearing. And there is absolutely nothing in the records to indicate that any of them were excessive or oppressive in their scope, or that they were not fully justified by the facts presented to the court. There is nothing in the record to indicate that they have been the subject of any criticism of any kind or from any source.

I will print as an appendix to this speech a list of all of these cases. I may say that this investigation discloses three cases at least not included in the list submitted by the American Federation of Labor, which covers a period of fifteen years.

In the message of the President transmitted to Congress at the beginning of this session, in discussing the question of injunctions in labor controversies, the following remark appears:

Instances of abuse in the granting of injunctions in labor disputes continue to occur.

Knowing that the Department of Justice is in constant and intimate touch with the circuit courts, and that every restraining order or preliminary injunction issued by any Federal court must be served by a Federal officer, a United States marshal or his deputy, and that the proceeding, if permanent, must become a matter of record in the office of the clerk of the circuit court, and that the Department of Justice would naturally be advised either directly or indirectly of any abuse of judicial power that may have occurred in connection with controversies of this character, on the 11th of March, 1908, I wrote the Attorney-General as follows:

MARCH 11, 1908.

HON. CHARLES J. BONAPARTE,
Attorney-General for the United States, Washington, D. C.

DEAR SIR: In the President's message transmitted to Congress at the beginning of the first session of the Sixtieth Congress the following statement occurs: "Instances of abuse in the granting of injunctions in labor disputes continue to occur," etc.

Will you be kind enough to give me the names of the cases which show the "instances of abuse in the granting of injunctions in labor disputes" which have occurred, and if the cases in which the injunctions were granted are not accessible in publications please send me copies of the decree granting the injunctions, and in either case please call my attention to the specific features of the injunction in which the court is thought to have abused its discretion.

Yours, very respectfully,

C. E. LITTLEFIELD.

The Attorney-General promptly replied as follows:

OFFICE OF THE ATTORNEY-GENERAL,
March 14, 1908.

HON. C. E. LITTLEFIELD, M. C.,
House of Representatives.

MY DEAR SIR: Your letter of the 11th instant has just reached me. There is nothing on file in this Department which would enable me to give you the information therein requested. I do not understand the passage in the President's message which you quote to be in reference to injunctions obtained in suits to which the United States is a party, and this Department is not informed regarding the incidents of suits between private parties, unless these should incidentally involve the interests of the Government. I regret my inability to comply with your request, and remain,

Yours very truly,

CHARLES J. BONAPARTE,
Attorney-General.

It is quite clear from this that if there are any such abuses they have not come to the notice of the Attorney-General. Finding that it would be necessary, in order to get the desired specific information, to apply to the President, on the 27th of March I wrote him as follows:

WASHINGTON, March 27, 1908.

HON. THEODORE ROOSEVELT,
President of the United States.

DEAR SIR: In your message transmitted to Congress at the beginning of this session, the following statement occurs: "Instances of abuse in the granting of injunctions in labor disputes continue to occur."

Having the impression that the information upon which the statement was made came from the office of the Attorney-General, I have written him requesting him to give me the name of the cases referred to, and I am advised by him that he has no information relative thereto.

Will you be kind enough to have sent to me the names of the cases

you had in mind in which the acts of abuse in the granting of injunctions in labor disputes continue to occur, so that I can examine these cases with reference to that question, as I desire to bring down the question of unauthorized injunctions and the particulars in which the jurisdiction may have been exceeded to date? If you have not the particular cases where they can be reached, you may be able to give me the sources of your information and I can inquire there. I am,

Yours, respectfully,

C. E. LITTLEFIELD.

The receipt of this letter up to date has not been acknowledged, and in this connection it may be proper for me to say that while I have written the President scores of letters during the last few years, this is the only letter that I have ever addressed to him the receipt of which has not been acknowledged.

On the 27th of April, 1908, in a special message to Congress, the President referred to the question of injunctions and urged legislation along those lines, with reference to the abuse of injunctions, saying:

There seems, however, much doubt about two of the measures I have recommended—the measure to do away with abuse of the power of injunction and the measure or group of measures to strengthen and render both more efficient and more wise the control by the National Government over the great corporations doing an interstate business.

As regards injunctions, some such legislation as that I have previously recommended should be enacted. They are blind who fail to realize the extreme bitterness caused among large bodies of worthy citizens by the use that has been repeatedly made of the power of injunction in labor disputes. Those in whose judgment we have most right to trust are of the opinion that while much of the complaint against the use of the injunction is unwarranted, yet that it is unquestionably true that in a number of cases this power has been used to the grave injury of the rights of laboring men.

Not having received any reply to my letter of March 27, on the 30th of April I wrote the President again as follows:

APRIL 30, 1908.

HON. THEODORE ROOSEVELT,
President of the United States, White House.

DEAR SIR: Under date of March 27 I wrote you as follows:

"In your message transmitted to Congress at the beginning of this session the following statement occurs: 'Instances of abuse in the granting of injunctions in labor disputes continue to occur.'"

"Having the impression that the information upon which the statement was made came from the office of the Attorney-General, I have written him requesting him to give me the names of the cases referred to, and I am advised by him that he has no information relative thereto."

"Will you be kind enough to have sent to me the names of the cases you had in mind in which the acts of abuse in the granting of injunctions in labor disputes continue to occur, so that I can examine these cases with reference to that question, as I desire to bring down the question of unauthorized injunctions and the particulars in which the jurisdiction may have been exceeded to date. If you have not the particular cases where they can be reached, you may be able to give me the sources of your information, and I can inquire there."

The receipt of said letter not having been acknowledged, I am apprehensive it may not have reached its destination through some error in the mail. I am endeavoring to make my examination complete and exhaustive, and hope, therefore, you will feel at liberty to give me the desired information.

Yours, very respectfully,

C. E. LITTLEFIELD.

On the 4th of May, as I read my morning paper at the breakfast table, I found in it a newspaper article by John Callan O'Laughlin, containing, among other things, the following:

The President has indicated in his several messages to Congress the high importance he attaches to these two pieces of legislation (relative to injunctions in labor disputes and the modification of the Sherman antitrust law), which he considers vital to the welfare of the country. In the case of the anti-injunction bill, he believes that if the men and interests working against its passage are successful, a powerful public sentiment will be aroused within a short time which will force through Congress a bill providing for jury trials in all cases of appeal to the courts by capital. He does not consider the bill introduced in the House a few days ago by Representative PAYNE, of New York, as meeting the situation in a satisfactory way.

The President believes that Congress should enact the bill introduced by Senator BEVERIDGE, of Indiana, in the Upper House, which provides that no temporary injunction or restraining order shall issue without notice, and that if an issue is made a hearing shall be granted within reasonable time, not exceeding seven days.

At present there is no law specifically covering this subject. Under existing practice an employer may obtain a temporary restraining order from a judge in chambers without hearing and without notice, and strikers are arrested and punished for violation thereof.

In his last message the President called attention to the evils of this practice, saying that "those in whose judgment we have the most right to trust are of the opinion that while much of the complaint against the use of the injunction is unwarranted, yet it is unquestionably true that in a number of cases this power has been used to the grave injury of the rights of laboring men."

Representative LITTLEFIELD, of Maine, who in a speech on Saturday night attacked both the anti-injunction and antitrust measures of the President and intimated that they would be smothered in the House Judiciary Committee, wrote to Mr. Roosevelt a few days ago and asked him to state specifically the cases to which he referred. The reply which Mr. LITTLEFIELD received indicates clearly that Mr. Roosevelt does not propose to be drawn into any undue criticism of the courts.

It would be an easy matter for the information which the Maine Member wants by an inquiry directed to the proper sources.

The Administration does not believe with Mr. LITTLEFIELD that if Congress should pass an anti-injunction measure, the Supreme Court would declare it unconstitutional.

As a matter of fact, in the course he has pursued, the President has enjoyed the advice of the Attorney-General and of Secretary Taft, who, for many years served as a circuit judge, and who, through his decl-

sions, is charged by labor with having made government by injunction possible. These two officials will take direct issue with Mr. LITTLEFIELD, and are satisfied that the courts would consider a law, such as that proposed by Senator BEVERIDGE, to be well within the limits of the Constitution.

After finishing my breakfast, on opening my mail I found the following communication:

THE WHITE HOUSE,
Washington, May 2, 1908.

DEAR SIR: An official communication of the specific names and cases which you call for would entitle the persons named to be heard, and would in effect commit the President to a prosecution of certain judges before the Judiciary Committee of the House. It ought not to be necessary to point out the obvious impropriety of such a course. It would be on a par with a communication by the President giving the names of the senior officers of the Army and Navy alluded to in the statement in the President's messages to the effect that the lack of system of selection for promotions in the Army and Navy tended to bring to the highest rank as many men of mediocre as of first-class ability.

If the committee can not itself perceive that there have been instances of abuse in the granting of injunctions, it must give to the statement in the message that such instances exist whatever weight the committee deems proper, without calling upon the President for proof.

Yours, truly,

THEODORE ROOSEVELT.

HON. C. E. LITTLEFIELD,
House of Representatives.

Inasmuch as the only matters relative to the prosecution of any judge that would be cognizable by the Judiciary Committee would be a charge of high crime and misdemeanor constituting an impeachable offense, if the President is correctly informed there must be at least one judge who has so abused his discretion in the granting of a writ of injunction as to subject him to the charge of having thus committed a high crime and a misdemeanor, and if this information be correct it might perhaps well be said that an important public duty would be well discharged if the name of the judge thus committing a high crime and misdemeanor, with the circumstances connected therewith, were submitted to the Judiciary Committee.

If any judge has been guilty of so gross a violation of his official duty I am unable to see any "impropriety" in calling the attention of the Judiciary Committee to that fact. Surely such conduct should not be tolerated, and the Judiciary Committee would not hesitate to invoke the appropriate remedy if the facts justified it. The House quite recently presented a judge at the bar of the Senate, though it is quite true that their zeal in that case proved to be misdirected and their efforts were attended by a humiliating failure. Assuming the information that the President has acted upon in making his general charge to be reliable, I do not propose to discuss the ethical question as to whether the charge ought in fairness to be confined to the judge or judges thus offending, or whether it should be made against the Federal judiciary as a whole, leaving each judge subject to the same cloud as would rightfully affect the criminal judge.

Relative to the question, however, as to whether any judge has so conducted himself and so corruptly abused his discretion as to be guilty of a high crime and a misdemeanor, it is proper to say that I have the authority of the chairman of the Judiciary Committee for the assertion that during his service on the committee, and especially during his service as chairman, there never has come to the committee, either directly or indirectly, from any source, any suggestion that any judge has been guilty of anything like an impeachable offense in connection with the issuing of an injunction; and I may say that, while I have been a member of the Judiciary Committee myself since 1899, there has never come to my knowledge, either directly or indirectly, anonymously or otherwise, any intimation of that character.

I have never noticed any signs of an undue or overtender consideration for the action of the court on the part of gentlemen who have urged anti-injunction legislation, and I feel confident that if they knew of facts that would justify a charge of an impeachable crime, they would not hesitate for an instant to make it.

I may be pardoned for saying a word in passing in commendation of the manly and courageous stand that the chairman of the committee, the gentleman from Wisconsin [Mr. JENKINS], has maintained in connection with this legislation. He has stood up courageously against every attempt that has been made to invade or impair the judicial power, and I am very glad, indeed, to make this statement with reference to his conduct in connection therewith, especially in view of the fact that in other matters of importance in which I have been largely interested, particularly the effort to procure legislation in the line of the regulation of the interstate transportation of intoxicating liquors, the gentleman from Wisconsin [Mr. JENKINS] and myself have been diametrically opposed to each other upon constitutional grounds, as he has conscientiously believed that the legislation supported by me would not be authorized under the Constitution.

It is proper also to say that during this time there have been a number of complaints upon the part of disappointed litigants to the Judiciary Committee by people who have sought through the medium of impeachment proceedings to retry their controversies which have been adversely passed upon by a judge; but in no single instance has any intimation come from any source that any judge in connection with the issue of an injunction had so violated the judicial proprieties as to be a proper subject of investigation by the Judiciary Committee, unless the letter of the President may be held to be an intimation of that character.

In this connection it ought not to be improper to allow the highest court in the land to express its judgment upon the conduct of the inferior Federal judges with reference to the granting of injunctions. In the case of *Ex parte Young*, decided by the Supreme Court of the United States on March 23, 1908, in answering the suggestion that if the Supreme Court upheld the action of the circuit court in that case it would draw to the lower court a great flood of litigation, where one Federal judge would have it in his power to enjoin and nullify the legislative acts of the State, either in criminal or civil actions, the court said:

To this it may be answered in the first place that no injunction ought to be granted except in a case reasonably free from doubt. We think such rule is and will be followed by all the judges of the Federal courts.

If there have been any gross abuses of judicial power in this respect by the Federal judges, it is quite obvious that the Supreme Court of the United States has not up to date learned thereof.

Upon the general question as to whether or not there has been any abuse of this power, it is important and interesting to note that the gentleman from Michigan [Mr. TOWNSEND], who has actively aided in the promotion of the agitation for the enactment of anti-injunction legislation, as is generally understood in cooperation with the President, in a letter written by him with great care, not only for the information of his constituents, but for publication in the press of his State, said:

After looking over the history of this writ in the United States, I have been unable to find a single case where it has been issued improperly.

It is not necessary for me to suggest that the gentleman from Michigan never makes a statement upon an important public question except as the result of thorough and exhaustive judicial investigation, and where he has not been able to find a single case where the writ has been issued improperly it certainly raises a very decided presumption that no such case exists.

It seems that the gentleman from Michigan has not only not been able to "perceive" an instance of abuse; he has been unable "to find a single case."

Under these circumstances I do not hesitate to say that "the committee can not itself perceive that there have been instances of abuse in the granting of injunctions." I submit with entire confidence that it seems to me that when we have called upon the attorney for the American Federation of Labor for instances and specifications and he fails to furnish them; when we have called upon the head of the organization itself for the same information and he furnishes information without calling attention to any criticism; when we have made a thorough and exhaustive investigation of the reported decisions of the courts; when we have applied to the Department of Justice and ascertained that they have no information in relation thereto; when the gentleman from Michigan has made his independent and disinterested search and found nothing; when the Supreme Court, though not referring specifically to labor controversies, says that the judges have exercised due care; and when there has never been from any quarter, prior to the letter of the President, the slightest intimation upon the part of men representing the labor organizations that any abuse of the writ of injunction amounting to a high crime and a misdemeanor has ever been committed—and I think it is hardly necessary to suggest that the gentlemen who appeared before our committee for the promotion of legislation of that character have never been backward in their assaults upon the judiciary, it appears that we have, with reasonable diligence at least, exhausted every available source of inquiry. I feel certain that the President has been deliberately misinformed as to the facts as they exist in connection with this question, because, in my judgment, there are no facts that warrant the suggestion or the intimation, at least since 1893, that a single judge, anywhere, at any time, in any place, under any stress, has been guilty of any abuse of the judicial power in issuing either a temporary restraining order or a preliminary injunction.

In considering a question of this character it must be borne distinctly in mind that so long as juries render verdicts and so long as judges enter up judgments, disappointed litigants and exasperated attorneys will abuse the jury and denounce the court, and the proceedings of the court in the administration of the equity power can not and will not be immune from this prevailing tendency upon the part of the losing suitor to criticize the tribunal in which he receives an adverse determination. HAS CONGRESS POWER TO LIMIT OR CONTROL THE JUDICIAL POWER OF A COURT OF EQUITY.

I premise the legal discussion of this question by the statement, which must be obvious, that I can not expect to exhaustively discuss any of the propositions involved. The most that I can attempt to do is to lay down, so far as I can, the foundation—legal and constitutional—principles involved in this question. Their exhaustive elaboration in detail must be left for another time and occasion. The limits of this speech are not adequate to a full and complete discussion thereof.

The question goes to the very foundation of our whole constitutional system. As I understand our form of government, it involves the exercise of three great coordinate, independent powers—the executive, legislative, and judicial. Each of these powers within its own constitutional sphere is absolutely supreme and independent and can not be controlled or interfered with by any of the other powers.

The Executive, when it comes to the question of the exercise of executive discretion, is absolutely supreme, and the exercise of that discretion can not be controlled by the court. Neither can the Executive be deprived of the exercise of that discretion by the legislative power.

The legislative in all of its acts, in the enactment of legislation, and in the appropriation of money, within its constitutional limitations, is also supreme, and the court can not under any circumstances inquire into or undertake to control the reasons that inspire or the causes that produce any particular legislative act or that result in any particular appropriation. They are legislative acts, and in the exercise of the legislative discretion within its constitutional sphere the legislature is absolutely supreme.

And so, upon the other hand, the judicial power within its sphere and within its constitutional limitation, in cases where the court has jurisdiction, is likewise supreme, and the court in the exercise of the judicial power vested in it by the Constitution can not in any way be controlled or interfered with either by the legislative or the executive branch of the Government. Each within its sphere is absolutely not only independent, but supreme.

DISTINCTION BETWEEN JURISDICTION AND JUDICIAL POWER.

The Constitution of the United States, section 1, Article III, says:

The judicial power of the United States shall be vested in one Supreme Court and in such inferior courts as the Congress may from time to time ordain and establish.

It is to be observed that the same judicial power is vested in the Supreme Court as is vested in the inferior courts. It is vested in the same language, in the same sentence, under the same circumstances and for the same purpose, and it has the same constitutional characteristics and qualities. The Constitution is its source in each case. While it is true that Congress may ordain and establish inferior courts, and in a sense create them and in the same sense can destroy them, when once ordained and established and their jurisdiction is defined, the source from which they derive their judicial power is section 1 of Article III of the Constitution. It is the same source, in the same language, from which the Supreme Court derives its judicial power.

Section 2 provides that the judicial power shall "extend to all cases in law and equity arising under this Constitution," etc. The jurisdiction once defined, my belief is that within the limits of the jurisdiction, the court having the jurisdiction of the subject-matter and the parties, the judicial power to be exercised by it is beyond the power of the legislature to either impair, modify, or control. In this respect there is no distinction between the "inferior courts" and the "Supreme Court." The Constitution vests "The judicial power of the United States" in terms "in such inferior courts as Congress may from time to time ordain and establish." Congress may "ordain and establish" the "inferior court," but when ordained and established the Constitution vests it with the "judicial power."

I am aware that the relation between "jurisdiction" and "judicial power" has been the subject of great investigation and extended discussion, and that there are those who contend, and with a degree of plausibility, that there is, as a constitutional and legal proposition, absolutely no distinction between "jurisdiction" and "judicial power."

I submit, however, upon reason and authority, that there can be no real question that the distinction is fundamental and profound; that while jurisdiction may be defined by the legislature the judicial power is conferred by the Constitution itself. The legislature may limit the jurisdiction of the court to the parties and the subject-matter, but within those limitations it can not impair the exercise of the judicial power.

There are those who seem to entertain the view that there is in some way a distinction in this respect between inferior courts that Congress may from time to time ordain and establish and the Supreme Court, on the ground that the Supreme Court is by name mentioned in the Constitution and that the inferior courts are to be created by the Congress. And it is contended that inasmuch as Congress has the power to create a court it has the power to destroy it, and if it can destroy in whole it can destroy in part, and if it can destroy in part it can impair or modify the judicial power of an inferior court, because that is not a court created by the Constitution.

In my judgment this distinction has no warrant either in reason or authority.

While Congress does "ordain and establish inferior courts" by the express provision of the Constitution, it is also true that as an effective instrumentality for the administration of justice, the Congress ordains and establishes the Supreme Court itself. The Constitution does not provide of how many judges that court shall consist, nor does it provide when or where it shall sit, or how its decrees shall be enforced, or how its procedure shall be regulated. While the Constitution, in general terms, defines the jurisdiction of the Supreme Court, original and appellate, the appellate jurisdiction being specifically subject to the control of Congress, without Congressional action supplying the essential details, providing for appeals, and the manner in which cases shall be conducted, the Supreme Court would be a helpless, inoperative judicial instrument for all substantial purposes. It is a practical impossibility for the Supreme Court, *ex proprio vigore*, without the necessary machinery provided by the legislature, to effectively perform any of its judicial functions, and the constitutional distinction that is said to exist between it and the inferior courts as to "judicial power," because of the power of Congress to "ordain and establish inferior courts" and its assumed lack of power over ordaining and establishing as an effective judicial instrumentality the Supreme Court, has no substantial, logical, or constitutional distinction upon which to rest. While this specific question, the distinction between courts named in and courts authorized to be established by the Constitution, has not been fully discussed and expressly passed upon by the Supreme Court of the United States with reference to the Constitution of the United States, we are by no means at loss for reliable authority for the determination of this question.

The constitution of Connecticut (Art. V) provides that "the judicial power of the State shall be vested in a supreme court of errors, a superior court, and such inferior courts as the general assembly shall from time to time ordain and establish;" and it then provides that the judges of all the courts "shall be appointed by the general assembly in such manner as shall by law be prescribed."

In the case of *Brown v. O'Connell* (36 Conn., 446) the court said:

It is obvious from this view of these provisions that the general assembly have no power or authority to organize courts or appoint judges, by virtue of the general legislative power conferred upon them, and that their authority to do either is special, and derived from article 5 of the constitution alone; and that the judicial power is not conferred by the general assembly, but vests, by force of the constitution, in the courts, when organized pursuant to the special provisions of that article.

Then the court proceeded to hold that the police court, which was one of the inferior courts that the general assembly was authorized to establish, was subject to the same constitutional limitations and provisions as the courts that were specially mentioned by name in the Constitution, and it said:

It is conceded, as it well may be, that the legislature had the power to constitute this police court, under the provisions of section 1 of the fifth article. There is nowhere in that instrument any limitation in respect to the number or character of the inferior courts which they may establish. It was therefore competent for them to provide for the organization of the court in question and to define the jurisdiction it should possess, and when so constituted the judicial power of the State vested in it, by force of the constitution, to the extent of the jurisdiction so defined.

The court in the case of *The Board of Commissioners of Vigo County v. Stout et al.* (136 Ind., 58) very clearly appreciated this distinction when it said, discussing the powers vested in a court by virtue of the provisions of the Constitution:

Courts are an integral part of the Government, and entirely independent, deriving their powers directly from the Constitution, in so far as such powers are not inherent in the very nature of the judiciary. A court of general jurisdiction, whether named in the Constitution or

established in pursuance of the provisions of the Constitution, can not be directed, controlled, or impeded in its functions by any of the other departments of the Government. The security of human rights and the safety of free institutions require the absolute integrity and freedom of action of courts.

Note the specific language of the court, insisting that there is no distinction between the court, so far as its "judicial power" is concerned, "*whether named in the Constitution or established in pursuance of the provisions of the Constitution.*"

In *Jackson v. Nimmo* (71 Tenn., 608) the court also clearly recognized this fundamental distinction between "jurisdiction" and "judicial power," as it says:

In view of this, we think it clear, from the first and eighth sections of the article from which we have quoted, that the preservation of these courts, with their distinctive features, modes of procedure and organism, substantially as independent and separate agencies for the exercise of the judicial power was intended, the courts to remain intact. But the matter of their jurisdiction is not so fixed, nor was it so intended. This was to remain as then until changed by the legislature.

That there was a profound distinction, fundamental and elemental, between "jurisdiction" and "judicial power," in the view of this court, is too clear for argument. The court further says in that case:

To what extent the jurisdiction thus left under control of the legislature may be changed we could not definitely determine. The existence, however, of these courts as parts of the judicial power of the Government is beyond the power of the legislature to destroy. The courts are to be preserved intact, but what shall be the matter over which they shall exercise their powers, subject to certain limitations involved in other clauses of the Constitution, is left to legislative discretion.

And again:

The court must necessarily be existent before it can exercise jurisdiction at all, so that it is a separate and independent thing, both in thought, logic, and fact, from the matter of its jurisdiction. This may be more or less extensive, may fluctuate, be enlarged or diminished, and yet the court remains, as we have said, the same organic thing, ready to do the work that may be assigned to it, whether much or little.

In the case of *Callanan v. Judd et al.* (23 Wis., 350) the court, in discussing this question of jurisdiction and judicial power, said:

It may well be that the legislature may deprive the circuit courts of original jurisdiction in actions for the foreclosure of mortgages. It is unnecessary to determine whether it could or not. But it is quite certain that this clause contains no authority for it, while leaving those courts jurisdiction of this class of actions, to attempt to withdraw from them an acknowledged part of the judicial power and rest it in the jury.

In other words, while the legislature might narrow the jurisdiction or deprive the court of jurisdiction, so long as the court retained the jurisdiction by virtue of the legislative act, it was beyond the power of the legislature to impair the judicial power exercised within the limit of that jurisdiction.

If these well-considered cases of undoubted authority are the law of the land there can be absolutely no question but that there is a substantial and fundamental distinction between jurisdiction and judicial power.

It is to be noticed that the Constitution itself, in article III, section 2, recognizes and applies this fundamental distinction between "judicial power" and "jurisdiction." It provides that "the judicial power shall extend to all cases," etc. In the next paragraph of the same section it specifies the "cases" in which the Supreme Court shall have the original jurisdiction, and the "other cases" in which "the Supreme Court shall have appellate jurisdiction," vesting the judicial power in the court in all of the "cases" over which court is given jurisdiction. Thus the Constitution vests the "judicial power" in all "cases" as to which it has distributed and delimited "jurisdiction."

INVOLABILITY OF JUDICIAL POWER.

The further proposition follows, to which I shall only need to make brief reference, and that is that the legislature can not impair the judicial power. Upon this point the language of the court in the case last cited is significant and conclusive. The court said:

It was an inherent part, and one of the constituent elements, of equitable jurisdiction. If, therefore, it shall appear that, by the Constitution, the equitable jurisdiction existing in this State is vested in the courts, I think it will necessarily follow that it would not be competent for the legislature to divest them of any part of it and confer it upon juries.

They were discussing a statute that attempted to transfer to a jury the right to determine an issue of fact in a court of equity, and upon that point the court further said:

In order to determine the meaning of the phrase "judicial power as to matters of law and equity," it is only necessary to recur to the system of jurisprudence established in this country and derived from England, in which the courts had certain well-defined powers in those two classes of actions. In actions at law they had the power of determining questions of law, and were required to submit questions of fact to a jury. When the Constitution, therefore, vested in certain courts judicial power in matters at law, this would be construed as

vesting such power as the courts, under the English and American system of jurisprudence, had always exercised in that class of actions. It would not import that they were to decide questions of fact, because such was not the judicial power in such actions. And the Constitution does not attempt to define judicial power in these matters, but speaks of it as a thing existing and understood. But to remove all doubt, in actions at law the right of a trial by jury is expressly preserved by another provision.

But, as already stated, the power of a court of chancery to determine questions of fact as well as of law was equally well established and understood. And when the Constitution vested in certain courts judicial power as to matters in equity, it clothed them with this power, as one of the established elements of judicial power in equity, so that the legislature can not withdraw it and confer it upon juries.

And again:

The whole question was determined by this court in the case of *Freeman v. McCollum* and others (20 Wis., 360), where, notwithstanding an express provision in the act of 1864, requiring the courts to submit issues of fact in these cases to a jury, the court decided that the circuit court was not bound to submit such issues to a jury unless it saw fit.

This opinion proceeds upon the express hypothesis that the legislature can not impair the judicial power, and is specifically in point as to the equity power.

In the case of *Little v. The State* (90 Ind., 339) the same propositions are repeatedly laid down, and the court says:

Courts of justice possess powers which were not given by legislation, and which no legislation can take from them. Judicial power exists only in the courts; it can not live elsewhere. (15 Mich., 361; 5 Mich., 409; 79 Ind., 373. Then there are: 7 Cranch, 32; 85 Ind., 318 (44 Am. R., 29); 84 Ind., 380; 72 Ind., 374.)

The judiciary is a coordinate department of the Government and is not a mere subordinate branch, dependent for existence and power upon the legislative will. Purely judicial powers inherent in courts as of the essence of their existence, are not the creatures of legislation, and these powers are inalienable and indestructible.

When it is demonstrated, as I think it is by the authorities hereinbefore referred to, that there is a profound and fundamental distinction between "jurisdiction" and "judicial power," and that "judicial power" is vested in the inferior Federal courts by the Constitution beyond the power of Congress to limit, impair, or control it, the only question that then arises is whether the proposed legislation is or not an impairment of the "judicial power" and before reaching the specific question of injunctions and the attempt to control the issue thereof by the court, I wish, in passing, to make a brief reference to the question of the attempt to control the right of the court to protect itself by its power to punish for contempt in disobedience of its orders.

THE COURT CAN NOT BE DEPRIVED OF THE RIGHT TO PUNISH FOR CONTEMPT.

In the message of the President, under date of April 27, 1908, he says:

In contempt cases, save where immediate action is imperative, the trial should be before another judge.

In Secretary Taft's reply to the president of the Mine Workers' Association some two or three months since, he suggested not only that there should be notice and hearing before any injunction was issued in labor controversies, but that the hearing upon the question of contempt should be before another judge; and the recommendation of the President in his message of April 27 is precisely in line with the reply of Secretary Taft to the president of the Mine Workers' Union. And the first question I wish to call attention to is whether or not it would be competent for the Congress to deprive the judge, while sitting as a court where a contempt is committed, of the power of protecting his own court by his own decree and determining the facts himself, by transferring that right to another judge, or, as suggested in some of the remedies proposed, to a jury for determination.

The opinions of the court upon this question are not open to misconstruction. In the case of *Little v. The State* (supra) the court said:

The judiciary is a coordinate department of the Government, and is not a mere subordinate branch, dependent for existence and power upon the legislative will. Purely judicial powers, inherent in courts as of the essence of their existence, are not the creatures of legislation, and these powers are inalienable and indestructible.

Among the inherent powers of a court of superior jurisdiction is that of maintaining its dignity, securing obedience to its process and rules, protecting its officers and jurors from indignity and wrong, rebuking interference with the conduct of business, and punishing unseemly behavior. This power is essential to the existence of the court. Without the power to punish for contempt, no others could, as decided in *United States v. Hudson*, be effectively exercised. There is no doubt that the power to punish for contempt is an inherent one, for, independent of legislation, it exists and has always existed in the courts of England and America. It is, in truth, impossible to conceive of a superior court as existing without such a power.

The legislature may regulate the exercise of this power—may prescribe rules of practice and procedure, but it can neither take it away nor materially impair it. In the case of *Neel v. State* (9 Ark., 259) the court said:

"The right to punish for contempts in a summary manner has been long admitted as inherent in all courts of justice and in legislative

assemblies, founded upon great principles, which are coeval and must be coexistent with the administration of justice in every country—the power of self-protection. * * * It is a branch of the common law brought from the mother country and sanctioned by our Constitution.

In another opinion by the same court it is said:

"The legislature may regulate the exercise of but can not abridge the express or necessarily implied powers granted to this court by the Constitution. If it could it might encroach upon both the judicial and executive departments, and draw to itself all the powers of government, and thereby destroy that admirable system of checks and balances to be found in the organic framework of both the Federal and State institutions and a favorite theory in the governments of the American people." (State v. Morrill, 16 Ark., 384.)

In that case the whole subject is well discussed, and it was held that the legislature could not restrict the power to punish for contempt to acts defined and enumerated in a statute. The supreme court of Illinois, in 64 Illinois, 195, declare a like doctrine, the court saying:

"This court held, in an early case, that the power to punish for contempts was an incident to all courts of justice, independent of statutory provisions. (Breese, 340.) Courts in other States have also announced the doctrine that this power is inherent in all courts of justice—necessary for self-protection, and an essential auxiliary to the pure administration of the law."

In our own reports we have cases emphatically asserting the doctrine that the power to punish for contempt is *inherent in courts of justice*, and exists without and independent of legislative enactment. (28 Ind., 47; 4 Ind., 627.) There are many cases sustaining this doctrine, and we cite a few of the many: 37 N. H., 450; 2 Vir. cases, 408; 64 N. C., 202.

As the court possessed the inherent power to punish contempts independently of legislation, it is not material that acts such as that committed by the appellant are not defined in our statute concerning contempts of court. The fact that the act is not embraced in any of the statutory definitions of a contempt does not deprive the court of the power to treat and punish it as a contempt, if it be really such. Where the act constitutes a contempt, then the courts may so adjudge it, although it is not within the statutory provisions upon the subject. It is not the legislative declaration that constitutes an act of contempt; it may be such, although there is no statute so declaring. It is, indeed, not for the legislature to declare what the courts shall or shall not consider to be a contempt; that power rests with the judiciary; for to hold differently would result in placing the whole subject within the absolute control of the legislative department, and would thus withdraw from the courts one of the primary and essential elements of their constitution and existence.

And upon the inviolability of this power the case of Fishback v. The State (131 Ind., 311) is also significant. The court there said:

In treating of the subject of contempt, Bishop, in his work on Criminal Law (7th ed.), vol. 2, section 243, says:

"No court of justice could accomplish the objects of its existence unless it could in some way preserve order and enforce its mandates and decrees. The common method of doing these things is by the process of contempt. Therefore the power to proceed thus is *incident to every judicial tribunal, derived from its very constitution, without any express statutory aid.*"

There is no doubt that the power to punish for contempt is an inherent one, for, independent of legislation, it exists, and has always existed, in the courts of England and America. It is in truth impossible to conceive a superior court existing without such a power.

The legislature may regulate the exercise of this power—may prescribe rules of practice and procedure—but it can neither take it away nor materially impair it. (See also 110 Ind., 301.)

Carter's case (96 Va., 805), decided March 16, 1890, is directly in point against the power of Congress to transfer the right to determine the question of contempt to either another judge or to a jury. The pith of the proposition is depriving the judge acting in his judicial capacity, where a contempt has been committed by a violation of his judicial order, of the power to protect his court, by his own decree, and I submit that if he is to be deprived of it, it would be much less objectionable to transfer it to a jury than to another judge.

In Carter's case the court was discussing a statute that transferred to a jury the right to determine whether or not a contempt had been committed. It was passing upon a case of contempt not within the definition of a direct contempt but one as to which the legislature provided for the determination by a jury, and the court said:

If it were a contempt, not within that classification, then it is incumbent upon us to consider whether it was within the power of the legislature to deprive the court of jurisdiction to punish it without the intervention of a jury.

Upon that point the court said, holding that the statute was unconstitutional:

Reading the constitution of the State in the light of decisions of eminent courts which we have consulted, we feel warranted in the following conclusions:

That in the courts created by the Constitution there is an inherent power of self-defense and self-preservation; that this power may be regulated, but can not be destroyed, or so far diminished as to be rendered ineffectual by legislative enactment; that it is a power necessarily resident in and to be exercised by the court itself, and that the vice of an act which seeks to deprive the court of this inherent power is not cured by providing for its exercise by a jury; that while the legislature has the power to regulate the jurisdiction of circuit, county, and corporation courts, it can not destroy, while it may confine within reasonable bounds, the authority necessary to the exercise of the jurisdiction conferred.

We can not more properly conclude this opinion than by a quotation from a great English judge: "It is a rule founded on the reason of the common law, that all contempts to the process of the court, to its judges, jurors, officers, and ministers, when acting in the due discharge of their respective duties, whether such contempts be by

direct obstruction or consequentially—that is to say, whether they be by act or writing—are punishable by the court itself, and may be abated *instantly* as nuisances to public justice.

"There are those who object to attachments as being contrary, in popular constitutions, to first principles. To this it may briefly be replied, that they are the first principles, being founded upon that which founds governments and constitutes law. They are the principles of self-defense; the vindication, not only of the authority, but of the very power of acting in court. It is in vain that the law has the right to act, if there be a power above the law, which has a right to resist; the law would then be but the right of anarchy and the power of contention." (Holt on Libel, chap. 9.)

That there is no distinction in respect to the question of judicial power between the courts specifically named in the Constitution and the courts created by the Congress has already been established, and this Virginia case is, therefore, directly in point upon the proposition that Congress can not deprive the court of the right to protect itself by the exercise of its power to punish for contempt.

It should be observed here that the legislation proposed does not relate to the ordinary power of the court to punish for contempt. It is an attempt to curtail and impair the judicial power of the court to punish a respondent who deliberately violates its order and is thus in contempt of the court. It is a specific contempt of a specific order issued by the court. So far as maintaining the integrity and power of the court and vindicating its title to the respect of the public, it is a matter of vastly greater importance than most of the instances of contempt which ordinarily occur in the administration of justice.

It is also to be observed that while a violation of an order of the court in connection with labor controversies may result in the commission of a crime, it is at the same time a violation of the order, and it is for the violation of the order and not for the commission of a crime that the respondent, under such circumstances, is punished by the court. While the respondent in such a case in violating the order of the court may have by the same act committed a crime, either against the State or against the Federal jurisdiction, he can be punished for that and also punished by the court for the violation of its order, the two being entirely distinct and independent legal proceedings, and having, so far as the remedy or the offense is concerned, no connection whatever with each other.

This whole subject of contempt, and the power of the court relative thereto, and the distinction to which I have just adverted are thoroughly gone over by the court in its opinion in the case of *In re Debs* (158 U. S., 594), the opinion being drawn by Mr. Justice Brewer, speaking for a unanimous court. In the course of the opinion, in discussing the power of the court to protect itself by punishing disobedience of its orders as a contempt, the court said:

But the power of a court to make an order carries with it the equal power to punish for a disobedience of that order, and the inquiry as to the question of disobedience has been, from time immemorial, the special function of the court. And this is no technical rule. In order that a court may compel obedience to its orders it must have the right to inquire whether there has been any disobedience thereof. To submit the question of disobedience to another tribunal, be it a jury or another court, would operate to deprive the proceeding of half its efficiency. In the case of *Yates* (4 Johns., 314, 369) Chancellor Kent, then chief justice of the supreme court of the State of New York, said:

"In the case of the Earl of Shaftesbury (2 St. Trials, 615; S. C. 1 Mod., 144), who was imprisoned by the House of Lords for 'high contempts committed against it,' and brought into the king's bench, the court held that they had no authority to judge of the contempt, and remanded the prisoner. The court in that case seems to have laid down a principle from which they never have departed, and which is essential to the due administration of justice. This principle that every court, at least of the superior kind, in which great confidence is placed, must be the sole judge, in the last resort, of contempts arising therein is more explicitly defined and more emphatically enforced in the two subsequent cases of the *Queen v. Paty* and others, and of the *King v. Crosby*."

And again, on page 371:

"Mr. Justice Blackstone pursued the same train of observation and declared that all courts, by which he meant to include the two Houses of Parliament and the courts of Westminster Hall, could have no control in matters of contempt. That the sole adjudication of contempts and the punishment thereof belonged exclusively and without interfering to each respective court."

In *Watson v. Williams* (36 Miss., 331, 341) it was said:

"The power to fine and imprison for contempt, from the earliest history of jurisprudence, has been regarded as a necessary incident and attribute of a court, without which it could no more exist than without a judge. It is a power inherent in all courts of record, and coexisting with them by the wise provisions of the common law. A court without the power effectually to protect itself against the assaults of the lawless, or to enforce its orders, judgments, or decrees against the recalcitrant parties before it, would be a disgrace to the legislation and a stigma upon the age which invented it."

In *Cartwright's case* (114 Mass., 230, 238) we find this language:

"The summary power to commit and punish for contempts tending to obstruct or degrade the administration of justice is inherent in courts of chancery and other superior courts, as essential to the execution of their powers and to the maintenance of their authority, and is part of the law of the land, within the meaning of *Magna Charta* and of the twelfth article of our Declaration of Rights." (See also *United States v. Hudson*, 7 Cranch, 32; *Anderson v. Dunn*, 6 Wheat., 204; *Ex parte Robinson*, 19 Wall., 505; *Mugler v. Kansas*, 123 U. S., 623, 672; *Ex parte Terry*, 128 U. S., 289; *Eilenbecker v. Plymouth County*, 134

U. S., 31, 36, in which Mr. Justice Miller observed: "If it has ever been understood that proceedings according to the common law for contempt of court have been subject to the right of trial by jury, we have been unable to find any instance of it."—*Interstate Commerce Commission v. Brimson*, 154 U. S., 447, 488.)

In this last case it was said, "surely it can not be supposed that the question of contempt of the authority of a court of the United States, committed by a disobedience of its orders, is triable, of right, by a jury."

In brief, a court enforcing obedience to its orders by proceedings for contempt is not executing the criminal laws of the land, but only securing to suitors the rights which it has adjudged them entitled to.

Here the unanimous conclusion of the Supreme Court of the United States is that in the last report every court "must be the sole judge of contempts arising therein," and when they indorse that proposition and say that to transfer the determination of that question to another tribunal, be it a jury or another court, which is the proposition suggested by the President in his message and by Secretary Taft in his reply to the Mine Workers' Union, "would operate to deprive the proceeding of half its efficiency." I feel bound to say that I must part company with the President and the Secretary and stay with the court and its solemn determination, and under no circumstances will I consent to the enactment of any legislation that will be thus in violation of what I believe to be profound, inherent, essential, fundamental principles.

The legislature has no power to deprive the court of the inherent right to protect itself, and if it had, I could not agree to legislation that would "be a disgrace to the legislation and a stigma upon the age which invented it."

It can not be necessary, in general, for me to further elaborate the proposition that the basis of the charge of the labor organizations against the courts proceeds entirely and absolutely from an incorrect hypothesis. The contempt proceedings of which they complain always arise where specific orders of the court have been violated. The parties are punished by the court not because they have committed crimes, not because the act itself may have been the commission of a crime, but because the act is a violation of the specific order of the court; and it is to maintain its dignity and enforce its decrees that the parties, under such circumstances, are held for contempt.

THE CONSTITUTIONAL RIGHT OF EQUITABLE PROCEDURE.

Thus far the discussion has involved the inviolability of the judicial power in general and the constitutional right of the citizen to its full, unlimited, and unhampered exercise. I think it is equally well settled that the Constitution as clearly guarantees to each citizen the right to the exercise by the chancellor of the full equity power of the court.

In the case of *Brown v. Kalamazoo Circuit Judge* (75 Mich., 274), a mandamus was applied for to compel the judge to set aside a decree in a chancery suit where, pursuant to a statute, the facts had been tried by a jury, and to proceed to hear the cause in the usual manner, passing upon both the law and the facts as a chancellor. In ordering the mandamus to issue requiring the cause to be brought forward and heard in the usual manner, in accordance with the well-settled equity procedure, the court, among other things, said:

It is within the power of a legislature to change the formalities of legal procedure, but it is not competent to make such changes as to impair the enforcement of rights. * * * The functions of judges in equity cases in dealing with them is as well settled a part of the judicial power, and as necessary to its administration, as the functions of juries in common-law cases. Our constitutions are framed to protect all rights. When they vest judicial power they do so in accordance with all of its essentials, and when they vest it in any court they vest it as efficient for the protection of rights, and not subject to be distorted or made inadequate. The right to have equity controversies dealt with by equitable methods is as sacred as the right of trial by jury. Whatever may be the machinery for gathering testimony or enforcing decrees, the facts and the law must be decided together; and when a chancellor desires to have the aid of a jury to find out how facts appear to such unprofessional men, it can only be done by submitting single issues of pure fact, and they can not foreclose him in his conclusions unless they convince his judgment.

And again:

In all ages, and in all countries, this distinction by nature, which was never called "equitable" except in English jurisprudence, where it was first so called from an idea that the rights were imperfect because unknown in the rude ages, when property was scanty, and business almost unheard of in the regions outside of great cities, has been recognized and provided for by suitable methods substantially similar in character. * * * The system of chancery jurisprudence has been developed as carefully and as judiciously as any part of the legal system, and the judicial power includes it, and always must include it. Any change which transfers the power that belongs to a judge to a jury, or to any other person or body, is as plain a violation of the Constitution as one which should give the courts executive or legislative power vested elsewhere. The cognizance of equitable questions belongs to the judiciary as a part of the judicial power, and under our Constitution must remain vested where it always has been vested heretofore.

Note the significance of the language—

the right to have equity controversies dealt with by equitable methods is as sacred as the right of trial by jury.

To the same point is the case of *Callanan v. Judd et al.* (supra), where the court said:

In order to determine the meaning of the phrase "judicial power as to matters of law and equity," it is only necessary to recur to the system of jurisprudence established in this country and derived from England, in which the courts had certain well-defined powers in those two classes of actions. In actions at law they had the power of determining questions of law, and were required to submit questions of fact to a jury. When the Constitution, therefore, vested in certain courts judicial power in matters at law, this would be construed as vesting such power as the courts, under the English and American system of jurisprudence, had always exercised in that class of actions. It would not import that they were to decide questions of fact, because such was not the judicial power in such actions. And the Constitution does not attempt to define judicial power in these matters, but speaks of it as a thing existing and understood. But, to remove all doubt, in actions at law the right of a trial by jury is expressly preserved by another provision.

But as already stated, the power of a court of chancery to determine questions of fact, as well as of law, was equally well established and understood. And when the Constitution vested in certain courts judicial power as to matters in equity, it clothed them with this power, as one of the established elements of judicial power in equity, so that the legislature can not withdraw it and confer it upon juries.

It follows, therefore, that the equity power vested in the courts by the Constitution can not be controlled, impaired, or invaded by the legislature.

RELIEF BY INJUNCTION IS AN INHERENT EQUITY POWER.

What, then, is the equity power so far as the right to injunctive relief is concerned?

In the case of *State of Pennsylvania v. The Wheeling, etc., Bridge Co. et al.* (13 Howard, 563) the Supreme Court of the United States held:

In exercising this jurisdiction the courts of the Union are not limited by the chancery system adopted by any State, and they exercise their functions in a State where no court of chancery has been established. The usages of the high court of chancery in England, whenever the jurisdiction is exercised, govern the proceedings. This may be said to be the common law of chancery, and since the organization of the Government it has been observed.

Now, what with reference to notice and hearing in matters of injunction was the common law of chancery or the usages of the high court of chancery in England at the time of the adoption of the Constitution?

In the case of *Smith v. Aykell* (3 Atkins Chancery Report, 566), decided in 1747, the lord chancellor issued a restraining order without notice and without hearing, in accordance with the then well-settled procedure of the high court of chancery. In Adams' Equity, the work of an English author, written in 1845, the following rule is laid down with reference to ex parte injunctions, at page 694:

The ordinary mode of obtaining this injunction is by moving after notice to the defendant; but in particular cases, where giving notice might accelerate the mischief, it will be granted ex parte and without notice; e. g., in case of waste, or of negotiating a bill of exchange, and, even where that special ground does not exist, yet if the act to be prohibited is such that delay is productive of serious damage, as in piracies of copyright and patent, an ex parte injunction may be obtained. In order to obtain an injunction ex parte the application must be made at the first possible moment, and all the facts must be fully and honestly stated; if any concealment or misrepresentation be detected, the injunction will be dissolved, although the facts, if truly stated, would have been sufficient to sustain it.

A reference to Eden on Injunctions (1821), also an English work, discloses the same universal and immemorial practice of issuing restraining orders without notice and without hearing where the chancellor is confronted with threatened irreparable harm with an inadequate remedy at law.

That temporary restraining orders, without notice and without hearing, ex parte, have been issued from time immemorial by the courts of equity is, in my judgment, beyond question. And perhaps at this point the fact should be noted that there is a substantial distinction between a restraining order and a preliminary injunction and a final writ of injunction, which is well stated in the case of *Riggins v. Thompson* (96 Tex., 157) in an opinion written by Chief Justice Gaines, in which he says:

We understand that under the practice of the American courts three species of injunctions may be issued: (1) A restraining order, which is defined to be: "A restraining order is an interlocutory order made by a court of equity upon an application for an injunction and as part of the motion for a preliminary injunction, by which the party is restrained pending the hearing of the motion" (Bouvier's Law Dict., 2 ed.); (2) one which is intended to operate, and which does operate unless dissolved by an interlocutory order, until the final hearing; and (3) a perpetual injunction, which can be properly ordered only upon the final decree.

The obvious purpose of a restraining order is to maintain the status quo until a hearing can be had upon the merits. If it be true that according to the immemorial practice of courts of equity restraining orders for the purpose of maintaining the status quo have been issued without notice and without hearing ex parte, then under the statement of the court in *Pennsylvania v. Wheeling* (supra), it follows that it is a part of the equitable judicial power vested in the courts by the Constitu-

tion, and that it can not be impaired by legislative action. Where the court has the jurisdiction of the subject-matter and of the parties, the litigant who presents a case of threatened irreparable harm with no adequate remedy at law, under the authority of *Brown v. Kalamazoo Circuit Judge* (supra) has a constitutional right to such an exercise of the judicial power as will secure to him the preservation and enjoyment of his property.

Let me give a few practical illustrations for the purpose of applying the legal proposition. The plaintiff may be possessed of a piece of property as to which a conspiracy may have been formed for the purpose of destroying it. If, on the presentation of his application for an injunction to restrain the consummation of the conspiracy, notice is given, it is an obvious suggestion to the conspirators to accomplish their object before a decree can by any possibility be entered, especially if they comprise a large body of men, which is ordinarily the case in conspiracies such as these we are now considering. Notice of an application for an injunction to restrain the destruction of the property as a result of the already formed conspiracy would simply be a notice to carry the conspiracy into effect and destroy the property before, by any possibility, the decree could be entered.

Now, if the legislature can step in and say that under no circumstances or conditions can a restraining order be issued except after a given notice and hearing, it is equivalent to a legislative determination in advance adverse to the plaintiff that under no circumstances can he present a state of facts disclosing a threatened irreparable injury without an adequate remedy at law. In other words, it is equivalent to saying that when a suitor over whom a court of equity has jurisdiction enters the court, presents his cause, discloses a state of facts where irreparable harm is threatened and where, if notice is given, irreparable injury will be done before the decree can be entered, the legislature can step in and by the exercise of its power arbitrarily say that under such circumstances no court of equity shall issue a decree which will give to the citizen that protection to which he is entitled by virtue of the provisions of the Constitution. The legislature determines in advance that what the suitor would otherwise be entitled to as due process of law in a court of equity can not and shall not be exercised in his case in time to preserve to him his rights and protect his property.

It is obvious that, if after the giving of notice, the conspiracy is consummated and the property destroyed, from that time on a court of equity has no power whatever to intervene for the protection of the suitor who had thus placed himself in a position where he was entitled to the exercise and protection of the judicial power, because a court of equity can only intervene to prevent the commission of a wrong. It affords no remedy for wrongs already committed. Redress for such wrongs can only be obtained in courts of common law. In a case like that supposed the act of the legislature would deprive the citizen of what he would otherwise be entitled to—due process of law in a court of equity for the protection of his property.

If it were a note about to be negotiated which between the original parties would be so tainted with fraud as to be open to successful defense, and in the hands of an innocent purchaser for value could not be successfully defended against, the same conclusion would follow, because after notice that an injunction was to be applied for to prevent its negotiation the note might well be negotiated before a decree could possibly be entered.

Or take for instance the case of the threatened misapplication of trust funds by a trustee. If notice and hearing were incumbent upon the court before the misapplication could be restrained, the mere notice that the order was contemplated would be a notice to the delinquent trustee to misapply the funds before the decree could by any possibility be entered.

In these instances, any one of which might well happen, each of them presenting a case of threatened irreparable harm without adequate remedy at law, if it be competent for the legislature to step in and say that no injunction shall be granted except after twenty-four hours' notice, it may extend the length of notice indefinitely, and thus adversely determine that the plaintiff shall be deprived of what before the enactment of the law was his right to due process of law under the provisions of the fifth amendment to the Constitution.

Under the Constitution the citizen can not be deprived of life, liberty, or property without due process of law. When the citizen presents to the court in equity a state of facts showing threatened irreparable harm with an inadequate remedy at law, "due process of law" in "controversies dealt with by equitable methods" entitles him to the issuance without notice and hearing of a temporary restraining order, to preserve his property

until a hearing can be had upon the merits. If the order is issued, his property is preserved. The denial of this "due process of law" may, and probably would, result in the destruction of his property. Here the legislature steps in and by its arbitrary act declares that under no circumstances shall the suitor have his constitutional right to "due process of law" accorded to him until a notice shall have been given and a hearing had, which will precipitate the destruction of his property, leaving him without an adequate remedy at law, and depriving "due process of law" of all of its value. What answer is there to the proposition that such legislation deprives the citizen of his property "without due process of law" in violation of the fifth amendment to the Constitution.

I do not believe that the legislature has the power to thus impair the equitable methods of procedure which, under the authorities cited, are guaranteed to the citizen as inviolably as is the right of trial by jury in actions at law.

THE ACT OF MARCH 2, 1793, DOES NOT AFFECT THIS CONCLUSION.

It may be said, however, by way of answer to this contention, that an early statute of the United States provided for notice and hearing before an injunction should be issued, and that statute, if my contention is sound, was unconstitutional.

It is true that on the 2d of March, 1793, the Congress of the United States enacted a statute which read:

Nor shall any writ of injunction issue in any case without reasonable previous notice to the adverse party or his attorney of the time and place of moving the same. (Chap. 22, vol. 1, U. S. Stat. L., p. 534.)

It may be said with reference to this statute that it does not in terms apply to a restraining order, but is confined by its terms to "a writ of injunction," the distinction between which and a temporary restraining order is well settled in the Texas case already cited. It does not in terms undertake to control the judicial power in issuing a temporary restraining order.

There are two early cases, which I will not stop to cite, where the question of whether or not the notice given was reasonable under this statute was the subject-matter of discussion. The court in each case proceeded upon the assumption that a notice was necessary, and passed upon the simple question as to whether, in those particular cases, it was or was not reasonable. The question as to whether or not the act applied to temporary restraining orders, and whether or not, if it did, it was a constitutional exercise of legislative power, does not appear to have been raised or considered.

It is also true, however, that in the case of *Schermerhorn v. L'Esperance* (2 Dallas, 360), decided in the October term, 1796—opinions by Justices Peters and Wilson—the court sustained a temporary restraining order which was issued without notice and hearing, ex parte, and continued it until a hearing upon the merits. While the case itself, as reported, does not clearly disclose the fact that the temporary restraining order was issued without notice and hearing, I have made an investigation of the case and find from the original files and papers in the case that such was the fact. The restraining order in that case was issued without notice and hearing on the 2d of May, 1795, by the circuit court sitting in Philadelphia, two years after the statute above referred to was passed. As indicating the fact that the attention of the Government was called to the proceeding, it may be said that one of the respondents was an officer of the United States Treasury. So that within two years after this statute requiring notice before a writ of injunction should issue, in a building adjoining that in which the act was passed, and in the same district where the Congress was sitting, the circuit court issued a temporary restraining order without notice and without hearing, as an ex parte proceeding, indicating very clearly either that the court considered the statute of no validity or else was of the opinion that it did not apply to a temporary restraining order.

It is extremely significant as demonstrating what the well-recognized equity practice in relation to temporary restraining orders was at that early date, notwithstanding this statute, that the counsel in this case, Mr. Lewis, moved for a rule to show cause why the injunction should not be dissolved, and endeavored to support his motion on two grounds, the first of which was "that the injunction was issued irregularly, as there was no affidavit made of the truth of the allegations contained in the bill." The report shows that he said in support of this proposition, on the first ground, that "he did not object because the injunction had issued before a subpoena was served, as there were various cases in which justice could not otherwise be attained." This is a conclusive demonstration not only of the existence of the well-recognized equity procedure, but of the construction placed upon this early statute by the profession and by the court, and shows that the attention of the court was specifically called to the fact that no notice had been given before the temporary restraining order was issued in that case. It will be noticed that the law as stated

by the distinguished counsel in that case as early as 1796 is precisely the law as I have stated it in the course of this argument.

THE ACT OF 1793.

There is apparently some misconception of the circumstances under which this old statute of 1793 ceased to be a part of the statute law. The gentleman from Texas [Mr. HENRY] expressed what is no doubt the prevailing misconception in relation thereto. In a speech which appears in the RECORD under date of February 19, 1908, he says, in discussing a bill of his requiring notice and hearing before a temporary restraining order should be issued:

Gentlemen, such was the law for more than three-quarters of a century. It was inadvertently changed when the statutes of the United States were recodified.

This is apparently a discovery of another "crime of '73." The statement of the gentleman from Texas is erroneous in three particulars: First, the original statute did not apply to a temporary restraining order but applied only to the writ of injunction; second, the alleged change was not the result of an inadvertence; and third, it was not made when the statutes were recodified.

I am fully aware that the statement of the gentleman from Texas is the popular misconception. I feel certain, however, that the gentleman from Texas, who is a very bright and able lawyer, could not have made his statement as the result of his own investigation, but must have relied for his information upon some other authority. I have been told that it was the discovery of an ill-informed and overzealous executive officer. It should be stated, before calling attention to the circumstances under which the existing statute was enacted, that the courts were authorized by Congress in patent cases to grant injunctions in accordance with the course and principles of courts of equity, as early as 1819, and from that time up to 1870, by various statutes, which may be found as follows:

Third Statutes at Large, page 481, chapter 19; Fifth Statutes at Large, page 117, section 17; volume 16, page 206.

The present statute was enacted in 1872, prior to the existing revision of the Revised Statutes. Section 718 of the Revised Statutes reads as follows:

Whenever notice is given of a motion for an injunction out of a circuit or district court, the court or judge thereof may, if there appears to be danger of irreparable injury from delay, grant an order restraining the act sought to be enjoined until the decision upon the motion, and such order may be granted with or without security, in the discretion of the court or judge.

This section was section 7 of the act "to further the administration of justice," as passed by the Senate April 17, 1872, and it became a law on June 1, 1872 (U. S. Stat. L., vol. 17, chap. 255, p. 197). It appears now, in the Revision of the Statutes of 1874, as I have already said, as section 718.

So that the alleged change in the law was by no means an inadvertence but was deliberate and premeditated. The debate that occurred in the Senate is very instructive upon this question as to whether there was any occasion for any change in order to give to the court the power to issue a temporary restraining order when confronted with threatened irreparable harm with an inadequate remedy at law. The practice was stated in the debate as follows, by the ablest lawyers in the Senate:

Mr. STOCKTON. I understood the chairman of the committee a few moments ago to say that injunctions were always granted ex parte.

Mr. TRUMBULL. Not always; they may be.

Mr. CARPENTER. I understand if any judge having the jurisdiction by law to grant an injunction has presented to him a bill in equity, fortified with proofs which entitle the party by the acknowledged and usual practice of a court of equity to have an injunction, the judge has no discretion to deny it.

Mr. FRELINGHUYSEN. I think that elementary provision of the law even I may have been presumed to have heard and known of.

Mr. CARPENTER. Therefore I was astonished to hear the Senator deny it.

Mr. FRELINGHUYSEN. I did not deny it. (46 Cong. Globe, 2492.)

This debate shows that at that time, at least, the practice was universal for the courts of equity to grant temporary restraining orders without notice and hearing when they were confronted with threatened irreparable harm.

It is very clear that Congress understood that, in making this section a part of a general statute, they were putting into statutory form the existing law.

It does not seem to me, therefore, that the act of 1793 in any way impairs the validity of the proposition that I maintain, that the Congress has no power by an arbitrary act of legislation to deprive the court sitting in equity of the judicial power to protect in accordance with immemorial equity procedure the right of the suitor who presents to it a case showing threatened irreparable harm with an inadequate remedy at law.

For these reasons I am unable to agree with the contentions either of the President or the Secretary of War when they in-

sist upon the passage of legislation which would deprive the court of its essential and inherent power; and upon this point I take pleasure in saying that I am supported by the distinguished gentleman from Mississippi [Mr. WILLIAMS], who, on the 27th of March, 1908, said:

Of course, I take it that nobody will understand the President or I to mean that there should be any limit upon temporary restraining orders when issued for the purpose of preventing immediate destruction of property or of life or limb.

In this statement I understand the gentleman from Mississippi to state clearly the equity power of the court, and to not only assent thereto, but to insist that it shall still remain entirely unimpaired, although it is quite true that, having made this statement, the gentleman endeavored by a resolution to commit the House to the enactment of a bill which would absolutely deprive the court of that power.

In this, as I understand it, the gentleman from Mississippi [Mr. WILLIAMS] was engaged in making political history, not in a serious attempt to change the law.

CONGRESS CAN NOT DEPRIVE THE CITIZEN OF THE EQUAL PROTECTION.

The particular legislation, however, that the President urged the enactment of, in my judgment, is subject to another constitutional objection in addition to those which I have already urged. If I am able to rely upon the newspaper article written by Mr. O'Laughlin, which contains the substance of the letter already written to, but not at that time received by me from the President, and therefore evincing internal indications of being an authoritative statement of the President's position with reference to legislation, the President urged the enactment of what is known as the Beveridge bill. The Beveridge bill reads as follows:

A bill (S. 4533) concerning injunctions in labor disputes.

Be it enacted, etc., That no temporary injunction or temporary restraining order shall be issued without notice by any court of the United States in controversies between employers and employees, and all such temporary injunctions and temporary restraining orders shall be heard by the court issuing the same within a reasonable time, not to exceed seven days from the date when said temporary injunction or temporary restraining order is issued: *Provided*, That said court, upon agreement of parties or at the application of the defendant, may postpone said hearing to a later date than said seven days, in the discretion of the court: *Provided further*, That nothing herein contained shall be held to authorize the issuing of a restraining order or an injunction in any case in which the same is not authorized by existing law.

It will be noticed that this expressly provides that no temporary injunction or temporary restraining order shall be issued without notice, and it confines this provision to "controversies between employers and employees," so that it is not only subject to the constitutional objection that it arbitrarily impairs the power of the court to protect the property of the suitor, but it is partial in its operation, as it expressly limits its remedial features to a particular class in the community and relates solely to labor controversies between employers and employees.

That Mr. O'Laughlin is correct in his statement that this is the bill the enactment of which the President urges, is, I have no doubt, true, because it is in precise accord with the legislation urged by the President during the last Congress. At that time a bill, practically the same in terms, was introduced by Mr. Gilbert, of Indiana. It reads as follows:

A bill (H. R. 9328) to regulate the granting of restraining orders in certain cases.

Be it enacted, etc., That in cases involving or growing out of labor disputes neither an injunction nor a temporary restraining order shall be granted except upon due notice to the opposite party by the court in term, or by a judge thereof in vacation, after hearing, which may be ex parte, if the adverse party does not appear at the time and place ordered: *Provided*, That nothing herein contained shall be held to authorize the issuing of a restraining order or an injunction in any case in which the same is not authorized by existing law.

That this bill was specifically indorsed by the President appeared clearly before the Judiciary Committee when these bills were being heard. Mr. H. R. Fuller, legislative representative of the Brotherhood of Locomotive Engineers, Brotherhood of Locomotive Firemen, Order of Railway Conductors, and Brotherhood of Railroad Trainmen, on the 14th of March, 1906, in answer to a question, on page 14 of the hearing, said:

Mr. FULLER. Now, I do not care to get too much in detail; the President's message speaks for itself. The President's message is an indorsement of this bill identically as it is before you.

The bill to which he referred was H. R. 9328.

Mr. GILLET. Has the President expressed himself as being in favor of this bill?

Mr. FULLER. He has; it is an Administration bill.

And further:

Mr. LITTLEFIELD. Do you understand, Mr. Fuller, that the Administration is still behind it, urging its passage?

Mr. FULLER. I do, sir; the President's message speaks for itself.

Before discussing the legal objections to this legislation proposing as it does to confine its remedial features to one class only and to deprive the public of protection in cases of contro-

versies between employees and employers, and conceding to it protection in cases of all other controversies, it may be of interest to explain the attitude of the labor organizations with reference to this particular measure.

After Mr. Fuller had completed his statement before the committee, urging the passage of what I have called the Gilbert bill (H. R. 9328), Mr. Andrew Furuseth addressed the committee as a representative of the American Federation of Labor, and at the conclusion of his remarks he used the following emphatic language with reference to H. R. 9328:

It is said that this bill has the indorsement of the President. That can not be. If he understands this bill and then gives to it his indorsement, he is an enemy to honest labor struggling under adverse conditions for a better life—nay, he would be an enemy to human liberty. We do not believe, will not believe it.

In the labor movement, as well as in all walks of life, there are differences of opinion, divergent perspectives.

Organized labor demands an anti-injunction law that will absolutely limit the power of judges when they deal with controversies growing out of labor disputes; not a law that will be used as a compulsory arbitration act.

We want H. R. 4445.

We don't want H. R. 9328.

Mr. Furuseth knew that the bill he denounced had the indorsement of the President, as he was present and heard Mr. Fuller's statement. His statement was deliberate and premeditated, as he read it from a typewritten memorandum.

With reference to this characterization of the bill, thus having the indorsement of the President, it is interesting to note also that at the same hearing and within fifteen or twenty minutes after Mr. Furuseth made his statement, Mr. Gompers, president of the American Federation of Labor, addressed the committee. Among other things he said:

The essence of the question has been very amply set forth in the discussion of the question by Mr. Furuseth, who has addressed you this morning. I should say now that we—and I speak as a representative of the American Federation of Labor—are not in favor of that which Mr. Fuller has called the Administration bill (pp. 34-35).

The following colloquy then occurred:

Mr. LITTLEFIELD. Of course. But is the organization represented by Mr. Furuseth federated with your organization?

Mr. GOMPERS. Yes, sir.

Mr. LITTLEFIELD. They all oppose H. R. 9328?

Mr. GOMPERS. Yes; and are in favor of the Little bill.

Mr. LITTLEFIELD. I simply ask this as a general question. Do your organizations indorse the severe restrictions placed upon H. R. 9328 by Mr. Furuseth?

Mr. GOMPERS. We are opposed to the bill; whether in the exact language of Mr. Furuseth or not is not the question.

Mr. LITTLEFIELD. Yes.

Mr. GOMPERS. But we are apprehensive—yes, sir—of that bill, and we have grave reasons for being apprehensive.

Mr. LITTLEFIELD. Mr. Furuseth had some very vigorous opinions. I did not know whether you entertained or shared with him in those.

Mr. GOMPERS. I share them very largely.

Mr. LITTLEFIELD. Yes.

Mr. GOMPERS. I only had the opportunity of casually hearing them, and hence I am not in a position to say whether every word in what Mr. Furuseth said meets my indorsement.

Mr. LITTLEFIELD. Oh, yes; of course not.

Mr. GOMPERS. But the essence of it meets my indorsement.

Mr. LITTLEFIELD. Very well.

It will be noted that the reason given by Mr. Gompers for not indorsing every word that Mr. Furuseth said was the fact that he only "casually" heard his statement. It ought to be stated that the quotation made from Mr. Furuseth's remarks contained all that he said that could have been referred to under the term of "vigorous opinions," and the remark was made by him at the very conclusion of his address, only about ten or fifteen minutes before Mr. Gompers began his statement.

I do not propose to enter into any discussion with Mr. Gompers as to whether, as a matter of fact, he really intended to indorse the vigorous opinions of Mr. Furuseth or not, and will content myself with stating just exactly what the record shows upon that point, because at this session, before the Judiciary Committee, the matter was called to Mr. Gompers's attention and he made his explanation in his own way, as I now give it:

Mr. LITTLEFIELD. So as to give you an opportunity to make a statement in relation to it. In the same statement, the typewritten statement read by Mr. Furuseth at the last Congress, he used this language: "It is said that this bill has the indorsement of the President. That can not be. If he understands this bill and then gives to it his indorsement, he is an enemy to honest labor struggling under adverse conditions for a better life—nay, he would be an enemy to human liberty. We do not believe, will not believe it."

Do I understand that this is simply Mr. Furuseth's individual statement?

Mr. GOMPERS. Yes, sir.

Mr. LITTLEFIELD. And not concurred in by the organization or by yourself?

Mr. GOMPERS. No, sir. But since you ask me that question, it was that very thing I had in mind when I sought to ask you to question me further upon Mr. Furuseth's statement. It was just that very thing I had in mind. You at one time charged me with being present and hearing that statement without one word of protest, and giving it by implication my approval. As a matter of fact, during Mr. Furuseth's reading of that paper I was called out in the lobby not less than a

half dozen times, and I think I was scheduled to speak immediately after Mr. Furuseth, and I think there was another gentleman who, because he had to leave, spoke between Mr. Furuseth and me, and it was necessary for me to be called into the committee room by one of my friends, who said that Mr. Furuseth had finished and that I might be called upon at any moment. I want to say that I never heard that part of the argument read; never knew of its existence until a week or ten days after. But that does not make very much difference. I think it was too strongly, and I should say improperly, made. The criticism even by indirection was not one that I would indorse or countenance, and you will observe that Mr. Furuseth says that he does not believe it. He does not believe that if the President understood all that was involved that he would still advocate the passage of that bill.

Further on in the same statement Mr. Gompers had his attention called to the matter again, and the following occurred:

Mr. LITTLEFIELD. Calling your attention to the statement of Mr. Furuseth, in which he used the vigorous language which has been quoted and that you have referred to, I want to call your attention to this fact, that at a hearing before the committee in the Fifty-ninth Congress you appeared and made a statement shortly after he made a statement on the same day. The only intervening statement between his and yours is the statement of Mr. Emile Twyeffort, which appears on pages 31, 32, and 33, occupying two full pages of the printed record, and which I presume took about fifteen or twenty minutes in its delivery. You then made your statement, and in the course of your statement these inquiries and answers appeared in reference to this statement of Mr. Furuseth, and I simply want to call your attention to this so that you can make any sort of explanation you see fit. I have no question to ask you about it. I read from page 34 of the Record:

"Mr. LITTLEFIELD. Of course. But is the organization represented by Mr. Furuseth federated with your organization?"

"Mr. GOMPERS. Yes, sir.

"Mr. LITTLEFIELD. They will oppose H. R. 9328?"

"Mr. GOMPERS. Yes; and are in favor of the Little bill.

"Mr. LITTLEFIELD. I simply ask this as a general question. Do your organizations indorse the severe restrictions placed upon H. R. 9328 by Mr. Furuseth?"

"Mr. GOMPERS. We are opposed to the bill; whether in the exact language of Mr. Furuseth or not is not the question.

"Mr. LITTLEFIELD. Yes.

"Mr. GOMPERS. But we are apprehensive—yes, sir—of that bill, and we have grave reasons for being apprehensive.

"Mr. LITTLEFIELD. Mr. Furuseth had some very vigorous opinions. I did not know whether you entertained or shared with him in those.

"Mr. GOMPERS. I share them very largely.

"Mr. LITTLEFIELD. Yes.

"Mr. GOMPERS. I only had the opportunity of casually hearing them, and hence I am not in a position to say whether every word in what Mr. Furuseth said meets my indorsement.

"Mr. LITTLEFIELD. Oh, yes; of course not.

"Mr. GOMPERS. But the essence of it meets my indorsement.

"Mr. LITTLEFIELD. Very well."

That is the end of the examination.

Mr. GOMPERS. Yes. One or two of the questions and answers I want to repeat:

"Mr. LITTLEFIELD. Mr. Furuseth has some very vigorous opinions. I did not know whether you entertained or shared with him in those.

"Mr. GOMPERS. I share them very largely.

"Mr. LITTLEFIELD. Yes.

"Mr. GOMPERS. I only had the opportunity of casually hearing them, and hence I am not in a position to say whether every word in what Mr. Furuseth said meets my indorsement."

If I had heard the entire statement Mr. Furuseth made, including that closing paragraph to which attention was called, I would not have said, then, when questioned by you, Mr. LITTLEFIELD, "I only had the opportunity of casually hearing them," meaning the statements made by Mr. Furuseth. I stated this morning, as I stated in May a year and a half ago, that I did not hear that statement made. I was not in the room when the statement was made. I repeat that now. I was not in the room when that closing part of Mr. Furuseth's statement was read by him, and I did not know to what you referred, Mr. LITTLEFIELD, when you asked me the question. That was only disclosed to me months and months after, when it was brought into question.

Mr. LITTLEFIELD. But you will have to concede, then, that when I asked you the question and there was no suggestion that you did not know, I could not infer that you did not know, could I?

Mr. GOMPERS. You might, because I was not in the room.

Mr. LITTLEFIELD. But my inference was that you were in the room. I may be mistaken about that, but when I asked you about Mr. Furuseth's opinions, and you made no disclaimer that you had heard them, of course I could not but infer that you had heard them.

Mr. GOMPERS. I think that the paper must have taken possibly forty or forty-five minutes in its reading, and during that time I was out of the room not less than two or three times, and I was out of the room for fully five minutes before Mr. Furuseth concluded, because one of our friends, I think you will remember, was going away—

Mr. LITTLEFIELD. I can not undertake to remember definitely about that.

Mr. GOMPERS. This other gentleman spoke after Mr. Furuseth closed, and he got away from this room so hurriedly that he could not even wait for a question I wanted to put to him; he had to get a train; and that is the reason that I did not hear it.

It will be noticed that he first remembers he heard of the existence of the statement "not until a week or ten days after," and next that it was only disclosed to him "months and months after," when it was brought into question. I have no further comment to make.

It should be stated, however, that the reason, as I understand it, why the representatives of labor oppose the Gilbert bill, and the Beveridge bill, both being substantially the same, is because those bills recognize the right of a court of equity to issue injunctions in cases where they claim only personal rights are involved as distinguished from controversies involving physical property, such as real or personal estate, they claiming that the power to regulate and control personal

rights is a power that the courts have usurped; one which they have no right to exercise; that in a court of equity the matter of injunctions was originally confined, and ought to be still confined, to the protection of physical, tangible property, and that it has no place in conserving or protecting personal rights.

I can not stop, of course, to indulge in a discussion of that branch of the question, but desire simply to refer to the well-known fact that the equity power has always and often been exercised in the protection of personal rights and control of the person and the regulating of the acts of the person as distinguished from its power to regulate, control, and protect corporate subjects.

This, I understand, is the real reason for their objection to the exercise of the injunctive power in labor controversies and to any legislation which proceeds upon the hypothesis that the court would have any right to issue an injunction in such cases either with or without notice and hearing. This clearly explains their real attitude, which is that any use of the injunctive power in labor controversies is an abuse of the injunctive power.

Perhaps I ought here to call attention to the fact that the hearing before the Judiciary Committee, at this session, disclosed the fact that the American Federation of Labor, speaking through their attorney, to the committee, are opposed to the legislation recommended by the President and Secretary Taft, for important public reasons. Mr. Spelling, who represented the American Federation of Labor at the hearing, had his attention called specifically to the recommendation of Secretary Taft that injunctions in labor controversies should not be issued without notice and hearing, and was asked what his view was upon that proposition, and he said:

MR. SPELLING. I think that there is not a member of the American Federation of Labor but believes that theirs is a just demand, and yet would oppose any legislation which would have the effect of *totally destroying the efficacy of the writ of injunction*; and I speak for myself, and, I believe, for at least all the more intelligent members of that organization when I say that they believe that a requirement that notice should be given, in all cases of injunction, would destroy very largely the value of that remedy in all cases, where an injunction should rightfully issue, without meeting the requirements of the situation.

THE ACTING CHAIRMAN. Exactly so. So that as I understand, on important public grounds, you and the better element in your organization, are opposed to notice and hearing, on the ground that it would destroy the efficiency of the writ under certain exigencies?

MR. SPELLING. Now, that is my opinion.

THE ACTING CHAIRMAN. Yes; and it is the opinion of the intelligent, conservative element in your organization?

MR. SPELLING. They will be heard. I think probably they will tell you that they oppose that because it recognizes a bogus jurisdiction, and would be inadequate to meet the needs of the situation.

So that it thus appears that the attorney for the American Federation of Labor, and all the more intelligent members of that organization, realize the fact that if such a statute were passed providing for notice and hearing in all cases, it would very largely destroy the value of the remedy without meeting the exigency of which they complain, and for that reason they are opposed to the legislation recommended by the President and indorsed by Secretary Taft. My judgment is that this reason assigned by them, is one extremely good and sufficient reason for a refusal to pass any such legislation, and it is gratifying to me to be able to state that upon that proposition I entirely agree with them.

The fact that Mr. Spelling is now in the employ of the Department of Justice as an attorney certainly does not impair the value of his opinion.

Here it should be remembered that in the case of a labor controversy, where large numbers of individuals are concerned as respondents, and therefore the probability of irreparable harm being done is very largely accentuated, it is quite obvious that if no injunction could be issued until notice could be served upon each individual, and under the legislation proposed it would not be effective until so served, it would be a practical impossibility to get such a notice as would render an injunction under such circumstances of any practical value in protecting even physical property, to say nothing of personal rights.

It clearly appeared before the committee that substantially all of the labor organizations were voluntary associations, and a notice upon one would not, either constructively or otherwise, be a notice upon any other member of the association. An injunction to be effective and to protect the rights of the plaintiff would have to be predicated upon an individual notice served upon each member of the alleged conspiracy or combination, which, it is obvious, would in a majority of instances be a practical impossibility. So that the writ of injunction might as well, under such circumstances and for all practical purposes, be entirely destroyed.

There is another phase of this subject which shows that a requirement of notice and hearing would deprive the writ of injunction of all of its value in labor controversies. It is perfectly competent, and it is the usual practice, for the court in issuing an injunction to restrain the carrying out of a conspiracy, to make the injunctive order to run not only against the respondents named, but against all other persons conspiring, combining, and confederating with them. It not only restrains the individuals named, but it prevents the enlarging and spreading of the conspiracy by preventing others, not named and not known when the order is applied for and issued, from joining and making general such a conspiracy. The necessity for this in a labor controversy is too apparent for discussion. Without the power to issue such an order in the vast majority of instances, the writ would be for all practical purposes a nullity. Such an order, however, could under no circumstances be issued under the legislation proposed, as each person to be affected by the order must have notice and hearing before the order is made.

The Gilbert bill, and its successor, the Beveridge bill, are, in my judgment, open to further constitutional objection in that they deprive the citizen of the equal protection of the law. This raises the extremely interesting and vitally important question whether the Congress of the United States is subject to the same constitutional inhibition in enacting legislation as now applies without question, by virtue of the specific provisions of the fourteenth amendment, to the States.

There can be no question under the provisions of the fourteenth amendment—which provides that no State shall deprive “any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws”—that legislation of this character would be clearly unconstitutional if enacted by a State.

If a State legislature undertook to control the judicial power of a court of equity so that it could exercise its protecting power to conserve the safety of persons and property in all cases except labor controversies, it would be clearly the exercise of class legislation, partial in its character. It would deny to the plaintiff, whose property was threatened by a labor conspiracy, the protection of the law guaranteed by the Constitution, while giving to every other litigant in connection with every other controversy that protection. The State courts as well as the courts of the United States, when confronted with such an attempt to deprive the citizen of the equal protection of the law, would wipe such a law from the statute book as quickly as hoar frost vanishes before the morning sun.

In my minority views on the employers' liability bill I took occasion to call attention to the fact that the fifth amendment of the Constitution of the United States guarantees to every person that he shall not be deprived of life, liberty, or property without due process of law, and that the fourteenth amendment contains precisely the same language applied to the State, with the additional clause declaring that the State shall not “deny to any person within its jurisdiction the equal protection of the laws.” I then said that it was a serious and interesting question as to whether, in the absence of such a specific provision in the fifth amendment, there was a guaranty of the equal protection of the law, so far as Congressional legislation was concerned, by virtue of the provisions of the fifth amendment to the Constitution guaranteeing due process of law.

At that time my attention had not been called to any authority construing the language “due process of law” so as to include a guaranty of the equal protection of the law. The industry and research of a very able legal friend of mine, Mr. Daniel Davenport, of Connecticut, have placed at my disposal the authorities which I think establish the proposition that the Congress of the United States, under the fifth amendment, is bound by the fundamental principles of eternal right and has no power to deprive any person of the equal protection of the law.

In the case of *Budd v. The State* (3 Humphries, 483), the question was whether a statute of the State of Tennessee could be sustained that made it a felony on the part of the officers and agents of a certain bank to do certain acts that were not made felonies when done by officers of other banks in Tennessee; that made one law for the officers of the Union Bank of the State of Tennessee and another law for the officers and agents of other banking corporations in the State.

It was contended by the counsel for the respondent that the statute in question was in contravention of the constitution of Tennessee, which provides that no man shall be disseized or imprisoned, etc., but by the judgment of his peers or the law of the land, practically a quotation from *Magna Charta*, and made a part of the constitution of Tennessee.

Upon this question the court said, the opinion being drawn by Judge Reese, whom I understand to have been a man of high character and great legal ability:

If the felony were enacted with regard to the clerks, servants, and agents of a merchant to deter them from embezzlement and false entries, would it be imagined for a moment that it would be regarded as the "law of the land" and consistent with the Bill of Rights? If the felony affected only all the clerks of all the merchants of Nashville, or of Davidson County, or of middle Tennessee, would that, in either case, be "the law of the land"? It is believed none would so contend. And why not? Simply because the law of the land is a rule alike embracing and equally affecting all persons in general, or all persons who exist or may come into the like state and circumstances. A partial law, on the contrary, embraces only a portion of those persons who exist in the same state and are surrounded by like circumstances. If peculiar felonies, affecting all the people, or certain of the public officers of East Tennessee only, were held to be "the law of the land," it would be difficult to say for what object that clause was inserted in the Bill of Rights. One of its objects has been stated in various adjudications in our State to have been to protect the feeble and the obnoxious from the injury and the injustice of the strong and the powerful and, in general, to protect minorities from the wrongful action of majorities. This being its scope and purpose, would it not interdict the legislature from passing such an act as is last above referred to, for instance, creating certain acts of nonfeasance or malfeasance of the register of the western district, although a public officer, a felony, leaving the register of middle Tennessee, East Tennessee, etc., unaffected by it? Certainly it would. And why? Because the law would not treat similarly all who were in like circumstances. It would therefore be partial and of course not the law of the land.

And the court held that this statute was unconstitutional, because it did not operate equally upon all. In other words, it was a deprivation "of the equal protection of the law."

The significance of this decision is that it was rendered in 1842, twenty-six years before the fourteenth amendment, expressly prohibiting a State from denying to any person the equal protection of the law, was adopted, and was therefore entirely independent of the provisions of the fourteenth amendment. It is a specific determination by a highly respected court that under a constitution guaranteeing the protection of the "law of the land," legislation that deprives any person of the equal protection of the law, or that is partial in its operation, is unconstitutional and void.

That the "law of the land" is synonymous with "due process of law" is well settled. The Supreme Court of the United States in the case of *Dent v. West Virginia* (129 U. S., 114), in a unanimous opinion drawn by Mr. Justice Field, certainly one of the ablest and most distinguished members of the court, said:

As we have said on more than one occasion, it may be difficult, if not impossible, to give to the terms "due process of law" a definition which will embrace every permissible exertion of power affecting private rights and exclude such as are forbidden. They come to us from the law of England, from which country our jurisprudence is to a great extent derived, and their requirement was there designed to secure the subject against the arbitrary action of the crown and place him under the protection of the law. They were deemed to be equivalent to the "law of the land." In this country the requirement is intended to have a similar effect against legislative power, that is, to secure the citizen against any arbitrary deprivation of his rights, whether relating to his life, his liberty, or his property. Legislation must necessarily vary with the different objects upon which it is designed to operate. It is sufficient, for the purposes of this case, to say that legislation is not open to the charge of depriving one of his rights without due process of law, if it be general in its operation upon the subject to which it relates, and is enforceable in the usual modes established in the administration of government with respect to kindred matters—that is, by process or proceedings adapted to the nature of the case. The great purpose of the requirement is to exclude everything that is arbitrary and capricious in legislation affecting the rights of the citizen.

Here, then, we have, first, the court in Tennessee, holding that under "the law of the land" no person can be deprived of "the equal protection of the law," and that legislation partial in its character is unconstitutional; and in the case of *Dent v. West Virginia*, the unanimous opinion of the Supreme Court holding that "due process of law" is synonymous with "the law of the land," and that the law must be general in its operation upon the subject to which it relates; and many other authorities establishing this identity of meaning could be cited.

Under these authorities no legislation can stand the constitutional test that is partial in its operation, or that undertakes to deprive any person of his rights in particular instances when other persons have accorded to them the full enjoyment of the same rights under similar conditions.

I think it will be conceded that Hon. Thomas M. Cooley was in his time what Blackstone and Kent were in theirs as an authority upon the law, and no text writer is entitled to or has received greater respect from the profession and the courts. In his edition of *Story on the Constitution*, he discusses the fourteenth amendment, and reaches conclusions that are entirely in harmony with and support the position which I have taken. Among other things, he says:

And the same may be said of the like distinctions under laws establishing public schools, preemption laws, exemption laws, and the like; the rules which exclude persons from their benefits must be uniform and not partial; the individual citizen is always entitled to the benefits of the general laws which govern society. (Sec. 1934.)

And quoting from Webster's argument in the Dartmouth College case, he said:

"By the law of the land is most clearly intended the general law; a law which hears before it condemns; which proceeds upon inquiry, and renders judgment only after trial. The meaning is that every citizen shall hold his life, liberty, property, and immunities under the protection of the general rules which govern society." "As to the words from Magna Charta," says another eminent jurist, "after volumes spoken and written with a view to their exposition, the good sense of mankind has at length settled down to this: That they were intended to secure the individual from the arbitrary exercise of the powers of government, unrestrained by the established principles of private right and distributive justice." (Sec. 1944.)

And again:

The provision that no State "shall deny to any person within its jurisdiction the equal protection of the laws" would not seem to call for much remark. Unquestionably every person—all being now free-men—is entitled to the equal protection of the laws without any such express declaration. But with the power in Congress to enforce this provision by "appropriate legislation," it becomes a matter of no little importance to determine in what consists the equal protection of the laws and what amounts to a denial thereof. (Sec. 1959.)

It is to be observed, first, that this clause, of its own force, neither confers rights nor gives privileges; its sole office is to insure impartial legal protection to such as under the laws may exist. It is a formal declaration of the great principle that has been justly said to pervade and animate the whole spirit of our constitution of government, that all are equal before the law. (Sec. 1960.)

I am one of those who believe that the proposition set forth in the noble and resounding phrase of the great Declaration, for the verification of which our fathers pledged their lives, their fortunes, and their sacred honor, is a vital and fundamental principle of our institutions. It reads: "We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness, and that to secure these ends governments are instituted among men," etc. This does not mean to me that men were created with equal capacities, with equal ability, or even with equal opportunities, but it does mean to me that they were created equal before the law, with equal rights and equal privileges, and that under our system of government, in harmony with these fundamental, eternal principles, it is not competent for any legislative power, either State or Federal, to enact any legislation that will deprive any person of the equal protection of the law.

This, in my judgment, is the stone that the builders not only did not reject but which they made, and which now is, the head of the corner. It is the inviolable bed rock, fundamental and eternal, upon which our institutions are builded; it is the great, inspiring, dominating principle that characterizes every governmental activity and is reflected in every branch and feature of our constitutional Government. It is the vital principle which makes "a government of the people, for the people, and by the people" a "government of laws and not of men."

So that, Mr. Speaker, I believe that both upon reason and upon authority this Congress has no power to pass any legislation that will deprive any person of the equal protection of the law, or that will deprive the court of its immemorial judicial power to protect the citizen in the enjoyment of his property when he is confronted with a labor controversy, when that right is preserved to him in connection with all other controversies, under circumstances of a similar legal character.

For both of these reasons, then, Mr. Speaker—because the legislature has no power to restrain the court in its right to issue a temporary restraining order and because it has no right to pass any legislation discriminating between classes, in addition to the practical difficulty of the substantial destruction of the equity power as a remedial process—I am unalterably opposed to legislation of this character.

ANTI-INJUNCTION LEGISLATION ORIGINALLY DEMANDED.

Before leaving this matter of injunctions, in order that this speech may be a reasonably adequate presentation of these controversies from a historical standpoint, I think, Mr. Speaker, that it is incumbent upon me to briefly discuss the injunction bill which the labor organizations were demanding during the last Congress. It is what was known during the last Congress as the "Little bill," and was known in a previous Congress as the "Grosvenor bill," and reads as follows:

A bill (H. R. 4445, Fifty-ninth Congress, first session) to limit the meaning of the word "conspiracy" and the use of injunctions and restraining orders in certain cases.

Be it enacted, etc., That no agreement, combination, or contract by or between two or more persons to do or procure to be done, or not to do or procure not to be done, any act in contemplation or furtherance of any trade dispute between employers and employees in the District of Columbia or in any Territory of the United States, or between employers and employees who may be engaged in trade or commerce between the several States, or between any Territory and another, or between any Territory or Territories and any State or States or the

District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, shall be deemed criminal, nor shall those engaged therein be indictable or otherwise punishable for the crime of conspiracy, if such act committed by one person would not be punishable as a crime, nor shall such agreement, combination, or contract be considered as in restraint of trade or commerce, nor shall any restraining order or injunction be issued with relation thereto. Nothing in this act shall exempt from punishment, otherwise than as herein excepted, any persons guilty of conspiracy for which punishment is now provided by any act of Congress, but such act of Congress shall, as to the agreements, combinations, and contracts hereinbefore referred to, be construed as if this act were therein contained.

Before discussing the provisions of this bill briefly I think it will be instructive to call attention to the circumstances under which it was urged upon the Judiciary Committee. This was pressed upon the committee upon the ground that the Parliament of England, in 1875, had passed legislation similar in its character; and it is proper to say that in 1875 Parliament did pass an act, which, among other things, provided that—

An agreement or combination by two or more persons to do or procure to be done any act in contemplation of or furtherance of a trade dispute between employers and workmen shall not be indictable as a conspiracy if such act committed by one person would not be punishable as a crime.

It will be observed that with the necessary changes in relation to interstate commerce and the introduction of the words "shall be deemed criminal, nor shall those engaged therein be indictable or otherwise punishable for the crime of conspiracy," the paragraph quoted is identical with H. R. 4445, known during the last session as the "Little bill," as introduced by the gentleman from Arkansas [Mr. Little], who was afterwards elected governor of that State. The Little bill contained the further proviso:

Nor shall any restraining order or injunction be issued with relation thereto.

At the hearing upon this bill in 1902 the representative of the American Federation of Labor gave the committee the impression that the paragraph quoted was all that there was of the English statute. In so doing he successfully diverted the attention of the committee from the fact that there were a number of special qualifications and restrictions that became a part of the same statute which very materially modified the general language quoted from the statute, which general language he insisted should be enacted into law without any qualifications or limitations.

The English statute, in addition to the general language above quoted, provided, among other things, first:

Nothing in this section shall exempt from punishment any persons guilty of a conspiracy for which a punishment is awarded by any act of Parliament.

Second:

Nothing in this section shall affect the law relating to riot, unlawful assembly, breach of the peace, or sedition, or any offense against the State or the Sovereign.

Just exactly what these two exceptions covered I am not able to say, because I have not had an opportunity to carefully examine the acts of Parliament therein referred to, but that they narrowed the general language of the act may be inferred as otherwise there would be no occasion for the reference to the exceptions.

The statute further provided that a crime, for the purposes of that section, meant an offense which was punishable on summary conviction, and then proceeded to provide for the punishment of certain things on summary conviction, which, before that time, were not so punished and were not denominated as crimes, and so far as I know are not denominated as crimes anywhere except in Great Britain, and by virtue of the provisions of this particular statute.

The third exception provided that—

Where a person employed by a municipal authority or by any company or contractor upon whom is imposed by act of Parliament the duty, or who have otherwise assumed the duty of supplying any city, borough, town, or place, or any part thereof, with gas or water, willfully and maliciously breaks a contract of service with that authority or company or contractor, knowing or having reasonable cause to believe that the probable consequences of his so doing, either alone or in combination with others, will be to deprive the inhabitants of that city, borough, town, place, or part, wholly or to a great extent of their supply of gas or water, he shall on conviction thereof by a court of summary jurisdiction or on indictment as hereinafter mentioned, be liable either to pay a penalty not exceeding £20 or to be imprisoned for a term not exceeding three months, with or without hard labor.

A successful strike by men employed by contractors upon public work would be rather difficult under the provisions of that exception.

The fourth exception provided that—

Where any person willfully and maliciously breaks a contract of service or of hiring, knowing or having reasonable cause to believe that the probable consequences of his so doing, either alone or in combination with others, will be to endanger human life, or cause serious bodily injury, or to expose valuable property, whether real or personal, to destruction or serious injury, he shall, on conviction thereof by a

court of summary jurisdiction, or on indictment as hereinafter mentioned, be liable either to pay a penalty not exceeding twenty pounds, or to be imprisoned for a term not exceeding three months, with or without hard labor.

Here it will be noticed that it is not necessary for the employee willfully and maliciously breaking his contract to intend as a consequence the injury of valuable property; and it was simply sufficient if he so broke his contract knowing or having reasonable cause to believe that that would be the consequence. He need not intend it as a consequence, but if he ought to know or had reasonable cause to know it would be a consequence, and then the breach of such a contract, under such circumstances, made him guilty of a crime punishable by fine and imprisonment, and this made a fourth exception to the operation of the general provision.

The fifth exception is found under the following proviso:

Every person who, with a view to compel any other person to abstain from doing or to do any act which such other person has a legal right to do or abstain from doing, wrongfully and without legal authority—

1. Uses violence to or intimidates such other person or his wife or children, or injures his property—

That is to say, if whenever any individual either uses violence or intimidates any other person, or his wife or children, or injures his property, he is liable to fine and imprisonment.

This constitutes the sixth exception: One who

2. Persistently follows such other person about from place to place—is also subject to fine and imprisonment. This is a very familiar method adopted by labor; and under the provisions of this statute, a single individual thus following another person about, would be subject to fine and imprisonment.

The seventh exception provides fine and imprisonment for any person who—

3. Hides any tools, clothes, or other property owned or used by such other person, or deprives him of or hinders him in the use thereof.

The eighth exception provides fine and imprisonment for any person who—

4. Watches or besets the house or other place where such other person resides or works, or carries on business or happens to be, or the approach to such house or place.

The ninth exception is as follows:

Any person who "follows such other person with two or more other persons in a disorderly manner in or through any street or road shall, on conviction thereof by a court of summary jurisdiction, or on indictment as hereinafter mentioned, be liable either to pay a penalty not exceeding £20 or to be imprisoned for a term not exceeding three months, with or without hard labor," the terms of fine and imprisonment applying in each case to the last five exceptions mentioned.

If there are any other exceptions that could have been added for the purpose of getting entire control of all of the operations of men engaged in a labor controversy, they do not occur to me, and it is difficult to see how human ingenuity could suggest them.

We were given the impression by the representative of the American Federation of Labor that the general language quoted in the bill was all there was of the English statute, and the fact that these nine important exceptions (which, as a matter of practical operation would place men engaged in a labor controversy in a strait-jacket that would make it practically impossible for them to successfully conduct a controversy of that character, either by way of strike or any other of the methods well known under such circumstances) were contained in the same statute was not only not disclosed to us but there was not the slightest intimation of their existence.

I think it is safe to say that the provisions of the English law could not be made a part of the law of this country either by Congress or any State legislature without the vigorous and bitter protests of the labor organizations. Yet we were urged to take a piece of the statute, without any knowledge of the qualifying language, and make it a part of the general law.

The scope of the "Little" bill should be briefly adverted to. It is not a crime under our law, in Maine at least, for a single individual to threaten to commit a crime. A man may threaten to commit murder, and under the statutes we have in existence this is not a crime; it is simply a threat to commit a crime—and so as to all other crimes. The remedy, if a man threatens to commit murder, is to have him placed under bonds to keep the peace, a proceeding to prevent him from committing the crime. The result is that this act, in terms, authorizes men to conspire to threaten to commit crime, or to threaten to commit murder, if need be.

There are a great many injuries that may be done by an individual to both person and property that do not reach the dignity of crime, yet are of such a character that might absolutely destroy the right of a man to peacefully enjoy his property and deprive him practically of the protection of the law.

This bill would clearly authorize men to conspire to do any act that interfered with the right or property or of the person that did not reach the dignity of a crime. It is not a crime for

an individual to intimidate or coerce, but this act clearly authorizes men to conspire and combine for the purpose of intimidating and coercing. It is not necessarily a crime to invade the legal rights of others, and this act clearly authorizes men to conspire for that purpose.

When that bill was first under discussion I asked the gentlemen responsible for its promotion whether they wished to be authorized to conspire to threaten to commit crime or do injury to property or to business, and they said "No." I asked them if they wished legislation authorizing them to conspire to intimidate and coerce, and they said "No." I put the further inquiry as to whether they thought it proper to insist upon legislation which authorized them to conspire and combine for the purpose of interfering with the legal rights of others, and they said "No."

I then suggested to them that I would draw a proviso that would simply prevent the application of the act to the matters which they said they did not desire to accomplish, and I prepared a proviso which read as follows:

"Provided, That the provisions of this act shall not apply to threats to injure the person or the property, business, or occupation of any person, firm, association, or corporation, to intimidation or coercion, or any acts causing or intended to cause an illegal interference, by overt acts, with the rights of others."

I submitted that there was nothing prohibited in this proviso that any reasonable man ought to desire to be authorized to conspire to do. It was conceded by the men interested in the promotion of this bill that they did not desire any such authority, but when they submitted the proviso to their counsel they immediately reported that the adoption of the proviso could not be agreed to because, although they did not want authority to do the various things therein prohibited, the proviso, if adopted, would emasculate the legislation and make it ineffective for the purposes desired by them. I absolutely declined to support the legislation without the qualifying proviso being added thereto.

No legitimate reason has ever been suggested why a proviso which excepted only such things as they conceded they did not ask to be authorized to do should not be adopted. It will also be observed that this bill exempted labor organizations from the operation of the Sherman antitrust law, because it provides "nor shall such agreement, combination, or contract be considered as in restraint of trade or commerce." This was an express attempt to exempt labor organizations from the operations of the Sherman antitrust law, which provides that *all contracts and agreements* in restraint of interstate commerce shall be held to be illegal, and the parties making the same shall be liable to fine and imprisonment. It was a specific attempt to make it lawful for men engaged in labor controversies to do things that it was criminal for others to do. It authorized them to do acts that it was criminal for others to do—an express attempt to deprive other persons of the equal protection of the law. This was one of the bills that was fully and elaborately discussed in my last campaign, to which I shall refer hereafter. I said in my campaign in every speech I made that under no circumstances would I agree to the passage of any legislation that would authorize men to conspire to threaten to murder, or make it lawful for one set of men to conspire to do what it was a crime for other men to do, and further that I would do all in my power to prevent the enactment of legislation along those lines.

A little later I will discuss the question as to whether labor organizations were intended to be included in the provisions of the Sherman antitrust law. Attention here should be called to the fact that the effect of the ordinary contract and agreement in restraint of interstate trade and commerce, so far as impairing or impeding interstate trade and commerce, is almost negligible.

Take any important article of merchandise—for instance, pipe—and as an illustration consider the Addyston Pipe and Steel Company case. So far as the amount of pipe in interstate commerce was concerned, it was a matter of very small consequence as to whether the agreement that was denounced in that case, as in violation of the Sherman antitrust law, was or was not sustained. The agreement was made for the purpose of increasing the price of pipe to the consumer, but the effect upon transportation, upon the volume of trade, upon the instrumentalities of commerce—whether the price was high or low—was practically negligible, because the amount of pipe that would be transported would be substantially the same in either case, whatever the price might be. So that the direct effect of a contract or agreement of that character, clearly within the provisions of the Sherman antitrust law, would in a practical sense be absolutely negligible.

On the other hand, take a contract or agreement between employees engaged in interstate commerce, having for its purpose

the interference with, or obstruction of, interstate commerce, until their demands shall have been complied with. A combination of that sort is very accurately described by Judge Taft in his opinion in the case of *Thomas v. Cincinnati, New Orleans and Texas Pacific Company* (62 Fed. Rep., 803), where he says:

The gigantic character of the conspiracy of the American Railway Union staggers the imagination. The railroads have become as necessary to life and health and comfort of the people of this country as are the arteries of the human body, and yet Debs and Phelan and their associates proposed, by inciting the employees of all the railways in the country to suddenly quit their service without any dissatisfaction with the terms of their own employment, to paralyze utterly all the traffic by which the people live, and in this way to compel Pullman, for whose acts neither the public nor the railway companies are in the slightest degree responsible, and over whose acts they can lawfully exercise no control, to pay more wages to his employees. The merits of the controversy between Pullman and his employees have no bearing whatever on the legality of the combination effected through the American Railway Union. The purpose, shortly stated, was to starve the railroad companies and the public into compelling Pullman to do something which they had no lawful right to compel him to do. Certainly the starvation of a nation can not be a lawful purpose of a combination, and it is utterly immaterial whether the purpose is effected by means usually lawful or otherwise.

And in this connection, in the opinion of the Supreme Court of the United States, in the case of *Loewe v. Lawlor*, delivered February 3, 1908, the following appears:

"* * * and the uniform course of decision has been to declare that it is not within the competency of a State to legislate in such a manner as to obstruct interstate commerce. If a State, with its recognized powers of sovereignty, is impotent to obstruct interstate commerce, can it be that any mere voluntary association of individuals within the limits of that State has a power which the State itself does not possess?"

If labor organizations were to be exempted from the operations of the Sherman antitrust law, it would place it in their power not only to technically and theoretically interfere with interstate commerce, but to absolutely paralyze every interstate-commerce instrumentality, and put for the time being an absolute stop to interstate-commerce transportation, a result that does not and can not follow in connection with any other conceivable violation of the statute. While it is true that their combinations have not in mind and their organizations do not exist for the purpose of producing financial returns, and that industrial organizations do exist for private gain, it is also true that to exempt them from the operations of the Sherman antitrust law would place interstate transportation absolutely and entirely within their control, so that they could without let or hindrance, without the legal right to control them, absolutely paralyze it. No such consequence can follow as the result of any other combination against which the law is aimed. Why, then, should they be exempted?

For these, as well as other reasons, I never could give my assent to legislation of that character. Every legislative suggestion that exempts labor organizations or men engaged in labor controversies from the operations of the Sherman antitrust law is clearly open to the suggestions above indicated.

THE SHERMAN ANTITRUST LAW.

This statute has been the subject of a great deal of controversy and debate. There seems to be a widespread difference of opinion as to its scope and purpose. It has been persistently claimed and, is now claimed, by the representatives of labor organizations that the law was not originally intended to include within its scope organizations of that character.

This claim is based in a very large degree, if not wholly, upon alleged understandings or upon conversations between men who were more or less actively engaged in the construction of the legislation. Many of the persons who are directly referred to as giving individual opinions as to the scope and purpose of the act are now dead, and it is impossible to verify the accuracy of the recollection of those who rely upon that source as the basis for their opinions.

The legislative history of the act itself is, I think, absolutely clear with reference to that question, and an examination of the history will demonstrate beyond all cavil that labor organizations were specifically intended to be included within its provisions.

It ought to be said that the act was not the result of hasty or ill-considered legislation. It was debated more or less in the last session of the Fiftyth Congress, and very much more extensively during the first session of the Fifty-first Congress. The debate upon this question occupies in the neighborhood of 150 pages of the CONGRESSIONAL RECORD, extending over this whole period of time. There are very few acts of Congress that have received as much careful and deliberate investigation and consideration as has the Sherman antitrust law.

Introduced into the Senate as the first bill in the Fifty-first Congress, on the 4th day of December, 1889, it was referred to the Finance Committee, of which its author, Mr. Sherman, was chairman. It was reported by that committee to the Senate,

and after considerable debate and the introduction of quite a variety of amendments the following amendment, on the 25th day of March, 1890, was introduced and adopted by the Committee of the Whole on the part of the Senate:

Provided, That this act shall not be construed to apply to any arrangements, agreements, or combinations between laborers, made with the view of lessening the number of hours of their labor or of increasing their wages; nor to any arrangements, agreements, associations, or combinations among persons engaged in horticulture or agriculture, made with a view of enhancing the price of their own agricultural or horticultural products.

It will be noticed that this amendment is in substance the bill introduced at this session of Congress by the gentleman from Pennsylvania [Mr. Wilson]. The amendment was offered by Mr. Sherman. While it may be said that it was treated with reasonable seriousness, the fact that it was specifically exempting a certain class of people, as distinguished from the great mass of people that the legislation was intended to operate upon, is quite clear from the debate. At the very time the amendment was pending it was suggested by Senator Blair that the bill ought to exempt persons engaged in the cod fisheries and in the manufacture of boots and shoes. And so far as anything appears by way of argument there is just as much reason for the exemption of those industries as there was for the exemption of persons engaged in horticulture or agriculture. It was jocosely suggested by Mr. Platt, of Connecticut, who was opposed to the legislation, that the woolgrowers of Ohio ought also to have the same exemption.

While the bill was pending before the Senate, having been reported from the Committee of the Whole to the Senate, a successful effort was made to refer it to the Judiciary Committee, it having been encumbered in the Committee of the Whole by a large variety of amendments, a great deal of doubt being expressed as to what would be its proper construction.

Pending the adoption in the Senate of the amendment already quoted, which had been adopted in the Committee of the Whole, Senator Edmunds, who was easily one of the greatest if not the greatest lawyer in the Senate at that time, and one of the greatest lawyers the Senate ever had in its membership, took occasion to discuss this particular amendment. His discussion and his opinions are extremely significant, because, as it will appear later, the bill was finally, after the debate in which he participated, referred to the Committee on the Judiciary, of which he was the chairman. In referring to this particular amendment, he said:

But if capital and plants and manufacturing industries organize to regulate and so to repress and diminish, if you please, below what it ought to be, the price of all the labor everywhere that is engaged in that kind of business, labor must organize to defend itself on the other side. If transportation companies and middlemen and exporters and dealers organize and arrange that they will give only so much for wheat, or corn, or pork, or whatever, the people who produce the wheat, the corn, the pork, or whatever are driven to organize to defend themselves so far as they can against that species of tyranny. However, the whole thing is wrong, as it appears to me; and so I think the amendment is wrong in the same way, which says that while the capital and the plant in any enterprise shall not combine to defend and protect itself, to increase the price of the product of that capital and plant, the labor which is essential to the production of that plant may combine to increase the price of the product of that capital and plant, the labor which is essential to the production of that plant may combine to increase the price of the work that is to be done to make the production of that enterprise.

What is the consequence, Mr. President? The laborers of the United States, I will say for illustration—and one illustration is as good as the hundreds that might be brought forward—the laborers of the United States engaged in the manufacture of iron (which is, perhaps, the most largely valuable, take it altogether, of all the manufactured products of the United States) combine, as this bill authorizes them to do, to put up the price of their wages; they put them up 50 per cent, for illustration. The manufacturer of iron, the men who and whose fathers by their labor have found the iron mine and have built the iron mill and the rolling mill and the steel process mill and all that sort of thing, are prohibited under penalties, as they ought to be under penalties if they are prohibited at all, from combining to raise the price of the iron that the workmen have made cost 50 per cent more and to sell at the advanced price if they can.

The consequence would be that if the labor of the United States thus organized chose through its head men to put up the price of the manufactured iron, that iron could not be produced unless the price at which it was to be sold should be enhanced accordingly. The result is that every iron mill in the United States must break or live not according to the demand for iron, not according to its production, but according to the will of the men employed to make it. (Cong. Rec., vol. 21, p. 2727.)

And again:

The fact is that this matter of capital, as it is called, of business and of labor is an equation, and you can not disturb one side of the equation without disturbing the other. If it costs for labor 50 per cent more to produce a ton of iron, that 50 per cent more goes into what that iron must sell for, or some part of it. I take it everybody will agree to that.

Very well. Now, if you say to one side of that equation, "You may make the value or the price of this iron by your combination for wages in the whole Republic or on the continent, but the man for whom you have made the iron shall not arrange with his neighbors as to the

price they will sell it for so as not to destroy each other," the whole business will certainly break, because the connection between the plant, as I will call it for short, and the labor that works that plant is one that no legislation and no force in the world—and there is only one outside of the world that can do it—can possibly separate. They can not be divorced. *Neither speeches nor laws nor judgments of courts nor anything else can change it, and therefore I say that to provide on one side of that equation that there may be combination and on the other side that there shall not be contrary to the very inherent principle upon which such business must depend. If we are to have equality, as we ought to have, if the combination on the one side is to be prohibited, the combination on the other side must be prohibited, or there will be certain destruction in the end.*

This is a very clear and concise statement of the precise business proposition involved in this legislation. The only answer attempted to be made to this argument of Senator Edmunds was the suggestion made by Senator Hoar, who said, in undertaking to differentiate the employee from the other factors upon which the legislation was intended to operate:

The laborer who is engaged lawfully and usefully and accomplishing his purpose in whole or in part in endeavoring to raise the standard of wages is engaged in an occupation the success of which makes republican government itself possible, and without which the Republic can not exist in substance, however it may nominally do in form, continue to exist.

I hold therefore that as legislators we may constitutionally, properly, and wisely allow laborers to make associations, combinations, contracts, agreements for the sake of maintaining and advancing their wages, in regard to which, as a rule, their contracts are to be made with large corporations who are themselves but an association or combination or aggregation of capital on the other side. When we are permitting and even encouraging that we are permitting and encouraging what is not only lawful, wise, and profitable, but absolutely essential to the existence of the Commonwealth itself.

While we might all agree with Senator Hoar as to the essential importance of the welfare of the laborers and their associations, it is quite obvious that it is equally essential to maintain the existence of capital in order that the laborer whose welfare is so essential should continue to be employed. It is absolutely impossible for the one to exist without the other. Senator Hoar did not suggest, nor can there be suggested, any line of differentiation or distinction with reference to the effect of either upon the welfare or prosperity of the Republic. To these suggestions Senator Edmunds made this reply:

There is no getting away from that, and therefore if the wage-earner is to command the operation of the statute and the wage payer can not go to the community and to his brother manufacturers in the same town and say, "Let us agree to put up the wages of our laborers in all our establishments, as they wish a dollar a day more, and let us put the price on our commodity that goes out a dollar a ton more, or whatever it may be, to make that good, so that we can all live and get on," the two sides of the equation are not on an equal footing.

On the one side you say that is a crime, and on the other side you say it is a valuable and proper undertaking. That will not do, Mr. President. You can not get on in that way. It is impossible to separate them; and the principle of it therefore is that if one side, no matter which it is, is authorized to combine, the other side must be authorized to combine, or the thing will break and there will be universal bankruptcy. (Vol. 21, p. 2729.)

To this remark of Senator Edmunds a careful reading of the debate from that time on shows that no attempt was ever made to reply. After having thus stated that the amendment made it a crime for one set of men to do what was lawful for another set of men to do, and that it was impossible to separate the two factors of the great equation, the Sherman antitrust bill, with all pending amendments, was referred to the Judiciary Committee, of which Senator Edmunds was chairman.

It was reported back by that committee on the 2d day of April, 1890, with an amendment, which is the Sherman antitrust law as it reads to-day, without the dotting of an "i" or the crossing of a "t," because after it was reported from the Senate committee it was not amended in any particular, but became a law precisely in the language of that report.

It is hardly necessary to suggest that after the statements made by Senator Edmunds no bill would be reported by him that either directly or indirectly exempted labor organizations from its operations when he had himself declared it was impossible to construct legislation upon that basis.

The bill went through all the various stages of conference reports, and amendments of various characters were from time to time suggested. It was taken up on the floor of the House, referred to and reported from the Judiciary Committee, and debated somewhat extensively upon the floor, but in no part of the debate and in no part of the proceedings was any effort made, after the conclusive and unanswerable statement of Senator Edmunds, to engraft upon the act any provision excepting labor organizations or men engaged in labor controversies therefrom.

We not only have this clear history, which is an unanswerable demonstration of the fact that the act was intended to cover employees and employers in interstate commerce, but in addition we have the statement made by Senator Edmunds,

published in the Chicago Inter-Ocean November 21, 1892, in which he said, referring to the Sherman antitrust law:

It is intended, and I think will cover every form of combination that seeks to in any way interfere with or restrain free competition, whether it be capital in the form of trusts, combinations, railroad pools or agreements, or labor through the form of boycotting organizations that say a man shall not earn his bread unless he joins this or that society. Both are wrong; both are crimes, and indictable under the antitrust law.

He further stated that it was the intention of the committee "to cover all such cases."

Inasmuch as Senator Hoar is frequently relied upon as authority for the suggestion that the legislation was not intended to include labor organizations within its scope, it ought to be said that in 1901 Senator Hoar made a legislative declaration in connection with a pending bill which clearly indicates that he understood that labor organizations were very properly included in the provisions of the Sherman antitrust law. His remarks were addressed to a provision reading as follows:

SEC. 4. That nothing in said act shall be so construed as to apply to any action or combination, otherwise lawful, of trade unions or other labor organizations, so far as such action or combination shall be for the purpose of regulating wages, hours of labor, or other conditions under which labor is performed, without violence or interfering with the lawful rights of any person. (CONGRESSIONAL RECORD, vol. 34, p. 2728.)

The last clause, "without violence or interfering with the lawful rights of any person," it will be seen covers very nearly the same ground as the proviso which I suggested as an amendment to the anti-injunction bill, and have heretofore referred to.

In discussing this amendment, Senator Hoar said:

There is a further provision that no labor organization or association shall be liable to punishment under the act to which this is an addition. I gave, as chairman of the committee, several full hearings to the representatives of the labor organizations of the country who were interested in promoting this legislation, and also to the representatives of the great organization, the Brotherhood of Locomotive Engineers, and they agreed with me, all of them, that these objections were well taken and that the legislation ought to pass.

Thereupon I proposed a measure, which I prepared carefully and thoroughly for that purpose, providing that the legislation against trusts should not apply to organizations for the purpose of raising wages, shortening hours of labor, or improving the conditions of labor if their action were otherwise lawful and was not accompanied with criminal violence, keeping the first section of the bill so far as it increased the punishment for the violation of the antitrust law, but striking out the minimum punishment, that I was in hopes the Judiciary Committee would authorize me to report to the Senate, and I should be glad to have it taken up and passed. (Vol. 34, p. 2727.)

So that the legislative record shows that Senator Hoar was not in favor of exempting labor organizations from the operations of the Sherman antitrust law. The provisions that he was discussing were in the form of a proposed amendment to the Sherman antitrust law. He did not intend to have the law apply except as to such combinations as could be actually had "without violence or interfering with the lawful rights of any person."

So long as the lawful rights of any person are protected, it is quite clear that there is no occasion for any statute. All that the Sherman antitrust law did, as a matter of fact, in the first instance was to protect the lawful rights of all parties who came within its scope.

THE LEGAL SCOPE OR BASIS OF THE SHERMAN ANTITRUST LAW.

I think it can be made clearly to appear that there is a profound misconception as to the legal scope of this statute. The common law applies to two well-defined and thoroughly understood conditions—contracts in restraint of trade, upon which is predicated the element of reasonable or unreasonable, which are contracts between two individuals, by virtue of which one contracts himself out of trade, and combinations or conspiracies tending to the monopoly of trade upon which the idea of reasonable or unreasonable never yet has been predicated by any well-considered decision.

On the 16th day of February, 1903, in a discussion on a bill pending before the House, amending the Sherman antitrust law, I took occasion to suggest these distinctions, and as a part of the history of this legislation I will now repeat in substance what I said on that occasion:

THE SHERMAN ANTITRUST LAW.

The Sherman antitrust law proceeds upon the theory that there are contracts and agreements monopolistic in their character which are in restraint of interstate trade and commerce. It is aimed throughout at contracts and agreements, that tend to monopoly. That is its genesis.

Section 1 provides that "every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce," etc., and "every person who shall make any such contract or engage in any such combination or conspiracy," etc.

Section 2 provides that "every person who shall monopolize or attempt to monopolize, or combine or conspire with any

other person or persons to monopolize, any part of the trade or commerce among the several States, or with foreign nations," etc.

Section 3 provides that "every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade or commerce," etc., and "every person who shall make any such contract, or engage in any such combination or conspiracy, shall be deemed guilty," etc.

Section 6 provides that "any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof)," etc. While the literal language of this act might include what is known at common law as "contracts in restraint of trade," it is very clear that its dominating controlling purpose is to prevent contracts, agreements, combinations, and conspiracies resulting in or attempting to create monopoly. It is at least doubtful if a common-law contract in restraint of trade can be predicated upon the Sherman antitrust law. It is because the words "in restraint of trade or commerce" are used that the idea has obtained that the qualification of reasonableness or unreasonableness should be imported into this statute by construction.

It is very ably suggested by Mr. Justice White, in his dissenting opinion in the *Trans-Missouri* case, that the Sherman antitrust law should be construed upon the basis as to whether or not the combinations or conditions that it undertakes to attack, are or are not reasonable or unreasonable, and it has been suggested by distinguished men since that the law is open to that criticism. It was suggested—I heard a distinguished gentleman in another tribunal the other day say—that it was intended by the framers of that law to subject it to the test, as to whether the conditions attacked were reasonable or unreasonable. I beg leave to submit that such a construction can not be sustained. There is a contract in restraint of trade at common law. A contract in restraint of trade at common law is a contract by virtue of which a man disables himself from engaging in a particular occupation, business, or profession. He agrees not to practice his profession or engage in his business for a certain number of years, or within a certain locality, or a corporation agrees not to sell its goods within a certain locality or during a certain time, or, as the note in *Angier v. Webber* (92 Comp. Dec., 751) puts it, they are "contracts which impose an unreasonable restraint upon the exercise of a business, trade, or profession are void, but contracts in reasonable restraint thereof are valid."

Now, that is the common-law contract in restraint of trade. But there are other conditions that disturb us vastly more than these contracts in restraint of trade, because contracts in restraint of trade at the common law were simply constructively against public policy and very few of them ever did any appreciable injury. The combinations and conspiracies that tend to monopoly and therefore increase the price of a product are an entirely distinct legal proposition. They are the status against which the Sherman antitrust law is aimed. It is contracts and combinations in the form of trusts or otherwise or conspiracies, not contracts that restrain one individual from engaging in a profession or in a business for a certain number of years or in a certain locality that are clearly within the intention of that statute.

Now, I wish to call the attention of the House to this fact: That at common law and under the decisions of the courts, from the days of the early common law down even until now, the idea of reasonableness or unreasonableness has never been predicated upon a combination or a conspiracy that tends to monopoly. It is always and only predicated upon contracts technically in restraint of trade, or that tend to exclude a man for a certain number of years or within a certain space. Every case referred to by the distinguished justice of the Supreme Court who dissented in the *Trans-Missouri* case as sustaining his view that reasonableness or unreasonableness should, under the Sherman antitrust law, be the test, is a case at the common law where the court were passing upon a contract technically in restraint of trade. No single case that he refers to involves contracts or agreements or conditions that tended to monopoly. In that respect his citations were foreign to the controlling purpose of that statute.

There are two distinct legal propositions—contracts in restraint of trade and combinations and agreements and conspiracies that tend to monopolies. I have not had the time myself carefully to examine every case upon this subject, but I have had them examined by a man in whose legal ability I have confidence, and I think I can safely say that from the time when monopolies were first discussed, the books do not contain a single case based upon contracts or agreements or conspiracies that tend to monopoly, and therefore improperly and unduly increasing the price of a product, in which the term "reasonable" or "unreasonable" is

predicated upon that condition—no case where that is relied upon as an element under such circumstances. On the other hand, where the facts satisfy the court that the condition tends to monopoly it is held unlawful without qualifications or limitations. While the term "restraint of trade" is used in defining the offense in the Sherman antitrust law, it is evidently used upon the theory that a monopoly or an attempt to monopolize trade would operate as a restraint upon interstate and foreign commerce, rather than in the artificial sense that a contract between two individuals that impaired the right of one to engage in trade for a certain time or within a certain locality would be a restraint of that commerce. The definition inaptly is in part based upon the common-law term "restraint of trade," while the act is not intended to apply to such contract, but to such contracts and combinations as tend to monopoly.

This whole question of the distinction between contracts in restraint of trade and combinations and conspiracies to monopolize trade was discussed in a very able and exhaustive opinion by Hon. William H. Taft, circuit judge, sitting in the circuit court of appeals in the case of the United States *v.* Addyston Pipe and Steel Company et al. (85 F. R., 271, 302). In the course of the opinion he states the proposition as follows:

The very statement of the rule implies that the contract must be one in which there is a main purpose, to which the covenant in restraint of trade is merely ancillary. The covenant is inserted only to protect one of the parties from the injury which, in the execution of the contract or enjoyment of its fruits, he may suffer from the unrestrained competition of the other. The main purpose of the contract suggests the measure of protection needed, and furnishes a sufficiently uniform standard by which the validity of such restraints may be judicially determined. In such a case, if the restraint exceeds the necessity presented by the main purpose of the contract, it is void for two reasons: First, because it oppresses the covenantor without any corresponding benefit to the covenantee; and second, because it tends to a monopoly. But where the sole object of both parties in making the contract as expressed therein is merely to restrain competition and enhance or maintain prices, it would seem that there was nothing to justify or excuse the restraint, that it would necessarily have a tendency to monopoly, and therefore would be void. In such a case there is no measure of what is necessary to the protection of either party except the vague and varying opinion of judges as to how much, on principles of political economy, men ought to be allowed to restrain competition. There is in such contracts no main lawful purpose, to subserve which partial restraint is permitted, and by which its reasonableness is measured, but the sole object is to restrain trade in order to avoid the competition which it has always been the policy of the common law to foster.

He says further:

It is true that there are some cases in which the courts, mistaking, as we conceive, the proper limits of the relaxation of the rules for determining the unreasonableness of restraints of trade, have set sail on a sea of doubt and have assumed that the power to say, in respect to contracts which have no other purpose and no other consideration on either side than the mutual restraint of the parties, how much restraint of competition is in the public interest and how much it is not.

That is to say, whenever the courts have departed from the original contracts in restraint of trade per se as to which the contracting out of trade is simply ancillary, and undertaken to apply to a combination and conspiracy tending to monopoly the element of reasonableness or unreasonableness, they have set sail on a "sea of doubt" and assumed a power which they can not legitimately exercise.

And again, in applying the authorities to the particular case in hand, he said:

Upon this review of the law and the authorities we can have no doubt that the association of the defendants, however reasonable the prices they fixed, however great the competition they had to encounter, and however great the necessity for curbing themselves by joint agreement from committing financial suicide by ill-advised competition, was void at common law, because in restraint of trade and tending to a monopoly.

And while it was attempted from the facts to show that although there was a combination or conspiracy in that case tending to monopoly, it was reasonable in its character, he held that such considerations were not applicable to the contract involved, because the contract was a combination or a conspiracy tending to monopoly, and not a contract in restraint of trade as to which at common law the element of reasonableness or unreasonableness was predicable, saying:

A great many affidavits of purchasers of pipe in pay territory, all drawn by the same hand or from the same model, are produced, in which the affiants say that, in their opinion, the prices at which pipe has been sold by defendants have been reasonable. We do not think the issue an important one, because, as already stated, we do not think that at common law there is any question of reasonableness open to the courts with reference to such a contract. Its tendency was certainly to give defendants the power to charge unreasonable prices, had they chosen to do so.

Here the learned judge distinctly holds that the element of reasonableness is not predicable upon a combination or conspiracy tending to the monopoly of trade. This opinion is instructive and valuable, and I will print it as an appendix to the speech. I refer again to the authorities to which I referred in 1903, showing, in connection with the opinion of Judge Taft, that there is no well-considered case at common law that

attempts in any degree to predicate, upon a combination or conspiracy tending to the monopoly of trade, the element of reasonableness or unreasonableness. It follows from this that the attempt that is made by the so-called "Hepburn amendment" to the Sherman antitrust law to import the element of unreasonableness into that statute has no foundation in the common law and is in direct violation of the well-considered legal distinction that has always existed between contracts per se in restraint of trade, where one individual contracts with another to contract himself out of trade, and combinations and conspiracies tending to the monopoly of trade.

These legal considerations disclose very clearly the cases that Mr. Justice Brewer had in mind in his concurring opinion in the Northern Securities case (193 U. S., 361), when he said, in referring to his concurrence in the Joint Traffic Association case (171 U. S., 505):

Instead of holding that the antitrust act included all contracts, reasonable or unreasonable, in restraint of interstate trade, the ruling should have been that the contracts there presented were unreasonable restraints of interstate trade, and as such within the scope of the act. That act, as appears from its title, was leveled at only "unlawful restraints and monopolies." Congress did not intend to reach and destroy those minor contracts in partial restraint of trade which the long course of decisions at common law had affirmed were reasonable and ought to be upheld.

The only "long course of decisions at common law" affirming contracts in restraint of trade to be reasonable are the contracts where individuals were contracting themselves out of trade—where the contract to remain out of trade was ancillary to the main contract. Contracts which were held to be reasonable, if they were limited either in point of time or in point of space, were uniformly held to be unreasonable if unlimited as to time and unlimited as to space.

Mr. Justice Holmes also had this distinction very clearly in mind in his dissenting opinion in that case when he says (p. 403):

The words hit two classes of cases, and only two—contracts in restraint of trade and combinations or conspiracies in restraint of trade—and we have to consider what these, respectively, are. Contracts in restraint of trade are dealt with and defined by the common law. They are contracts with a stranger to the contractor's business, although in some cases carrying on a similar one, which wholly or partially restrict the freedom of the contractor in carrying on that business as otherwise he would. The objection of the common law to them was primarily on the contractor's own account. The notion of monopoly did not come in unless the contract covered the whole of England.

There was no objection to such combinations merely as in restraint of trade or otherwise unless they amounted to a monopoly. Contracts in restraint of trade, I repeat, were contracts with strangers to the contractor's business, and the trade restrained was the contractor's own.

These are exactly the same contracts referred to by Mr. Justice Brewer in his concurring opinion as being in partial restraint of trade, and which a long course of decisions at common law had affirmed were reasonable and ought to be upheld.

Mr. Justice Holmes proceeds:

Combinations or conspiracies in restraint of trade, on the other hand, were combinations to keep strangers to the agreement out of the business. The objection to them was not an objection to their effect upon the parties making the contract, the members of the combination or firm, but an objection to their intended effect upon strangers to the firm and their supposed consequent effect upon the public at large. In other words, they were regarded as contrary to public policy because they monopolized or attempted to monopolize some portion of the trade or commerce of the realm.

These remarks of Mr. Justice Holmes very clearly suggest the profound and underlying distinction between the two conditions; as to the contracts that restricted the freedom of the contractor in carrying on that business as otherwise he would, and combinations and conspiracies in restraint of trade, the distinction is profound and fundamental. Upon the first the element of reasonableness or unreasonableness can be properly predicated; upon the second, which is made a crime under the Sherman antitrust law, the element of reasonableness or unreasonableness can not with any propriety be predicated.

Bearing in mind these legal suggestions with reference to the rationale of the Sherman antitrust law, I will now enter upon the discussion of what is known as the Hepburn amendment to the Sherman antitrust law, and with reference to this it is to be first said that the amendment was not drawn, either in whole or in part, by the gentleman from Iowa, who introduced it and under whose name it travels. It has never yet been clearly disclosed to the subcommittee who heard the matter just exactly who is responsible for all of its provisions.

It perhaps should first be stated, in order that there may be no misapprehension about its public features, that, as conceded by Mr. Low, the bill is not in any sense a bill of the trust conference held under the auspices of the National Civic Federation. The committee of that conference were under no instructions and had no authority to prepare any specific legislation. On the contrary, they were specifically instructed to urge upon Congress without delay to pass legislation providing for a non-

partisan commission, in which the interests of capital and labor and the general public should be represented. It was expected that this commission would make a thorough inquiry into the matter, and the resolution concluded with the statement that all it asked was that a national nonpartisan commission be appointed to consider the question and report at the second session of the then approaching Congress recommending some legislation for enactment.

The committee of the conference therefore had no authority whatever to prepare and propose any specific measure of legislation. The conference was composed of a great variety of men, some of whom were able lawyers, and they fully appreciated the fact that the subject-matter was so complicated and involved such tremendous interests that legislation to accomplish the end desired by the association could not be formulated without thorough investigation and long and careful consideration, so that it must be distinctly understood that what is known as the "Hepburn bill" is in no sense either directly or indirectly a measure for which the conference is responsible or to which it has ever in any sense given its approval. In fact, Mr. Low, who presented the Hepburn amendment, concedes that he is not acting with any authority from the conference, but suggests that he was complying with the wishes of the chairman of the Committee on Interstate and Foreign Commerce in the presentation of the bill pending before the committee. While it appears from Mr. Low's first statement that both Mr. JENKINS and Mr. HEPBURN were present at the conference as the result of which the bill was prepared, it also further appears in the hearing that Mr. JENKINS distinctly disclaimed any desire on his part to have the bill presented by the committee, and was in no sense responsible therefor.

So that the Hepburn bill stands before the House and the country, not as representing the ideas of the conference, but as the result of the collaboration of the gentlemen whose names were disclosed in the hearing before the committee, and other gentlemen whose names were not disclosed. The Hepburn bill reads as follows:

A bill (H. R. 19745) to regulate commerce among the several States or with foreign nations, and to amend the act approved July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopolies."

Be it enacted, etc., That the act approved July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopolies," be, and hereby the same is, amended by adding at the end of said act the following sections:

"SEC. 8. That any corporation or association affected by this act, but not subject to the act approved February 4, 1887, entitled 'An act to regulate commerce,' or the acts amendatory thereof or supplemental thereto, shall be entitled to the benefits and immunities in this act hereinafter given, if and when it shall register as herein provided, and shall comply with the requirements of this act, hereinafter set forth, but not otherwise.

"Such registration, by a corporation or association for profit and having capital stock, may be effected by filing with the Commissioner of Corporations a written application therefor, together with a written statement setting forth such information concerning the organization of such corporation or association, its financial conditions, its contracts, and its corporate proceedings, as may be prescribed by general regulations from time to time to be made by the President pursuant to this act; and such registration by a corporation or association not for profit and without capital stock may be effected by filing with the Commissioner of Corporations a written application therefor, together with a written statement setting forth, first, its charter or agreement of association and by-laws; second, the place of its principal office, and, third, the names of its directors or managing officers, and standing committees, if any, with their residences.

"Thereupon the Commissioner of Corporations shall register such corporation or association under this act. In case any corporation or association so registered shall refuse or shall fail at any time to file the statements or to give the information required under this act, or to comply with the requirements of this act, or in case information furnished by it shall be false in any material particular, the Commissioner of Corporations shall have power to cancel the registration of such corporation or association after thirty days' notice in writing to such corporation or association. Any corporation or association aggrieved by such action of the Commissioner of Corporations may apply to the supreme court of the District of Columbia, in a suit or proceeding in equity, for such relief in the premises as may be proper, and said court shall have jurisdiction to hear and determine such application, subject to appeal as in other causes in equity.

"SEC. 9. That the President shall have power to make, alter, and revoke, and from time to time, in his discretion, he shall make, alter, and revoke, regulations prescribing what facts shall be set forth in the statements to be filed with the Commissioner of Corporations by corporations and associations for profit and having capital stock applying for registration under this act, and what information thereafter shall be furnished by such corporations and associations so registered, and he may prescribe the manner of registration and of cancellation of registration.

"Nothing in this act shall require the filing of contracts or agreements of corporations or associations not for profit or without capital stock, and such corporations and associations while registered hereunder, and the members thereof, shall be entitled to all the benefits and immunities given by this act, excepting such as are given by section 10 and section 11, without filing such contracts or agreements; but from time to time every such corporation or association shall file with the Commissioner of Corporations, when and as called for by him, a revised statement giving, as of a date specified by him, such information as is required to be given at the time of original registration under section 8 of this act.

"SEC. 10. That any corporation or association registered under this act, and any person, not a common carrier under the provisions of the said act approved February 4, 1887, or the acts amendatory thereof or supplemental thereto, being a party to a contract or combination hereafter made, other than a contract or combination with a common carrier filed under section 11 of this act, may file with the Commissioner of Corporations a copy thereof, if the same be in writing, or if not in writing, a statement setting forth the terms and conditions thereof, together with a notice that such filing is made for the purpose of obtaining the benefit of the provisions of this section. Thereupon the Commissioner of Corporations, with the concurrence of the Secretary of Commerce and Labor, of his own motion and without notice or hearing, or after notice and hearing, as the Commissioner may deem proper, may enter an order declaring that in his judgment such contract or combination is in unreasonable restraint of trade or commerce among the several States or with foreign nations. If no such order shall be made within thirty days after the filing of such contract or written statement, no prosecution, suit, or proceeding by the United States shall lie under the first six sections of this act, for or on account of such contract or combination, unless the same be in unreasonable restraint of trade or commerce among the several States or with foreign nations; but the United States may institute, maintain, or prosecute a suit, proceeding, or prosecution under the first six sections of said act for or on account of any such contract or combination hereafter made, of which a copy or written statement shall not have been filed as aforesaid, or as to which an order shall have been entered as above provided.

"No corporation or association for profit or having capital stock, and registered under this act, that hereafter shall make a combination or consolidation with any other corporation or association, shall be entitled to continue its registration under this act, unless without delay it shall file with the Commissioner of Corporations, pursuant and subject to the provisions of this section, a statement setting forth the terms and conditions of such combination or consolidation, together with a notice as hereinabove provided.

"SEC. 11. That any common carrier under the provisions of the said act approved February 4, 1887, or the acts amendatory thereof or supplemental thereto, being a party to a contract or combination hereafter made, or any other party to such contract or combination, may file with the Interstate Commerce Commission a copy thereof, if the same be in writing, or if not in writing, a statement setting forth the terms and conditions thereof, together with a notice that such filing is made for the purpose of obtaining the benefit of the provisions of this section. Thereupon the Interstate Commerce Commission, of its own motion and without notice or hearing, or after notice and hearing, as said Commission may deem proper, may enter an order declaring that in its judgment such contract or combination is in unreasonable restraint of trade or commerce among the several States or with foreign nations. If no such order shall be made within thirty days after the filing of such contract or written statement, no prosecution, suit, or proceeding by the United States shall lie under the first six sections of this act, for or on account of such contract or combination, unless the same be in unreasonable restraint of trade or commerce among the several States or with foreign nations, but the United States may institute, maintain, or prosecute a suit, proceeding, or prosecution under the first six sections of said act for or on account of any such contract or combination hereafter made, of which a copy or written statement shall not have been filed as aforesaid, or as to which an order shall have been entered as above provided."

SEC. 2. That section 7 of the said act approved July 2, 1890, is hereby amended so as to read as follows:

"SEC. 7. That any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover the damages by him sustained and the costs of suit, including a reasonable attorney's fee."

SEC. 3. That in any suit for damages under section 7 of the said act approved July 2, 1890, based upon a right of action accruing prior to the passage of this act, the plaintiff shall be entitled to recover only the damages by him sustained and the costs of suit, including a reasonable attorney's fee; and no suit for damages under said section 7 of the said act, based upon a right of action accruing prior to the passage of this act, shall be maintained unless the same shall be commenced within one year after the passage of this act.

Nothing in said act approved July 2, 1890, or in this act, is intended, nor shall any provision thereof hereafter be enforced so as to interfere with or to restrict any right of employees to strike for any cause or to combine or to contract with each other or with employers for the purpose of peaceably obtaining from employers satisfactory terms for their labor or satisfactory conditions of employment, or so as to interfere with or to restrict any right of employers for any cause to discharge all or any of their employees or to combine or to contract with each other or with employees for the purpose of peaceably obtaining labor on satisfactory terms.

SEC. 4. That no suit or prosecution by the United States under the first six sections of the said act approved July 2, 1890, shall hereafter be begun for or on account of any contract or combination made prior to the passing of this act, or any action thereunder, unless the same be in unreasonable restraint of trade or commerce among the several States or with foreign nations; and no suit or prosecution by the United States under the first six sections of the said act approved July 2, 1890, shall be begun after one year from the passage of this act for or on account of any contract or combination made prior to the passage of this act, or any action thereunder; but no corporation or association authorized to register under section 8 of the said act approved July 2, 1890, as amended, shall be entitled to the benefit of this immunity if it shall have failed so to register, or if the registration of such corporation or association shall have been canceled before the expiration of one year after such registration, exclusive of the period, if any, during which such cancellation shall have been stayed by an order or decree of court subsequently vacated or set aside. Anything herein contained to the contrary notwithstanding, all actions and proceedings now or heretofore pending under or by virtue of any provision of the said act approved July 2, 1890, may be prosecuted and may be defended to final effect; and all judgments and decrees heretofore or hereafter made in any such actions or proceedings may be enforced in the same manner as though this act had not been passed.

In the discussion of some of the salient features of the proposed legislation I shall not devote myself to the bill introduced, because after a number of long and protracted hearings before

the subcommittee of which I am chairman, the gentlemen proposing the measure decided to present a substitute therefor which, according to their view, represented more clearly and adequately the views entertained by the gentlemen who collaborated in the preparation of the measure. That substitute was presented and made a part of the hearings, and reads as follows:

A bill to regulate commerce among the several States or with foreign nations, and to amend the act approved July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopolies."

Be it enacted, etc., That section 7 of the act approved July 2, 1890, entitled "An act to protect trade and commerce against unlawful restraints and monopolies," be, and the same is hereby, amended so as to read as follows:

"SEC. 7. That any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover the damages by him sustained and the costs of suit, including a reasonable attorney's fee."

SEC. 2. That in any suit for damages under section 7 of the said act approved July 2, 1890, based upon a right of action accruing prior to the passage of this act, the plaintiff shall be entitled to recover only the damages by him sustained and the costs of suit, including a reasonable attorney's fee; and no suit for damages under said section 7 of the said act, based upon a right of action accruing prior to the passage of this act, shall be maintained unless the same shall be commenced within one year after the passage of this act.

SEC. 3. Nothing in said act approved July 2, 1890, or in this act, is intended, nor shall any provision thereof hereafter be enforced so as to interfere with or to restrict any right of employees to strike for any purpose not unlawful at common law or to combine or to contract with each other or with employers for the purpose of obtaining from employers peaceably or by any means not unlawful at common law satisfactory terms for their labor or satisfactory conditions of employment, or so as to interfere with or to restrict any right of employers for any purpose not unlawful at common law to discharge all or any of their employees or to combine or to contract with each other or with employees for the purpose of obtaining labor on satisfactory terms, peaceably or by any means not unlawful at common law.

SEC. 4. That the said act, approved July 2, 1890, is hereby further amended by adding at the end of said act the following sections:

"SEC. 9. That any corporation or association which may be subject to this act but not subject to the act approved February 4, 1887, entitled 'An act to regulate commerce,' or the acts amendatory thereof or supplemental thereto, shall be entitled to the benefits and immunities in this act hereinafter given, if and when it shall register as herein provided, and shall comply with the requirements of this act hereinafter set forth, but not otherwise.

"Such registration by a corporation or association for profit and having capital stock may be effected by filing with the Commissioner of Corporations a written application therefor, together with a written statement setting forth such information concerning the organization of such corporation or association, its financial condition, its contracts, and its corporate proceedings as may be prescribed by general regulations from time to time to be made by the President pursuant to this act; and such registration by a corporation or association not for profit and without capital stock may be effected by filing with the Commissioner of Corporations a written application therefor, together with a written statement setting forth, first, its charter or agreement of association and by-laws; second, the place of its principal office, and, third, the names of its directors or managing officers and standing committees, if any, with their residences.

"Thereupon the Commissioner of Corporations shall register such corporation or association under this act. In case any corporation or association so registered shall refuse or shall fail at any time to file the statements or to give the information required under this act, or to comply with the requirements of this act, or in case information furnished by it shall be false in any material particular, the Commissioner of Corporations shall have power to cancel the registration of such corporation or association after thirty days' notice in writing to such corporation or association. Any corporation or association aggrieved by such action of the Commissioner of Corporations may apply to the supreme court of the District of Columbia, in a suit or proceeding in equity, for review of such action and such relief in the premises as may be proper, and said court shall have jurisdiction to hear and determine such application and to affirm, reverse, or modify such action of said Commissioner, subject to appeal as in other causes in equity.

"SEC. 10. That the President shall have power to make, alter, and revoke, and from time to time, in his discretion, he shall make, alter, and revoke regulations prescribing what facts shall be set forth in the statements to be filed with the Commissioner of Corporations by corporations and associations for profit and having capital stock, applying for registration under this act, and what information thereafter shall be furnished by such corporations and associations so registered, and he may prescribe the manner of registration and of cancellation of registration.

"Nothing in this act shall require the filing of contracts or agreements of corporations or associations not for profit or without capital stock, and such corporations and associations, while registered hereunder, and the members thereof, shall be entitled to all the benefits and immunities given by this act excepting such as are given by section 11 and section 12, without filing such contracts or agreements; but from time to time every such corporation or association shall file with the Commissioner of Corporations, when and as called for by him, a revised statement giving, as of a date specified by him, such information as is required to be given at the time of original registration, under section 9 of this act.

"SEC. 11. That any corporation or association registered under this act, and any person not a common carrier under the provisions of the said act approved February 4, 1887, or the acts amendatory thereof or supplemental thereto, being a party to a contract or combination hereafter made other than a contract or combination with a common carrier filed under section 12 of this act, may file with the Commissioner of Corporations a copy thereof, if the same be in writing, or if not in writing, a statement setting forth the terms and conditions thereof,

together with a notice that such filing is made for the purpose of obtaining the benefit of the provisions of this section.

"No prosecution, suit, or proceeding by the United States shall be begun under the first six sections of this act for or on account of any such contract or combination hereafter made, of which a copy or written statement shall have been filed as aforesaid, or for or on account of any act done in performance thereof by or in behalf of such corporation, association, or person, unless such contract or combination shall be in unreasonable restraint of trade or commerce, as defined in section 3 of this act, or shall constitute a conspiracy in violation of section 1 or of section 3 of this act, or shall be in violation of section 2 of this act. If in the opinion of the Commissioner of Corporations any such contract or combination of which a copy or a written statement shall have been filed as aforesaid shall be in unreasonable restraint of trade or commerce, as defined in section 3 of this act, or shall constitute a conspiracy in violation of section 1 or of section 3 of this act, or shall be in violation of section 2 of this act, said Commissioner shall be authorized and empowered, and it shall be his duty, to enter an order to that effect, which order shall set forth briefly the grounds upon which it is based. Any such order may be made by the Commissioner upon his own motion and without notice or hearing within thirty days from the date of the filing of such contract or written statement. After the expiration of such thirty days no such order shall be made by the Commissioner except after notice to the party or parties who filed such contract or written statement and after giving such party or parties an opportunity to be heard, and such order shall take effect upon a date therein to be specified not less than ten days after the filing thereof; but any person aggrieved by such action of the Commissioner of Corporations, or the United States in case of his nonaction, may apply to the Interstate Commerce Commission for a rehearing of the case; and said Commission (with which the Commissioner of Corporations is hereby authorized to sit for the purpose of such rehearing with the powers and duties of a member) is hereby authorized and directed, after due motion to rehear such case and thereupon to enter such order in the case as seems to it proper, subject, as in other instances, to appeal to the courts as hereinafter provided. If any party or parties to any such contract or combination, of which a copy or a written statement shall have been filed as aforesaid, shall do any act in performance of such contract or in pursuance of such combination after the Commissioner of Corporations or the Interstate Commerce Commission shall have entered an order as aforesaid, such party or parties, unless such order of the Commissioner on the rehearing herebefore provided shall have been replaced by a new order or such order shall have been suspended or set aside by order of the court, as herein provided, shall be deemed guilty of a misdemeanor and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or both said punishments; and the United States may institute and maintain proceedings in equity under section 4 of this act to prevent and restrain the performance of such contract and the continuance of such combination and any action pursuant thereto in violation of this act.

"No corporation or association authorized to register under section 9 of this act shall be entitled to the benefit of this section if it shall have failed so to register or if the registration of such corporation or association shall have been canceled; and the United States may institute, maintain, or prosecute a suit, proceeding, or prosecution under the first six sections of said act for or on account of any such contract or combination hereafter made of which a copy or written statement shall not have been filed as aforesaid or as to which an order shall have been entered as above provided.

"Any party affected by any such order entered by the Commission may institute and maintain a suit to enjoin, set aside, annul, or suspend such order in the supreme court of the District of Columbia, and jurisdiction is hereby given to such court to hear and determine such suits and to grant such relief; but no interlocutory order or decree enjoining, setting aside, annulling, or suspending any such order of the Commission shall be granted except after not less than five days' notice to the Commission. The provisions of 'An act to expedite the hearing and determination of suits in equity, etc., approved February 11, 1903, shall be, and are hereby, made applicable to all such suits, including the hearing on an application for a preliminary injunction. An appeal may be taken from any interlocutory order or decree granting or continuing an injunction in any suit, but shall lie only to the Supreme Court of the United States: Provided, That the appeal must be taken within thirty days from the entry of such order or decree, and it shall take precedence in the appellate court over all other causes, except causes of like character and criminal causes.

"No corporation or association for profit or having capital stock, and registered under this act, that hereafter shall make a combination or consolidation with any other corporation or association, shall be entitled to continue its registration under this act, unless without delay it shall file with the Commissioner of Corporations, pursuant and subject to the provisions of this section, a statement setting forth the terms and conditions of such combination or consolidation, together with a notice as hereinafore provided.

"SEC. 12. That any common carrier under the provisions of the said act approved February 4, 1887, or the acts amendatory thereof or supplemental thereto, being a party to a contract or combination in the nature of a traffic agreement, but not including pooling of freight or earnings, hereafter made as forbidden by section 5 of the said act approved February 4, 1887, or any other party to such contract or combination, may file with the Interstate Commerce Commission a copy thereof, if the same be in writing, or, if not in writing, a statement setting forth the terms and conditions thereof, together with a notice that such filing is made for the purpose of obtaining the benefit of the provisions of this section.

"No prosecution, suit, or proceeding by the United States shall be begun under the first six sections of this act or on account of any such contract or combination hereafter made of which a copy or written statement shall have been filed as aforesaid, or for or on account of any act done in performance thereof by or in behalf of such corporation, association, or person, unless such contract or combination shall be in unreasonable restraint of trade or commerce as defined in section 3 of this act, or shall constitute a conspiracy in violation of section 1 or of section 3 of this act, or shall be in violation of section 2 of this act. If in the opinion of the Interstate Commerce Commission any such contract or combination of which a copy or a written statement shall have been filed as aforesaid shall be in unreasonable restraint of trade or commerce as defined in section 3 of this act, or shall constitute a conspiracy in violation of section 1 or of section 3 of this act, or shall be in violation of section 2 of this act, said Commission shall be

authorized and empowered and it shall be its duty to enter an order to that effect, which order shall set forth briefly the grounds upon which it is based. Any such order may be made by the Commission, upon its own motion and without notice or hearing, within thirty days from the date of the filing of such contract or written statement. After the expiration of such thirty days no such order shall be made by the Commission except after notice to the party or parties who filed such contract or written statement and after giving such party or parties an opportunity to be heard, and such order shall take effect upon a date therein to be specified not less than ten days after the filing thereof; but any person aggrieved by such action of the Interstate Commerce Commission, or the United States in case of its nonaction, may apply to the supreme court of the District of Columbia for review of the case; and said court is hereby authorized and directed to hear and determine such application and to affirm, reverse, or modify such action, or in case of its failure to act to enter such order in the case as seems to it proper, subject as in other instances to the provisions of section 11 and to appeal to the Supreme Court of the United States as herein provided.

"If any party or parties to any such contract or combination, of which a copy or a written statement shall have been filed as aforesaid, shall do any act in performance of such contract or in pursuance of such combination after the Commissioner of Corporations for the Interstate Commerce Commission shall have entered an order as aforesaid, such party or parties, unless such order of the Commission shall have been enjoined, annulled, or suspended by a decree or order of a court, as herein provided, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or both said punishments, in the discretion of the courts; and the United States may institute and maintain proceedings in equity under section 4 of this act, to prevent and restrain the performance of such contract and the continuance of such combination and any action pursuant thereto in violation of this act.

"No corporation or association authorized to register under section 9 of this act shall be entitled to the benefit of this section if it shall have failed so to register, or if the registration of such corporation or association shall have been canceled; and the United States may institute, maintain, or prosecute a suit, proceeding, or prosecution under the first six sections of said act for or on account of any such contract or combination hereafter made, of which a copy or written statement shall not have been filed as aforesaid, or as to which an order shall have been entered as above provided."

SEC. 5. That no suit or prosecution by the United States under the first six sections of the said act approved July 2, 1890, shall hereafter be begun for or on account of any contract or combination made prior to the passage of this act, or any action thereunder, unless the same be in unreasonable restraint of trade or commerce among the several States or with foreign nations; and no suit or prosecution by the United States under the first six sections of the said act approved July 2, 1890, shall be begun after one year from the passage of this act for or on account of any contract or combination made prior to the passage of this act, or any action thereunder; but no corporation or association authorized to register under section 9 of the said act approved July 2, 1890, as amended, shall be entitled to the benefit of the provisions of this section, if it shall have failed so to register, or if the registration of such corporation or association shall have been canceled before the expiration of one year after such registration, exclusive of the period, if any, during which such cancellation shall have been stayed by an order of the Interstate Commerce Commission or an order or decree of court subsequently vacated or set aside. Anything herein contained to the contrary notwithstanding, all actions and proceedings now or heretofore pending under or by virtue of any provision of the said act approved July 2, 1890, may be prosecuted and may be defended to final effect; and all judgments and decrees heretofore or hereafter made in any such actions or proceedings may be enforced in the same manner as though this act had not been passed.

It would not be profitable for me to spend any time in this discussion in comparing the provisions of the substitute with those of the original bill. In the main, it proceeds upon the same lines. In some important details the modifications are quite pronounced, but so far as they modify and materially change the propositions involved in the original bill they are understood to now represent the desires of the gentlemen behind the legislation, and so far as the legislation is subject to criticism, it is only fair to say that the criticism ought to be directed to that substitute, in which they have endeavored to obviate, so far as they thought it wise to do so, specific objections made to their original proposition.

In discussing some of the salient features of the proposed legislation, having reference now to the substitute, I will take up first the features of the bill which relate to labor organizations. Section 3 of the substitute appears in a different order from section 3 of the original bill, and is intended, I have no doubt, to be a substantial modification of the original section 3. No legal discussion of section 3 has ever been presented to the committee. The original section was objected to on the part of those appearing in opposition to the legislation, upon the ground that it very clearly exempted labor organizations from the operation of the Sherman antitrust law, to all intents and purposes legalized an interstate boycott, and practically neutralized the effect of the decision in the *Loewe v. Lawlor* case, announced February 3, 1908, and known as the "Danbury hat case."

Whether section 3 in the substitute was intended to obviate these objections the committee were not advised. The first provision in this section, which is somewhat uncertain in its meaning and for which no explanation was vouchsafed to the committee, provides that nothing in the Sherman antitrust act should be enforced so as to interfere with a "strike for any purpose not unlawful at common law."

Just exactly what the parties responsible for this legislation mean by this language, I do not know. If it was meant to apply

to interstate commerce all of the principles of common law relating to combinations, it would then make the Sherman antitrust law very much more drastic and oppressive than it is now with reference to labor organizations.

If, on the other hand, it was only intended to wipe out the Sherman antitrust law as to labor organizations and leave them subject to such inhibitions only as were "unlawful at common law," then the legislation would be absolutely meaningless and ineffective, because, as is thoroughly well known, there is no Federal common criminal law, and if common-law principles with reference to combinations in restraint of trade applied to interstate transportation, the enactment of the Sherman antitrust law would be a work of supererogation and entirely unnecessary.

Which one of these meanings was intended by the astute legal gentlemen responsible for the language of this section, I do not undertake to say. If the first, clearly it would be extremely offensive to the labor organizations and would not meet with the approval of the committee. If the second, it was an insidious effort to absolutely destroy the operations of the Sherman antitrust law as to labor organizations, thus by indirection, without disclosing clearly upon its surface, accomplish a result that was certainly not intended, if the statements of Mr. Low and Mr. Jenks, who were the principal promoters of the legislation before the committee, can be relied upon, because they distinctly said that under no circumstances did they wish any legislation passed that would legalize or authorize such a boycott as was denounced by the Supreme Court of the United States in the Danbury hat case.

The further language of this substitute, however, presented and urged by them very clearly, in my judgment, did authorize just exactly such a boycott, because it provided that the provisions of the act should not be enforced where there was a combination of employees "for the purpose of obtaining from employers peaceably or by any means not unlawful at common law, satisfactory terms," etc.

It will be noted that this does not confine the purpose to means unlawful at common law, because by the very language of the section the phrase "by any means not unlawful at common law" is alternative and not used as synonymous with "obtaining from employers peaceably."

Now, the fact is that in the Danbury Hat case the results accomplished, which were clearly subject to the prohibition of the Sherman antitrust law, according to the decision of the Supreme Court of the United States, were in every instance peaceable. It was specifically and distinctively a peaceable boycott. It was an attempt on the part of employees to get from their employers, "peaceably," satisfactory terms.

So also was the boycott denounced by Mr. Justice Gould in his decision in the Bucks Store and Range Company case; that was specifically and distinctly a case where the employees were seeking to obtain from their employers, "peaceably," satisfactory terms, and so forth.

There can be no question, in my judgment, but that the language of section 3 of the substitute was deliberately intended to legalize and authorize an interstate boycott in the teeth of the decision of the court in the Danbury Hat case. The attention of Mr. Jenks was called to this, what I believe to be the obvious construction, by myself, and he suggested that their attorneys insisted that such was not the proper construction. In answer to that suggestion, he was requested to furnish to the committee the opinion of the counsel for the gentlemen responsible for the promotion of the legislation, differentiating the language used in section 3 from the conditions involved in the Danbury Hat case and the Bucks Store and Range case, or what would be more satisfactory to the committee, to have their counsel present, so that they could be examined and the matter discussed for the purpose of ascertaining what the true construction, effect and intent of this ingenious language in section 3 were.

Not only did he fail to present his counsel before the committee, but he utterly failed to present from his counsel, whoever they may be, the slightest suggestion or discussion undertaking in any way to differentiate the language criticised, from the facts passed upon by the court in these two cases. And, in the absence of this, after the chairman of the committee specifically insisted that the language was so intended and susceptible of no other construction, I think I am entirely safe in saying that section 3 was a deliberate purpose to exempt labor organizations from the operations of the Sherman antitrust law, and to defeat the effect of the decision in the Danbury hat case.

The labor organizations are not entirely satisfied with this construction that has been placed on this language, and they insisted, through Mr. Gompers, that what is known as the "Wil-

son bill" should be made an amendment to the substitute, in order to protect, as they said, the rights of labor organizations. The Wilson bill, insisted upon by them as an amendment to the proposed legislation, reads as follows:

A bill (H. R. 20584) to amend the act approved July 2, 1890, entitled "An act to protect trade and commerce against any unlawful restraints and monopolies."

Be it enacted, etc., That the act approved July 2, 1890, entitled "An act to protect trade and commerce against any unlawful restraints and monopolies," be, and the same is hereby, amended by adding at the end of said act the following section:

"SEC. 9. That nothing in said act is intended nor shall any provision thereof hereafter be enforced so as to apply to organizations or associations not for profit and without capital stock, nor to the members of such organizations or associations."

"That nothing in said act is intended nor shall any provision thereof hereafter be enforced so as to apply to any arrangements, agreements, or combinations among persons engaged in agriculture or horticulture made with a view of enhancing the price of their own agricultural or horticultural product."

It will be noticed that this bill is substantially a repetition, with but little change in language, of the original proviso adopted in the Committee of the Whole on the part of the Senate as an amendment to the Sherman antitrust law, which amendment went to its final grave in the hands of the Judiciary Committee upon the part of the Senate after Senator Edmunds had so explicitly pointed out its effect and made it absolutely certain that no legislation containing any such exception could ever meet with his approval.

That the legislation proposed, without this amendment, would be, to the last degree, unsatisfactory to the labor organizations, is, perhaps, too obvious for discussion. This amendment is clearly open to every objection which I have heretofore made as to its unconstitutionality and its unwisdom and impropriety.

The significance of the decision of the Supreme Court in the Danbury hat case, and its application to labor organizations and their activities, can be no more effectively stated than by quoting from the address delivered by Mr. Samuel Gompers, on May 1, at Chicago, and reported in the June number of the American Federationist, in which he says, referring to this particular case:

Apart from the fact that this decision applies to the hat makers, it also applies to every man and woman who belongs to a labor organization. I have heard it claimed several times since the decision has been rendered that it does not affect the labor organizations. My friends, I think it is in Shakespeare's "Merchant of Venice" where Shylock makes the remark, "You might as well take from me my life as take from me the means whereby I live." Under this decision of the Supreme Court and under its other decisions rendered in the recent past they might as well dissolve and destroy the organizations of labor as to enforce these decisions.

If I understand the English language, this is equivalent to an assertion that if the labor organizations were deprived of the right of engaging in and prosecuting an interstate boycott, they might as well dissolve and destroy them. In other words, that their successful activities and the results that they expect to accomplish are rendered entirely nugatory, and hence the instrument to be used in accomplishing these results is the interstate boycott.

This is in entire harmony with the petition filed by the American Federation of Labor to intervene and be heard in opposition to the plaintiff in the Danbury hat case before the Supreme Court of the United States. This petition was filed by Mr. T. C. Spelling, as the attorney for the American Federation of Labor, and is signed by Mr. Samuel Gompers and Frank Morrison, by T. C. Spelling, attorney. It was filed on the 2d of December, 1907, and among other things this petition states:

To the Supreme Court of the United States:

Your petitioners, The American Federation of Labor, Samuel Gompers and Frank Morrison, mentioned in the complaint herein, respectively show:

That said American Federation of Labor is a voluntary association heretofore organized and having an office and place of business at the city of Washington, in the District of Columbia; that it has a constitution heretofore regularly adopted and a membership consisting of many other voluntary associations; that the said Samuel Gompers mentioned in the complaint as the chief agent of your petitioner, is its president and chief executive officer, and said Frank Morrison is its secretary; that the said The United Hatters of North America mentioned in said complaint, is one of the voluntary associations constituting said membership; that petitioners are financially and otherwise interested in the decision of the above-entitled case, and that a decision herein in favor of the plaintiff in error would seriously obstruct and hinder the said American Federation of Labor, petitioner, in carrying out the purposes for which it was organized, and destroy, at least to some extent, its usefulness to its members, and would likewise in like manner injure said members.

That is to say, if it were held that the organization could not engage in an interstate boycott it "would seriously obstruct and hinder the said American Federation of Labor in carrying out the purposes for which it was organized, and destroy, at least to some extent, its usefulness to its members."

The petition goes on to say:

Wherefore your petitioners respectfully pray that they may be permitted to file a brief and be heard on the side of the defendants in

error herein, and for such other relief as to the court may seem proper. And in amplification of this petition your petitioners respectfully represent the following facts:

First. That the constitution of said American Federation of Labor, petitioner, makes special provision for the prosecution of "boycotts," so called, when instituted by a constituent or affiliated organization, as is described in the complaint filed in the district court by the plaintiff in error herein, through the agency and pursuant to the approval of the executive council of petitioner; but that what are alleged in said complaint to be boycotts are in reality legal and proper proceedings set on foot and carried on in order to accomplish lawful ends of your petitioner and of said affiliated or constituent associations.

Second. That under the provisions of said constitution many so-called "boycotts" have been and several are now being prosecuted by petitioner pursuant to approval of its said executive council.

From this it would appear quite clearly that the boycott was the principal instrument contemplated by the constitution of the American Federation of Labor for the accomplishment of its purposes; and this seems to have been in Mr. Gompers's mind when he was making his speech, especially when he insisted that they "might as well dissolve and destroy the organization of labor as to enforce these decisions." That is to say, according to his point of view, as declared in his speech on the 1st of May, 1908, if the decision in the Danbury hat case was to be enforced, and his organization is to be prohibited from engaging in interstate boycott, it might as well be dissolved and destroyed.

This is a trifle inconsistent with his statement in relation to this matter, when his attention was called to it before the committee, when a portion of the extracts above referred to was read, and he was inquired of as follows:

The CHAIRMAN. I suppose that accurately states the attitude of your organization?

Mr. GOMPERS. Yes, sir; but that is not one of the fundamental principles.

The CHAIRMAN. Well, your constitution provides for the prosecution of boycotts, does it not?

Mr. GOMPERS. No, sir.

The CHAIRMAN. But this petition, signed by the American Federation of Labor, Samuel Gompers, and Frank Morrison, by T. C. Spelling, attorney, says:

"First. That the constitution of said American Federation of Labor, petitioner, makes a special provision for the prosecution of boycotts."

I know nothing about it except what I see here.

Mr. GOMPERS. The constitution makes provision for the selection of a committee on boycotts, and also regulates the manner or, rather, restricts the number of boycotts which an organization can apply for indorsement, and it also restricts the central bodies from indorsing certain boycotts.

Your questions make it necessary for me to say just a word more, if I may.

The CHAIRMAN. Certainly.

Then follows a discussion of the Danbury hat case by him which goes into the merits of the case rather than a discussion of the legal principles, and is therefore not quoted, but it can be found at page 64 of the hearings on House bill No. 19745.

An examination of their constitution discloses the fact that it makes specific provision for the prosecution of boycotts, and contains many detailed provisions relating thereto. I make the following quotation on this point from the official proceedings of the convention of the American Federation of Labor, held at Pittsburg, Pa., November 20, 1905:

The committee on boycotts made the following report and recommendation, which was adopted by the convention: "We must recognize the fact that a boycott means war, and to successfully carry on a war we must adopt the tactics that history has shown are most successful in war. The greatest master of war said that 'War was the trade of a barbarian, and that the secret of success was to concentrate all your forces upon one point of the enemy, the weakest if possible.' In view of these facts, the committee recommends that the State Federations and central bodies lay aside minor grievances and concentrate their efforts and energies upon the least number of unfair parties or places in their jurisdiction. One would be preferable. If every available means at the command of the State Federations and central bodies were concentrated upon one such, and kept up until successful, the next on the list would be more easily brought to terms and within a reasonable time none opposed to fair wages, conditions, or hours but would be brought to see the error of their ways and submit to the inevitable. Under the present system, our efforts are largely wasted and our ammunition scattered. Let us reduce the boycotts to the lowest possible number and concentrate our efforts upon those, and we feel certain better results will be obtained."

I think Mr. Gompers must have had this action of his Federation of Labor in mind when making the statement last quoted from him. It is certainly a frank and explicit statement of the spirit that animates his organization, and I am not prepared to say that it does not fitly characterize the boycott "as the trade of a barbarian."

The Wilson bill is intended to leave the Sherman antitrust law so that the boycott shall be legitimized, as it exempts labor organizations entirely from its operations. It attempts to authorize them to prosecute this "trade." In the June issue of the Federationist Mr. Gompers, the president of the American Federation of Labor, makes this assertion:

In the name of labor, in the interest of all our people, we urge and must insist upon the enactment of—

The Wilson bill (H. R. 20584) amending the Sherman antitrust law.

That is to say, the issue flatly and squarely presented by him to Congress and the American people is the authorization of the interstate boycott.

Upon this issue I do not hesitate to say that, so far as I am concerned, I shall not only refuse to authorize or permit the authorization or legalization of an interstate boycott, but I shall use every instrumentality within my power to prevent the passage of any legislation intended to accomplish that result.

The Wilson bill is distinctively class legislation. It destroys absolutely the equality of men before the law, but is insisted upon in the American Federationist in the copy to which I have alluded, in connection with the declaration in the same article, in which they object to the injunction as "denying to workers the constitutional right of equality before the law;" the same article which insists upon the constitutional right of equality before the law insists upon specific legislation which would be distinctively denying to all other people the equal protection of the law, and creates the labor organization a distinctive class with peculiar and special privileges which are not granted to others situated in like manner. But a little inconsistency like this does not in any way disturb what they look upon as the value of the argument with which they sustain their position. It may be proper to again observe that the combinations that Mr. Gompers thus insists on having authorized by law are capable of being developed into what is denounced by Mr. Secretary Taft in his great opinion in the Phelan case as a conspiracy of the American Railway Union that "stagger the imagination."

With this legislation demanded by Mr. Gompers on behalf of the American Federation of Labor it would be perfectly possible to duplicate, without limit, combinations and conspiracies that, in the language of Mr. Secretary Taft, would "stagger the imagination."

It would legitimate the conditions referred to by Judge Gray in his celebrated report (reference to which has already been made) in the following language:

It also becomes our duty to condemn another less violent, but not less reprehensible, form of attack upon those rights and liberties of the citizen which the public opinion of civilized countries recognizes and protects. The right and liberty to pursue a lawful calling and to lead a peaceable life, free from molestation or attack, concerns the comfort and happiness of all men, and the denial of them means destruction of one of the greatest, if not the greatest, of the benefits which the social organization confers. What is popularly known as the "boycott" (a word of evil omen and unhappy origin) is a form of coercion by which a combination of many persons seek to work their will upon a single person, or upon a few persons, by compelling others to abstain from social or beneficial business intercourse with such person or persons. Carried to the extent sometimes practiced in aid of a strike, and as was in some instances practiced in connection with the late anthracite strike, it is a cruel weapon of aggression, and its use immoral and antisocial.

To say this is not to deny the legal right of any man or set of men voluntarily to refrain from social intercourse or business relations with any persons whom he or they, with or without good reason, dislike. This may sometimes be un-Christian, but it is not illegal. But when it is a concerted purpose of a number of persons not only to abstain themselves from such intercourse, but to render the life of their victim miserable by persuading and intimidating others so to refrain, such purpose is a malicious one, and the concerted attempt to accomplish it is a conspiracy at common law, and merits and should receive the punishment due to such a crime.

And again:

* * * The temptation to resort to this weapon oftentimes becomes strong, but it is none the less to be resisted. It is an attempt of many, by concerted action, to work their will upon another who has exercised his legal right to differ with them in opinion and in conduct. It is tyranny pure and simple, and as such is hateful, no matter whether attempted to be exercised by few or by many, by operators or by workmen, and no society that tolerates or condones it can justly call itself free.

In the same report Judge Gray, with equal vigor denounces the black list. I do not hesitate to say that upon this question, involving the right of the boycott and black list, I stand without any hesitation with Judge Gray. It is proper also to say that every other person that appeared before the committee in the proposed promotion of this legislation disclaimed any desire to have any legislation passed that would authorize the boycott.

I understand the President to agree with the denunciations expressed by Mr. Secretary Taft and Judge Gray, since in his message of April 27, 1908, he says:

But we should sanction neither a boycott nor a black list which would be illegal at common law.

And in another message I think he specifically indorses the attitude taken by Judge Gray in connection with the boycott, in his report on the anthracite coal strike, and moreover it may be said in this connection, inasmuch as the Wilson bill is a deliberate attempt to completely exempt from the operations of the Sherman antitrust law labor organizations, that that amendment does not evidently have the support of the Presi-

dent of the United States, because in this same special message to which I have referred the President says:

A strong effort has been made to have labor organizations completely exempted from any of the operations of this law, whether or not their acts are in restraint of trade. Such exception would in all probability make the bill unconstitutional, and the legislature has no more right to pass a bill without regard to whether it is constitutional than the courts have lightly to declare unconstitutional a law which the legislature has solemnly enacted.

So, as I understand it, the President himself is opposed to the amendment insisted upon by the American Federation of Labor, without the incorporation of which they are opposed, as I understand it, to the adoption of the so-called amendment to the Sherman antitrust law.

I propose to make one other quotation from the report of Judge Gray, in which, after having referred to the fact that in that particular case the boycott was accompanied by quite a number of acts of violence and outrage, he says, covering, as I understand it, the boycott question, and the occurrences incidental to its operation in that particular case:

The practices which we are condemning would be outside the pale of civilized war. In civilized warfare women and children and the defenseless are safe from attack, and a code of honor controls the parties to such warfare which cries out against the boycott we have in view. Cruel and cowardly are terms not too severe by which to characterize it.

I do not wish to be understood as asserting that all the provisions of the proposed substitute were opposed by the American Federation of Labor. The chief feature of the bill is the requiring of the organizations that come within its scope and take advantage of its privileges to become registered and submit their contracts and agreements to the determination and approval of the Bureau of Corporations. This bill contemplated the registering of the labor organizations, but did not require them to file any contracts and agreements, for the reason that they were not corporations organized with capital stock or for profit. It repealed the provisions of the Sherman antitrust law, giving threefold damages; and this feature of the legislation, as I understand it, met with the approval of the Federation, although they were distinctly opposed to the requirements of registration or the submission of any contracts or agreements to the determination of the Bureau of Corporations.

It did not appear that there was any suit pending in any court where threefold damages might be recovered under the provisions of section 7 of the Sherman antitrust law, except the Danbury hat case above referred to.

They might well be satisfied with the provisions of this substitute relating to threefold damages, because the act, in my judgment, disclosed a reprehensible effort to legislate out of court the plaintiff in the Danbury hat case, and take away his right to obtain threefold damages.

Section 2 of the substitute provides—

That in any suit for damages under section 7 of the said act, approved July 7, 1890, based upon a right of action accruing prior to the passage of this act, the plaintiff shall be entitled to recover only the damages by him sustained, etc.

"Any suit for damages" clearly covers the Danbury hat case, because that is a suit for damages, and a suit "based upon a right of action accruing prior to the passage of this act" also covers the Danbury hat case, because that action was so based.

Therefore, in terms conclusive, but without mentioning the Danbury hat case by name, although it was distinctly admitted that that was the only case that anybody knew was pending or that would be affected thereby, this proposed amendment in terms deprived the plaintiffs in that case of their right to recover threefold damages to which they were entitled when their suit was brought. It was admitted in substance that section 2 legislated these plaintiffs out of court, and they were the only plaintiffs that could possibly be affected thereby.

But it was contended that the closing portion of section 5 legislated them back into court. That could have been done by providing that as to pending actions the act should not in any way affect them, which could have been done in two or three words. On the other hand, the bill provided, first, that pending actions might be prosecuted and defended to final effect, which, of course, has no connection whatever with the question of statutory measure of damages, and further provided that all judgments and decrees heretofore or hereafter made in any such actions or proceedings "may be enforced in the same manner as though this act had not been passed," which did not restore the right to threefold damages.

But section 2 of the act expressly provided that no judgment should be rendered for anything but single damages, and any judgment therefore rendered after the passage of the act would be rendered for single damages only, and the fact that the act provided that the judgment might be enforced in the same manner as though this act had not been passed had no effect what-

ever upon the measure of damages, of which the plaintiffs in the Danbury hat case were deprived by the express provisions of section 2.

The attention of the promoters of this legislation was specifically called to this apparent effort in the first bill to legislate the plaintiffs out of court and deprive them of their right to recover this measure of damages, and after their attention having been so called to it, they filed as a substitute the bill which I have just been criticizing.

I do not go so far as to say that either Mr. Low or Mr. Jenks, who seemed to be mainly responsible for and largely interested in the enactment of this legislation, had any such intent. My belief, however, is that whoever prepared the language of this act and put it into legislative shape did have a deliberate purpose by indirection to deprive the plaintiffs in the Danbury hat case of the benefits of the Sherman antitrust law. I have no doubt it was the hope and the expectation that the legislation might pass and accomplish this result, and perhaps the peculiar effect of the language might not be discovered.

Whether in relation to subsequent actions the damages should be single or threefold is a matter which I do not propose to take time to discuss, except to say that if the substitute, as suggested, applying to future litigation, became a law, it would separate into a class by itself actions at law brought to recover by reason of unlawful or criminal conduct, and deprive the plaintiffs in such case of what is a well-known common-law right, of their right to recover punitive and exemplary damages for torts maliciously and willfully committed, a right too familiar to require discussion or elaboration.

There would not seem to be on general principles any particularly good reason why defendants who were engaged in the violation of a statute and in the commission of a specific crime, and in its commission were doing an injury to a plaintiff, that in such a case and under such circumstances the plaintiff should be deprived of the ordinary common-law right to recover at least punitive and exemplary damages.

THE AMENDMENT AS RELATING TO COMBINATIONS OF CAPITAL.

This portion of the amendment is said to have two great objects: First, it requires all corporations or individuals who seek to get the benefit of its provisions to register themselves with the Bureau of Corporations, and in the case of corporations, to file such information concerning the organization of such corporation, its financial condition, its contracts, and its corporate proceedings as may be prescribed by general regulations from time to time to be made by the President pursuant to this act, the purpose of the act being to procure from the corporations availing themselves of the provisions of the act information which would give to the public the measure of publicity which is understood to be desirable in connection with their operation and control, not only for the purpose of informing the Congress as to the needs of future legislation, but for the purpose of giving to the public such information as would so far as may be protect them in connection with the operations of, and their investments in, organizations of that character.

Corporations thus registering themselves for the purpose of getting the benefit of the provisions of this act were to have conferred upon them privileges that do not now exist under the law.

In entire disregard of the legal features of this legislation, to which I have heretofore called specific attention, involving contracts in restraint of trade at common law, and combinations and conspiracies tending to monopolize trade, it was proposed to engraft upon this statute without reference to the question as to whether the qualification would relate to contracts in restraint of trade at common law or combinations and conspiracies, the element of reasonableness, or unreasonableness, and a most ingenious scheme was devised for the purpose of putting into operation or making an application of these qualifying terms.

It perhaps should be said in a general way, first, that it may be quite true that there is existing business embarrassment on account of the confusion or lack of correct apprehension as to the true scope of the Sherman antitrust law that prevails and on account of the further alleged fact that in the general conduct of business it is claimed that it is to an extent necessary to enter into arrangements and agreements of some character which are alleged to be proper and judicious and perhaps necessary to the general conduct of business, but which are believed to be technically in violation of the provisions of the Sherman antitrust law as now construed.

This in a general way was the claim suggested by both Mr. Low and Mr. Jenks, both of whom I may say in passing, impressed me as men of character, intelligence and ability, and having the sincere and earnest desire to correct what they believed to be a generally prevailing business embarrassment in

connection with this legislation. It ought to be said, however, that neither of these gentlemen had, or ever have had, any practical experience in business. Neither of them had any expert knowledge of the law relating thereto and had to depend largely for their facts and for their law upon other parties; and their statements, both in relation to the facts and the law, were in a large degree general and not specific and concrete.

The provisions concerning the reasonableness or unreasonableness of the contracts and agreements to be entered into by the corporations availing themselves of the provisions of this proposed amendment were extremely ingenious and to my mind very suggestive. It is provided by the specific terms of the proposed substitute that these contracts and agreements would be subject to the determination of the Commissioner. That the Commissioner, if of the opinion, after an examination, that the contract or combination was in unreasonable restraint of trade, should so order, stating in his order his reasons therefor; and it was further provided, if the Commissioner made no such order within thirty days from the date of the filing of the contract or agreement, that after the expiration of that time the Commissioner should make no order, such contracts and agreements thus becoming validated by the simple lapse of time, should be held to be *prima facie* reasonable. So that it appeared by the amendment that it would be incumbent upon the Government in a prosecution of the parties to such contract or agreement thus held by lapse of time to be reasonable to show that it was an unreasonable restraint of trade.

This right of the Government to attack such contracts or agreements as unreasonable is merely technical and unsubstantial, since the memorandum filed with the committee by the Commissioner of Corporations discloses the fact that the determination of the Commissioner or his failure to determine was intended by that Bureau to be final and conclusive. On this point the memorandum filed by Hon. Herbert Knox Smith, the Commissioner, which he was instructed to prepare by the President, says, among other things:

Within thirty days he will thus find out either that his contract is believed to be contrary to public policy and may be attacked by the Government, in which case he would thereafter enter upon it at his own very proper risk, or he would learn, on the other hand, that the Government saw no *prima facie* reason to disapprove it, and he would then know that he could go ahead and base his operations upon it, and that so long as it was not against public policy it could not be attacked under the Sherman law; and this would be all the average business man would care to know.

Now, bear in mind the fact that whether or not it was against public policy was reached in one of two ways—first, by a specific determination of the Commissioner that the contract was in unreasonable restraint of trade, and, second, by the failure of the Commissioner to determine at all, when after the lapse of thirty days, by the simple lapse of time, the contract and agreement would be held to be reasonable. So that the action or inaction of the Commissioner resulted in the determination of whether or not the contract was against public policy, and if it was inaction upon the part of the Commissioner it gave to the corporation the knowledge that they could go ahead and base "their operations upon it." That this was the distinct understanding of the Commissioner of Corporations as to the manner in which this legislation, if it became a law, was to be enforced, more clearly appears from his further statement in the same memorandum, in which he says:

It should be so that the Government can, by legal and regular methods make its election as to the kind of contract which it will prosecute or will not prosecute, and be able so to advise the parties to that contract that they may act upon definite knowledge.

In essence this section provides merely a regular procedure, available for all parties for exercising that discretion as to enforcement of law which is an inseparable part of administrative functions.

Then the Commissioner goes on to discuss the fact that the executive department has a discretion which it can exercise as to when and how and under what circumstances it will enforce the provisions of a criminal statute. This suggestion, in his memorandum made by authority of the President, I take to be an authoritative declaration that a decision by his Bureau, either by action or inaction, would be accepted and acted upon by the Department of Justice. Wherever, then, by the operation of thirty days' time alone a contract thus filed was held to be reasonable, the corporations interested therein could feel satisfied that although technically still open to attack in the courts, they need have no apprehension, because the Department of Justice would take this negative determination by the lapse of time as the rule by which they were to be governed in the enforcement of the provisions of the Sherman antitrust law, and no action would be brought thereunder for the purpose of assailing any contract thus determined by indirection not to be in unreasonable restraint of trade.

Although the substitute provides more or less complicated machinery for appeal, it is very clear that, so far as the Government is concerned, if the Commissioner of Corporations correctly

apprehends the intent of the legislation, this determination simply by the lapse of time would be to all practical intents and purposes conclusive upon the Government, because the Department of Justice would take its cue therefrom and never bring any action in relation thereto.

Now, then, it is to be observed that this would enable any great combination to practically determine for itself what should and should not be a reasonable contract in restraint of trade. It is very clear that there can be no contract or agreement entered into by a manufacturing or industrial corporation which is not bound to be ultimately reflected in the price to the consumer; and the question as to whether or not a contract or a combination between it and another corporation is or is not in reasonable restraint of trade must ultimately be determined by the question as to whether or not such contract or combination does or does not unduly increase the price to the consumer; and the price to the consumer is beyond all question the final test of the reasonableness or unreasonableness, according to the theory of the proposed amendment, of a combination in restraint of trade.

I may say here that I am at all times and under all circumstances unalterably opposed to placing in the hands of any administrative bureau the power to pass upon the price of products to the consumer, and the power to supervise and regulate and control the business of 87,000,000 of people.

Mr. Smith, the commissioner who appeared before the subcommittee, admitted that in case a contract or agreement was submitted to him for decision it would be necessary, in order to ascertain whether or no it was in unreasonable restraint of trade, to ascertain and determine what was the cost of producing the product. He said, as he was practically compelled to say, that the examination to be made by his Bureau would not be perfunctory and formal and of the rubber-stamp variety, but that there would be intelligent and careful investigations for the purpose of developing the facts. That being the case, it is obvious that as to a large number of combinations in this country it would be impossible to determine within thirty days' time whether the proposed contracts or agreements were or were not reasonable, involving an investigation of the cost of producing their product, the question of their capitalization, which are all involved legitimately in the question of determining what could be legitimately charged in order to produce a fair return to the parties engaged in the prosecution of the business. The great bulk of the large corporations would thus be able to file any contract or agreement that they saw fit to file, and have it validated by the simple lapse of thirty days' time, during which it would be physically impossible for the Bureau of Corporations to pass even in the most perfunctory manner upon the question as to whether or not the contract or agreement in question was in unreasonable restraint of trade.

The result is that this ingenious scheme would result in the validation of substantially every contract and agreement that would be filed by the great combinations in the country, and place entirely within their control the consumers who are interested in the price of their product.

This bill would have provided a wholesale immunity bath on an immense scale for every large and vicious combination in the country—self-devised, self-prepared, and self-administered.

I distinctly stated to the gentlemen promoting this legislation that I desired to know, first, what sort of contracts and agreements the great combinations seeking the advantage of this legislation desired to enter into, what purpose they expected to accomplish, how they intended to reach the result, and what the effect was to be upon the consumer. Upon this phase of the investigation absolutely no information of any kind was submitted to the committee. It was suggested and intimated that the distinguished gentlemen interested in various combinations would make statements to the committee at some time during the progress of the hearings which, I may say now, were very long and protracted, but at no stage of the investigation was any information of this kind vouchsafed. Mr. Jenks said, however, that some of the men engaged in business were now engaged in practices which, if disclosed, would subject them to criminal prosecution, and they could not be expected to disclose to the committee exactly what they were doing, but this was no answer to the inquiry. The contracts or agreements that they desired to make were entirely independent of the question as to what sort of arrangements they were now engaged in carrying out.

The chairman of the committee distinctly stated to the promoters of this legislation that he would absolutely decline to recommend any legislation until he knew what was sought to be accomplished, how it was intended to accomplish it, and what the result would be upon the vast mass of consumers in

the country. No one came before the committee to even intimate or suggest the kind of contracts, the purpose to be accomplished, the way in which it would be accomplished, and the effect upon the consumers of the country.

Moreover, the Commissioner of Corporations admitted that it would be necessary for him to pass on the cost of producing the product. When asked whether he would also pass upon the question of capitalization, there was submitted to him the concrete illustration of a corporation whose plant cost \$150,000 to create, afterwards included in a vast combination with hundreds of other corporations capitalized in the combination on the basis of a million and a half. He was then asked whether, in determining whether the contract and agreement submitted by such a combination was or not in reasonable restraint of trade, he would take into account the cost of the plant or its capitalization—\$150,000 or \$1,500,000. He distinctly refused to state to the committee what his conclusion under such circumstances would be. He was then informed by the chairman that the chairman would not be likely to turn over to his Bureau the question of determining whether a contract was in reasonable restraint of trade, in the absence of knowing whether his Bureau would base its determination upon the actual value or upon created and printed value, which might be ten times the amount of the real value.

The only reason that Mr. Smith was able to give for not informing me as to whether he would take into account, in determining the reasonableness of a contract, the actual value of \$150,000 or the capitalized value of \$1,500,000 was because it required him to lay down principles in advance that "I neither can lay down nor ought to lay down."

He finally admitted, however, that "Whoever is in the office should follow the principles so far as they are laid down by the common law and the courts."

He having finally suggested these as the principles that ought to be followed, I endeavored to ascertain from him how these principles would apply to the illustrations, and so inquired.

Mr. LITTLEFIELD. Laid down by the common law; but you are not prepared to tell us whether the common law would justify you in basing the right on the capital or the capitalization.

Mr. SMITH. No.

This seemed to exhaust that source of information.

I have no hesitation in saying, so far as I am concerned, that in connection with the propriety of submitting the business of 87,000,000 people to one bureau officer, I should decline under any and all circumstances to submit such a proposition until I knew first what sort of a combination it was desired to have legalized; and second, upon what principles of law the determination was to be reached. The hearing before the subcommittee, so far as these two questions are concerned, are an entire and absolute blank; and for that reason, if for no other, I should under no circumstances recommend this legislation.

Upon this point it is to be further observed that a combination or conspiracy tending to monopolize trade is beyond all question illegal at common law, and a combination or conspiracy to restrain interstate trade is also a criminal conspiracy or combination under the provisions of the Sherman antitrust law. I have never yet seen or heard of a legal proposition that would justify the efforts to make a crime reasonable, which would be the effect of this amendment to the Sherman law if it were adopted, because it expressly provides that combinations and conspiracies in restraint of interstate trade, if reasonable, will be valid. A reasonable crime, in my judgment, is unthinkable, and I do not believe that it is sound to undertake to predicate upon a conceded criminal condition the element of reasonableness for the purpose of exempting such supposed condition from criminality.

As Mr. Justice Taft has well said, in the language which I have already quoted:

We do not think that at common law there is any question of reasonableness with reference to such a contract.

The effort to ingraft upon the Sherman antitrust law an amendment the controlling and dominating features of which relate to combinations and conspiracies tending to the monopoly of trade is an effort to amend the statute by introducing therein an element undertaking to qualify a conceded criminal condition which has no precedent in legislation and no justification in authority.

The gentleman from Massachusetts [Mr. WASHBURN] made a very clear and succinct statement before the committee. It was obvious that he had given to this question a very intelligent, able, and discriminative investigation. He called attention to the fact that there were more than 5,000 corporations in Massachusetts that were engaged in contracts or combinations with each other for the purpose of protecting themselves against injurious competition, but conceded that the effect of all of these combinations and contracts was to increase to a certain extent the

price of the commodity to the consumer. This, of course, gave rise immediately to the question as to how far or under what circumstances the increase of the cost to the consumer could be justified and whether or not any legislation could be had to adequately meet the situation and properly regulate and control it so as to protect the rights both of the corporations and of the consumer.

It ought to be said in connection with the question as to what sort of combinations or contracts would justify the amendment proposed, that a letter from Mr. Andrew Carnegie was read, in which he claimed that there was one great product, an article of general consumption, as to which, in his judgment, it was quite proper, to quote his language, "that the railroad company and the manufacturers should be allowed to agree upon a common rate;" and he said: "I do not recall any other article of which this can be so clearly said." He said, further, that "in ninety-nine cases out of one hundred it will undoubtedly be to rob the community of its right to the benefits of free competition, disguise it as we may."

If Mr. Carnegie's view of the situation is correct, the condition upon which this legislation is to be justified shows an extremely small factor in the aggregate of business—1 per cent as against 99 per cent that is entitled to relief. It is at least open to doubt whether Congress would be justified in enacting legislation to relieve so small a factor when its operation would be vicious in the last degree as to the remaining portion. It must be borne in mind that there can be no general legislation that will not operate under some circumstances with great hardship and apparent oppression; and the Sherman antitrust law must necessarily be subject to such consequences, and that this by no means indicates any necessity for its amendment.

It may, perhaps, not surprise you to learn that the particular article that Mr. Carnegie had in his mind was steel rails. As to steel rails, I may observe in passing that the committee were not informed that the United States Steel Company was suffering by reason of the lack of any legislation enabling them to successfully conduct their business. The last report of the company shows that they had accumulated in profits about \$133,000,000, and after paying all fixed charges, operating expenses, and dividends, carrying to a surplus fund something like \$69,000,000.

To be perfectly frank about it, the assertion that 99 per cent of the cases to be affected are criminal and vicious and only 1 per cent legitimate does not impress me as a strong reason for the enactment of general legislation.

In the President's message of April 27, 1908, he quotes the finding of the finance committee of the city of Boston, Mr. Nathan Matthews, chairman, in which reference to what is known as the "Boston agreement," is made as follows:

Where, as in the case of the "Boston agreement," a number of the most important manufacturers and dealers in structural steel in this country, including the American Bridge Company, one of the constituent members of the United States Steel Corporation, have combined together for the purpose of raising prices by means of collusive bids, and false representations, their conduct is not only repugnant to common honesty, but is plainly obnoxious to the Federal statute known as the "Sherman or antitrust law."

Upon this, the President makes the following comment:

Surely such a state of affairs as that set forth emphasizes the need of further Federal legislation, not merely because of the material benefits such legislation will secure, but above all because this Federal action should be part, and a large part, of the campaign to waken our people as a whole to a lively and effective condemnation of the low standard of morality implied in such conduct on the part of great business concerns.

If I understand the comment of the President correctly he intends to severely censure the conduct referred to in the quotation above made. It is very clear that if Chairman Matthews is correct in his views that the conduct of the American Bridge Company, which he condemns without stint as being a most reprehensible conspiracy, shows a state of facts that is clearly within the provisions of the Sherman antitrust law, and would make at least the American Bridge Company, depending upon the facts that might be developed, clearly liable to punishment for engaging in such obnoxious and reprehensible combinations.

The fact that the American Bridge Company has been guilty of this conduct does not, as it seems to me, indicate the necessity for any additional legislation. It is now criminal, and I infer from the President's message his idea is that it ought to remain criminal. The only thing that it does indicate, in my judgment, is that the Department of Justice should have an injection of ginger or an acceleration of steam and zeal so that it might more effectively and actively prosecute combinations of that character, and particularly that combination, assuming the facts to be accurately stated. The only possible effect that the

proposed amendment to the Sherman antitrust law could have, if it became a law, upon this combination or conspiracy entered into by the American Bridge Company would be to give to the bridge company an opportunity to get complete immunity therefrom by filing its contract and agreement and having it determined to be reasonable by the inaction of the Commissioner after the lapse of thirty days' time, because it is quite clear that the contracts of the American Bridge Company could not by any exercise of diligence be passed upon by the Commissioner of Corporations within thirty days. The amendment would enable it to get a certificate of good character for precisely that same kind of a contract after the lapse of thirty days' time.

Mr. Henry R. Towne, representing the Merchants' Association of New York, made a very interesting statement of business conditions which he thought were legitimate and laudable which seemed to him to be embraced by a strict construction of the Sherman antitrust law, but did not undertake to suggest any definite and specific standards by virtue of which what might be known as "reasonable arrangements" or "contracts" could be determined. This really is the great difficulty in the whole matter, the inability to define by any specific and definite standard what would be a reasonable contract, combination, or conspiracy in restraint of trade.

The inherent difficulty undoubtedly is that the law never yet has ascertained or defined or undertaken to qualify combinations and conspiracies tending to monopolize trade because as a matter of law a reasonable conspiracy to monopolize trade is unthinkable; they are unlawful per se.

In this connection it may be useful for me to quote from the case of *Hopkins v. The United States* (171 U. S., 592), where the court describe in detail a large variety of business arrangements and agreements that are not within the scope of the Sherman antitrust law. Under these definitions very many of the difficulties suggested by the parties promoting this legislation are eliminated as elements of controversy:

The contract condemned by the statute is one whose direct and immediate effect is a restraint upon that kind of trade or commerce which is interstate. Charges for such facilities as we have already mentioned are not a restraint upon that trade, although the total cost of marketing a subject thereof may be thereby increased. Charges for facilities furnished have been held not a regulation of commerce, even when made for services rendered or as compensation for benefits conferred. (*Sands v. Manistee River Improvement Co.*, 123 U. S., 288; *Monongahela Navigation Company v. United States*, 148 U. S., 312, 329, 330; *Kentucky and Indiana Bridge Company v. Louisville, etc., Railroad*, 37 Fed. Rep., 567.)

To treat as condemned by the act all agreements under which, as a result, the cost of conducting an interstate commercial business may be increased would enlarge the application of the act far beyond the fair meaning of the language used. There must be some direct and immediate effect upon interstate commerce in order to come within the act. The State may levy a tax upon the earnings of a commission merchant which were realized out of the sales of property belonging to nonresidents, and such a tax is not one upon interstate commerce, because it affects it only incidentally and remotely, although certainly. (*Ficklin v. Shelby County Taxing District*, 145 U. S., 1.) Many agreements suggest themselves which relate only to facilities furnished commerce or else touch it only in an indirect way, while possibly enhancing the cost of transacting the business, and which at the same time we would not think of as agreements in restraint of interstate trade or commerce. They are agreements which in their effect operate in furtherance and in aid of commerce by providing for it facilities, conveniences, privileges, or services, but which do not directly relate to charges for its transportation nor to any other form of interstate commerce. To hold all such agreements void would, in our judgment, improperly extend the act to matters which are not of an interstate commercial nature.

It is not difficult to imagine agreements of the character above indicated. For example, cattle, when transported long distances by rail, require rest, food, and water. To give them these accommodations it is necessary to take them from the car and put them in pens or other places for their safe reception. Would an agreement among the landowners along the line not to lease their lands for less than a certain sum be a contract within the statute as being in restraint of interstate trade or commerce? Would it be such a contract even if the lands, or some of them, were necessary for use in furnishing the cattle with suitable accommodations? Would an agreement between the dealers in corn at some station along the line of the road not to sell it below a certain price be covered by the act, because the cattle must have corn for food? Or would an agreement among the men not to perform the service of watering the cattle for less than a certain compensation come within the restrictions of the statute? Suppose the railroad company which transports the cattle itself furnishes the facilities and that its charges for transportation are enhanced because of an agreement among the landowners along the line not to lease their lands to the company for such purposes for less than a named sum, could it be successfully contended that the agreement of the landowners among themselves would be a violation of the act as being in restraint of interstate trade or commerce? Would an agreement between builders of cattle cars not to build them under a certain price be void because the effect might be to increase the price of transportation of cattle between the States? Would an agreement among dealers in horse blankets not to sell them for less than a certain price be open to the charge of a violation of the act, because horse blankets are necessary to put on horses to be sent long journeys by rail, and by reason of the agreement that the expense of sending the horses from one State to another for a market might be thereby enhanced? Would an agreement among cattle drivers not to drive the cattle after their arrival at the railroad depot at their place of destination to the cattle yards where

sold for less than a minimum sum come within the statute? Would an agreement among themselves by locomotive engineers, firemen, or trainmen engaged in the service of an interstate railroad not to work for less than a certain named compensation be illegal because the cost of transporting interstate freight would be thereby enhanced? Agreements similar to these might be indefinitely suggested.

In our opinion all these queries should be answered in the negative. The indirect effect of the agreements mentioned might be to enhance the cost of marketing the cattle, but the agreements themselves would not necessarily for that reason be in restraint of interstate trade or commerce. As their effect is either indirect or else they relate to charges for the use of facilities furnished, the agreements instanced would be valid provided the charges agreed upon were reasonable. The effect upon the commerce spoken of must be direct and proximate. (*New York, Lake Erie and Western Railroad v. Pennsylvania*, 158 U. S., 431, 439.)

Before reaching a discussion of the legal effect of this amendment in prohibiting its application to contracts, combinations, and conspiracies that are held to be reasonable by some standard not as yet invented or suggested by anyone to the committee, it is interesting to note upon its practical phase that this matter is completely covered by Secretary Taft in his opinion in the Addyston pipe case, where he says, among other things:

The manifest danger in the administration of justice according to so shifting, vague, and indeterminate a standard would seem to be a strong reason against adopting it.

And again:

We think the cases hereafter cited show that the common-law rule against restraining of trade extends to all articles of merchandise, and that the introduction of such a distinction only furnishes another opportunity for courts to give effect to the varying economical opinions of its individual members.

Inasmuch as Mr. Secretary Taft is of the opinion that the alleged standard proposed to be introduced by this amendment is shifting, vague, and indeterminate, I think I may safely assume that he would be opposed to the enactment of any legislation of this character.

This demonstrates that Mr. Low had a solid foundation for his remark when he said he did not know what a reasonable restraint of trade was and did not know of anybody else that did.

It is interesting to note, before I pass to the discussion of the effect of the proposed amendment upon the criminal and penal provisions of the Sherman antitrust law, that the Supreme Court of the United States, in the case of the Cincinnati Packet Company v. Bay (200 U. S., 184), have distinctly held that contracts and agreements upon which reasonableness and unreasonableness are predicated at common law do not as matter of fact come within the scope of the present Sherman antitrust law. In that case they held that a contract for the sale of a vessel, in connection with which the parties thereto agreed not to engage in the business in which the vessels were before that time engaged, was not a contract that came within the scope of the Sherman antitrust law, saying:

This being our view of the covenant in question, whatever differences of opinion there may have been with regard to the scope of the act of July 2, 1890, there has been no intimation from anyone, we believe, that such a contract, made as part of the sale of a business and not as a device to control commerce, would fall within the act. On the contrary, it has been suggested repeatedly that such a contract is not within the letter or spirit of the statute. (*United States v. Trans-Missouri Freight Association*, 166 U. S., 290, 329; *United States v. Joint Traffic Association*, 171 U. S., 505, 568.) And it was so decided in the case of a patent. (*Bement v. National Harrow Company*, 186 U. S., 70, 92.) It would accomplish no public purpose, but simply would provide a loophole of escape to persons inclined to elude performance of their undertakings, if the sale of a business and temporary withdrawal of the seller necessary in order to give the sale effect were to be declared illegal in every case where a nice scrutiny could discover that the covenant possibly might reach beyond the State line. We are of opinion that the agreement before us is not made illegal by either of the provisions thus far discussed.

The court thus held distinctly that contracts of that character are not within the scope of the Sherman antitrust law, leaving within its scope only contracts, combinations, and conspiracies tending to the monopoly of trade.

CHARACTER OF POWER VESTED IN COMMISSIONER.

There was considerable discussion before the committee, in which I do not propose to indulge at any length, as to whether the power that was to be vested in the Commissioner of Corporations by the proposed amendment was executive, judicial, or legislative or a combination of two or more of them. If executive, the action of the Commissioner in the executive capacity would be clearly conclusive and binding and could not be reviewed by the courts, either directly or indirectly, by way of appeal, because the exercise of executive discretion within its sphere is not subject to either legislative or judicial control.

If judicial, then the question arose whether it was adequately and competently vested in the Commissioner and whether an executive officer under those conditions could exercise a judicial power.

If legislative, then it would be an attempt to delegate to an executive officer legislative power, which the Congress has no power to do.

In this connection it is to be borne in mind that it is well settled that the power to review the question in connection with a public utility corporation, such as a railroad, as to whether or not a rate which has been charged is or is not reasonable, is a judicial power. If the railroad company has charged an unreasonable rate of freight, and collected it under protest from the shipper, the shipper has a well-recognized right at common law to recover back from the carrier the amount of the freight that is in excess of what would be a reasonable sum; and if, on the other hand, the shipper has not paid for the carriage of the property, the carrier can recover only what is a reasonable sum. But whoever heard of a recovery in court of a part of the sum paid for an article of merchandise on the ground that the price charged was unreasonable or excessive, in the absence of fraud in the contract of sale?

The power to fix the rate of transportation for the future is a legislative power, and this power can not be delegated to another body. It may be that the legislature can fix a specific and definite standard by which a reasonable rate to operate in the future may be determined, and delegate to some commission or body the power to determine what the rate shall be, measured by that standard, but no case can be found in the absence of specific constitutional provisions which sustains the delegation of the entire power without the establishing of a standard to any body or commission.

Upon this point the court said, in the case of *Interstate Commerce Commission v. The Railway Company* (167 U. S., 499):

It is one thing to inquire whether the rates which have been charged and collected are reasonable—that is a judicial act; but an entirely different thing to prescribe rates which shall be charged in the future—that is a legislative act.

My attention has not been called to any legislation undertaking to fix the price of an article of merchandise. This bill, in the last analysis, however, undertakes to vest in the Commissioner of Corporations the power to determine what the price of all articles of merchandise that might be the subject of contracts and combinations filed with him shall be, but does not in any sense establish any standard by which it can in advance be determined how that conclusion is to be reached. As I have already shown, the Commissioner of Corporations either did not know what were the rules of common law governing that question, or if he did know, absolutely refused to state what he understood them to be.

WOULD THE AMENDMENT MAKE THE LAW A POLITICAL FACTOR?

I do not take time to discuss what is claimed to be an important political criticism of this bill. It is claimed, and it is true, that it would be in the power of the President under its provisions to change at any time the regulations under which corporations would be entitled to file their certificates and become entitled to the benefits of the act. It is also true that the Commissioner, even after having acted or having failed to act, on notice to the parties, might review his former decision or failure to decide and reach a different conclusion in relation to any contract or combination on file.

It is claimed that this power, arbitrary in its character, is liable to abuse; that if the bill became a law during the existing Administration, for instance, there would be no guaranty or certainty upon the part of the corporations who might avail themselves of its immunities as to what new regulations might be imposed by the next Administration as conditions for retaining their certificates and remaining immune.

It is apparent that a change of Administration might produce an entire change of policy and deprive the great combinations of their self-administered immunity. Whether this would tend to direct their political contributions into the coffers of the party whose continuance in power would maintain the continuance of their certificates of good character is a matter as to which the disseminators of public information would no doubt have and express vigorous opinions. There are public men, it is said, who have insisted that the control of 51 per cent of any product was a demonstration of the vicious character of the corporation. This standard would leave numerous victims outside the breastworks, and it is not impossible that it might intensify the political conflict if the result involved the application of such a standard.

THE AMENDMENT WOULD DESTROY THE ACT AS A PENAL STATUTE.

To my mind the most serious legal objection to this proposed amendment is the fact that the introduction of the element of reasonableness or unreasonableness would entirely invalidate the penal provisions of the act. If these were invalidated, there would not be enough of the act left for any extended discussion.

From all the authorities submitted by the opponents of the bill, with the answers thereto on the part of Hon. Herbert Knox Smith, my judgment is there is very little question that such would be the result of the adoption of the proposed amendment.

I do not go so far as to say that the gentlemen actively promoting the legislation contemplated or intended such a result. Nor am I certain that the legal gentlemen whose names were not disclosed, who were apparently responsible for the peculiar provisions of the act, contemplated such a result. I think it quite probable that they were undertaking to accomplish results that they thought might be advantageous to the interests that they represented, without taking into account the question as to what the effect of the amendment proposed would be upon the act itself.

Upon this question the following authorities, in my judgment, are conclusive:

In 26 Indiana, App. 279, the court was passing upon an act of the legislature, which provided:

It shall be unlawful for any person to haul over any turnpike or gravel roads at any time when the same is (are) thawing through, or is (are), by reason of wet weather, in condition to be cut up and injured by heavy hauling, a load on a narrow-tired wagon of more than 2,500 pounds.

The court held that the act was invalid, on the ground that it was indeterminate and uncertain, saying:

There must be some certain standard by which to determine whether an act is a crime or not, otherwise cases in all respects similar, tried before different juries, might rightfully be decided differently, and a person might properly be convicted in one county for hauling over a turnpike in that county, and acquitted in an adjoining county of a charge of hauling the same load on the same wagon over a turnpike in like condition in the latter county, because of the difference of conclusions of different judges and juries based upon their individual views of what should be the standard of comparison of tires, derived from their varying experiences or the opinions of witnesses as to what difference of width of tires would constitute one wagon a narrow-tired wagon and another a broad-tired wagon.

In the case of the Chicago and Northwestern Railroad Company v. Dey, et al. (35 Fed. Rep., 866), the opinion by Justice Brewer, the court said:

The next proposition of complainant is that the law is a penal one; that it imposes enormous penalties without clearly defining the offenses. It will be observed that section 2 requires that all charges shall be reasonable and just. Section 23 provides that if any railroad company shall charge more than a fair and reasonable rate of toll, or make any unjust charge prohibited in section 2, it shall be deemed guilty of extortion, and, by section 26, be subject to criminal prosecution, with a large penalty. Now, the contention of complainant is that the substance of the provisions is that if a railroad company charges an unreasonable rate it shall be deemed a criminal and punished by fine, and that such a statute is too indefinite and uncertain, no man being able to tell in advance what in fact is, or what any jury will find to be, a reasonable charge. If this were the construction to be placed upon this act as a whole, it would certainly be obnoxious to complainant's criticism, for no penal law can be sustained unless its mandates are so clearly expressed that any ordinary person can determine in advance what he may and what he may not do under it. In Dwar. St., 652, it is laid down "that it is impossible to dissent from the doctrine of Lord Coke, that acts of Parliament ought to be plainly and clearly, and not cunningly and darkly, penned, especially in legal matters." (See also United States v. Sharp, Pet. C. C., 122; The Enterprise, 1 Paine, 34; Bish. St. Cr., sec. 41; Lieb. Herm., 156.) In this the author quotes the law of the Chinese Penal Code, which reads as follows:

"Whoever is guilty of improper conduct, and of such as is contrary to the spirit of the laws, though not a breach of any specific part of it, shall be punished at least 40 blows; and when the impropriety is of a serious nature, with 80 blows."

There is very little difference between such a statute and one which would make it a criminal offense to charge more than a reasonable rate.

In Tozer v. The United States (52 F. R., 917), the facts are stated as follows:

George K. Tozer was indicted for a violation of the Interstate commerce act prohibiting undue preferences. The court sustained a demurrer to the fourth count, and the defendant was convicted under the second and third counts. The court subsequently denied defendant's motion for a new trial and an arrest of judgment, and from the judgment of conviction the defendant brings error.

Justice Brewer, in delivering the opinion of the court, said:

But in order to constitute a crime the act must be one which the party is able to know in advance whether it is criminal or not. The criminality of an act can not depend upon whether a jury may think it reasonable or unreasonable. There must be some definiteness and certainty. In the case of Chicago and Northwestern Railroad Company v. Dey (52 Fed. Rep.) I had occasion to discuss this matter, and I quote therefrom as follows:

The court then quoted the part of the Dey case which I have already cited, and said:

Applying that doctrine in this case, and eliminating the idea that the through rate is a standard of comparison of the local rate there is nothing to justify a verdict of guilty against the defendant.

In the case of Louisville and Nashville Railroad Company v. Commonwealth (99 Ky., 133) Judge Hazelrigg, delivering the opinion of the court, said:

The indictment in this case charges that the appellant did unlawfully charge, collect, and receive from A. Vancleave & Co. the sum of \$41.70 as toll or compensation for the transportation of a carload of coal, weighing 53,800 pounds, being at the rate of \$1.55 per ton, from Pittsburg, Ky., to Lebanon, in Marion County, over the line of said railroad, a distance of — miles, the said rate of \$1.55 per ton for the said transportation of said coal being more than a just and reasonable compensation therefor, contrary to the form of the statute, etc.

A conviction followed, and from the judgment on the verdict of the jury for the sum of \$500 the company has appealed.

Its complaints are that the statute prohibiting extortion by railroad companies, and providing a penalty therefor, prescribes no standard as to what is just and reasonable for the guidance of the corporation, and altogether fails to define what it may and what it may not do; that it is, therefore, void for uncertainty; that even if the statute is valid, the indictment states no facts showing the appellant guilty of the offense charged.

The chief question to be considered is the one affecting the validity of the statutes, the provisions of which are found in sections 816 and 819 of the Kentucky Statutes. The first-named section reads as follows: "If any railroad corporation shall charge, collect, or receive more than a just and reasonable rate of toll or compensation for the transportation of passengers or freight in this State, or the use of any railroad car upon its track, or upon any track it has control of or has the right to use in this State, it shall be guilty of extortion."

Section 819 fixes the penalty for the first offense at not less than \$500 nor more than \$1,000 and increases the penalty for subsequent infractions of the law. The circuit court of any county into or through which the road runs, and the Franklin circuit court, are given jurisdiction of the offense, the prosecution to be by indictment or action in the name of the Commonwealth, upon information filed by the board of railroad commissioners.

That this statute leaves uncertain what shall be deemed a "just and reasonable rate of toll or compensation" can not be denied, and that different juries might reach different conclusions on the same testimony as to whether or not an offense has been committed must also be conceded.

The criminality of the carrier's act, therefore, depends upon the jury's view of the reasonableness of the rate charged; and this latter depends on many uncertain and complicated elements.

That the corporation has fixed a rate which it considers will bring it only a fair return for its investment does not alter the nature of the act. Under this statute it is still a crime, though it can not be known to be such until after an investigation by a jury, and then only in that particular case, as another jury may take a different view, and, holding the rate reasonable, find the same act not to constitute an offense. There is no standard whatever fixed by the statute, or attempted to be fixed, by which the carrier may regulate its conduct; and it seems clear to us to be utterly repugnant to our system of laws to punish a person for an act the criminality of which depends not on any standard erected by the law which may be known in advance, but on one erected by a jury. And especially so as that standard must be as variable and uncertain as the views of different juries may suggest and as to which nothing can be known until after the commission of the crime.

If the infliction of the penalties prescribed by this statute would not be the taking of the property without due process of law and in violation of both State and Federal constitutions, we are not able to comprehend the force of our organic laws.

It is to be noticed that this case is predicated upon language substantially identical with that which it is proposed to inject into the Sherman antitrust law by this amendment, and the opinion of the court above expressed is as applicable to the language proposed in the amendment as it was to the language in the case passed upon by the court.

The court cites the opinion of Mr. Justice Brewer in the case in 35 F. R., 866, and also the Tozer case in 52 F. R., 917. After having cited the opinion of Judge Baxter, in the case of Louisville and Nashville Railroad Company v. Railroad Commission of Tennessee (16 Am. and Eng. Railroad Cases, 15), which sustains precisely the same point, the court said:

When we look to the other side of the question we find the contention of the State supported by neither reason nor authority. No case can be found, we believe, where such indefinite legislation has been upheld by any court where a crime is sought to be imputed to the accused.

The same question was considered by the court in the case of Commonwealth v. Louisville and Nashville Railroad Company (46 S. W. Rep., 700), where a statute prohibited a corporation from giving any undue or unreasonable preference or advantage to any particular persons or localities, in which case the court said:

It seems to us the opinion of this court in the case of Louisville and Nashville Railroad v. Commonwealth (35 S. W., 129), is decisive of this, for "undue or unreasonable preference or advantage to any particular person or locality" is just as indefinite and uncertain as the phrase "just and reasonable rate of toll or compensation."

In the case of McChord v. The Louisville and Nashville Railroad Company (183 U. S., 498), after quoting the Kentucky case (99 Ky., 133), the Supreme Court of the United States said that the former law under which that decision was rendered having been found defective, had been amended by later acts which established a definite standard, and sustained the statute for that reason, approving at the same time the reasoning of the court in the other cases.

In the case of Czarra v. Board of Medical Supervisors (25 Appeal Cases, D. C., p. 450), the court, holding a statute invalid that was indefinite in its terms providing for the revoking of a physician's license for unprofessional or dishonorable conduct, said:

In all criminal prosecution the right of the accused to be informed of the nature and cause of the accusation against him is preserved by the sixth amendment. In order that he may be so informed by the indictment or information presented against him, the first and fundamental requisite is that the crime or offense with which he stands charged shall be defined with reasonable precision. He must be informed by the law, as well as by the complaint, what acts or conduct are prohibited and made punishable. In the exercise of its power to regulate the

conduct of its citizens within the constitutional limitations, and to declare what shall constitute a crime or punishable offense, the legislature must inform him with reasonable precision what acts are intended to be prohibited. * * *

"Reasonable certainty, in view of the conditions, is all that is required, and liberal effect is always to be given to the legislative intent when possible. But when the legislature declares an offense in words of no determinate signification, or its language is so general and indefinite as that it may embrace within its comprehension not only the acts commonly recognized as reprehensible, but others also which it is unreasonable to presume were intended to be made criminal, the courts possess no arbitrary discretion to discriminate between those which were and those which were not intended to be made unlawful, can do nothing else than declare the statute void for its uncertainty."

In the case of *ex parte Andrew Jackson* (45 Ark.), the court held a Federal statute void for indefiniteness and uncertainty, which made it a crime for anybody to commit an offense against good morals, for precisely the same reasons and upon the same ground laid down by the courts in the citations to which I have already called attention.

Upon this point the committee were presented with a very interesting and somewhat extraordinary discussion of the law from the Commissioner of Corporations. In the memorandum filed by the Hon. Herbert Knox Smith, he discusses this question of the effect of the amendment, taking the ground that the authorities did not justify the conclusion to which I have heretofore arrived. His first legal suggestion in connection with this question, which needs consideration, is:

The only case at all analogous which is opposed to this view (that is, his view) is that of *United States v. Tozer* (52 Fed. Rep., 917), where it was held that there can be no conviction under the provisions of an act prohibiting undue preference in a case where the jury is required to determine whether the preference is reasonable or unreasonable.

As to this suggestion of the Commissioner, it is to be said that a representative of his office was in attendance upon the committee at every one of its hearings, taking notes for the use of the Commissioner, and that all of the cases to which I have called attention in this speech were specifically presented to the committee and discussed in the presence of this representative of the Commissioner of Corporations, so that at least a representative of the Commissioner had definite and specific knowledge that the case of the *United States v. Tozer* was not the only case at all analogous, but he had definite and specific information that there were not only other cases analogous, but that there were several cases specifically and precisely in point against the contention made by the Commissioner. Instead of the case of *United States v. Tozer* being the only case at all analogous, the following cases, the most of which are in point, and all of them, beyond all question analogous, had been cited and discussed:

- 26 Ind. Appeals, 279;
- 35 Fed. Rep., 866;
- 45 Ark.;
- 46 S. W., 700;
- 99 Ky., 133;
- 8 Am. and Eng. Enc. of Law, p. 935;
- 183 U. S., 498.

How the Commissioner came to make this statement the committee is not advised.

Further continuing the discussion, the Commissioner says, in the case of *Czarra v. Board of Medical Supervisors* (25 App. Cases, D. C., 443):

The medical practitioner was convicted under the act of Congress approved June 3, 1896, of "unprofessional and dishonorable conduct." The point considered by the court was whether these words were sufficient to satisfy the sixth amendment, which preserves the right of the accused in all criminal prosecutions to be informed of the nature and cause of the accusation against them. In this case the court said:

"This obvious duty must be performed by the legislature itself and can not be delegated to the judiciary. It may doubtless be accomplished by the use of words or terms of settled meaning or which indicate offenses well known to and defined by the common law. Reasonable certainty in view of the conditions is all that is required, and liberal effect is always to be given to the legislative intent when possible."

This is all the Commissioner does say about that case, and its effect and what was decided therein. If the English language is given its ordinary and usual signification in view of the fact that the Commissioner saw fit to italicize the words "was convicted," this statement of the *Czarra* case is equivalent to the assertion on the part of the Commissioner that there was a conviction that was sustained, and that notwithstanding the indefiniteness of the language the court sustained the validity of the statute. That this statement of the Commissioner, in his typewritten memorandum, is not an inadvertence, appears

very clearly from the fact that the Commissioner appeared before the committee more than a week before he submitted his written memorandum, and in his address upon that occasion made, in substance, the same statement with reference to the *Czarra* case that appears in his memorandum.

I hold in my hand the *Czarra* case. In the first place, there was no conviction under the statute. The statute provided a penalty for practicing medicine after the revocation of a license, and authorized the Commissioners to revoke the license for unprofessional or dishonorable conduct.

The license had been revoked. Nothing else had been done, although it is quite true that the revoking of the license laid the foundation for a criminal prosecution, provided *Czarra* continued to practice his profession, so that there was no conviction; and, in the next place, instead of sustaining the statute and the action of the Commissioners in revoking the license, the court said:

For the reasons heretofore given we are of the opinion that the order appealed from must be reversed with costs and the cause remanded with directions to dismiss the complaint.

The "reasons" were that the statute was too indefinite and uncertain.

So that this case, instead of sustaining the contention of the distinguished Commissioner of Corporations, is a specific and direct authority in opposition thereto, and his statement of it is a complete misstatement.

In the next case, *Johnson v. Southern Pacific Company* (117 Fed. Rep., 469), by which the Commissioner proposed to sustain his contention he is equally unfortunate in his attempt to accurately state the law. He said:

The act of March 2, 1893, known as the "safety-appliance law," makes it unlawful for any common carrier engaged in interstate commerce to run any train in such traffic that has not a "sufficient number of cars in it so equipped with power or train brakes that the engineer of the locomotive drawing such train can control its speed without requiring a brakeman to use the common hand brakes for that purpose" (sec. 1).

A number of convictions have been had under this act, and the point of indefiniteness has never been successfully raised, if raised at all. In *Johnson v. Southern Pacific Company* (117 Fed. Rep., 469), the court said, referring to this act:

"The act of March 2, 1893, is a penal statute, * * * its terms are plain and free from doubt and its meaning is clear."

The Commissioner in this remark and citation evidently relies upon the fact that here was a statute requiring a "sufficient number," an indefinite and uncertain term, and then leaves the impression, or in fact specifically states, that this provision of that statute had been sustained and a number of convictions had under it, and that in relation thereto the point of indefiniteness had never been successfully raised.

Section 1 of the act of 1893, to which the Commissioner refers, reads:

That from and after the 1st day of January, 1898, it shall be unlawful for any common carrier engaged in interstate commerce by railroad to use on its line any locomotive engine in moving interstate traffic not equipped with a power driving-wheel brake and appliances for operating the train-brake system, or to run any train in such traffic after said date that has not a sufficient number of cars in it so equipped with power or train brakes that the engineer on the locomotive drawing such train can control its speed without requiring brakemen to use the common hand brake for that purpose.

This, it will be observed, contains two propositions, the first specific and definite, prohibiting a common carrier from using any locomotive engine not equipped with a power driving-wheel brake and appliances for operating the train-brake system; the second prohibiting it from running any train that has not a sufficient number of cars in it so equipped with power or train brakes, etc.

The second proposition in the section contains the indefinite and indeterminate language "sufficient number" upon which the Commissioner of Corporations relies to sustain his contention that language as indefinite as the term unreasonable has already been incorporated in legislation and been sustained by the courts.

Having these two propositions in mind, let me call attention to the portion of the opinion from which the Commissioner of Corporations quoted, and it will presently appear that the quotation that he made was a deliberate misquotation, because the court was not, at that stage of the opinion, discussing the second proposition in the statute containing the indefinite phrase "sufficient number."

The opinion reads:

The act of March 2, 1893, is a penal statute, and it changes the common law. It makes that unlawful which was innocent before its enactment, and imposes a penalty, recoverable by the Government. Its terms are plain and free from doubt, and its meaning is clear.

Now follows the portion of the statute upon which the language of the court was predicated. The court says:

It declares that it is unlawful for a common carrier to use in interstate commerce a car which is not equipped with automatic couplers,

and it omits to declare that it is illegal for a common carrier to use a locomotive that is not so equipped.

An examination of the opinion discloses the fact, first, that the case was not a criminal prosecution, but was a civil action to recover damages for personal injury. The question was: Did sections 1, 2, 6, and 8 of the act of 1893 relieve the plaintiff of the assumption of risk, so that he was entitled to recover, although he knew of the negligent condition in which the cars were being operated?

The portion of section 1 which the court quoted in its opinion as applicable to the controversy pending before it contains only the first proposition to which I have alluded. The court quoted this much only of the section:

SEC. 1. That from and after the 1st day of January, 1898, it shall be unlawful for any common carrier engaged in interstate commerce by railroad to use on its line any locomotive engine in moving interstate traffic not equipped with a power driving-wheel brake and appliances for operating the train-brake system.

The court stopped there, leaving out of consideration entirely the second proposition, which included the element of a "sufficient number," referred to by the Commissioner in his memorandum, and the language used by the court quoted by the Commissioner of Corporations, instead of being applicable to the proposition in the section including the indefinite term "sufficient number" applied, and applied only, to the first proposition in the statute, and had no relation whatever to a construction of this indefinite and indeterminate language.

The portion of the statute to which the court referred when it said, "Its terms are plain and free from doubt and its meaning is clear," is not the portion quoted in the Commissioner's memorandum, but is the portion which declares that it was unlawful for a common carrier engaged in interstate commerce by railroad to use on its line any locomotive engine in moving interstate traffic not equipped with a power driving-wheel brake and appliances for operating the train-brake system.

The case does not justify the conclusion attempted to be drawn by the Commissioner in his memorandum. The court did not directly or indirectly, by inference or otherwise, undertake to construe the term "sufficient number." If the Commissioner had quoted all of the opinion relating to the question there discussed and considered, that fact would have been too obvious for discussion. The Commissioner asserts that a number of convictions have been had under this act and that the point of indefiniteness has never been successfully raised. Not having been able to find any convictions, before I decided to discuss or comment upon this statement of the Commissioner, I called the attention of his Bureau to the fact that I had not been able to find any convictions, to say nothing of a number, and asked them to furnish me the facts upon which the Commissioner based his statement.

In answer to my inquiry I received the following letter:

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF CORPORATIONS,
May 6, 1908.

HON. CHARLES E. LITTLEFIELD,
House of Representatives, Washington, D. C.

DEAR SIR: In the absence of Commissioner Smith, I beg to say, in reply to your verbal inquiry in regard to the words "A number of convictions have been had under this act" (the safety-appliance act), on page 441 of the hearing on House bill 19745, that the statement was evidently made inadvertently, though the opinion of Judge Evans in the United States v. Illinois Central Railroad Company, dated November 1, 1907, holds the suits under this act to be criminal prosecutions. A copy of this decision is sent you herewith.

I also inclose a memorandum furnished me to-day by the Secretary of the Interstate Commerce Commission; the "order increasing percentage;" ten cases considered applicable by the Commissioners, and the proof of a very recent case not yet in print.

Very respectfully,

E. DANA DURAND,
Acting Commissioner.

An examination of this opinion of Judge Evans discloses the fact that while he decided that the safety-appliance act is a criminal statute and that all violations of its provisions are in a broad sense crimes and misdemeanors, he does not predicate that language upon the indefinite portion of section 1 of the act of 1893, because the very beginning of his opinion discloses the fact that the only portion of that act relating to the subject that he was considering in his opinion is the first part of the section, which is definite and specific, and as to that the Judge says:

Section 1 of the act of March 2, 1893, as amended, known as the "safety-appliance act," provides that "It shall be unlawful for any common carrier engaged in interstate commerce to use on its line any locomotive engine in moving interstate traffic not equipped with a power driving wheel brake and appliances for operating the train-brake system."

Not including, as you will observe, that portion of the section which undertakes to establish the indefinite offense of a "sufficient number."

So that this opinion of Judge Evans, even though it holds that the act is criminal in its character, is absolutely no justification

for the conclusion of the Commissioner that the term "sufficient number" has been held to be an adequate description of a criminal offense. The opinion does not either directly or indirectly refer to that portion of the section. As bearing upon the statement that a number of convictions have been had under that act, and that the point of indefiniteness had never been successfully raised, the memorandum of the Interstate Commerce Commission inclosed in the Bureau's letter to me is extremely significant. It reads as follows:

There have never been any convictions under the so-called "safety-appliance law" in the sense that they are criminal prosecutions. All the prosecutions have been by civil suits and not by criminal procedure. As will be noted by reference to the act, it is a penal statute for the recovery of a specific amount, namely, \$100, for each violation.

It has also been held by a majority of the courts that the law is absolute and that reasonable care or due diligence is not a defense.

There has never been any case brought where the charge was that there was not a sufficient number of cars so equipped with power or train brakes that the engineer of the locomotive drawing such train can control its speed without requiring the brakeman to use the common hand brakes for that purpose. The law was amended March 2, 1903, for the very reason that it was believed that this was so indefinite that a prosecution under this section would have been almost impossible. For that reason Congress amended the law and fixed a definite number of cars that should be equipped, namely, 50 per cent, and left it within the power of the Commission to increase the percentage. This they have done by increasing the percentage to 75 per cent. No prosecutions have been brought under this section where there was more than the required percentage of cars having their brakes used and operated.

It is true that Judge Evans, in the western district of Kentucky, has held that this is a criminal statute, but this decision is at variance with every other decision which we have had in nearly a thousand cases which have been brought.

I can understand how it may have been an inadvertence in a paper prepared with deliberation for the purpose of sustaining the contention of the Commissioner of Corporations to state that a number of convictions have been had under this act, intending to be understood that they were had under that provision of it relating to a "sufficient number," although there were none. But how it could have been an inadvertence to assert that the point of indefiniteness had never been successfully raised, giving the inference that it had been raised unsuccessfully in a number of cases, where there were no such cases, is not quite clear to me.

Let us sincerely hope that the conclusions of the Commissioner of Corporations, reached as a result of the multitudinous and continuous investigations in which his Bureau is or has been engaged, are not characterized by the same painful inadvertence as appears in this vigorous effort to promote the passage of legislation that will vest in his Bureau this tremendous power. If, unhappily, they should be so characterized, it may be doubted whether they are not wholly without value for any practical purpose.

I have felt bound to call attention to these unfortunate statements for the reason that this memorandum is, I imagine, to be circulated throughout the country for the purpose of demonstrating the propriety as well as the validity of the proposed amendments to the Sherman antitrust law. When it becomes necessary to sustain a piece of proposed legislation by that method of handling authorities, I feel bound to say it does not commend itself to my judgment.

SHALL THE RIGHT TO DO BUSINESS BE PRESERVED?

In order to make this discussion complete and cover the whole ground of labor legislation, proposed and demanded, it is incumbent upon me to state, as briefly as I may, the effect of the bill known as the "Pearre bill." This is the bill specifically and imperatively demanded by the American Federation of Labor, and is, as I understand it, the superlative achievement in the line of legislative drafting of the remedies insisted upon by them. The bill reads as follows:

A bill to regulate the issuance of restraining orders and injunctions and procedure thereon and to limit the meaning of "conspiracy" in certain cases.

Be it enacted, etc., That no restraining order or injunction shall be granted by any court of the United States, or a judge or the judges thereof, in any case between an employer and an employee, or between employers and employees, or between employees, or between persons employed to labor and persons seeking employment as laborers, or between persons seeking employment as laborers, or involving or growing out of a dispute concerning terms or conditions of employment, unless necessary to prevent irreparable injury to property or to a property right of the party making the application, for which injury there is no adequate remedy at law, and such property or property right must be particularly described in the application, which must be in writing and sworn to by the applicant or by his, her, or its agent or attorney. And for the purposes of this act no right to continue the relation of employer and employee or to assume or create such relation with any particular person or persons, or at all, or to carry on business of any particular kind, or at any particular place, or at all, shall be construed, held, considered, or treated as property or as constituting a property right.

SEC. 2. That in cases arising in the courts of the United States or coming before said courts, or before any judge or the judges thereof, no agreement between two or more persons concerning the terms or conditions of employment of labor, or the assumption or creation or termination of any relation between employer and employee, or concerning any act or thing to be done or not to be done with reference

to or involving or growing out of a labor dispute, shall constitute a conspiracy or other criminal offense or be punished or prosecuted as such unless the act or thing agreed to be done or not to be done would be unlawful if done by a single individual, nor shall the entering into or the carrying out of any such agreement be restrained or enjoined unless such act or thing agreed to be done would be subject to be restrained or enjoined under the provisions, limitations, and definition contained in the first section of this act.

Sec. 3. That all acts and parts of acts in conflict with the provisions of this act are hereby repealed.

With reference to this bill, in the American Federationist for June, 1908, over his signature as president of the American Federation of Labor, Mr. Gompers says:

In the name of labor, in the interest of all our people, we urge and must insist upon the enactment of * * * the Pearre bill, H. R. 94, regulating the issuing of the injunctive writ to its original and beneficent purpose.

It will be first observed that he does not succeed in his editorial statement in fully stating the purpose of the bill as it is stated in the bill, because that purpose is "to regulate the issuance of restraining orders and injunctions and procedure thereon and to limit the meaning of 'conspiracy' in certain cases."

This bill is, as I understand it, the handiwork of Mr. T. C. Spelling, the author of a legal elementary work known as "Spelling, on extraordinary remedies," and I feel that I am safe in saying that this incomparable achievement in the line of desired labor legislation is the most extraordinary proposition ever yet submitted to a legislative body. It should be distinctly borne in mind that this bill, in connection with the Wilson bill, represents the ultimatum of the American Federation of Labor. In the discussion of this bill before the Committee on the Judiciary at this session, Mr. Gompers used the following language:

I referred to the Pearre bill; yes, sir. I ought to say in this connection, with the subject of the bills before this committee, events have demonstrated clearly to my mind that there is only one bill before the committee that can be at all effective to deal with this abuse, with this invasion of human rights, and that is the Pearre bill. The others I do not know that it is necessary for me to argue even. The best of the other bills are ineffective, and so far as the representatives of the American Federation of Labor are authorized to speak at all for the men and women in the labor movement of the country to whom I have referred, *see say to you now that they would rather suffer the wrongs that they do, hoping and praying and working for a time when effective justice will be accorded us, than to consent to a wrong principle which would effectually and for a great length of time manacle the workman and prevent any sort of tangible relief.* (P. 48.)

And again, in the same hearing, after his attention had been called to the Rodenberg bill, and with the knowledge that there were various bills, too numerous to mention, some providing for notice and hearing before injunctions in labor controversies, others providing for hearing the question of contempt by juries, and others for hearing the question of contempt by other judges, etc., Mr. Gompers said:

Mr. Chairman, in any species of legislation that is intended to be helpful of a constructive character, to bring amelioration into conditions of the workers, compromise is possible. You can not get a whole loaf and therefore wisdom dictates that something shall be accepted. Time will give the opportunity to build upon it and construct this species of legislation that will be generally helpful. In this measure, in this feature of legislation, no such construction can take place. If labor concedes that the court has the right to enter and to issue injunctions that are never issued of the same character against any other citizen or man in the community, then, if we concede that, we must forever hold our peace, for we have given away our case. (P. 49.)

If I understand Mr. Gompers correctly, and I think I do, the Pearre bill is the only bill that would be accepted by the organization which he represents. The other bills are betrayals of principles on which they rely, and for their purposes mere "leather and prunella."

As to this he insists there must be no compromise. His organization "would rather suffer the wrongs that they do, hoping and praying and working for a time when effective justice will be accorded us, than to consent to a wrong principle which would effectually and for a great length of time manacle the workman and prevent any sort of tangible relief."

For these reasons the Wilson bill and the Pearre bill are their "sine qua non."

What is the Pearre bill? The Pearre bill in its essence and effect absolutely repeals the whole law of conspiracy in its relation to interstate commerce in relation to labor controversies. It provides that no restraining order or injunction shall be granted except to prevent irreparable injury to property or to property rights, and then proceeds to define what under the provisions of that bill shall be held to be property or property rights. This definition is the significant feature of the proposed legislation. It reads:

And for the purposes of this act no right to continue the relation of employer and employee or to assume or create such relation with any particular person or persons, or at all, or to carry on business of any particular kind, or at any particular place, or at all, shall be construed, held, considered, or treated as property or as constituting a property right.

Note the fearful significance of the last clause of this section, all comprehensive as it is in its terms "and for the purposes of this act no right * * * to carry on business of any particular kind or at any particular place or at all shall be construed, held, considered, or treated as property or as constituting a property right."

This bill, it will be observed, first proceeds upon the assumption that the right to carry on business is a property right, because if it were not it would not be necessary by express legislative declaration to declare it to be otherwise; and in fact Mr. Spelling, who appeared before the committee in support of this extraordinary piece of proposed legislation, conceded that the courts had so held, and that the right to do business was property and entitled to the protection of the law. He claimed, to be sure, that these decisions were predicated upon a wrong view of the law, and that they ought not to have been made, but he conceded that they had been made and that such was the law in accordance with the decisions of the court. On this point he said, in the hearing:

The ACTING CHAIRMAN. Have these vicious and unwarranted decisions resulted in the conclusion on the part of the courts—and I am not discussing now whether they are well founded or not—that the right to do business is property?

Mr. SPELLING. Yes; a great many courts; and I say, Mr. LITTLEFIELD, that the only basis that you or others have for the assertion that the right to do business is property is these decisions that we are attacking, and I say they are departures from the fundamentals of equitable jurisdiction, and I can show that they are departures.

The ACTING CHAIRMAN. And for that reason you want to get it corrected by legislation. That is what it comes right down to, is it not? It is because they are departures, and have reached that result and produced that condition, that now you are asking to have the condition corrected by legislation?

Mr. SPELLING. Yes; we want to have the excess lopped off. We want to get back; we want the courts brought back to the original, legitimate boundaries of their jurisdiction, as the boundaries were recognized prior to those erroneous and unwarranted decisions.

The ACTING CHAIRMAN. And usurpatory decisions.

Mr. SPELLING. And the only way to reach it is to go back and put our fingers on the rotten spot in these decisions, reach the germ of the disease and kill it, and that is what this bill purports to do, and what I feel it will do if it passes. (p. 10.)

Mr. Spelling not only concedes that the authorities all hold that the right to do business is property and therefore entitled to the protection of the law, but, although having been given a full opportunity, and having had plenty of time before he entered the employ of the Department of Justice to devote his legal acumen to this proposition, he failed to file with the committee a single case sustaining his contention, although he did, of course, in his argument discuss his theory, but there was no single case that he could find that sustained specifically his contentions.

It is proper to say that one of the principal cases relied upon by Mr. Spelling to sustain his contention that the right to do business was not a property right is the case of *People v. District Court* (26 Colo., 386), which was a case where an injunction had been sought to restrain the maintenance of a gambling house. In the course of the opinion the court used language which expressly differentiates between personal and property rights and recognizes the existence of both as within the protection of a court of equity.

In the syllabus and on the page referred to by Mr. Spelling, although not quoted by him, we read:

Courts of equity have no jurisdiction by injunction to restrain men that do not violate some personal or property right.

Here the distinction between personal and property rights is recognized, and both are recognized as within the injunctive power of a court of equity.

In the opinion, on page 389, the court said:

While it is undoubtedly true that a court of equity has jurisdiction by injunction to prevent violation of the public law when necessary to prevent irreparable injury to personal or property rights, it is equally true that it is not within its jurisdiction to prevent a criminal act, merely because it is criminal, when it in no way violates a property or civil right.

And here again the court expressly recognizes the fact that both personal and property rights are within the protection of the injunctive power. These are quotations that Mr. Spelling did not succeed in making, and if he had it would have shown that the case to which he referred as sustaining his contention was directly in opposition thereto.

The elementary book to which I have heretofore referred as being the work of Mr. T. C. Spelling is also in direct opposition to the contention he now makes in support of this extraordinary legislation. In that book, section 24, he says:

One reason for noninterference is a fundamental want of jurisdiction; another is the existence of an adequate remedy at law. In other words, the subject-matter of equity jurisdiction is the protection of civil rights and private property and not the punishment or prevention of crime or immoral acts when not in connection with violations of private right.

And while in order to sustain his contention he makes a quotation from High on Injunctions, it is to be noticed that he

quotes section 20b and does not call attention to section 20, which precedes section 20b, and which reads:

The subject-matter of the jurisdiction of equity being the protection of private property and of civil rights, courts of equity will not interfere for the punishment of merely criminal or immoral acts unconnected with violations of private right.

That *property* and *civil rights* are equally within the protection of a court of equity is so obvious from these citations that it is hardly worth discussion. If further authorities upon this point were necessary, it can be settled adequately by the case of *Texas v. Patterson* (14 Tex., Civil Appeal Reports, p. 465), quoting from page 469:

It is only when *property* or *civil rights* are involved and irreparable injury to such rights is threatened or is about to be committed, for which no adequate remedy exists at law, that courts of equity will interfere by injunction for the purpose of protecting such rights.

And again:

Yet as his punishing would furnish him whose *property* or *civil rights* have been irreparably injured by the acts constituting the offense no compensation for such injury, courts of equity will interfere to prevent such injury.

And again:

Where equity interposes its arm for the protection of *property* or *civil rights*.

And again:

For the purpose of preventing him from irreparably injuring another in his *property* or *civil rights*.

And again:

She must show that such nuisance is an injury to the *property* or *civil rights* of the public at large.

Similar quotations, distinctly and unequivocally recognizing the power of the court of equity to protect civil rights as distinguished from physical property, could be multiplied ad libitum. In fact, there are no authorities that contradicted this proposition.

It is to be noted in this connection that Mr. Justice Gould, of the supreme court of the District of Columbia, in his very able and courageous opinion in the *Buck Stove and Range* case, expressly decided upon all the authorities that the right to do business was property and entitled to the protection of the law.

I have no occasion to encumber this speech with a detailed reference to the authorities sustaining the proposition that the right to do business is property. That whole question was exhaustively investigated and thoroughly covered by the very able report of the Subcommittee of the Judiciary of the Fifty-ninth Congress, submitted by the gentleman from Massachusetts [Mr. TIBBELL] and the gentleman from Illinois [Mr. STERLING], with a very clear and perspicuous statement of the views of the gentleman from Georgia [Mr. BRANTLEY], all three of whom will be recognized as lawyers of ability and character, and their report I quote in the appendix.

Under these authorities there can be no question that under the law of the land, as it exists to-day, the right to do business is property and entitled to the protection of the law.

I think it is entirely safe to say that so long as the provisions of the fifth amendment to the Constitution of the United States which expressly provides that no "person shall be deprived of life, liberty, or property without due process of law," remains embedded therein, a statute that undertakes to destroy the right to do business as property will without any hesitation be held by the Supreme Court to be void and unconstitutional, as a deprivation of property without due process of law.

That portion of the Pearre bill which provides that "for the purpose of this act no right to continue the relation of employer or employee or to assume to create any such relation with any particular person or persons or at all" shall be "treated as property or as constituting a property right," is subject to exactly the same constitutional objection under the authority of the case of *Adair v. U. S.* (208 U. S., 172), where the court said:

The first inquiry is whether the part of the tenth section of the act of 1898, upon which the first count of the indictment was based, is repugnant to the fifth amendment to the Constitution, declaring that no person shall be deprived of liberty or property without due process of law. In our opinion that section in the particular mentioned is an invasion of the personal liberty, as well as of the right of property, guaranteed by that amendment. Such liberty and right embraces the right to make contracts for the purchase of the labor of others and equally the right to make contracts for the sale of one's own labor.

Without stopping to consider what would have been the rights of the railroad company under the fifth amendment, had it been indicted under the act of Congress, it is sufficient in this case to say, that as agent of the railroad company, and as such responsible for the conduct of the business of one of its departments, it was the defendant *Adair's* right—and that right inhered in his personal liberty, and was also a right of property—to serve his employer as best he could so long as he did nothing that was reasonably forbidden by law as injurious to public interests. It was the right of the defendant to prescribe the terms upon which the services of Coppage

would be accepted, and it was the right of Coppage to become or not, as he chose, an employee of the railroad company upon the terms offered to him. Mr. Cooley, in his *Treatise on Torts* (page 278) well says: "It is a part of every man's civil rights that he be left at liberty to refuse business relations with any person whomsoever, whether the refusal rests upon reason or is the result of whim, caprice, prejudice, or malice. With his reasons neither the public nor third persons have any legal concern. It is also his right to have business relations with anyone with whom he can make contracts, and if he is wrongfully deprived of this right by others, he is entitled to redress."

Section 2 of this bill is a deliberate attempt to exempt labor organizations from the operations of the Sherman antitrust law, although not so stated in terms, no other construction can be placed on the language used and this is open to the criticism which I have already made upon that proposition.

The fact that this legislation would be a flat violation of the fifth amendment is a sufficient answer thereto. Its practical application, as explained by its distinguished author, is so astounding in its effect upon the business interests of the country as to call for special comment.

I have had occasion during the last year or two to discuss in great detail the provisions of the Pearre bill and express my position in relation thereto. In one of the speeches in which I engaged in that discussion I took occasion to illustrate the operation of the legislation, which undertook to deprive the owner of a piece of property of the protection of the law the moment he began to do business with it. This was an address that I delivered in Battle Creek, Mich., before the Citizens' Industrial Association. For the purpose of showing the application of this legislation I illustrated it by calling attention to the fact that the plant of the Postum Cereal Company, vast and extensive in its character, costing probably a million and a half or more of money, consisting of buildings with the machinery contained therein, was constructed and operated solely for the purpose of manufacturing the products of that company.

I called attention to the fact that these buildings, with the machinery contained therein, were entitled to and would receive the protection of the law, notwithstanding the fact that this bill might be enacted by Congress; that the bill conceded that the buildings were physical property, and that the machinery was of the same character; and, if a combination or conspiracy were formed for the purpose of destroying either the buildings or their contents by irresponsible parties, that a court of equity would, notwithstanding the passage of the bill, issue its restraining order to prevent their destruction and protect the owner in the enjoyment of his property.

Then I called attention to the fact that if this bill became a law and the owner saw fit to use these buildings and their contents for the purpose of carrying on the business for which and only for which they were constructed and maintained, the moment he engaged in that enterprise, engaged in business, he would cease to have the protection of the law; and although parties might combine and conspire to absolutely deprive him of the power and the right to engage in business and to use his property for the only purpose for which it was constructed, they could do so without let or hindrance, and he would be without the protection of the law.

Mr. Spelling, before my committee, realizing perhaps some of the embarrassments suggested by this proposition, undertook to make an answer thereto, and the answer is contained in the hearing before the committee from which I now quote. Mr. Spelling had frequently during the hearing alluded to the speech that I made at Battle Creek, and I may say now, in order to give a correct history of this legislation and the efforts of Mr. Spelling to procure favorable action thereon, that he called my attention, as chairman of the subcommittee having this particular Pearre bill in charge, to the fact that I had stated in the Battle Creek speech that that particular bill should not, if I had the power, ever become a law. I stated to him that he was correctly stating my attitude, that the assertion made in that speech was made after due deliberation, that it was my deliberate intention and purpose, and, if I had the power, under no circumstances would legislation of that sort ever become a part of the law.

After having had his attention called to the speech in that manner and the illustration made by me of the practical operation of this proposed legislation, he made this answer, and I quote verbatim from the hearings:

The ACTING CHAIRMAN. How can a man use property that is created for doing a certain business without engaging in the business and carrying it on?

Mr. SPELLING. I will tell you how.

The ACTING CHAIRMAN. That is, how can he use the property created for that purpose without engaging in the purpose?

Mr. SPELLING. Had you not better repeat that? I did not hear it.

The ACTING CHAIRMAN. I say, how can a man use property for the purposes for which it is created and owned without engaging in the purpose; and if that is business, how can he do it without engaging in business?

Mr. SPELLING. Now, Mr. LITTLEFIELD, your corporation, or the one you are speaking about, is a manufacturing company, is it not?

Mr. LITTLEFIELD. Surely.

Mr. SPELLING. Suppose that manufacturing business becomes unprofitable and it quits, whether on account of strikes or for some other reason, and ceases to do business?

The ACTING CHAIRMAN. That does not even approach an answer to the question.

Mr. SPELLING. Well, let me answer, will you, please?

The ACTING CHAIRMAN. Go ahead; I thought you had answered it.

Mr. SPELLING. It ceases to do business. There can not, then, be any interference with its right to do business. It can still use that property for some other purpose—for a farm or for a cow house or for a residence; and it can use the machinery for anything it pleases. It can use it for ballast in a lake steamer. So it still has left the right of user and possession, which is a right of property, but the right to that business is done. That is personal.

The ACTING CHAIRMAN. That is the only answer there is to that proposition; is it?

Mr. SPELLING. That is all that I have.

The ACTING CHAIRMAN. After due and mature consideration, having had several months to think it over. (P. 16.)

In order to make this perfectly certain, the acting chairman repeated the proposition at a little later stage of the hearing:

The ACTING CHAIRMAN. I understand, to go back to your illustration a little bit further, that while it might be well that this large amount of property might be aggregated for the purpose of doing a particular business, the law would not protect a man in the use of the property in that particular business, but it would protect the property; so that if he could not use it in that business, it might be used, as you suggest, as ballast for a lake steamer. That is your conception of the practical condition when you get down to it. It would protect the property because the things per se, the physical structures, could be left there and could be used for horse sheds or ballast for a lake steamer; but it would not go so far as to protect him in the use of that particular property in any special business he wanted to devote it to?

Mr. SPELLING. It is not within my plan to go over that again.

The ACTING CHAIRMAN. I understood that to be your illustration, that the argument practically comes down to that.

Mr. SPELLING. I say that there is a very clear distinction between the right to do business and the right to use and possess property—that is, the property right of use and possession of property. (P. 18.)

So that we have as the practical result of the legislation invented by Mr. Spelling, and insisted on by the president of the American Federation of Labor, and in default of the passage of which he is now traveling about the country breathing out threatenings and slaughter against every man who opposes his will, a proposition which simply comes down to this: With the passage of this bill the right to do business as property is destroyed; and although the right to do business may be gone the buildings and machinery constructed for that purpose will remain and may still be used by the owners thereof for cow barns or for ballast for lake steamers.

It must be a profound comfort and a source of great consolation for the business interests of the country to feel assured that, although they may be driven out of business with impunity and without any right to legal redress therefor, they will still retain the inalienable constitutional right to use their buildings for cow barns and the material contained therein for ballast for steamers.

This bill was one of the questions thoroughly discussed by me in my last campaign. I declared in every speech I made that under no circumstances should I give my assent to any legislation that undertook to outlaw the right to do business or undertook to destroy it as a property right. At that time I did not have these suggestions made by Mr. Spelling, indicating his conception and his appreciation of the condition into which the interests of eighty-seven millions of people would be plunged if the American Federation of Labor could get the American Congress to pass this bill, deliberately outlawing the right to do business as property.

The issues tendered by the leaders of the labor organizations are, shall the boycott and blacklist be legalized or penalized, and shall the right to do business be outlawed or shall it be maintained. On these issues I am unalterably against the boycott and black list, and I stand unqualifiedly for the maintenance of the right to do business and its protection by the law. These issues transcend in their vital importance all the issues that now divide the two great political parties. Any candidate, from the Presidency down, that either truckles, or panders, to such a propaganda in either the Democratic or Republican party deserves to go down in overwhelming defeat. If we, as representatives of the people, all discharge our duties like men and patriots, we shall be able to transmit to our children and to our children's children the great heritage we have received, and long after the Republican party with its glorious record of progress and achievement shall have passed away, and the Democratic party, with its Jeffersons, Jacksons, Tildens, Cleveland, and Bryans, shall have become nothing but a memory, the constitutional government of a free people will continue to guarantee life, liberty, and the pursuit of happiness to countless millions yet unborn.

CONCLUSION.

It may perhaps be well for me to state here, because I have now reached the end of the discussion of the legislation demanded by the labor organizations, that the provisions of the Gilbert bill, to which I called attention in the early part of this address, practically authorizing conspiracies to threaten to commit crime and exempting labor organizations from the operation of the Sherman antitrust law, making it lawful for them to do what other people were denounced as criminals for doing, and this Pearre bill, destroying the right to do business as property and outlawing it, were denounced by me in every speech I made in my campaign. I challenged the gentlemen assailing me in that campaign to even read those two bills in the speeches they were making assailing me for my attitude in relation thereto. This is the head and front of my offending. I have no controversy with labor organizations as such nor any controversy with labor leaders except so far as controversies with them arise from their insistence upon legislation that in my judgment I deem unwise and vicious.

These two pieces of legislation were the great issues in my campaign; and I take great pleasure in saying that in no instance have I ever been able to find a member of the American Federation of Labor, or of any labor union, that undertook at any time when he thoroughly understood the situation, and had the effect of these two bills explained to him, to disapprove or criticize my attitude. On the contrary, I have never yet found a member of that organization, or a laboring man, who has not heartily indorsed my attitude in relation thereto when understood.

I am in perfect sympathy with the organization of labor for any lawful purpose. I think they are equally as legitimate as organizations of capital. I fully appreciate the fact that organizations of labor have been able to produce lasting, beneficial results to wage-earners. I fully approve of all of their activities and of all their purposes so long as they are confined within the limits of law. When a labor organization steps beyond the pale of the law and undertakes to infringe the right of either the man that labors or the man that furnishes employment to labor, then I part company with them.

I can not, I will not give my assent to any legislation that will operate in their favor as a class and against the rest of the community.

I can not, I will not give my assent to any legislation that will give to them special privileges and exempt them from the operation of criminal legislation that applies to all others, thus depriving other persons of the equal protection of the law.

It will become them, in the issue of the Federationist to which I have referred, while asking for the constitutional right of equality before the law, to insist upon the enactment of legislation, under the threat of their supreme displeasure, that confers upon them rights and privileges enjoyed and possessed by no other class of persons, that will turn over to them, without let or hindrance, without the right of courts to regulate or control, the whole interstate transportation of the country, and that would legalize and authorize the prosecution of interstate boycotts throughout the length and breadth of the land.

I gave in my last campaign my solemn promise to my constituents that no legislation of this character should, if I could prevent it, ever become a part of the law of the land. I shall return to them the commission that they gave me, unstained and untarnished by any taint of cowardice or demagoguery on this proposition. There is no power on earth, either Executive or otherwise, there is no exigency, political or otherwise, that can lead me by the slightest degree to vary from the faithful performance of that promise. I shall stand by it without variableness, neither shadow that is cast by turning.

Finally, brethren—and if I should speak from the fullness of my heart, inspired by the universally kind and appreciative sentiments that have been expressed to me on both sides of the House in connection with my withdrawal from public life, I could properly say, Beloved brethren, applying it, without distinction or discrimination, to both my Democratic and Republican friends—finally, brethren, may I be allowed to say that the results in my campaign are, in my judgment, a sufficient warrant for the assertion that, notwithstanding the threats of organized labor, no Member upon this floor need have any hesitation in standing upon his own feet, wearing his own hat, and discharging his duty in the fear of the ever-living God, without the fear of man.

Before I call attention in detail to the results, I wish to briefly indicate the conditions that confronted me in the campaign of 1906. In 1904 the Republicans in my State elected Governor Cobb, who, among other things, gave his solemn promise in the campaign to the people of the State that if

elected governor he would do his best to faithfully and impartially enforce the prohibitory law.

Strange as it may seem, he being a man of the highest character and of perfect integrity, as well as of great ability and unusual accomplishments, labored under the impression that this promise, thus made in his campaign, was equivalent to the giving of a bond by a business man and required full and complete fulfillment, and from that time on until now he has made an earnest, vigorous, and sincere effort to make good this promise to the people of Maine.

He was my warm personal friend, he lives in the town where I live, and I presented his name to the convention. The campaign that resulted in his nomination was one of unusual and extraordinary bitterness and rancor, and upon his election and ever since every public act that he has done that has created any friction or resulted in any disturbance has, as a rule, been, with great zeal and enthusiasm, charged up to me personally, upon the ground that in some way, directly or indirectly, I was responsible therefor, although I have had no more connection with the personal acts of the governor in the discharge of his duty, fully as I approve of them, than has any other Member of this House.

Politically, and entirely unrelated to labor legislation, I have been subjected to the continuous assaults of the leading Republican newspaper in my section, printed in my district, based very largely on gross misrepresentations of my public conduct, a paper that is taken very largely by many Republicans who take no other paper.

There was in 1906 a very vigorous agitation in connection with the resubmission of the prohibitory amendment of the constitution of the State of Maine, and this agitation was more acute and intense probably in the largest city in my district than in any other place in the State of Maine.

Fortunately or unfortunately for me, as the case may be, my attitude in connection with the question of prohibition is probably as well or better known than my attitude in connection with any other public question that concerns the people of that State. I became a temperance man and a believer in the prohibitory law long before I occupied any office. I did not accumulate those opinions for the purpose of obtaining office, and I have never modified or changed them for the purpose of retaining it. It is perhaps not invidious to say that I was as conspicuous as any other man in the State in connection with this agitation, and so far as that tended to embarrass the political situation it would embarrass me to a much greater degree, except possibly the governor, than any other man running for public office.

There was practically no campaign in the other three Congressional districts of the State. The three other Members of Congress from the State of Maine are well known to you as men of character, integrity, industry, and as capable, faithful public servants. I suppose that every one of them may properly be said to be, in the popular signification of the term, very much more effective and successful vote getters than I.

I had opposed to me in the campaign as candidate one of the ablest Democratic campaigners in the State of Maine, and probably as able a campaigner as can be found anywhere in the Democratic party throughout the country.

Under these conditions, independently of the assaults made upon me by the American Federation of Labor on account of my attitude in connection with the legislation which I have just been discussing, I stood to lose in my district probably a larger number of votes than any other Member of Congress could legitimately expect to lose.

It should also be stated that the assistance I received in my campaign from men outside the State was four speeches from the grand old hero who presides over the House, one magnificent speech by Secretary of War Taft, and two speeches by the brilliant gentleman from Michigan [Mr. HAMILTON]. With these exceptions, the campaign was fought by me from the beginning to the end, so far as outside assistance upon the stump was concerned, absolutely single-handed and alone.

Mr. Gompers made seven or eight speeches in my district, viciously and bitterly attacking, and had scores of his representatives making a personal canvass during the campaign.

As the result of this campaign the plurality of the governor, which was 26,816 in 1904, was reduced to 8,064 in 1906, the governor losing on his plurality in 1906, as compared with 1904, 18,752.

Mr. ALLEN, in the First District, had his plurality reduced in the whole State from 4,981 to 1,749, or a loss of 3,232.

My plurality was reduced from 5,391 to 1,362, a loss of 4,029, losing 797 more than Mr. ALLEN.

Mr. BURLEIGH's plurality was reduced from 6,863 in 1904 to 1,791 in 1906, or a loss of 5,072, more than 1,000 more than my loss.

Mr. POWERS's plurality was reduced from 8,901 in 1904 to 3,574 in 1906, a loss of 5,327, nearly 1,300 more than my loss.

The governor lost in my district on his vote in 1906, as compared with 1904, 1.6 per cent; I lost 2.4 per cent; Mr. ALLEN lost 7½ per cent; Mr. BURLEIGH lost 10 per cent, and Mr. POWERS lost 15½ per cent.

Mr. POWERS's total Republican vote in 1904 was 20,501; my total vote was 19,176. My vote in 1906 was 18,708, from 1,500 to 2,000 more than the vote cast for any other Congressman.

It should be borne in mind that 1906 was what is known as an off year, and is being compared with the Presidential year 1904. In 1904 I received only 19,176, while in 1906 I received 18,708, a loss, as compared with 1904, of only 468. My plurality in my district exceeded that of the governor by 383.

In every speech that I made in this campaign I called the attention of my constituents to the fact that the country little knew or little cared what became of the Republican candidate for Congress, but that they were, in my judgment, vitally interested in ascertaining what the opinion of the voters of the second district of Maine was upon the great questions which I had presented to them in every speech for their consideration. Every intelligent voter in my district knew that my personal interest would be conserved by my defeat at the polls and my relegation to private life; that I was holding the office and had always held it at a financial sacrifice, and, so far as my personal interests were concerned, at a loss to myself.

In every address I made they were specifically requested to register their verdict upon the issues presented to them by me. In the light of the results, I feel that I have a right to say that I am proud of my constituency and the manner in which they acquitted themselves under these circumstances and the verdict they rendered upon the issues before them.

With reference to this legislation and the action that should be taken thereon, I know not what course others may take, and I think I may be pardoned for going so far as to say I care not what course others may take; but, as for me, I propose to base my action upon considerations which I believe to be elemental and fundamental. So far as I have the power to control or shape legislation, the legislation shall be upon the principles of the equality of all before the law—the high and the low; the rich and the poor; the weak and the strong; the oppressor and the oppressed; the wage-earner and the wage payer, friend and foe, shall receive from me the application of the same universally operating principles of fundamental eternal justice. Whenever I fail to be actuated by these principles, which I believe to be essential to the perpetuation of the constitutional government of a free people, may "my tongue cleave to the roof of my mouth, my right hand forget its cunning," and may I be "anathema maranatha."

APPENDIX A.

UNITED STATES V. ADDYSTON PIPE AND STEEL COMPANY ET AL.

[Circuit court of appeals, sixth circuit, February 8, 1908. 85 Fed. Rep. pp. 271-273, 278-302.]

This was a proceeding in equity, begun by petition, filed by the Attorney-General on behalf of the United States, against six corporations engaged in the manufacture of cast-iron pipe, charging them with a combination and conspiracy in unlawful restraint of interstate commerce in such pipe, in violation of the so-called "Antitrust law," passed by Congress July 2, 1890. The defendants were the Addyston Pipe and Steel Company, of Cincinnati, Ohio; Dennis, Long & Co., of Louisville, Ky.; the Howard-Harrison Iron Company, of Bessemer, Ala.; the Anniston Pipe and Foundry Company, of Anniston, Ala.; the South Pittsburg Pipe Works, of South Pittsburg, Tenn., and the Chattanooga Foundry and Pipe Works, of Chattanooga, Tenn. The petition prayed that all pipe sold and transported from one State to another, under the combination and conspiracy described therein, be forfeited to the petitioner, and be seized and confiscated in the manner provided by law, and that a decree be entered dissolving the unlawful conspiracy of defendants, and perpetually enjoining them from operating under the same, and from selling said cast-iron pipe in accordance therewith to be transported from one State into another. The defendants filed a joint and separate demurrer to the petition, in so far as it prayed for the confiscation of goods in transit, on the ground that such proceedings, under the antitrust act, are not to be had in a court of equity, but in a court of law. In addition to the demurrer, the defendants filed a joint and separate answer, in which they admitted the existence of an association between them for the purpose of avoiding the great losses they would otherwise sustain, due to ruinous competition between defendants, but denied that their association was in restraint of trade, State or interstate, or that it was organized to create a monopoly, and denied it was a violation of the antitrust act of Congress. Testimony in the form of affidavits was submitted by petitioner and defendants, and, by stipulation, it was agreed that the final hearing might be had thereon. Judge Clark, who presided in the circuit court, dismissed the petition on the merits. His opinion is reported in 78 Fed., 712.

From the minutes of the association, a copy of which was put in evidence by the petitioner, it appeared that prior to December 28, 1894, the Anniston Company, the Howard-Harrison Company, the Chattanooga Company, and the South Pittsburg Company had been associated as the Southern Associated Pipe Works. Upon that date the Addyston Company and Dennis Long & Co. were admitted to membership, and the following plan was then adopted:

Taft, circuit judge, after stating the case as above, delivered the opinion of the court.

The first section of the act of Congress entitled "An act to protect trade and commerce against unlawful restraints and monopolies," passed July 2, 1890 (26 Stat., 209), declares illegal "every contract, combination in the form of trust or otherwise or conspiracy in restraint of trade or commerce among the several States or with foreign nations." The second section makes it a misdemeanor for any person to monopolize or attempt to monopolize, or combine or conspire with others to monopolize, any part of the trade or commerce among the several States. The fourth section of the act gives the circuit courts of the United States jurisdiction to hear and determine proceedings in equity brought by the district attorneys of the United States under the direction of the Attorney-General to restrain violations of the act.

Two questions are presented in this case for our decision: First, was the association of the defendants a contract, combination, or conspiracy in restraint of trade, as the terms are to be understood in the act? Second, was the trade thus restrained trade between the States?

The contention on behalf of defendants is that the association would have been valid at common law, and that the Federal antitrust law was not intended to reach any agreements that were not void and unenforceable at common law: It might be a sufficient answer to this contention to point to the decision of the Supreme Court of the United States in *U. S. v. Trans-Missouri Freight Assn.* (168 U. S., 290, 17 Sup. Ct., 540), in which it was held that contracts in restraint of interstate transportation were within the statute, whether the restraints would be regarded as reasonable at common law or not. It is suggested, however, that that case related to a quasi public employment necessarily under public control, and affecting public interests, and that a less stringent rule of construction applies to contracts restricting parties in sales of merchandise, which is purely a private business, having in it no element of a public or quasi public character. Whether or not there is substance in such a distinction—a question we do not decide—it is certain that, if the contract of association which bound the defendants was void and unenforceable at the common law because in restraint of trade, it is within the inhibition of the statute if the trade it restrained was interstate. Contracts that were in unreasonable restraint of trade at common law were not unlawful in the sense of being criminal, or giving rise to a civil action for damages in favor of one prejudicially affected thereby, but were simply void and were not enforced by the courts. (*Mogul Steamship Company v. McGregor, Gow & Co.* (1892), App. Cas., 25; *Hornby v. Close*, L. R., 2 Q. B., 153; *Lord Campbell, C. J.*, in *Hilton v. Eckersley*, 6 El. and Bl. 47, 66; *Hannon J.*, in *Farrer v. Close*, L. R., 4 Q. B., 602, 612.) The effect of the act of 1890 is to render such contracts unlawful in an affirmative or positive sense, and punishable as a misdemeanor, and to create a right of civil action for damages in favor of those injured thereby, and a civil remedy by injunction in favor of both private persons and the public against the execution of such contracts and the maintenance of such trade restraints.

The argument for defendants is that their contract of association was not and could not be a monopoly, because their aggregate tonnage capacity did not exceed 30 per cent of the total tonnage capacity of the country; that the restraints upon the members of the association, if restraints they could be called, did not embrace all the States, and were not unlimited in space; that such partial restraints were justified and upheld at common law, if reasonable, and only proportioned to the necessary protection of the parties; that in this case the partial restraints were reasonable, because without them each member would be subjected to ruinous competition by the other, and did not exceed in degree of stringency or scope what was necessary to protect the parties in securing prices for their product that were fair and reasonable to themselves and the public; that competition was not stifled by the association because the prices fixed by it had to be fixed with reference to the very active competition of pipe companies which were not members of the association, and which had more than double the defendants' capacity; that in this way the association only modified and restrained the evils of ruinous competition, while the public had all the benefit from competition which public policy demanded.

From early times it was the policy of Englishmen to encourage trade in England, and to discourage those voluntary restraints which tradesmen were often induced to impose on themselves by contract. Courts recognized this public policy by refusing to enforce stipulations of this character. The objections to such restraints were mainly two. One was that by such contracts a man disabled himself from earning a livelihood, with the risk of becoming a public charge, and deprived the community of the benefits of his labor. The other was that such restraints tended to give to the covenantor, the beneficiary of such restraints, a monopoly of the trade, from which he had thus excluded one competitor, and by the same means might exclude others.

Chief Justice Parker, in 1711, in the leading case of *Mitchell v. Reynolds* (1 P. Wms., 181, 190), stated these objections, as follows:

"First. The mischief which may arise from them (1) to the party by the loss of his livelihood and the subsistence of his family, (2) to the public by depriving it of an useful member. Another reason is the great abuses these voluntary restraints are liable to, as, for instance, from corporations who are perpetually laboring for exclusive advantages in trade, and to reduce it into as few hands as possible."

The reasons were stated somewhat more at length in *Alger v. Thacher* (19 Pick., 51, 54), in which the supreme judicial court of Massachusetts said:

"The unreasonableness of contracts in restraint of trade and business is very apparent from several obvious considerations: (1) Such contracts injure the parties making them, because they diminish their means of procuring livelihoods and a competency for their families. They tempt improvident persons, for the sake of present gain, to deprive themselves of the power to make future acquisitions, and they expose such persons to imposition and oppression. (2) They tend to deprive the public of the services of men in the employment and capacities in which they may be most useful to the community as well as themselves. (3) They discourage industry and enterprise, and diminish the products of ingenuity and skill. (4) They prevent competition and enhance prices. (5) They expose the public to all the evils of monopoly, and this especially is applicable to wealthy companies and large corporations, who have the means, unless restrained by law, to exclude rivalry, monopolize business, and engross the market. Against evils like these wise laws protect individuals and the public by declaring all such contracts void."

The changed conditions under which men have ceased to be so entirely dependent for a livelihood on pursuing one trade have rendered the first and second considerations stated above less important to the community than they were in the seventeenth and eighteenth centuries, but the disposition to use every means to reduce competition and create

monopolies has grown so much of late that the fourth and fifth considerations mentioned in *Alger v. Thacher* have certainly lost nothing in weight in the present day, if we may judge from the statute here under consideration and similar legislation by the States.

The inhibition against restraints of trade at common law seems at first to have had no exception. See language of Justice Hall, Yearbook, 2 Hen. V., folio 5, pl. 26. After a time it became apparent to the people and the courts that it was in the interest of trade that certain covenants in restraint of trade should be enforced. It was of importance, as an incentive to industry and honest dealing in trade, that, after a man had built up a business with an extensive good will, he should be able to sell his business and good will to the best advantage, and he could not do so unless he could bind himself by an enforceable contract not to engage in the same business in such a way as to prevent injury to that which he was about to sell. It was equally for the good of the public and trade, when partners dissolved and one took the business, or they divided the business, that each partner might bind himself not to do anything in trade thereafter which would derogate for his grant of the interest conveyed to his former partner. Again, when two men became partners in a business, although their union might reduce competition, this effect was only an incident to the main purpose of a union of their capital, enterprise, and energy to carry on a successful business and one useful to the community. Restrictions in the articles of partnership upon the business activity of the members with a view of securing their entire effort in the common enterprise were, of course, only ancillary to the main end of the union, and were to be encouraged. Again, when one in business sold property with which the buyer might set up a rival business, it was certainly reasonable that the seller should be able to restrain the buyer from doing him any injury which, but for the sale, the buyer would be unable to inflict. This was not reducing competition, but was only securing the seller against an increase of competition of his own creating. Such an exception was necessary to promote the free purchase and sale of property. Again, it was of importance that business men and professional men should have every motive to employ the ablest assistants and to instruct them thoroughly; but they would naturally be reluctant to do so unless such assistants were able to bind themselves not to set up a rival business in the vicinity after learning the details and secrets of the business of their employers.

In a case of this last kind, *Mallan v. May* (11 Mees. & W., 632), Baron Parke said:

"Contracts for the partial restraint of trade are upheld not because they are advantageous to the individual with whom the contract is made and a sacrifice pro tanto of the rights of the community, but because it is for the benefit of the public at large that they should be enforced. Many of these partial restraints on trade are perfectly consistent with public convenience and the general interest and have been supported. Such is the case of the disposing of a shop in a particular place, with a contract on the part of the vendor not to carry on a trade in the same place. It is, in effect, the sale of a good will and offers an encouragement to trade by allowing a party to dispose of all the fruits of his industry. * * * And such is the class of cases of much more frequent occurrence, and to which this present case belongs, of a tradesman, manufacturer, or professional man taking a servant or clerk into his service, with a contract that he will not carry on the same trade or profession within certain limits. * * * In such a case the public derives an advantage in the unrestrained choice which such a stipulation gives to the employer of able assistants, and the security it affords that the master will not withhold from the servant instruction in the secrets of his trade, and the communication of his own skill and experience, from the fear of his afterwards having a rival in the same business."

For the reasons given, then, covenants in partial restraint of trade are generally upheld as valid when they are agreements (1) by the seller of property or business not to compete with the buyer in such a way as to derogate from the value of the property or business sold; (2) by a retiring partner not to compete with the firm; (3) by a partner pending the partnership not to do anything to interfere, by competition or otherwise, with the business of the firm; (4) by the buyer of property not to use the same in competition with the business retained by the seller, and (5) by an assistant, servant, or agent not to compete with his master or employer after the expiration of his time of service. Before such agreements are upheld, however, the court must find that the restraints attempted thereby are reasonably necessary (1, 2, and 3) to the enjoyment by the buyer of the property, good will, or interest in the partnership bought; or (4) to the legitimate ends of the existing partnership; or (5) to the prevention of possible injury to the business of the seller from use by the buyer of the thing sold; or (6) to protection from the danger of loss to the employer's business caused by the unjust use on the part of the employee of the confidential knowledge acquired in such business. Under the first class come the cases of *Mitchell v. Reynolds*, 1 P. Wms., 181; *Fowle v. Parke*, 131 U. S., 88, 9 Sup. Ct., 658; *Nordenfeldt v. Maxim Nordenfeldt Company* (1894), App. Cas., 634; *Rousillon v. Rousillon*, 14 Ch. Div., 351; *Cloth Company v. Lonsont*, L. R. 9, Eq., 345; *Whittaker v. Howe*, 3 Beav., 383; *Match Company v. Roeber*, 106 N. Y., 473, 13 N. E. 419; *Tode v. Gross*, 127 N. Y., 480, 28 N. E., 460; *Beal v. Chase*, 31 Mich., 490; *Hubbard v. Miller*, 27 Mich., 15; *National Ben. Co. v. Union Hospital Company*, 45 Minn., 272, 47 N. W., 806; *Whitney v. Slayton*, 40 Me., 224; *Pierce v. Fuller*, 8 Mass., 222; *Richards v. Seating Company*, 87 Wis., 593, 58 N. W., 787. In the second class are *Tallis v. Tallis*, 1 El. & Bl., 391, and *Lange v. Work*, 2 Ohio St., 520. In the third class the *Machinery Company v. Dolphs*, 138 U. S., 617, 11 Sup. Ct., 412, Id., 28 Fed., 553, and *Matthews v. Associated Press*, 136 N. Y., 333, 32 N. E., 981. In the fourth class are *American Strawboard Company v. Haldeman Paper Company*, 83 Fed., 619, and *Hitchcock v. Anthony*, Id., 779, both decisions of this court; *Navigation Company v. Winsor*, 20 Wall., 64; *Dunlop v. Gregory*, 10 N. Y., 241; *Hodge v. Sloan*, 107 N. Y., 244, 17 N. E., 335. While in the fifth class are the cases of *Homer v. Ashford*, 3 Bing., 322; *Horne v. Graves*, 7 Bing., 735; *Hitchcock v. Coker*, 6 Adol. & E., 454; *Ward v. Byrne*, 5 Mees. & W., 547; *Dubowski v. Goldstein* (1896), 1 Q. B., 478; *Peels v. Saalfeld* (1892), 2 Ch., 149; *Taylor v. Blanchford*, 13 Allen, 370; *Keeler v. Taylor*, 53 Pa. St., 467; *Herreshoff v. Boutineau*, 17 R. L., 3, 19 Atl., 712.

It would be stating it too strongly to say that these five classes of covenants in restraint of trade include all of those upheld as valid at the common law, but it would certainly seem to follow from the tests laid down for determining the validity of such an agreement that no conventional restraint of trade can be enforced unless the covenant embodying it is merely ancillary to the main purpose of a lawful contract and necessary to protect the covenantor in the enjoyment of the legitimate fruits of the contract or to protect him from the dangers of an unjust use of those fruits by the other party. In *Horne v. Graves* (7 Bing., 735) Chief Justice Tindal, who seems to be regarded

as the highest English judicial authority on this branch of the law (see Lord Macnaghten's judgment in *Nordenfeldt v. Maxim Nordenfeldt Company* (1894) (App. Cas., 535, 537), used the following language:

"We do not see how a better test can be applied to the question whether this is or not a reasonable restraint of trade than by considering whether the restraint is such only as to afford a fair protection to the interests of the party in favor of whom it is given, and not so large as to interfere with the interests of the public. Whatever restraint is larger than the necessary protection of the party requires can be of no benefit to either. It can only be oppressive. It is, in the eye of the law, unreasonable. Whatever is injurious to the interests of the public is void on the ground of public policy."

This very statement of the rule implies that the contract must be one in which there is a main purpose, to which the covenant in restraint of trade is merely ancillary. The covenant is inserted only to protect one of the parties from the injury which, in the execution of the contract or enjoyment of its fruits, he may suffer from the unrestrained competition of the other. The main purpose of the contract suggests the measure of protection needed, and furnishes a sufficiently uniform standard by which the validity of such restraints may be judicially determined. In such a case, if the restraint exceeds the necessity presented by the main purpose of the contract, it is void for two reasons: First, because it oppresses the covenantor, without any corresponding benefit to the covenantee; and, second, because it tends to a monopoly. But where the sole object of both parties in making the contract is expressed therein is merely to restrain competition, and enhance or maintain prices, it would seem that there was nothing to justify or excuse the restraint, that it would necessarily have a tendency to monopoly, and therefore would be void. In such a case there is no measure of what is necessary to the protection of either party, except the vague and varying opinion of judges as to how much, on principles of political economy, men ought to be allowed to restrain competition. There is in such contracts no main lawful purpose, to subserve which partial restraint is permitted, and by which its reasonableness is measured, but the sole object is to restrain trade in order to avoid the competition which it has always been the policy of the common law to foster.

REASONABLE RESTRAINT OF TRADE.

Much has been said in regard to the relaxing of the original strictness of the common law in declaring contracts in restraint of trade void as conditions of civilization and public policy have changed, and the argument drawn therefrom is that the law now recognizes that competition may be so ruinous as to injure the public, and therefore that contracts made with a view to check such ruinous competition and regulate prices, though in restraint of trade, and having no other purpose, will be upheld. We think this conclusion is unwarranted by the authorities when all of them are considered. It is true that certain rules for determining whether a covenant in restraint of trade ancillary to the main purpose of a contract was reasonably adapted and limited to the necessary protection of a party in the carrying out of such purpose have been somewhat modified by modern authorities. In *Mitchell v. Reynolds* (1 P. Wms., 181), the leading early case on the subject, in which the main object of the contract was the sale of a bake house, and there was a covenant to protect the purchaser against competition by the seller in the bakery business, Chief Justice Baker laid down the rule that it must appear before such a covenant could be enforced that the restraint was not general, but particular or partial, as to places or persons, and was upon a good and adequate consideration, so as to make it a proper and useful contract. Subsequently, it was decided in *Hitchcock v. Coker* (6 Adol. & E., 454), that the adequacy of the consideration was not to be inquired into by the court if it was a legal one, and that the operation of the covenant need not be limited in time. More recently the limitation that the restraint could not be general or unlimited as to space has been modified in some cases by holding that, if the protection necessary to the covenantee reasonably requires a covenant unrestricted as to space, it will be upheld as valid. (*Whittaker v. Howe* (3 Beav., 383), *Cloth Company v. Lonsort* (L. R., 9 Eq., 345), *Rousillon v. Rousillon* (14 Ch. Div., 351), *Nordenfeldt v. Maxim Nordenfeldt Company* (1894) (App. Cas., 535). See also *Fowle v. Park* (131 U. S., 88, 9 Sup. Ct., 658), *Match Company v. Roeber* (106 N. Y., 473, 13 N. E., 419). But these cases all involved contracts in which the covenant in restraint of trade was ancillary to the main and lawful purpose of the contract, and was necessary to the protection of the covenantee in the carrying out of that main purpose. They do not manifest any general disposition on the part of the courts to be more liberal in supporting contracts having for their sole object the restraint of trade than did the courts of an earlier time. It is true that there are some cases in which the courts, mistaking, as we conceive, the proper limits of the relaxation of the rules for determining the reasonableness of restraints of trade, have set sail on a sea of doubt, and have assumed the power to say, in respect to contracts which have no other purpose and no other consideration on either side than the mutual restraint of the parties, how much restraint of competition is in the public interest, and how much is not.

The manifest danger in the administration of justice according to so shifting, vague, and indeterminate a standard would seem to be a strong reason against adopting it. The cases assuming such a power in the courts are *Wickens v. Evans* (3 Young & J., 318), *Collins v. Locke* (4 App. Cas., 674), *Ontario Salt Company v. Merchants Salt Company* (18 Grant (U. C.), 540), *Kellogg v. Larkin* (3 Pin., 123), *Leslie v. Lorillard* (110 N. Y., 519, 18 N. E., 363).

In *Wickens v. Evans*, three trunk manufacturers of England, who had competed with each other throughout the realm, to their loss, agreed to divide England into three districts, each party to have one district exclusively for his trade, and, if any stranger should invade the district of either as a competitor, they agreed "to meet to devise means to promote their own views." The restraint was held partial and reasonable, because it left the trade open to any third party in either district. In answer to the suggestion that such an agreement to divide up the beer business of London among the London brewers would lead to the abuses of monopoly, it was replied that outside competition would soon cure such abuses—an answer that would validate the most complete local monopoly of the present day. It may be, as suggested by the court, that local monopolies can not endure long, because their very existence tempts outside capital into competition; but the public policy embodied in the common law requires the discouragement of monopolies, however temporary their existence may be. The public interest may suffer severely while new competition is slowly developing. The case can hardly be reconciled with later cases, hereafter to be referred to, in England and America. It is true that there was in this case no direct evidence of a desire by the parties to regulate prices, and it has been sometimes explained on the theory that the agreement was solely to reduce the expenses incident to a business covering the realm by restricting its territorial extent; but

it is difficult to escape the conclusion that the restraint upon each two of the three parties was imposed to secure to the other a monopoly and power to control prices in the territory assigned to him, because the final clause in the contract implies that when it was executed there were no other competitors except the parties in the territory divided.

Collins v. Locke was a case in the privy council. The action was brought to enforce certain articles of agreement by and between four of the leading master stevedore contracting firms in Melbourne, Australia, who did practically all the business at that port. The court (composed of Sir Barnes Peacock, Sir Montague E. Smith, and Sir Robert F. Collier) describes the scope and purposes of the agreement and the view of the court as follows:

"The objects which this agreement has in view are to parcel out the stevedoring business of the port among the parties to it, and so to prevent competition, at least among themselves, and also, it may be, to keep up the price to be paid for the work. Their lordships are not prepared to say that an agreement having these objects is invalid if carried into effect by proper means—that is, by provisions reasonably necessary for the purpose—though the effect of them might be to create a partial restraint upon the power of the parties to exercise their trade."

No attempt is made to justify the view thus comprehensively stated, or to support it by authority, or to reconcile it with the general doctrine of the common law that contracts restraining competition, raising prices, and tending to a monopoly, as this is conceded by the court to have been, are void. The court ignores the public interest that prices shall be regulated by competition, and assumes the power in the court to uphold and enforce a contract securing a monopoly if it affect only one port, so as to be but a partial restraint of trade. The case is directly at variance with the decision of the supreme court of Illinois in *More v. Bennett* (140 Ill., 69; 29 N. E., 888), hereafter discussed, and can not be reconciled in principle with many of the other cases cited.

The Canadian case of *Ontario Salt Company v. Merchants' Salt Company* is another one upon which counsel for defendants rely. That was the decision of a vice-chancellor. Six salt companies, in order to maintain prices, combined, and put their business under the control of a committee, and agreed not to sell except through the committee. It was held that because it appeared that there were other salt companies in the province, and because the combiners denied that they intended to raise prices, but only to maintain them, the contract of union was not in unlawful restraint of trade. The conclusion and argument of the court in *Salt Company v. Guthrie* (35 Ohio St., 666), hereafter stated, would seem to be a sufficient answer to this case.

Kellogg v. Larkin (3 Pin., 123) was an early case in Wisconsin, in which the action was on the covenant of a warehouseman in a lease of his warehouse, by which he agreed to devote his services to the lessee at certain compensation, and not to purchase or store wheat in the Milwaukee market. The covenant was held valid. Had nothing else appeared in the case the conclusion would have been clearly right, because such a covenant might well have been reasonably necessary to the protection of the lessee in his enjoyment of the warehouse and the good will of the lessor. But it further appeared that the warehousemen of Milwaukee, to the united grain dealers of that city, to enable the latter to obtain absolute control of the wheat market in Milwaukee. The court held the latter combination valid also. The decision can not be upheld, in view of the more modern authorities hereafter referred to.

The case of *Leslie v. Lorillard* (110 N. Y., 519; 18 N. E., 363) would seem to be an authority against our view. In that case a stockholder sought to restrain the payment of an annual payment about to be made by the Old Dominion Steamship Company under a contract by which it bought off the Lorillard Steamship Company from continuing in competition with it in carrying passengers and freight between New York and Norfolk. The contract was held valid, although it had no purpose except the restraining of competition, and, so far as appears, the obtaining of the complete control of the business. The case is rested on *Match Company v. Roeber* (106 N. Y., 473; 13 N. E., 419), which was a case of the purchase of property and good will. It proceeds on the general proposition "that competition is not invariably a public benefaction, for it may be carried on to such a degree as to become a general evil," and thus leaves it to the discretion of the court to say how much competition is desirable, and how much is mischievous, and accordingly to determine whether a contract is bad or not. The case is directly opposed to *Anderson v. Jett* (89 Ky., 375; 12 S. W., 670), hereafter cited. It should be said that nothing appears in the report of the case to show directly that the purpose of the contract was to reserve the entire business to the Dominion Company, or to secure to it the power of regulating prices, but this natural inference from the terms of the contract is not negatived.

The case of *Mogul Steamship Company v. McGregor, Gow & Co.* (1892) (App. Cas., 25) has been cited to sustain the position of the defendants. It does not do so. It was a suit for damages, brought by a company engaged in the tea-carrying trade at Hankow, China, against six other companies engaged in the same trade, for loss inflicted by an alleged unlawful conspiracy entered into by them to drive the plaintiff out of the trade, and to obtain control of the trade themselves. It appeared that the defendants agreed to conform to a plan of association, by which they should constantly underbid the plaintiff and take away his trade by offering exceptional and very favorable terms to customers dealing exclusively with the members of the association, and that they did this to control the business the next season after he had been thus driven out of competition. It was held by the House of Lords that this was not an unlawful and indictable conspiracy giving rise to a cause of action by the person injured thereby; but it was not held that the contract of association entered into by the defendants was not void and unenforceable at common law. On the contrary, Lord Bramwell, in his judgment (at page 46), and Lord Hannon, in his (at page 58), distinctly say that the contract of association was void, as in restraint of trade; but all the law lords were of opinion that contracts void as in restraint of trade were not unlawful in a criminal sense, and gave no right of action for damages to one injured thereby. The statute we are considering expressly gives such contracts a criminal and unlawful character. It is manifest, therefore, that whatever of relevancy the *Mogul Steamship Company* case has in this discussion makes for rather than against our conclusion.

Two other cases deserve mention here. They are *Roller Company v. Cushman* (143 Mass., 353; 9 N. E., 629) and *Gloucester Isinglass and Glue Company v. Russia Cement Company* (154 Mass., 92; 27 N. E., 1005). In these cases it was held that contracts in restraint of trade are not invalid if they affect trade in articles which, though useful and convenient, are not articles of prime or public necessity, and therefore contracts between dealers made to secure complete control of the manufacture and sale of such articles were supported. In the first case the article involved was a fastening of a certain slide roller, and in the other was glue made from fish skins. We think the cases here-

after cited show that the common-law rule against restraint of trade extends to all articles of merchandise, and that the introduction of such a distinction only furnishes another opportunity for courts to give effect to the varying economical opinions of its individual members. It might be difficult to say why it was any more important to prevent restraints of trade in beer, mineral water, leather cloth, and wire cloth than of trade in curtains, shades, or glue. However this may be, the cases do not touch the case at bar, because the same court, in *Telegraph Company v. Crane* (160 Mass., 50; 35 N. E., 98), held that fire-alarm telegraph instruments were articles of sufficient public necessity to render unreasonable restraints of trade in them void, and certainly such articles are not more necessary for public use than water, gas, and sewer pipe.

There are other cases upon which counsel of defendants rely, which, in our judgment, have no bearing on the issue, or, if they have, are clearly within the rules we have already stated. One is a case in which a railroad company has made a contract with a sleeping-car company by which the latter agreed to do the sleeping-car business of the railway company on a number of conditions, one of which was that no other company should be allowed to engage in the sleeping-car business on the same line. (*Chicago, St. L. & N. O. R. Co. v. Pullman Southern Car Company*, 139 U. S., 79; 11 Sup. Ct., 490.) The main purpose of such a contract is to furnish sleeping-car facilities to the public. The railroad company may discharge this duty itself to the public and allow no one else to do it, or it may hire some one to do it, and, to secure the necessary investment of capital in the discharge of the duty, may secure the sleeping-car company the same freedom from competition that it would have itself in discharging the duty. The restraint upon itself is properly proportioned to, and in only ancillary to, the main purpose of the contract, which is to secure proper facilities to the public. Exactly the same principle applies to similarly exclusive contracts with express companies and stock-yard delivery companies. (*Express Cases*, 117 U. S., 1, 6 Sup. Ct., 542, 628; *Stock Yards Company v. Keith*, 139 U. S., 128, 11 Sup. Ct., 461; *Butchers' and Drovers' Stock Yards Company v. Louisville and Nashville Railroad Company*, 31 U. S. App., 252, 14 C. C. A., 290, and 67 Fed., 35.) The fact is that it is quite difficult to conceive how competition would be possible upon the same line of railway between sleeping-car companies or express companies. Such contracts involve the hauling of sleeping cars or express cars on each express train, the assignment of offices in each station, and various running arrangements, which it would be an intolerable burden upon the railroad company to make and execute for two companies at the same time. And the same is true of contracts with a stock-delivery company. The railway company could not ordinarily be expected to have more than one general station for the delivery of cattle in any one town. It would only be required by the nature of its employment to furnish such facilities as were reasonably sufficient for the business at that place. There is hardly more objection on the ground of public policy to such a restriction upon a railway company in cases like these than there would be to a restriction upon a lessor not to allow the subject-matter of the lease to be enjoyed by anyone but the lessee during the lease. The privilege, when granted, is hardly capable of other than exclusive enjoyment. The public interest is satisfactorily secured by the requirement, which may be enforced by any member of the public, to wit, that the charges allowed shall not be unreasonable, and the business is of such a public character that it is entirely subject to legislative regulation in the same interest.

Having considered the cases upon which the counsel for the defendants have relied to maintain the proposition that contracts having no purpose but to restrain competition and maintain prices, if reasonable, will be held valid, we must now pass in rapid review the cases that make for an opposite view.

In *People v. Sheldon* (139 N. Y., 251; 34 N. E., 785) all the coal dealers in the city of Lockport, N. Y., entered into a contract of association, forming a coal exchange to prevent competition by constituting the exchange the sole authority to fix the price to be charged by members for coal sold by them, and the price was thus fixed. The court approved a charge to the jury that even if this was merely a combination between independent coal dealers to prevent competition between themselves for the due protection of the parties to it against ruinous rivalry, and although no attempt was made to charge unreasonable or excessive prices, it was inimical to trade and commerce, whatever might be done under it, and was within the State statute making a conspiracy injurious to trade indictable. Said Andrews, C. J. (p. 139, N. Y., and p. 789, 34 N. E.):

"If agreements and combinations to prevent competition in prices are, or may be, hurtful to trade, the only sure remedy is to prohibit all agreements of that character. If the validity of such an agreement would depend upon actual proof of public prejudice or injury, it would be very difficult in any case to establish the invalidity, although the moral evidence might be very convincing."

See, to the same effect *Judd v. Harrington*, 139 N. Y., 105, 34 N. E., 790; *Leonard v. Poole*, 114 N. Y., 371, 21 N. E., 707; *De Witt Wire Cloth Company v. New Jersey Wire Cloth Company* (Com. Pa.), 14 N. Y. Supp., 277.

In *Morris Run Coal Company v. Barclay Coal Company* (68 Pa. St., 173), five coal companies controlling the bituminous coal trade in Northern Pennsylvania agreed to allow a committee to fix prices and rates of freight, and to fix proportion of sales by each. Competition was not destroyed, because the anthracite coal and Cumberland bituminous coal were sold in competition with this coal. The association was nevertheless held void as in illegal restraint of trade and competition and tending to injure the public. In *Nestor v. Brewing Company* (161 Pa. St., 473, 29 Atl., 102), forty-five brewers in Philadelphia made an agreement to sell beer in Philadelphia and Camden at a certain price to be fixed by a committee of their number. Though beer could hardly be said to be an article of prime necessity, like coal, yet, as it was an article of merchandise, the contract was held void as in restraint of trade, and tending to monopoly.

In *Salt Company v. Guthrie* (35 Ohio St., 666) the salt manufacturers of a producing territory in Ohio, with some exceptions, combined to regulate the price of salt by preventing ruinous competition between themselves, and agreed to sell only at prices fixed by a committee of their number. The supreme court of Ohio held the contract void. Judge McIlvaine, who delivered the opinion of the court, said:

"The clear tendency of such an agreement is to establish a monopoly, and to destroy competition in trade, and for that reason, on the ground of public policy, courts will not aid in its enforcement. It is no answer to say that competition in the salt trade was not in fact destroyed, or that the price of the commodity was not unreasonably advanced. Courts will not stop to inquire as to the degree of injury inflicted upon the public. It is enough to know that the inevitable tendency of such contracts is injurious to the public."

Other Ohio cases which presented similar facts, and in which the same rule was enforced are *Emery v. Candle Company* (47 Ohio St., 320, 24 N. E., 660), and *Hoffman v. Brooks* (11 Wkly. Law Bul., 258).

In *Anderson v. Jett* (89 Ky., 375, 12 S. W., 670), two owners of steamboats running on the Kentucky River made an agreement to keep up rates and divide net profits, to prevent ruinous competition and reduced rates. The contract was held void.

In *Chapin v. Brown* (83 Iowa, 156, 48 N. W., 1074) the grocers in a town, in order to avoid a trade in butter, which was burdensome, agreed not to buy any butter or to take it in trade, except for use in their own families, so as to throw the business into the hands of one man who dealt in butter exclusively. The agreement was held invalid, because in restraint of trade, and tending to create a monopoly.

In *Craft v. McConoughy* (79 Ill., 346) five grain dealers in Rochelle, Ill., agreed to conduct their business as if independent of each other, but secretly to fix prices at which they would sell grain, and to divide profits in a certain proportion. This was held void, as in restraint of trade and tending to create a monopoly. In *More v. Bennett* (140 Ill., 69, 29 N. E., 888) articles of association entered into by only a part of the stenographers of Chicago to fix a schedule of prices, and prevent competition among their members and a consequent reduction of prices, was held void. The court said:

"A combination among a number of persons engaged in a particular business to stifle or prevent competition, and thereby to enhance or diminish prices to a point above or below what they would be if left to the influence of unrestricted competition, is contrary to public policy. Contracts in partial restraint of trade which the law sustains are those entered into by a vendor of a business and its good will with its vendee, by which the vendor agrees not to engage in the same business within a limited territory, and the restraint, to be valid, must be no more extensive than is reasonably necessary for the protection of the vendee in the enjoyment of the business purchased."

As already said, this case is in direct conflict with *Collins v. Locks* (4 App. Cas., 674), discussed above. To the same effect as *More v. Bennett*, are *Ford v. Association* (155 Ill., 166, 39 N. E., 651) and *Bishop v. Preservers' Association* (157 Ill., 284, 41 N. E., 765).

In *Association v. Nieserowski* (95 Wis., 129, 70 N. W., 166) the suit was on a note given in pursuance of the secret rules of an association of sixty out of the seventy-five master masons in Milwaukee, by which all bids for work about to be let were first made to the association, and the lowest bidder was then required to add 6 per cent to his bid, and, if the bid was more than 8 per cent below the next lowest bidder, more than 6 per cent might be added. Each member was required to pay to the association 6 per cent of his estimates, when due, for subsequent distribution. In declaring the contract void, the court said:

"The combination in question is contrary to public policy, and strikes at the interests of those of the public desiring to build, and between whom and the association or the members thereof there exist no contract relations."

In *Vulcan Powder Company v. Hercules Powder Company* (96 Cal., 510, 31 Pac., 581) four powder companies of California agreed that each should sell at a price to be fixed by a committee of their representatives, and should pay over to the others the profits on any excess of sales over a fixed proportion of the total sales. The contract was held void.

In *Oil Company v. Adoue* (83 Tex., 650, 19 S. W., 274) five owners of cotton-seed oil mills in Texas made an agreement not to sell at less than certain agreed prices. One guaranteed profits to the four others, and suit was brought on the guaranty. It was held void, as restraining trade and tending to a monopoly, even though the evidence failed to establish that it effected a monopoly.

In *Association v. Kock* (14 La. Ann., 168) eight commercial firms in New Orleans holding a large quantity of cotton bagging entered into an agreement by which they stipulated that for three months no member should sell a bale except by a vote of the majority. It was held that the contract was "palpably and unequivocally a combination in restraint of trade, and to enhance the price in the market of an article of primary necessity to cotton planters. Such combinations are contrary to public order, and can not be enforced in a court of justice."

In *Hilton v. Eckersley* (6 El. & Bl., 47), it was held that an agreement between eighteen cotton manufacturers to submit to the control of a committee of their number for twelve months the question as to prices to be paid for labor and the terms of employment, in order to resist the aggressions of an association of workmen, was void and unenforceable, because in restraint of trade.

In *Urmonst v. Whitelegg* (63 L. T. (N. S.), 455), a case in the Queen's Bench division, before Day and Lawrence, J. J., the action was brought to enforce a penalty under the rules of the Bolton Mineral Water Manufacturers' Association, which recited that the object of the association was to maintain the price of mineral water, and bound the members for ten years not to sell at less than 9d. a dozen bottles, or at not less than any higher price fixed by the committee, on penalty of £10 for each violation. Day, J., said:

"If a contract for raising prices against the public interest is a contract in restraint of trade, this is undoubtedly such a contract. During the last hundred years great changes have taken place in the views of the public, of the legislature, and, therefore, of the judges, on the matter, and many old-fashioned offenses have disappeared; but the rule still obtains that combination for the mere purpose of raising prices is not enforceable in a court of law. This contract is illegal in the sense of not being enforceable. It is not necessary that it should be such as to form the ground of criminal proceedings."

In the foregoing cases the only consideration of the agreement restraining the trade of one party was the agreement of the other to the same effect, and there was no relation of partnership, or of vendor and vendee, or of employer and employee. Where such relation exists between the parties, as already stated, restraints are usually enforceable, if commensurate only with the reasonable protection of the covenantee in respect to the main transactions affected by the contract. But in recent years even the fact that the contract is one for the sale of property or of business and good will, or for the making of a partnership or a corporation, has not saved it from invalidity if it could be shown that it was only part of a plan to acquire all the property used in a business by one management, with a view to establishing a monopoly. Such cases go a step further than those already considered. In them the actual intent to monopolize must appear. It is not deemed enough that the mere tendency of the provisions of the contract should be to restrain competition. In such cases the restraint of competition ceases to be ancillary, and becomes the main purpose of the contract, and the transfer of property and good will, or the partnership agreement, is merely ancillary and subordinate to that purpose. The principal cases of this class are *Richardson v. Buhl*, 77 Mich., 632, 43 N. W., 1102; *Arnot v. Coal Company* 68 N. Y., 558; *People v. Milk*

Exchange, 145 N. Y., 267, 39 N. E. 1062; *People v. Refining Company*, 54 Hun., 366, 7 N. Y. Supp., 406; *State v. Nebraska Distilling Company*, 29 Nebr., 700, 46 N. W., 155; *State v. Standard Oil Company*, 49 Ohio St., 137, 30 N. E., 279; *Manufacturing Company v. Klotz* 44 Fed., 721; *Distilling and Cattle Feeding Company v. People*, 156 Ill., 448, 41 N. E., 188; *Carbon Company v. McMillin*, 119 N. Y., 46, 23 N. E., 530; *Harrow Company v. Hench*, 83 Fed., 36; *Factor Company v. Adler*, 90 Cal., 110, 27 Pac., 36; *Lumber Company v. Hayes* 76 Cal., 387, 18 Pac., 391.

In addition to the cases cited, there are others which sustain the general principle, but in them there exists the additional reason for holding the contracts invalid that the parties were engaged in a quasi public employment. They are *Gibbs v. Gas Company*, 130 U. S., 396, 9 Sup. Ct., 553; *People v. Chicago Gas Trust Co.*, 130 Ill., 268, 22 N. E., 798; *Stockton v. Railroad Company*, 50 N. J. Eq., 52, 24 Atl., 964; *West Virginia Transportation Company v. Ohio River Pipe Line Company*, 22 W. Va., 600; *Hooker v. Vandewater*, 4 Denio, 349; *Stanton v. Allen*, 5 Denio, 434; *Railroad Company v. Collins*, 40 Ga., 582; *Hazelhurst v. Railroad Company*, 43 Ga., 13.

Upon this review of the law and the authorities we can have no doubt that the association of the defendants, however reasonable the prices they fixed, however great the competition they had to encounter, and however great the necessity for curbing themselves by joint agreement from committing financial suicide by ill-advised competition, was void at common law, because in restraint of trade, and tending to a monopoly. But the facts of the case do not require us to go as far as this, for they show that the attempted justification of this association on the grounds stated is without foundation.

The defendants, being manufacturers and vendors of cast-iron pipe, entered into a combination to raise the prices for pipe for all the States west and south of New York, Pennsylvania, and Virginia, constituting considerably more than three-quarters of the territory of the United States, and significantly called by the associates "pay territory." Their joint annual output was 220,000 tons. The total capacity of all the other cast-iron pipe manufacturers in the pay territory was 170,500 tons. Of this, 45,000 tons was the capacity of mills in Texas, Colorado, and Oregon, so far removed from that part of the pay territory, where the demand was considerable, that necessary freight rates excluded them from the possibility of competing, and 12,000 tons was the possible annual capacity of a mill at St. Louis, which was practically under the same management as that of one of the defendants' mills. Of the remainder of the mills in pay territory, and outside of the combination, one was at Columbus, Ohio, two in northern Ohio, and one in Michigan. Their aggregate possible annual capacity was about one-half the usual annual output of the defendants' mills. They were, it will be observed, at the extreme northern end of the pay territory, while the defendants' mills at Cincinnati, Louisville, Chattanooga, and South Pittsburg, and Anniston and Bessemer, were grouped much nearer to the center of the pay territory. The freight upon cast-iron pipe amounts to a considerable percentage of the price at which manufacturers can deliver it at any great distance from the place of manufacture. Within the margin of the freight per ton which Eastern manufacturers would have to pay to deliver pipe in pay territory, the defendants, by controlling two-thirds of the output in the pay territory, were practically able to fix prices.

The competition of the Ohio and Michigan mills, of course, somewhat affected their power in this respect in the northern part of the pay territory; but the farther south the place of delivery was to be, the more complete the monopoly over the trade which the defendants were able to exercise within the limit already described. Much evidence is adduced upon affidavit to prove that defendants had no power arbitrarily to fix prices, and that they were always obliged to meet competition. To the extent that they could not impose prices on the public in excess of the cost price of pipe, with freight from the Atlantic seaboard added, this is true; but within that limit they could fix prices as they chose. The most cogent evidence that they had this power is the fact, everywhere apparent in the record, that they exercised it. The details of the way in which it was maintained are somewhat obscured by the manner in which the proof was adduced in the court below, upon affidavits solely, and without the clarifying effect of cross-examination, but quite enough appears to leave no doubt of the ultimate fact. The defendants were, by their combination, therefore able to deprive the public in a large territory of the advantages otherwise accruing to them from the proximity of defendants' pipe factories, and, by keeping prices just low enough to prevent competition by Eastern manufacturers, to compel the public to pay an increase over what the price would have been if fixed by competition between defendants nearly equal to the advantage in freight rates enjoyed by defendants over Eastern competitors. The defendants acquired this power by voluntarily agreeing to sell only at prices fixed by their committee, and by allowing the highest bidder at the secret "auction pool" to become the lowest bidder of them at the public letting. Now, the restraint thus imposed on themselves was only partial. It did not cover the United States. There was not a complete monopoly. It was tempered by the fear of competition, and it affected only a part of the price. But this certainly does not take the contract of association out of the annulling effect of the rule against monopolies. In *United States v. E. C. Knight Company* (156 U. S., 1, 16, 15 Sup. Ct., 255), Chief Justice Fuller, in speaking for the court, said:

"Again, all the authorities agree that, in order to vitiate a contract or combination, it is not essential that its results should be a complete monopoly. It is sufficient if it really tends to that end, and to deprive the public of the advantages which flow from free competition."

It has been earnestly pressed upon us that the prices at which the cast-iron pipe was sold in pay territory were reasonable. A great many affidavits of purchasers of pipe in pay territory, all drawn by the same hand or from the same model, are produced, in which the affiants say that, in their opinion, the prices at which pipe has been sold by defendants have been reasonable. We do not think the issue an important one, because, as already stated, we do not think that at common law there is any question of reasonableness open to the courts with reference to such a contract. Its tendency was certainly to give defendants the power to charge unreasonable prices, had they chosen to do so. But if it were important, we should unhesitatingly find that the prices charged in the instances which were in evidence were unreasonable. The letters from the manager of the Chattanooga foundry, written to the other defendants, and discussing the prices fixed by the association, do not leave the slightest doubt upon this point, and outweigh the perfunctory affidavits produced by the defendants. The cost of producing pipe at Chattanooga, together with a reasonable profit, did not exceed \$15 a ton. It could have been delivered at Atlanta at \$17 to \$18 a ton, and yet the lowest price which that foundry was permitted by the rules of the association to bid was \$24.25. The same thing was true all through pay territory, to a greater or less degree, and especially at "reserved cities."

Another aspect of this contract of association brings it within the term used in the statute, "a conspiracy in restraint of trade." A conspiracy is a combination of two or more persons to accomplish an unlawful end by lawful means, or a lawful end by unlawful means. In the answer of the defendants it is averred that the chief way in which cast-iron pipe is sold is by contracts, let after competitive bidding invited by the intending purchaser. It would have much interfered with the smooth working of defendants' association had its existence and purposes become known to the public. A part of the plan was a deliberate attempt to create in the minds of the members of the public inviting bids the belief that competition existed between the defendants. Several of the defendants were required to bid at every letting, and to make their bids at such prices that the one already selected to obtain the contract should have the lowest bid. It is well settled that an agreement between intending bidders at a public auction or a public letting not to bid against each other, and thus to prevent competition, is a fraud upon the intending vendor or contractor, and the ensuing sale or contract will be set aside. *Breslin v. Brown*, 24 Ohio St. 565; *Atcheson v. Mallon*, 43 N. Y., 147; *Loyd v. Malone*, 23 Ill., 41; *Wooten v. Hinkle*, 20 Mo., 290; *Phlippen v. Stickney*, 3 Metc. (Mass.), 334; *Kearney v. Taylor*, 15 How., 494, 519; *Wilbur v. How*, 8 Johns. 444; *Hannah v. Fife*, 27 Mich., 172; *Gibbs v. Smith*, 115 Mass., 592; *Swan v. Chorpennan*, 20 Cal., 182; *Gardiner v. Morse*, 25 Mo., 140; *Ingram v. Ingram*, 49 N. C., 188; *Brisbane v. Adams*, 3 N. Y., 129; *Woodruff v. Berry*, 40 Ark., 251; *Wald, Pol. Cont.*, 310, note by Mr. Wald and cases cited. The case of *Jones v. North*, L. R. 19 Eq., 426, to the contrary, can not be supported. The large purchasers of pipe are municipal corporations, and they are by law required to solicit bids for the sale of pipe in order that the public may get the benefit of competition. One of the means adopted by the defendants in their plan of combination was this illegal and fraudulent effort to evade such laws, and to deceive intending purchasers. No matter what the excuse for the combination by defendants in restraint of trade, the illegality of the means stamps it as a conspiracy, and so brings it within that term of the Federal statute.

The second question is whether the trade restrained by the combination of the defendants was interstate trade. The mills of the defendants were situated, two in Alabama, two in Tennessee, one in Kentucky, and one in Ohio. The invariable custom in sales of pipe required the seller to deliver the pipe at the place where it was to be used by the buyer, and to include in the price the cost of delivery. The contracts, as the answer of the defendants avers, were invariably made after public letting at the home, and in the State, of the buyer. The pay territory sales in which it was the professed object of the defendants to regulate by their contract of association included thirty-six States. The cities which were especially reserved for the benefit of the defendants were Atlanta and Anniston, reserved to the Anniston mill, in Alabama; New Orleans and Chattanooga, reserved to the Chattanooga mill, in Tennessee; St. Louis and Birmingham, reserved to the Bessemer mill, in Alabama; Omaha, reserved to the South Pittsburg mill, in Tennessee; Louisville, New Albany, and Jeffersonville, reserved to Dennis Long & Co., of Louisville, and Cincinnati, Newport, and Covington, reserved to the Addyston mill, in Ohio. Under the agreement every request for bids from any place, except the reserved cities, went to any one of the defendants, was submitted to the central committee, who fixed a price, and the contract was awarded to that member who would agree to pay for the benefit of the other members of the association the largest "bonus." In the case of the reserved cities, the successful bidder having been already fixed, the association determined the price and bonus to be paid. The contract of association restrained every defendant except the one selected to receive the contract from soliciting (in good faith) or making a contract for pipe with the intending purchaser at all, and restrained the defendant so selected from making the contract except at the price fixed by the committee. In cases of pipe to be purchased in any State of the thirty-six in pay territory, except four, each one of the defendants, by his contract of association, restrained his freedom of trade in respect to making a contract in that State for the sale of pipe to be delivered across State lines, five of them agreeing not to make such a contract at all, and the sixth agreeing not to make the contract below a fixed price. With respect to sales in Ohio, Kentucky, Tennessee, and Alabama, the effect of the contract of association was to bind at least three, sometimes four, and sometimes five, of the defendants not to make a contract at all in those States for the sale and delivery of pipe from another State; and if the job were assigned, as it might be, to one living in a different State from the place of the contract and delivery, its effect would be to bind him not to sell and deliver pipe across State lines at less than a certain price. It thus appears that no sale or proposed sale can be suggested within the scope of the contract of association with respect to which that contract did not restrain at least three, often four, more often five, and usually all, of the defendants in the exercise of the freedom which but for the contract would have been theirs, of selling in one State pipe to be delivered from another State at any price they might see fit to fix. Can there be any doubt that this was a restraint of interstate trade and commerce? Mr. Justice Field, in *County of Mobile v. Kimball* (102 U. S., 691, 696), said:

"Commerce with foreign countries and among the States, strictly considered, consists in intercourse and traffic, and the transportation and transit of persons and property, as well as the purchase, sale, and exchange of commodities."

In *Robbins v. Trading Dist.* (120 U. S., 489, 7 Sup. Ct., 592), a law of Tennessee, which imposed a tax on all "drummers" who solicited orders on samples, was held unconstitutional, in so far as it applied to the drummer of an Ohio firm who was soliciting orders for goods to be sent from Ohio to purchasers in Tennessee, on the ground that it was a tax on interstate commerce. In delivering the opinion of the court in that case, Mr. Justice Bradley said (p. 497, 120 U. S., and p. 596, 7 Sup. Ct.) that a tax on the sale of goods, or the offer to sell them before they are brought into the State, was clearly a tax on interstate commerce. He further said:

"The negotiation of sales of goods which are in another State, for the purpose of introducing them into the State in which the negotiation is made, is interstate commerce."

The principle thus announced has been reaffirmed by the court in *Corson v. Maryland* (120 U. S., 502, 7 Sup. Ct., 655); in *Asher v. Texas* (128 U. S., 129, 9 Sup. Ct., 1); in *Stoutenburg v. Hennick* (129 U. S., 141, 9 Sup. Ct., 256); and in *Brennan v. City of Titusville* (153 U. S., 289, 14 Sup. Ct., 829). The point of these cases was emphasized by the distinction taken in *Emert v. Missouri* (156 U. S., 296, 15 Sup. Ct., 367), in which the validity of a law of Missouri imposing a tax on peddlers was in question. The plaintiff in error, convicted under the law of failure to pay the tax, was the selling agent of a New Jersey sewing machine manufacturing company, who carried the machine for sale with him in his wagon. It was held that in such a

case, the machine having become part of the mass of property in the State, the tax on the peddler was not a tax on interstate commerce.

If, then, the soliciting of orders for and the sale of goods in one State, to be delivered from another State, is interstate commerce in its strictest and highest sense—such that the States are excluded by the Federal Constitution from a right to regulate or tax the same—it seems clear that contracts in restraint of such solicitations, negotiations, and sales are contracts in restraint of interstate commerce. The antitrust law is an effort by Congress to regulate interstate commerce. Such commerce as the States are excluded from burdening or regulating in any way by tax or otherwise, because of the power of Congress to regulate interstate commerce, must, of necessity, be the commerce which Congress may regulate, and, which by the terms of the antitrust law, it has regulated. We can see no escape from the conclusion, therefore, that the contract of the defendants was in restraint of interstate commerce.

The learned judge who dismissed the bill at the circuit was of opinion that the contract of association only indirectly affected interstate commerce, and relied chiefly for this conclusion on the decision of the Supreme Court in the case of *United States v. E. C. Knight Company* (156 U. S., 1, 15 Sup. Ct., 249).

In that case the bill filed under the antitrust law sought to enjoin the defendants from continuing a union of substantially all the sugar refineries of the country for the refining of raw sugars. The Supreme Court held that the monopoly thus effected was not within the law, because the contract or agreement of union related only to the manufacture of refined sugar, and not to its sale throughout the country; that manufacture preceded commerce, and although the manufacture under a monopoly might and doubtless would indirectly affect both internal and interstate commerce, it was not within the power of Congress to regulate manufactures within a State on that ground. The case arose on a bill in equity filed by the United States under the antitrust act, praying for relief in respect of certain agreements under which the American Sugar-Refining Company had purchased the stock of four Philadelphia sugar-refining companies with shares of its own stock, whereby the American Company acquired nearly complete control of the manufacture of refined sugar in this country. The relief sought was the cancellation of the agreements of purchase, the redelivery of the stock to the parties respectively, and an injunction against the further performance of the agreements and further violations of the act. The Chief Justice, in delivering the judgment of the court, said:

"The argument is that the power to control the manufacture of refined sugar is a monopoly over a necessity of life, to the enjoyment of which by a large part of the population of the United States interstate commerce is indispensable, and that therefore the General Government, in the exercise of the power to regulate commerce, may repress such monopoly directly and set aside the instruments which have created it. * * * Doubtless the power to control the manufacture of a given thing involves in a certain sense the control of its disposition, but this is a secondary and not the primary sense; and, although the exercise of that power may result in bringing the operation of commerce into play, it does not control it, and it affects it only incidentally and indirectly. Commerce succeeds to manufacture and is not a part of it. The power to regulate commerce is the power to prescribe the rule by which commerce shall be governed, and is a power independent of the power to suppress monopoly. But it may operate in repression of monopoly whenever that comes within the rules by which commerce is governed, or whenever the transaction is itself a monopoly of commerce. * * * The regulation of commerce applies to the subjects of commerce and not to matters of internal police. Contracts to buy, sell, or exchange goods to be transported among the several States, the transportation and its instrumentalities, and articles bought, sold, or exchanged for the purpose of such transit among the States, or put in the way of transit, may be regulated; but this is because they form part of interstate trade or commerce. The fact that an article is manufactured for export to another State does not of itself make it an article of interstate commerce, and the intent of the manufacturer does not determine the time when the article or product passes from the control of the State and belongs to commerce."

The Chief Justice then refers to the prior case of *Coe v. Errol* (116 U. S., 517, 6 Sup. Ct., 475), in which it was held that logs were not made subjects of interstate commerce by the mere intent of the owner to ship them into another State, so that State taxation upon them could be regarded as a burden upon interstate commerce, until that intent had been carried so far into execution that "they had commenced their final movement from the State of their origin to that of their destination." *Kidd v. Pearson* (128 U. S., 1, 9 Sup. Ct., 6), is also referred to. In that case it was held that a law of Iowa, which forbade the manufacture of spirituous liquors, except for certain purposes, was not in conflict with the commerce clause of the Federal Constitution, although it appeared by proof that the liquor was to be manufactured only with intent to ship the same out of the State. The Chief Justice further said:

"It was in the light of well-settled principles that the act of July 2, 1890, was framed. Congress did not attempt thereby to assert the power to deal with monopoly directly as such; or to limit and restrict the rights of corporations created by the States or the citizens of the States in the acquisition, control, or disposition of property; or to regulate or prescribe the price or prices at which such property or the products thereof should be sold; or to make criminal the acts of persons in the acquisition and control of property which the States of their residence or creation sanctioned or permitted. Aside from the provisions applicable where Congress might exercise municipal power, what the law struck at was combinations, contracts, and conspiracies to monopolize trade and commerce among the several States or with foreign nations; but the contracts and acts of the defendants related exclusively to the acquisition of the Philadelphia refineries and the business of sugar refining in Pennsylvania, and bore no direct relation to commerce between the States or with foreign nations. The object was manifestly private gain in the manufacture of the commodity, but not through the control of interstate or foreign commerce. * * * There was nothing in the proofs to indicate any intention to put a restraint upon trade or commerce, and the fact, as we have seen, that trade or commerce might be indirectly affected, was not enough to entitle complainants to a decree."

We have thus considered and quoted from the decision in the *Knight* case at length, because it was made the principal ground for the action of the court below, and is made the chief basis of the argument on behalf of the defendants here. It seems to us clear that, from the beginning to the end of the opinion, the Chief Justice draws a distinction between a restraint upon the business of manufacturing and a restraint

upon the trade or commerce between the States in the articles after manufacture, with the manifest purpose of showing that the regulating power of Congress under the Constitution could affect only the latter, while the former was not under Federal control and rested wholly with the States.

Among the subjects of commercial regulation by Congress, he expressly mentions "contracts to buy, sell, or exchange goods to be transported among the several States," and leaves it to be plainly inferred that the statute does embrace combinations and conspiracies which have for their object to restrain, and which necessarily operate in restraint of, the freedom of such contracts. The citation of the case of *Coe v. Errol* was apt to show that merchandise, before its shipment across State lines, was not within the regulating power of Congress, and a fortiori, that its manufacture was not; while *Kidd v. Pearson* clearly made the distinction between the absence of power in Congress to control manufacturing merely because the manufacturer intends to add to interstate commerce with the product and the power which Congress has to prevent obstructions to interstate transportation in the product when made. But neither of these cases controls the one now under consideration. The subject-matter of the restraint here was not articles of merchandise or their manufacture, but contracts for sale of such articles to be delivered across State lines, and the negotiations and bids preliminary to the making of such contracts, all of which, as we have seen, do not merely affect interstate commerce, but are interstate commerce. It can hardly be said that a combination in restraint of what is interstate commerce does not directly affect and burden that commerce. The error into which the circuit court fell, it seems to us, was in not observing the difference between the regulating power of Congress over contracts and negotiations for sales of goods to be delivered across State lines, and that over the merchandise, the subject of such sales, and negotiations. The goods are not within the control of Congress until they are in actual transit from one State to another. But the negotiations and making of sales which necessarily involve in their execution the delivery of merchandise across State lines are interstate commerce, and so within the regulating power of Congress even before the transit of the goods in performance of the contract has begun.

The language of the Chief Justice in the last passage quoted above from his opinion, upon which so much reliance was placed by the circuit court and the defendants' counsel at the bar, is to be interpreted by the facts of the case before the court. The statement in the opinion that Congress did not intend by the antitrust act to limit and restrict the rights of persons and corporations in the mere acquisition, control, or disposition of property, or to regulate the prices at which such property should be sold, or to make criminal the acts of persons or corporations in the acquisition and control of property which the States of their residence or creation sanctioned or permitted, does not imply that Congress did not intend to strike down any combination which had for its object the restraint and attempted monopoly of trade and commerce among a given number of States in specified articles of commerce, and the resulting power to regulate prices therein. The obstacle in the way of granting the relief asked in *United States v. E. C. Knight Company* was (to use the language of the Chief Justice) that "the contracts and acts of the defendant related exclusively to the acquisition of the Philadelphia refineries, and the business of sugar refining in Pennsylvania, and bore no direct relation to commerce between the States or with foreign nations." The Supreme Court distinctly adjudged that "what the law struck at was combinations, contracts, and conspiracies to monopolize trade and commerce among the several States or with foreign nations." That the defendants in the present case combined and contracted with each other for the purpose of restraining trade and commerce among the States covered by their agreement, in the articles manufactured by them, is too clear to admit of dispute. In the *E. C. Knight & Co.* case there was, the Supreme Court said, "nothing in the proofs to indicate any intention to put a restraint upon trade or commerce." In the present case the proofs show that no one of the companies in this pipe-trust combination was allowed to send its goods out of the State in which they were manufactured except upon the terms established by the agreement. Can it be doubted that this was a direct restraint upon interstate commerce in those goods? To give the language of the opinion in the *Knight* case the construction contended for by defendants, would be to assume that the court, after having in the clearest way distinguished the case it was deciding from a case like the one at bar, for the very purpose of not deciding any case but the one before it, then proceeded to confuse the cases by using language which decided both. We can not concur in such an interpretation of the opinion.

Counsel for the defendants also find in the language of Mr. Justice Peckham, in the case of *United States v. Trans-Missouri Freight Association* (166 U. S., 290, 313, 326, 17 Sup. Ct., 540) an argument against our conclusion in this case. The question in that case was whether the antitrust act applied to railroad companies which combined in establishing traffic rates for the transportation of persons and property. It was vigorously contended on behalf of the railroad companies that the act was never intended to apply to them, because Congress had already provided for their regulation by the interstate commerce law. In meeting this position, Mr. Justice Peckham used the following language (p. 313, 166 U. S., and p. 548, 17 Sup. Ct.):

"We have held that the trust act did not apply to a company engaged in one State in the refining of sugar under circumstances detailed in the case of *United States v. E. C. Knight & Co.* (156 U. S., 1, 15 Sup. Ct., 249), because the refining of sugar under those circumstances bore no distinct relation to commerce between the States or with foreign nations. To exclude agreements as to rates by competing railroads for the transportation of articles of commerce between the States would leave little for the act to take effect upon."

Again, upon page 326, 166 United States, page 553, 17 Supreme Court, Justice Peckham repeats the same idea:

"In the *Knight & Co.* case, supra, it was said that this statute applied to monopolies in restraint of interstate or international trade or commerce, and not to monopolies in the manufacture even of a necessary of life. It is readily seen from these cases that, if the act does not apply to the transportation of commodities by railroads from one State to another or to foreign nations, its application is so greatly limited that the whole act might as well be held inoperative."

This is not a declaration that cases might not arise within the statute which were not combinations of common carriers in relation to interstate transportation. The language used means nothing more than that, if such combinations were excluded from the effect of the act, the great and manifest scope for the operation of a Federal statute on such a subject would be denied to it. To give the language more weight would be to violate the first canon for the construction of a judicial

opinion laid down by Chief Justice Marshall in *Cohens v. Virginia* (6 Wheat., 264, 340, 399):

"It is a maxim, not to be disregarded, that general expressions in every opinion are to be taken in connection with the case in which those expressions are used. If they go beyond the case, they may be respected, but ought not to control the judgment in a subsequent suit when the very point is presented for decision. The reason for this maxim is obvious. The question actually before the court is investigated with care, and considered in its full extent. Other principles which may serve to illustrate it are considered in their relation to the case decided, but their possible bearing on all cases is seldom completely investigated."

In *re Greene* (52 Fed., 104), cited for the defendants, is to be distinguished from the case at bar in exactly the same way as the *Knight Company* case. The indictment against *Greene*, drawn under the antitrust act, charged him with being a member of a combination to acquire possession and control of 75 per cent of the distilleries of the country, for the purpose of fixing the price of whisky and controlling the trade in it between the States. The immediate object of the combination was a monopoly in manufacture. The effect upon interstate trade in whisky was as indirect as was the monopoly of the refining of sugar in the *Knight Company* case upon interstate trade in that article.

The case of *Dueber Watch Case Mfg. Company v. E. Howard Watch and Clock Company* (35 U. S. App., 16; 14 C. C. A., 14, and 66 Fed., 637) can not be regarded as an authority upon either of the questions considered in this case, because of the division of opinion among the judges. It was a suit brought by a watch manufacturing company against twenty other companies to recover damages for a boycott of the plaintiff. The averment was that the defendants had agreed not to sell any goods manufactured by them to any person dealing with the plaintiff, and had caused this to be known in the trade, and that they fixed an arbitrary price for the sale of their goods to the public, and, because plaintiff's competition interfered with their maintaining this price they were using the boycott against plaintiff to stifle competition. The pleadings were not drawn with care to bring the case within the antitrust law. The questions arose on demurrer to the bill. Judge Lacombe held that the facts stated gave rise to no cause of action; Judge Shipman held that the averments were not sufficient to show that the trade restrained was interstate, and Judge Wallace dissented, on the ground that a cause of action was sufficiently stated and that the restraint was upon interstate commerce. These varying views decided the case, but they certainly furnish no precedent or authority.

There is one case which seems to be quite like the one at bar. It is the case of *United States v. Jellico Mountain Coal and Coke Company* (46 Fed., 432), a decision by Judge Key, at the circuit. The owners of coal mines in Kentucky entered into a contract of association with coal dealers in Nashville, by which they agreed that the mine owners should only sell to dealers who were members, and the members should only buy from mine owners who were members, and that the dealers should sell at certain fixed prices, of which the mine owners should receive a proportionate part, after payment of freight, and that prices might be raised by a vote of the association, in which case the addition to the price should be divided between the dealers and the mine owners. The contract recited that it was intended to establish and maintain the price of coal at Nashville. It was held to be an attempt to create a monopoly in the interstate trade in coal between Kentucky and Nashville, Tenn., and it was enjoined.

It is pressed upon us that there was no intention on the part of the defendants in this case to restrain interstate commerce, and in several affidavits the managing officers of the defendants make oath that they did not know what interstate commerce was, and, therefore, that they could not have combined to restrain it. Of course the defendants, like other persons subject to the law, can not plead ignorance of it as an excuse for its violation. They knew that the combination they were making contemplated the fixing of prices for the sale of pipe in thirty-six different States, and that the pipe sold would have to be delivered in those States from the four States in which defendants' foundries were situated. They knew that freight rates and transportation were a most important element in making the price for the pipe so to be delivered. They charged the successful bidder with a bonus to be paid upon the shipment of the pipe from his State to the State of the sale. Under their first agreement, the bonus to be paid by the successful bidder was varied according to the State in which the sale and delivery were to be made. It seems to us clear that the contract of association was on its face an extensive scheme to control the whole commerce among thirty-six States in cast-iron pipe and that the defendants were fully aware of the fact, whether they appreciated the application to it of the antitrust law or not.

Much has been said in argument as to the enlargement of the Federal governmental functions in respect of all trade and industry in the States if the view we have expressed of the application of the antitrust law in this case is to prevail, and as to the interference which is likely to follow with the control which the States have hitherto been understood to have over contracts of the character of that before us. We do not announce any new doctrine in holding either that contracts and negotiations for the sale of merchandise to be delivered across State lines are interstate commerce (see cases above cited), or that burdens or restraints upon such commerce Congress may pass appropriate legislation to prevent and courts of the United States may in proper proceedings enjoin. (In *re Debs*, 158 U. S., 564; 15 Sup. Ct., 900.) If this extends Federal jurisdiction into fields not before occupied by the General Government, it is not because such jurisdiction is not within the limits allowed by the Constitution of the United States.

The prayer of the petition that pipe in transportation under the contract of association be forfeited in a proceeding in equity like this, is, of course, improper, and must be denied. The sixth section of the antitrust act, after providing that property owned and in transportation from one State to another or to a foreign country under a contract inhibited by the act "shall be forfeited to the United States," continues "and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law." This requires a like procedure to that prescribed in sections 3309-3391, Revised Statutes, and involves a trial by jury. The only remedy which can be afforded in this proceeding is a decree of injunction.

For the reasons given the decree of the circuit court dismissing the bill must be reversed, with instructions to enter a decree for the United States perpetually enjoining the defendants from maintaining the combination in cast-iron pipe described in the bill, and substantially admitted in the answer, and from doing any business thereunder.

APPENDIX B.

[House of Representatives, Report 1522, part 2, Fifty-seventh Congress, first session.]

LIMITING THE MEANING OF THE WORD CONSPIRACY.

Mr. LITTLEFIELD, from the Committee on the Judiciary, submitted the following as the views of the minority (to accompany H. R. 11060):

The undersigned, a member of the Judiciary Committee, to whom was referred the bill (H. R. 11060) to limit the meaning of the word "conspiracy" and the use of "restraining orders and injunctions" in certain cases, which bill has been reported by the Judiciary Committee without amendment with a favorable recommendation, begs leave to submit herewith views giving reasons why the bill should not become a law without certain amendments materially modifying its provisions and narrowing its scope. It is a bill to define the meaning of the word conspiracy and regulate the use of restraining orders and injunctions. It defines conspiracy as follows (leaving out the language not involved in the definition):

"That no agreement, combination, or contract by or between two or more persons to do or procure to be done, or not to do or procure not to be done, any act in contemplation or furtherance of any trade dispute between employers and employees * * * shall be deemed criminal, nor shall those engaged therein be indictable or otherwise punishable for the crime of conspiracy, if such act committed by one person would not be punishable as a crime."

It is further provided in the act as follows:

"Nor shall such agreement, combination, or contract be considered as in restraint of trade or commerce."

This last clause is intended to exempt employers and employees contemplating or engaged in the furtherance of any trade dispute from the operation of the Sherman antitrust act. Following the definition and this clause is the general provision, "nor shall any restraining order or injunction be issued with relation thereto." It is submitted that the bill ought not to become a law until it is amended in two important particulars:

First, By striking out the words "nor shall such agreement, combination, or contract be considered as in restraint of trade or commerce."

EXCEPTION TO SHERMAN ANTITRUST ACT.

The only statute of the United States that prohibits contracts and agreements in restraint of trade and commerce is the Sherman antitrust act, approved July 2, 1890.

That statute makes such contracts and agreements criminal and imposes upon the parties making them penalties of fine and imprisonment. It makes no discrimination between classes or individuals. In its application it is not a respecter of persons. It does not select, as it ought not, persons engaged in any particular business or occupation, as distinguished from other kinds of business or occupation, as subject to its penalties. It operates equally and alike upon all. If the results legislated against are properly the subject of criminal legislation, all agencies through which such results are produced must be equally within the penal provisions of the act, as otherwise the restraint of trade and commerce could not be effectually prevented. If the result is injurious, all acts producing the results should be under the ban of the statute.

It is certainly conceivable that acts may be done in "contemplation or furtherance of any trade dispute between employers and employees" that would not be "in restraint of trade or commerce," and it is undoubtedly true that acts might be specially directed to or necessarily involve the "restraint of trade or commerce" for the purpose of furthering such dispute. It can hardly be insisted that a set of acts done to accomplish a particular purpose, and which as a part thereof necessarily restrain trade or commerce, should be held innocent and harmless when intended to produce results denounced as criminal, while other acts of the same general character, not involving this particular purpose, but producing the same result, should be held criminal.

No reason is perceived why the law should discriminate as to the purpose for which trade or commerce should be restrained. We do not think it proper to discriminate between the classes of persons or the acts in which they may be engaged when such acts equally tend to and bring about the same criminal result. It is not within the proper province of the lawmaking power to make fish of one and fowl of another. A State with its recognized powers of sovereignty is impotent to obstruct interstate commerce, but this bill without amendment would in effect authorize persons engaged in the furtherance of a trade dispute, employers and employees, to make contracts and agreements, do acts that would obstruct interstate commerce, and thus exercise powers not possessed by a sovereign State.

We can not feel that the proponents of the bill would desire this result. With the language stricken out as proposed by the amendment it will be seen that the language of the bill is sweeping and far-reaching, and it would be difficult to say just how far the court would go in holding under it that parties to combinations between employers or employees for the furtherance of a trade dispute would be excepted from the operations of the Sherman antitrust act. It is quite possible that its operation will prove to be more extensive than is contemplated by conservative judgment. When the friends of the bill have the full benefit of such extremely general language, with its inherent possibilities of judicial construction, it would appear to be as far as they ought to ask the legislative power to go.

Second, The broad and comprehensive scope of the definition of the word "conspiracy" under the terms of this proposed act should be narrowed and confined within at least reasonable limits.

THE ENGLISH LAW.

An examination of the origin of the legislation which is relied upon as the precedent for this bill will, perhaps, be instructive. Jackson H. Ralston, esq., an attorney at law and counsel for the Federation of Labor, drew this bill and appeared before the committee during the last Congress in advocacy thereof. As to the precise language of the bill and the precedents therefor he used this language at the hearing:

"I want to say that upon examination of the statute law of other jurisdictions I found that the Parliament of England had met the very condition that seemed to be confronting the labor organization here, and in the act known as the 'Trade-union act of 1875' Parliament had provided that where an act could be committed by an individual and not be criminal, the same act, if committed by a number of individuals in combination, could not be made the subject of the criminal-conspiracy law or could not be deemed a criminal act."

"The CHAIRMAN. What was the date of that act?"

"Mr. RALSTON. That act was passed in 1875."

"Mr. PARKER. Does it apply to all acts, no matter what they are?"

"Mr. RALSTON. In relation to trades disputes.
 "Mr. PARKER. It would not, therefore, apply to a boycott?
 "Mr. RALSTON. Yes; it would apply there absolutely.
 "The CHAIRMAN. Even if they starved the man to death?
 "Mr. RALSTON. Yes, sir; it would apply to an act of that kind, and for this reason: That any man has a legal right to purchase from any other man that he chooses, and there is a correlative right in every man to refuse to sell him his goods. That is right."
 Very clearly giving to the committee the impression that the language which he quoted as being the substance of the English law was a correct statement of the scope of that legislation. And upon this same point, more effectively impressing the committee with the idea that he was simply asking in substance a reenactment of the English statute, and leaving upon their minds the impression that its scope, operation, and effect had been accurately stated by him, he said further:
 "Continuing the argument I had in mind, I have stated, I think correctly, the law under this act of 1875. Now, the trades-union act was followed in Maryland in the act of 1884. I have here the Maryland act as it was incorporated in the code of 1888. The language is as follows:

"An agreement or combination by two or more persons to do or procure to be done any act in contemplation or furtherance of a trade dispute between employers and workmen shall not be indictable as a conspiracy if such act committed by one person would not be punishable as an offense. Nothing in this section shall affect the law relating to riot, unlawful assembly, breach of the peace, or any offense against any person or against property."

"That is, as I say, the language of the Maryland act of 1884.
 "Mr. PARKER. And that was the language of the English act of 1875?
 "Mr. RALSTON. Almost identically the language of the English act and the language which has been followed in the bill now before the committee."

Thus very clearly leaving upon the mind of the committee the impression that he had accurately stated the scope of the English statute. The quotation which Mr. Ralston made from the Maryland statute is accurate, and the effect of making the quotation is only to intensify the impression that he had also accurately stated the scope of the English statute. This presentation of the English statute, with the idea that Congress was to accept it as a legislative precedent in legislating upon this subject, was a very serious misconception of the scope of the English law. The fact is, as the brief analysis of the English statute which is given below will show beyond all possible peradventure, that the English statute when accurately stated is very much narrower in its scope than the language used by Mr. Ralston in stating the English law, and is in fact, by numerous limitations and restrictions upon its operation, not only practically innocuous, but extremely oppressive in its operation upon laboring men, as it creates offenses theretofore unknown in the English law and never yet made nor attempted to be made criminal in any American jurisdiction.

What Mr. Ralston did was to take one section of a chapter nearly word for word, disconnect it from at least eight distinct and specific provisions which narrowed and limited the scope of its operations. The section which he quoted as a legislative precedent for our action reads as follows, and is a part of the conspiracy and protection of property act of 1875:

"An agreement or combination by two or more persons to do, or procure to be done, any act in contemplation or furtherance of a trade dispute between employers and workmen shall not be indictable as a conspiracy if such act committed by one person would not be punishable as a crime."

The first exception reads as follows:

"Nothing in this section shall exempt from punishment any persons guilty of a conspiracy for which a punishment is awarded by any act of Parliament."

Just what the scope of this exception is could not be stated in detail without an examination of the statutory law of England to ascertain as to what particular subjects the law of conspiracy applies.

The second exception is:

"Nothing in this section shall affect the law relating to riot, unlawful assembly, breach of the peace, or sedition, or any offense against the State or the Sovereign."

The third exception provides:

"Where any person willfully and maliciously breaks a contract of service or of hiring, knowing or having reasonable cause to believe that the probable consequences of his so doing, either alone or in combination with others, will be to endanger human life or cause serious bodily injury, or to expose valuable property, whether real or personal, to destruction or serious injury, he shall, on conviction thereof by a court of summary jurisdiction or indictment, as hereinafter mentioned, be liable either to pay a penalty not exceeding £20 or to be imprisoned for a term not exceeding three months, with or without hard labor."

The scope of this exception will be appreciated when it is considered that it is not infrequently the "probable consequence" of a strike to expose valuable property—a man's business is certainly "valuable property"—to serious injury, and wherever there is reasonable cause to believe that such consequences are probable it is very clear that a single individual, independent of conspiracy, who "willfully and maliciously" violated his contract of service or hiring with that end in view, would be punishable under the English law by fine and imprisonment. Such an act, it is believed, is not made a crime in any jurisdiction in this country, and it is thought that the Federation of Labor, which desires this legislation, would protest with great vigor, and properly so, against the enactment of a statute which would make such an act on the part of a single individual punishable by fine and imprisonment. We only call attention to the exceptions which would affect laboring men, as this legislation is requested and urged principally by the labor organizations for the purpose of ameliorating their condition.

The fourth exception limiting the scope of this provision of the English law provides that every person who uses violence to or intimidates any other person, or his wife or children, or injures his property with a view to compel such other person to abstain from doing or to do any act which such other person has a legal right to do or abstain from doing, wrongfully and without legal authority, "shall, on conviction thereof by a court of summary jurisdiction, or on indictment as hereinafter mentioned, be liable either to pay a penalty not exceeding £20, or to be imprisoned for a term not exceeding three months, with or without hard labor."

The fifth exception provides that whoever for the same purpose persistently follows such other person about from place to place should be punished in the same manner.

The sixth exception provides that whoever for the same purpose "hides any tools, clothes, or other property owned or used by such other person, or deprives him of or hinders him in the use thereof," shall be punished in the same manner.

The seventh exception provides that whoever for that purpose "watches or besets the house or other place where such other person resides or works or carries on business or happens to be, or the approach to such a house or place" shall be punished in the same manner. The eighth exception provides that whoever, for the same purpose, "follows such other person with two or more other persons in a disorderly manner in or through any street or road" shall be punished in the same manner.

All of these provisions, with the possible exception of some phases of that included in the fourth subdivision creating new and additional criminal offenses upon the part of laboring men, and especially laboring men engaged in the familiar methods universally employed for the purpose of alleviating their condition by strikes. In no instance in any jurisdiction in this country are any of those acts, except possibly some included in the fourth subdivision, made punishable as crimes. It may be safely said that legislation of that sort would not be tolerated for a moment by any of the organizations who are interested in the passage of this bill.

Instead of ameliorating the condition of the laboring man who desires to avail himself of the right of the strike or the boycott provisions of the law, such as exist in the English statute, they narrow and restrict the scope of the operation of the general provision which was, presumably under a misapprehension, cited to us as a precedent for this bill. The enactment of such drastic and oppressive provisions would place every laboring man in a strait-jacket and practically destroy the efficiency of every labor organization in the country. Yet when fairly stated the provision relied upon as a precedent for this bill should have been stated, and should be stated with all of these qualifications and restrictions.

It is not credible that the Federation of Labor would advocate the adoption of the English statute from which this extract upon which they rely as a precedent was made, creating as it does so many new offenses aimed explicitly and expressly against laboring men and labor organizations. When considered in connection with Federal legislation the application of these suggestions is necessarily confined to their effect upon interstate trade and commerce. A bill similar to this was reported by the Judiciary Committee in the last Congress (H. R. 8917, Report No. 2007), but at the time of making the report the attention of the committee had not been called to the provisions above referred to in the English statute, but had, in fact, as the result of the partial statement of the counsel, been diverted therefrom. For that reason no allusion was made to it in that report.

The operation of this law in England, as might well be expected, has proved to be entirely satisfactory to the employers of labor. A short extract from a very able and instructive review of the legislation and its operation, made by A. Maurice Low, esq., who went to England under the auspices of the Department of Labor and made an exhaustive and thorough investigation of the subject, may prove instructive:

"EFFECT OF THE ACT OF 1875.

"The passage of the act of 1875 was hailed by the workmen with great satisfaction. It was regarded by them as conceding all for which they had so long contended—the right to enter into a legal combination to thwart or restrict the efforts of their employers, to more narrowly define their rights, and to lighten the punishment which they might incur in case of any violation of the law. The employers did not regard the law without apprehension.

"How far these hopes on the one side and fears on the other have been realized is a striking commentary on the effect of judicial interpretation of statute law. Dealing for the time being with the law as viewed from the standpoint of the employer, the fact stands forth in bold relief that the law which the employers dreaded twenty-five years ago they would not to-day repeal had they the power. This is not the opinion of a single employer. It is the composite opinion of what may fairly be termed the representative employers of labor in the United Kingdom, men speaking for the basic industries on which must rest all commercial prosperity. The reason given by employers why they are satisfied with the existing law is that it is easier now to prosecute and convict men endeavoring to interfere with their business or their employees than it was prior to the passage of the act, and that the rights of both parties being more narrowly defined, both know precisely what they may or may not be permitted to do, and generally endeavor to keep within those limitations.

"The right of workmen to do in combination that which they might do legally as individuals, feared by the employers at the time of the passage of the act and hailed by the workmen as placing a powerful weapon in their hands, has in practice not been either so dangerous or as beneficial as was imagined at the time. That men can strike, either as individuals or in combination, and do other things in combination which would have been illegal under previous laws, does not apparently cause the employers much concern. So long as men go on strike and do not by intimidation or violence prevent other men from taking their places, employers feel able to cope with the situation. It is in dealing with this question that employers believe they have been distinct gainers by the passage of the conspiracy and protection of property act."

His general conclusions, which we quote below, are also instructive, but should be read in connection with the fact that the law relating to boycotts and strikes had been construed very much more oppressively against labor organizations than is the case in this country.

"GENERAL CONCLUSIONS.

"What effect the passage of the law of 1875 has had in improving the relations between capital and labor is a question so difficult of exact determination, or of mathematical demonstration, that it can only be answered in the most cautious manner and by inference rather than by direct statement. Despite the frequent reference which has been made in this article to litigation—which, perhaps, is always the natural corollary of any legislative action or a complete change from the old established order—and the admitted discontent with some of the phases of the law, that these relations have been improved must be conceded, and the acknowledgment is frankly made by the representatives of both capital and labor.

One of the chief causes for this improvement is the power given to the workmen to do in combination that which they were before permitted to do as individuals only. That permission has removed one source of friction; it has with exactness limited the rights of the men, and there has been no attempt on the part of employers to interfere with this legal right. On the other hand, section 7, as judicially interpreted, enables the employers to prevent intimidation or coercion or interference with the carrying on of their business in their own way, and when an attempt is made to interfere with them a ready means is provided for obtaining relief. Perhaps the answer to the question as to the effect of the law on the relations between capital and labor can be best given in

the words of two men—one entitled to speak as the representative of federated capital, the other as the representative of federated labor. The representative of capital said:

"We are satisfied with the law. We would not change it if we could, except to make clearer the definition of intimidation and coercion. Before the law came into effect we were harassed by picketing and besetting, and it was extremely difficult to secure a conviction. Now we are far less troubled by these forms of violence, and when it becomes necessary to appeal to the protection of the law it is quickly given us, and where the case is a just one we can rely on securing a conviction. But there is another reason why we think the law is a good thing and why it is mutually advantageous both to capital and labor. Prior to 1875 the relations between masters and men were vague, indefinite, barbaric, archaic. The men were denied the right to improve their condition, to obtain an increase of wages, to reduce their hours of labor. I mean, they were denied the right to attempt to do these things by peaceful means, a right which certainly belonged to them. These restrictions have been removed.

"We are often, I admit, dictated to by trade unions, often severe and burdensome restrictions are imposed upon us in the conduct of our business; still, I concede that the men have a right to try and obtain an amelioration of their condition provided they do not resort to illegal methods. Nor can it be denied that what we now recognize as legitimate was in the old days regarded as illegal; prosecutions were frequently instituted on frivolous grounds. The law has removed this cause of complaint. It has brought the relations between capital and labor into greater harmony. These relations are not yet perfect, but they are better than they were."

From the standpoint of the representative of labor the following:

"Speaking broadly, I have no hesitation in saying that the relations between capital and labor are better to-day than they were twenty-five years ago. I do not attribute all of this improvement to the passage of the law of 1875. I attribute part of that improvement to the law of that year, part to the better understanding which now exists between employer and employed, to the recognition that both have equal rights, to the recognition that both are mutually dependent on each other, that nothing can be to the advantage of the one without being to the advantage of the other, and, conversely, if one side is dissatisfied the other is sure to be, with the results that the consequences are injurious to both. Referring more directly to the law of 1875, its advantages to labor have been these:

"It has permitted us to do in combination what we were permitted to do as individuals, but which we were prohibited from doing in association before that law came into effect; it has more particularly established our rights; it has given us certain privileges and restrictions, and at the same time has laid equal privileges and restrictions upon employers; it has made us feel that we are not in a class by ourselves, but stand equal in the eye of the law with other men, which has had the effect of removing much of the bitterness, much of the feeling of injustice and inequality which formerly existed between capital and labor. The law is not to be regarded as perfect. It has not quite fulfilled all of our expectations. The courts, in the opinion of labor, have been too prone to construe the law in favor of capital. Some of the convictions under section 7 we regard as unwarranted by the law and the facts.

"The decision in *Allen v. Flood* was a great victory for us, but the limitation of the power to picket, the restrictions which are imposed upon us, the restraint under which we are held, the fact that we can only do certain negative things and have no power to act affirmatively have weakened instead of strengthened us when we are engaged in a conflict with capital. We should like to see the law amended. Its amendment has often been discussed by us, but I am frank to say I do not see any prospect of the law being modified to make it more acceptable to the workmen. Still, if the question were put to a vote, if we were asked whether we would have the law repealed or let it stand as it now is, faulty although we know it to be, I have no hesitation in saying that a majority of the intelligent workmen of Great Britain would vote in favor of the law being retained on the statute books."

That the English law, if adopted as it reads in the act of 1875, would be very much more restrictive and oppressive than any law that now exists in this country with reference to labor organizations is undeniable. That it would authorize the issuance of injunctions in a great many of the instances about which the most serious complaint is made is also true. It has been complained bitterly that injunctions have been issued to prevent laboring men from approaching a place of business, when the English law makes the mere watching of the approach to such house for the purpose indicated, although done by an individual, a crime. The walking delegate could not exist when the law made it a crime on the part of the single individual for said purpose to either watch or beset the house or other place where any person resided or where he carried on his business or happened to be. An injunction against a single individual persistently following another about from place to place without any reference whatever to the place of business where he might be engaged or his own house, with a view to compel him to do or abstain from doing an act wrongfully and without legal authority, would be, if an injunction was issued in reference thereto, considered a gross abuse of the power of injunction, but in England no individual could thus follow a person from place to place, no matter where the place might be, without being punishable by fine or imprisonment.

It would no doubt be thought oppressive if the court punished by fine or imprisonment a single individual, to say nothing of a combination of individuals, for wilfully or maliciously breaking a contract of service or hiring, even though it was intended thereby to expose a business to injury. The business of an individual or corporation is valuable property. It would be purposely and designedly exposed to serious injury, or at least there may be reasonable cause to believe that would be the probable result, when the object of breaking a contract of service is to paralyze the business and bring it to an absolute standstill until what are not infrequently the reasonable demands of the laboring man are properly adjusted. If, however, a single individual in England saw fit to break his contract of service wilfully and maliciously for the purpose of exposing to serious injury the business of his employer, or aiding in that purpose, he would be punishable by fine and imprisonment, and a combination could be restrained by injunction from carrying such purpose into effect.

It is thought that such an exercise of the power of injunction, which would be possible in this country if we took the English statute with its limitations, so far as applicable to interstate commerce, would be considered oppressive and dangerous to the last degree by the labor organizations. In short, under this statute, with its limitations and restrictions, it is difficult to see how laboring men could successfully and safely assert their rights and protect their interests. Yet this is the statute which we were led to believe furnished an adequate precedent for the pending bill.

We suggest, therefore, as a second amendment to this bill, the proviso which was reported as an amendment by the committee in the last Congress, which reads as follows:

"Provided, That the provisions of this act shall not apply to threats to injure the person or the property, business, or occupation of any person, firm, association, or corporation, to intimidation or coercion, or any acts causing or intended to cause an illegal interference, by overt acts, with the rights of others."

This proviso does not, we think, go as far in limiting the scope of the operation of the bill as do the various exceptions and limitations found in the English law. In other words, it leaves the bill with a wider field within which to operate than is covered by the precedent which is relied upon to justify it. Unlike the English exceptions, it does not make criminal or restrainable what was not before criminal or restrainable.

The bill provides that "any act in contemplation or furtherance of any trade dispute between employers and employees" shall not "be deemed criminal, nor shall those engaged therein be indictable or otherwise punishable for the crime of conspiracy, if such act committed by one person would not be punishable as a crime, nor shall any restraining order or injunction be issued with relation thereto."

This bill, as it reads, without amendment, would authorize a large number of persons engaged in the "furtherance of a trade dispute" to orally threaten personal violence and injury to persons, property, business, and occupations—to intimidate and coerce by oral threats—as such an act, when committed by one person, is not punishable as a crime. The only remedy for a threat to do personal injury in nearly every State jurisdiction is a proceeding to place the party making the threat under bonds to keep the peace, and thus prevent the commission of an act that would "be punishable as a crime." If such threat is ever punishable as a crime it is an exception to which attention has not been called, and certainly is not the rule. This being the case, the bill would certainly authorize a combination of any size to orally threaten injury—to intimidate and coerce by oral threats—acts which we assume no one would desire to have permitted, much less authorized, by the provision of any public statute. We have been advised by some of those urging its passage that such a result was neither desirable nor desired.

The bill was evidently drawn under the misapprehension that oral threats to injure as aforesaid were "punishable as a crime." The object sought to be obtained by this act, as we understand it, is to prohibit the punishment of combinations, organized to do or doing acts that would be lawful and proper if done by an individual, and to prohibit the use of injunctions to restrain the doing of such acts by any combination, acts which are not intended to and do not injure persons or property. We do not understand that anyone seriously contends that authority should be given, either directly or indirectly, by a public statute to any combination to orally threaten injury to persons or property, business or occupations, or intimidate or coerce by such threats, or to interfere with the legal rights of others, or that the court should be prohibited from restraining such acts. It is for the purpose of preventing such an undesired and unwarrantable operation of the act and confining it to what its friends admit to be its legitimate scope that the adoption of the second amendment is recommended.

Moreover, it will be observed that this bill by its terms applies as well to employers as to employees, and whether that result is intended or not undoubtedly places the employers with reference to employees where they can take any kind of action in combination, which stops short of an actual crime by an individual employer, to oppress their employees without being subject to criminal punishment or the restraints of a court of equity, and to that extent very clearly leaves the employees at the mercy of the employer.

THE EXCEPTION IS CONTRARY TO THE SPIRIT OF THE CONSTITUTION.

The clause providing that such agreement, combination, or contract shall not be considered in restraint of trade or commerce, if it appeared in a law enacted by a State, would clearly be within and in violation of that provision of the Constitution being considered by the Supreme Court of the United States in the case of *Connolly and another against The Union Sewer Pipe Company*. It is that clause of the Constitution of the United States which is found in the fourteenth amendment and provides, among other things, that "no State shall . . . deny to any person within its jurisdiction the equal protection of the laws." An examination of the Constitution of the United States discloses the fact that there is no such prohibition applying to Federal legislation, and while a statute which denies to any person within the jurisdiction of the United States the equal protection of the laws is, when passed by Congress, equally in violation of the fundamental reasons which justify the existence of that amendment, such statute may not be invalid by reason of the absence of any such constitutional prohibition. Legislation of that character is clearly, however, obnoxious to the same consideration of justice, fairness, and public policy.

In discussing the statute of Illinois in connection with this constitutional provision in the case above referred to, the Supreme Court of the United States declared that by the fourteenth amendment it was—"undoubtedly intended not only that there should be no arbitrary deprivation of life or liberty, or arbitrary spoliation of property, but that equal protection and security should be given to all under like circumstances in the enjoyment of their personal and civil rights; that all persons should be equally entitled to pursue their happiness and acquire and enjoy property; that they should have like access to the courts of the country for the protection of their persons and property, the prevention and redress of wrongs, and the enforcement of contracts; that no impediment should be interposed to the pursuits of anyone except as applied to the same pursuits by others under like circumstances; that no greater burdens should be laid upon one than are laid upon others in the same calling and condition, and that in the administration of criminal justice no different or higher punishment should be imposed upon one than such as is prescribed to all for like offenses."

In applying these general principles, held to be within the scope of the amendment to the case in hand, the court said:

"These principles, applied to the case before us, condemn the statute of Illinois. We have seen that under that statute all except producers of agricultural commodities and raisers of live stock who combine their capital, skill, or acts for any of the purposes named in the act may be punished as criminals, while agriculturists and live-stock raisers, in respect of their products or live stock in hand, are exempted from the operation of the statute, and may combine and do that which, if done by others, would be a crime against the State. The statute so provides notwithstanding persons engaged in trade or in the sale of merchandise and commodities within the limits of a State and agriculturists and raisers of live stock are all in the same general class—that is, they are all alike engaged in domestic trade, which is of right open to all, subject to such regulations applicable alike to all in like conditions,

as the State may legally prescribe. The difficulty is not met by saying that, generally speaking, the State when enacting laws may, in its discretion, make a classification of persons, firms, corporations, and associations in order to subserve public objects."

And again:

"No duty rests more imperatively upon the courts than the enforcement of those constitutional provisions intended to secure that equality of rights which is the foundation of free government."

And again:

"Two or more engaged in selling dry goods, or groceries, or meats, or fuel, or clothing, or medicines, are under the statute criminals, and subject to a fine, if they combine their capital, skill, or acts for the purpose of establishing, controlling, increasing, or reducing prices, or of preventing free and unrestrained competition amongst themselves or others in the sale of their goods or merchandise; but their neighbors who happen to be agriculturalists and live-stock raisers may make combinations of that character in reference to their grain or live stock without incurring the prescribed penalty. Under what rule of permissible classification can such legislation be sustained as consistent with the equal protection of the laws?"

And

"We conclude this part of the discussion by saying that to declare that some of the class engaged in domestic trade or commerce shall be deemed criminals if they violate the regulations prescribed by the State for the purpose of protecting the public against illegal combinations formed to destroy competition and to control prices, and that others of the same class shall not be bound to regard those regulations, but may combine their capital, skill, or acts to destroy competition and to control prices for their special benefit, is so manifestly a denial of the equal protection of the laws that further or extended argument to establish that position would seem to be unnecessary."

That the Sherman antitrust law denounces as a criminal, without any exception or reservation, every person who shall make a contract or combination in the form of a trust or otherwise, or conspiracy in restraint of trade or commerce among the several States and foreign nations, is very clear.

Two or more persons or corporations engaged in the business of manufacturing or selling "dry goods, or groceries, or meats, or fuel, or clothing, or medicines" (to quote the language of the court in the Illinois case), if they enter into a contract, or combination, or conspiracy in restraint of such interstate trade or commerce would clearly be subject to fine and imprisonment, but under the provisions of this bill employers or employees who may be engaged in interstate commerce might make any contract or agreement in furtherance of any trade dispute between them, and although the direct and necessary effect of the contract and agreement might be not only to restrain but absolutely paralyze interstate trade and commerce, still under the provision of this bill such agreement, combination, or contract would not be considered as in restraint of trade and commerce, and would neither be indictable under the statute, nor could the making of such agreement be restrained by the court.

Upon the other hand, such acts or such agreement, if done or made by any other than the excepted parties, would clearly be indictable and restrainable under the provisions of the antitrust law. While it can be perhaps successfully contended that this exception would be constitutional, there is certainly strong ground for the conclusion that it is clearly within the principle and spirit of the Constitution, and this of itself should lead Congress to hesitate before passing legislation which would appear upon its face to be obnoxious to the idea that every person within the jurisdiction of the United States is entitled to the equal protection of the law, as "in the administration of criminal justice no different or higher punishment should be imposed upon one than such as is prescribed to all for like offenses." A fortiori, then, penalties imposed on criminal liability "should not be imposed upon one than such as is prescribed to all for like offenses."

Such legislation is not "intended to secure that equality of rights which is the foundation of free government."

THE REPORT OF THE COMMITTEE.

Common courtesy requires that some reference should be made to the report of the committee, which contains a somewhat exhaustive exposition of this bill.

In reaching their conclusions the committee use some rather novel reasoning. An agreement or a contract without at least two parties thereto is unthinkable. On this point the committee, among other things, say:

"To make such an agreement a person who agrees with another to make and become a party to such a contract, combination, or agreement has agreed or conspired to commit an offense against the United States, which offense would be consummated if both parties should actually enter into such agreement, and hence under the provisions of the act of May 17, 1879, above quoted, he would be guilty of the crime of conspiracy the moment either party should actually consent and become a party to the contract or combination forbidden by the act of July 2, 1890, even if the other person should then refuse to enter into the combination, contract, or agreement made illegal by that act, and which the two persons had agreed to make, and it would be entirely immaterial that no act was done by either party in restraint of trade or commerce."

That is to say, "the moment either party" becomes "a party to the contract," which must of necessity involve the idea of the other party becoming a party also, he would be guilty of conspiracy "even if the other person should then refuse to enter into the contract," leaving only one party to act. One party would be guilty of conspiring, though he had no one to conspire with. It is possible that this may be logic, but it is submitted, with great deference to the committee, that it is chopping logic a trifle fine. This fine, close reasoning is characteristic of the report.

Attention is called to this lucid statement:

"Suppose the persons referred to, not intending to enter into an agreement which will violate that act or to commit any crime, but desire to make an agreement as to their future conduct and acts in aid or furtherance of a trade dispute between themselves and their employers, do make an agreement (all unconsciously) which is in restraint of trade or commerce between the several States if executed. That is, it provides for the doing or not doing of acts which, if done or not done, will necessarily to some extent restrain such trade or commerce. Here there was no prior agreement to make this particular contract, but in determining and agreeing what they will do or will not do such an illegal contract or combination is actually made. Here, clearly, is no conspiracy to make an illegal agreement, and there can be no punishment for a conspiracy under existing law so far as the mere making of the agreement is concerned, although it is an illegal agreement, can not be enforced, and the parties have committed a misde-

meanor (by making it) under the provisions of subdivision 2 of section 1 of the act of July 2, 1890."

Here, if the reasoning of the committee is correctly apprehended under this illustration, "there can be no punishment for a conspiracy under existing law," as there is no conspiracy to conspire on the part of the parties.

THE EFFECT OF THE BILL.

The proposition which seems to give the committee the greatest satisfaction is its discovery as to what it calls the "effect of the bill."

It seems that it has ascertained that all this bill purports to do is to make "nonenjoinable, and in some cases unpunishable," "the agreement, combination, or contract described" only "not an act done or threatened to be done in pursuance thereof."

"The act, or any unlawful act done in the execution of such agreement, combination, or contract is still punishable (if an offense), still considered in restraint of trade or commerce (if it is), and in proper cases may be enjoined or restrained." That is to say, employers or employees in "the furtherance of any trade dispute" may with impunity make any kind of an agreement they like that tends to advance their interests, but the moment they undertake by acts done "or threatened by them" to execute their agreement thus authorized by law, if such acts "would interfere with such commerce to the extent of restraining it," they would be subject to restraining orders and punishment the same as now. This is what the committee says it thinks the bill means.

Summed up in a sentence it means that it is lawful to agree and contract and contrive to do what it is unlawful to do. If you undertake to carry out a valid contract you may be committing a crime and be subject to a restraining order.

The law expressly authorizes you to make a contract and immediately punishes you if you undertake to carry it out. It is to be noticed that although the report of the committee bears evidence of extended investigation, it does not favor us with any case that even inferentially sustains so abnormal a proposition. There is no occasion to discuss it as a legal proposition. With all respect to the committee, it does not appear to be justified by common sense. It must impress the labor organizations as a profound concession to be allowed the high and lofty privilege of being allowed to agree to do acts that they are not allowed to perform. They may agree to strike, but they must not strike. With such a great addition to their existing rights they may be expected to improve their condition.

To place such a construction upon the bill is to insult the intelligence of the labor organizations which are promoting this bill and stultify the attorneys who drew it. If this opinion of the committee is sound, the bill accomplishes nothing. It is to be hoped that it is not for the reason that it entertains that view that the committee reports the bill with a favorable recommendation.

From that point of view the bill does not rise to the dignity of a tub to a whale. It is idle to suggest that men ought not to have the right to do what they have the right to agree to do. If the committee really takes this view, and really desires to aid employers and employees along these lines—believes that full effect should be given to the evident intent—it could very easily have eliminated any question such as it has raised by simply amending the bill by inserting after the word "contract" in the third line on page 1, the words "or act done in pursuance thereof," and the same words after the word "contract" in the third line on the second page of the bill. Perhaps the friends of the bill will test the enthusiasm of the committee by insisting on such an amendment in order to dispel the doubt thus raised.

It is not believed that this clause is necessary; but if the committee's view is correct, in order to raise the bill above the dignity of blank paper for any practical purposes it is necessary.

The committee, moreover, appear to be a trifle enamored of this idea, and iterate and reiterate it again and again, finally "emphatically and as a repetition," so that this interesting idea can not be an inadvertence.

This report is full of protestations of friendship for and sympathy with employees, but we fear that the employees when they realize the infinitesimal character of the alleged relief that the committee believes it is giving them may reach the inference that these protestations are entitled to some discount.

It is not necessary to follow the committee through all its reasoning in this report.

It suggests some amendments which would, it thinks, as successfully emasculate the bill as does its novel construction, but does not say it is intended to press them. With reference to the effect of this bill unamended it says:

"No serious harm can come of it. The evils it is claimed would follow its enactment into law are largely imaginary. The workmen of the United States who demand this legislation are as loyal and well disposed and law-abiding as any class of our citizens. It is difficult to find serious objections to this provision. The enactment of this bill into law will give no aid or encouragement to lawbreaking or lawbreakers. We discover nothing in this proposed legislation that cripples government, imperils capital, permits restraint of interstate trade and commerce, or merits denunciation."

As tending to suggest in some degree a contrary inference, reference is made to a short debate in the last Congress upon a bill identical with this, where the principal question was whether the amendments heretofore suggested in these views should be adopted. During that debate the gentleman from New York (Mr. Ray), then the chairman of the House Judiciary Committee, characterized the effect of the bill as it now reads without the amendments in the following language:

"We do not propose to permit combinations to destroy property, to injure persons, to overthrow society, law, and order to be legalized, and no man who loves his country and favors law and order, and the preservation of property and property rights, and the general good and prosperity of the country, will favor a measure that not only permits but legalizes such combinations. Personal liberty is a grand thing, but it should not include license to do unlawful acts or interfere with the person and property of others unlawfully."

Hence the amendment. It would seem if these remarks were seriously intended that there are those who think that the unamended bill "merits denunciation." "No man who loves his country and favors law and order . . . will favor a measure . . ." The amendment referred to is identical with the one heretofore referred to. Without the amendment the bill would have read precisely as now reported by the committee, and would, in the opinion of the gentleman from New York (Mr. Ray), license "unlawful acts," "interfere with the person and property of others unlawfully," and legalize "combinations to destroy property, injure persons, and overthrow society, law, and order."

These vigorous sentiments are singularly illuminating when considered in connection with this display head in the report, "Will not aid or encourage lawlessness."

In discussing further the purpose and effect of these amendments the gentleman from New York [Mr. Ray] said: "And no man possessed of good sense or desiring to have good order in a community would ask to have one of those acts excepted from the operation of the bill by the amendment legalized. We desire to protect the interests of mercantile men, business men, and railroad and other corporations, while at the same time protecting the interests of the great labor organizations of this country. This we do by the amendments of the bill. They are wise and necessary."

Without the amendments, according to the gentleman from New York [Mr. Ray], their interests would be unprotected. Upon that portion of this bill "intended to effect a modification of the so-called 'Sherman antitrust law,'" the gentleman from New York [Mr. Ray] said: "If we forbid a corporation to do a certain act, and make the act a crime, that same act ought to be wrong and criminal in the eye of the law if done by one man or by a dozen men. It ought to be wrong, whether it is committed by an individual or by an organization."

Comment is unnecessary. That the committee has received light that was not vouchsafed to the gentleman from New York [Mr. Ray] seems quite obvious.

STATEMENT OF THE ENGLISH LAW BY THE COMMITTEE.

Assuming that the committee intend to make an accurate statement of the English law on this subject, in their report they are somewhat unfortunate. It is apparently relied upon by the committee as a controlling precedent for this bill. It quotes the general provision of the English conspiracy and protection of property act of 1875 without quoting the eight exceptions which qualify, limit, and narrow its operation. It states the general provision of the English law without even intimating the substance of the exceptions. It does not even state that the English law as a whole not only did not ameliorate the condition of organized labor, but imposed new and oppressive restriction upon them.

After having quoted the general provisions, without any reference whatever to these important limitations, the committee quote from Mr. Low's report, explaining the "practical working of this law," which would show that it was very conservative in its operation, clearly giving the impression that the general provision which it quotes was "this law" upon which Mr. Low was making his report, when, in fact, it was not that provision at all, but the statute as a whole that he was discussing. Still, whoever reads the committee report, and especially this paragraph by itself, would clearly get the impression that the general provision was in substance the English law referred to, when the fact is directly the reverse.

The force of this criticism is not affected by the fact that at the close of this paragraph containing the erroneous statement and comments a general reference is made to the criminal statutes of Great Britain. "Without referring to this particular statute it is said 'that they make criminal many acts that are innocent here.' This draws the attention from, rather than directly to, this particular provision in question and does not call attention to any of the 'many acts that are innocent here.'"

Moreover, the uncertainty is increased by the statement "that the principle involved is precisely the same."

THE NEW YORK LAW.

It is likewise unfortunate in its reference to the conspiracy laws of New York, if the quotations which it makes therefrom are accurate. It says, after making its quotation, "It will be noted that no agreement to commit an act can be a conspiracy under this law unless such act would or might be an offense or unlawful if committed by one person acting alone;" on the contrary, there are several specifications referred to in the quotation which are certainly not made crimes, "if committed by one person acting alone," by any of the provisions of the law cited, nor is the criminal character of a conspiracy to do the acts made to depend upon the fact that the act if performed by one person would be "punishable as a crime."

Such as—

(2) Falsely and maliciously to indict another for a crime, or to procure another to be complained or arrested for a crime; or

(3) Falsely to institute or maintain an action or special proceedings; or

(5) To prevent another from exercising another trade or calling, or doing any other lawful act, by force, threats, intimidation, or by interfering or threatening to interfere with tools, implements, or property belonging or used by another, or with the use or employment thereof; or

(6) To commit any act injurious to the public health, to public morals, or to trade or commerce, or for the perversion or obstruction of justice, or of the due administration of the laws."

In the last specification there are undoubtedly included offenses that would be punishable as crimes if committed by one alone. Further comment upon the report is, it is believed, unnecessary. If the view of the committee is correct, the bill by its terms simply "keeps the word of promise to the ear, but breaks it to the hope." It is not believed that the friends of this bill have been misled by their attorney to that extent.

A fair construction leaves it open to the objections which have been made herein and makes the amendments which are here suggested necessary in the interests of wise, judicious, and conservative legislation, legislation that will give to all the "equal protection of the law."

C. E. LITTLEFIELD.
R. M. NEVIN.

APPENDIX C.

Cases involving labor disputes in which injunctions have been granted during the last five years.

INJUNCTION CASES INVOLVING LABOR DISPUTES. (FEDERAL COURTS.)

1902. November 8. C. C. Dist. Nebraska.

Union Pacific R. R. Co. v. Ruef et al., 120 Fed., 102.

In this case a restraining order as prayed was issued, and the case was set down for hearing as to whether a temporary injunction should issue. By agreement of counsel this hearing was to result in a final decree, and evidence was taken on both sides before hearing. The evidence showed that there had been much violence before the bill was filed. An injunction was issued.

1903. April 1. C. C. E. D. Missouri E. D.

Wabash R. R. Co. v. Hannahan et al., 121 Fed., 564.

In this case a restraining order was issued on the filing of this bill. On the hearing of a motion for a preliminary injunction the motion was denied and the restraining order was vacated.

1903. June 22. C. C. D. Minnesota, Fifth Div.

Knudsen et al. v. Benn et al., 123 Fed., 636.

In this case a restraining order was issued on the filing of a bill, and on the hearing, duly noticed, of a motion for a preliminary injunction, such injunction was issued. The evidence showed that there had been violence both before the filing of the bill and after the restraining order was issued.

1905. July 1. C. C. N. D. California.

Loewe et al. v. California State Federation of Labor, 139 Fed., 71.

This case was heard upon an order to show cause why a temporary injunction should not issue. It was heard upon the bill and the affidavits filed by both parties, no answer having been filed. A temporary injunction was issued to restrain the defendants from boycotting. No actual violence was shown, but the boycotting was held to be illegal coercion.

1905. July 10. C. C. S. D. Iowa E. D.

A. T. & S. F. R. E. Co. v. Gee.

This case recites an injunction issued by this court on May 6, 1904, in which illegal picketing, by means of intimidation, was forbidden. The court holds that there can be no such thing as peaceful picketing, so this injunction must be construed as restraining violence.

1906. November 7. C. C. Md. Ohio W. D.

Pope Motor Car Co. v. Keegan, 150 Fed., 148.

In this case a temporary restraining order was allowed on the filing of the bill. An application for a preliminary injunction came up and was heard on affidavits filed and oral evidence. The preliminary injunction was allowed against such of the defendants as were shown to have participated in the violence and intimidation.

1906. December 11. C. C. E. D. Wis. 150 Fed., 155.

Allis-Chalmers Co. v. Iron Molders' Union No. 125 et al.

In this case a temporary restraining order was granted upon the bill and accompanying affidavit. The defendants answered, and upon the hearing for a preliminary injunction it was denied, on the ground that the equity of the bill was substantially denied by the defendant.

A supplemental bill was filed three months later. The defendants answered the supplemental bill and submitted a large number of affidavits. On motion for a preliminary injunction this injunction was granted, restraining illegal picketing, which was found to have been conducted by means of threat, intimidation, and actual violence.

1906. November 7. C. C. N. D. Cal. 149 Fed., 577.

Hammond Lumber Co. v. Sailors' Union of the Pacific.

In this case a restraining order was issued whereby it was ordered that the defendant's name be restrained during the pendency of the hearing for a temporary injunction. One month later an injunction order was made, and under this certain members who had violated the injunction were cited for contempt. Demurrers to the petition to punish for contempt were quashed.

This case was appealed to the circuit court of appeals for the ninth circuit and was there decided on October 7, 1907, and the temporary injunction issued was there sustained. (See 156 Fed., 450.)

1907. October 21. C. C. S. D. Ohio, W. D.

A. R. Barnes & Co. v. Berry, 156 Fed., 72.

Suit was brought to prevent the violation of a contract between two voluntary associations. No answer was filed, but affidavits were filed in behalf of the defendants. An injunction was issued to restrain the officers of the union from exercising their power, their control, and their influence to induce strikes which would cause the men to violate a contract made by the union.

1907. September 26. C. C. N. D. W. Va. 156 Fed., 173.

National Telephone Co. of W. Va. v. Kent.

In this case an original and an amended bill were filed. On the amended bill, exhibits, and affidavits a preliminary injunction was granted. The defendants demurred to the bill on the ground that a sufficient cause for the preliminary injunction was not presented. The court overruled the demurrer, holding in its decision that a boycott was illegal and expressing the opinion that a newspaper which was joined as a defendant had no right to publish any matter intended to aid wrongdoers in doing unlawful things.

1907. October 17. C. C. A. 8th circuit.

Shine v. Fox Bros. Mfg. Co., 156 Fed., 357.

This is an appeal in the circuit court of the United States for the eastern district of Missouri. It is appealed from an order temporarily enjoining certain labor organizations and their officers from boycotting the manufacturing company and the product of its factory. The order was affirmed. A rehearing is pending.

1907. August 7. C. C. D. Montana.

Rocky Mountain Bell Telephone Co. v. Montana Federation of Labor, 156 Fed., 809.

This case arose on a motion for a temporary restraining order, after notice given and affidavits filed on both sides. The court held that an order should be granted restraining the boycott by means of circulars which had been conducted by the defendants.

September 26. C. C. N. D. West Virginia.

October 24. D. C. N. D. West Virginia.

Hitchman Coal Co. v. United Mine Workers et al.

Following additional restraining orders other than hereinbefore noted are issued from January 1, 1903, to date:

(1) Mobile & Ohio R. R. v. E. E. Clark et al., restraining order issued May 11, 1903. Uncontested.

(2) Kemmerer v. Haggerty, July 15, 1905 (139 Fed. Rep., 693), restraining order issued on filing of complaint by Judge Jackson. Order vacated for collusion of stockholders and lack of jurisdiction, July 15, 1905.

(3) Armstrong Cork Company v. Anheuser Busch, restraining order issued on filing of complaint and affidavits July 3, 1905. Hearing set July 25, no opposition.

(4) Newport Iron & Brass Foundry v. Moulders Union, September 27, 1904. Injunction issued. No further record of the case.

(5) Niles Bement Pond Company v. Elwell et al., restraining order January 31, 1906. No further record.

(6) Pope Motor Car Company v. Stitart, restraining order issued on filing of complaints and affidavits. October 5, 1906, hearing set for October 13. No further record.

(7) Central District & Printing Telegraph Company v. Kent, restraining order on filing complaint and affidavits May 31, 1907. Preliminary injunction granted July 2, 1907. State of facts and allegations similar to that shown in National Telephone Company v. Kent. Many of its defendants being identical and both corporations evidently affected by its same strike. No further record.

(8) Hitchman Coal & Coke Company v. John Mitchell et al., November 27, 1907, restraining order issued on filing of complaint and fourteen affidavits, and hearing continued from time to time on defendants' motion; cause still at issue. Set down for hearing last Monday in May, 1908.

INJUNCTION CASES NOT INVOLVING LABOR DISPUTES.

These are principally patent cases, though there are a number of suits to restrain unfair competition and cases of other sorts:

INJUNCTIONS.

1903. January 17. C. C. N. D. N. Y. 119 Fed., 922.
General Electric Co. v. Wise.
1903. January 27. C. C. S. D. Iowa E. D. 120 Fed., 309.
City Water Supply Co. v. City of Ottumwa.
Temporary injunction.
1903. January 14. C. C. D. of N. J. 120 Fed., 981.
Western Union Telegraph Co. v. Pacific Telegraph Co.
1903. February 13. C. C. E. D. Mo. E. D. 120 Fed., 679.
Peters v. Union Biscuit Co.
1903. January 6. C. C. S. D. N. Y. 121 Fed., 126.
Frank v. Jones.
1903. January 6. C. C. S. D. N. Y. 121 Fed., 126.
Frank v. Ginger.
1903. October 2. C. C. W. D. Mich. S. D. 121 Fed., 357.
Bissell Chilled Plow Works v. Bissell Plow Co.
1903. April 1. C. C. S. D. Mo. E. D. 121 Fed., 564.
Wabash R. Co. v. Hannahan.
Restraining order issued on filing bill. Motion for preliminary injunction denied and restraining order vacated.
1903. February 10. C. C. S. D. N. Y. 121 Fed., 907.
Edward Thompson Co. v. American Law Book Co.
1903. March 17. C. C. W. D. N. Y. 121 Fed., 1007.
National Biscuit Co. v. Swich.
1903. January 2. C. C. S. D. N. Y. 122 Fed., 191.
Trow Typewriting, Printing & Bookbinding Co. v. U. S. Typewriting Co.
1903. May 19. C. C. E. D. N. C. 122 Fed., 725.
Terry v. Robbins.
1903. May 23. C. C. N. D. N. Y. 122 Fed., 871.
Bradley v. Eccles.
1903. May 7. C. C. D. of N. J. 122 Fed., 75.
National Meter Co. v. Neptune Meter Co.
1903. April 7. C. C. D. of Mass. 122 Fed., 87.
Merrimac Mattress Mfg. Co. v. Brown.
1903. March 13. C. C. N. D. N. Y. 122 Fed., 640.
Klander, Weldon Dyeing Machine Co. v. Stedwell Dyeing Machine Co.
1903. June 30. C. C. N. D. Fla. 123 Fed., 946.
L. & N. Ry. Co. v. Brown.
1903. April 16. C. C. S. D. N. Y. 123 Fed., 104.
Frost v. Crandel Wedge Co.
1903. July 25. C. C. D. of Kans., 2d Div. 123 Fed., 762.
Old Colony Trust Co. v. Wichita.
1903. May 8. C. C. S. D. N. Y. 123 Fed., 101.
General Electric Co. v. Wagner Electric Co.
1903. July 11. C. C. N. D. N. Y. 124 Fed., 324.
Kirk v. United States.
1903. August 1. C. C. S. D. Ala. 124 Fed., 644.
Sullivan Timber Co. v. City of Mobile.
1903. August 5. C. C. N. D. N. Y. 124 Fed., 764.
American Acetylene Burner Co. ads. Kirchberger.
1903. March 31. C. C. N. D. Ill. 124 Fed., 222.
Cutler-Hammer Mfg. Co. v. Hammer.
1903. August 14. C. C. N. D. N. Y. 124 Fed., 542.
Van Epps v. International Paper Co.
1903. August 29. C. C. D. of N. J. 124 Fed., 778.
Brill v. North Jersey Street Ry. Co.
1903. June 20. C. C. W. D. N. Y. 124 Fed., 903.
Carter, Crume Co. v. American Salesbook Co.
1903. August 1. C. C. W. D. N. Y. 124 Fed., 902.

Abstract of cases filed with the committee by American Federation of Labor:

APPENDIX C.

1. Farmers' Loan and Trust Co. v. Northern Pacific R. R. April 6, 1904, Jenkins, judge. 60 Fed. Rep., 803a.
In this case the receivers of the road filed a petition to put certain schedules in effect January 1, 1894, and certain defendants, members of the Brotherhood of Railway Trainmen, were enjoined against combining and conspiring to interfere with the operation of the road by quitting its service for that purpose. These injunctions were issued December 19 and 22, 1893, motion to modify the same made by P. M. Arthur, grand chief of the railway brotherhood, February 15, 1894. Injunction modified by striking out the words "and from ordering, recommending, approving, or advising others to quit the service of the receivers of the Northern Pacific Railroad on January 1, 1894, or at any other time."
Appeal was taken from the order refusing further modification of the injunction. For this, see memorandum Arthur v. Oaks, 63 Fed. Rep., 310. Memoranda G.
2. C. C. U. S., eighth judicial circuit, district Nebraska.
Ames v. Union Pacific. January 27, 1894.
This is an order granting petitions of Receivers of Union Pacific Railroad, part of said order operating as restraint of a conspiracy or combination of employees to procure a strike for the purpose of crippling the operation of the road. Evident cause of complaint is this order, which it does not appear that employees made any effort to have modified or vacated, although it contained explicit leave and invitation for them to do so. In connection with this note careful protection given to same employees under same receivers nine days later, Ames v. Union Pacific, 60 Fed. Rep. 74, where court protected said employees against an attempted wage reduction by same receivers. (See Memoranda A.)
3. C. C. U. S. district Pennsylvania.
Platt v. Philadelphia & Reading Railroad, 65 Fed., 600; November 27, 1894, Dallas, judge.
Memoranda is the courts decision in this case denying a petition by certain employees, members of the Brotherhood of Railway Trainmen, asking that the receivers of said road be restrained from discharging them and other members of the union unless they withdraw from said union.
Memoranda states the facts and the decision, against which there can obviously be no complaint.
4. C. C. U. S., Western District Arkansas.
Western Coal Mining Company v. Puckett et al., Nov. 21, 1890:
This is a restraining order issued on complaint and affidavits and exhibits with an order to show cause on a motion for preliminary injunction with hearing fixed first Monday in December, 1890.
No complaint accompanies the order and no specific objection appears. Restraint order was in the usual form and suggested the exceedingly serious condition as it enjoins the intimidating use of firearms, the marching of armed men over roads adjacent to mines, for the purpose of interfering with and intimidating miners, and discloses a condition approximating a local war. This case does not appear in the reports, therefore nothing of record to show that the order was contested successfully or otherwise.
5. C. C. U. S., Western District Kentucky.

Reinecke Coal Mining Co. v. Wood, 112 Fed., 497. Nov. 13, 1901. Evans, district judge.

This is the injunction in this case. A restraining order was issued November 13, 1901, hearing fixed for November 25, on motion for preliminary injunction. Granted December 23.

Memoranda C shows an exceedingly serious condition of affairs in which this order was issued.

6. C. C. U. S., Eastern Division Eastern District Missouri.

Wabash Railroad Co. v. Hannahan et al., March 3, 1903. 121 Fed. Rep., 563. Adams, district judge.

This is a famous restraining order referred to in Memoranda D, issued on complaint and affidavits and vacated on the hearing by same judge as complainants did not, in the opinion of the court, sustain the allegations of the complaint.

7. C. C. U. S., Eastern Division Western District Tennessee.

Mobile and Ohio Railroad v. E. E. Clark et al.; May 11, 1903.

This is a restraining order issued on filing complaint and motion for preliminary injunction May 11, 1903. Order to show cause returnable May 13, 1903. Case not in the reports; unable to say whether order was contested or not. In the printed copy of this order the words "persuaded," "influence," etc., are italicized in evident complaint.

8. C. C. U. S., Eastern District Missouri, Eastern Division.

Boyer v. Western Union Telegraph Co., 124 Fed. 246, August 17, 1903. Rogers, district judge.

Complaint is evidently based on court's decision denying plaintiff's prayer for a bill in equity enjoining defendant from discharging members of the Commercial Telegraphers' Union and the maintenance of an alleged blacklist against them. Demurrer sustained. The case is substantially set forth in Memoranda E.

9. C. C. U. S., Southern District Ohio, Western Division.

Newport Iron & Brass Foundry Co. v. Iron Moulders' Union, September 27, 1904.

This is a copy of a final injunction issued after argument and hearing.

10. C. C. U. S., Eastern District Eastern Division Missouri.

Armstrong Cork Co. v. Anheuser-Busch, July 3, 1905.

Restraining order issued on complaint and motion for preliminary injunction. Hearing fixed July 25, 1905.

11. C. C. U. S., Sixth Circuit Eastern District of Michigan, Southern Division.

Grand Trunk Railroad Co. v. Gratiot Lodge et al., August 23, 1905.

This is an original bill and amended bill of complaint, supported by numerous long affidavits of workmen who have been threatened and assaulted by defendants. Bill filed August 22, 1905. Order to show cause returnable August 31. The court required complaints to serve defendants with copy of complaints and affidavits before August 25, and defendants to file answer and reply affidavits before August 28. No restraining order was issued. No evidence is supplied of further proceedings. The bill alleges a strike by defendants to enforce a closed shop and higher wage scale. Alleging constant picketing, intimidation, and assault and abuse of nonunion employees.

12. C. C. U. S., Eastern Division Southern Division of Iowa.

Atchison, Topeka & Santa Fe R. R. v. Gee, October 24, 1905, 139 Fed. Rep., 582; 140 Fed. Rep., 153. McPherson, judge.

Proceedings for contempt, growing out of violation of a restraining order issued in May, 1904.

Memoranda F summarizes these proceedings, which display the utmost consideration and fairness by the court with evidence of continued and defiant contempt of the court's order.

13. C. C. U. S., Eastern District Pennsylvania.

Niles Bement Pond Co. v. Elwell, January 31, 1906. Restraining order issued. Case not in reports. Nothing to show other action. Order of the usual character.

14. Pope Motor Car Co. v. Stittart et al. C. C. U. S. District Indiana, Anderson, judge. Restraining order issued on exhibits and affidavits June 9, 1906. Hearing fixed June 16.

15. C. C. U. S., Eastern District Wisconsin. Allis Chalmers Co. v. Iron Moulders' Union 125 et al. June 16, 1906. Ditto, September 24, 1906. Temporary restraining order granted June 16, 1906. Hearing for preliminary injunction July 6. Defendant's answer and motion for preliminary injunction denied on the ground that the equity of the bill is substantially denied by the defendant.

The supplemental bill filed three months (Sept. 11) later and defendant's answer submitting a large number of affidavits. Motion for a preliminary injunction granted restraining illegal picketing found to have been conducted by threats, intimidation, and actual violence.

16. C. C. U. S., Western District Ohio.

Pope Motor Car Co. v. Keegan, 150 Fed., 148.

Temporary restraining order granted October 5, 1906. On filing complaint, affidavits, and exhibits. Hearing October 13. On motion for preliminary injunction heard on affidavits and oral evidence. Preliminary injunction allowed against such defendants as are shown to have participated in violence and intimidation.

17. C. C. U. S., Northern District West Virginia.

National Telephone Co. v. Kent, 156 Fed., 173. Dayton, judge.

Restraining order issued May 31, 1907. Heard July 2, 1907. Motion for preliminary injunction and amended bill, exhibits, and affidavits. Motion heard on numerous affidavits. Demurrer overruled and preliminary injunction issued September 26.

Reference memoranda 4.

18. C. C. U. S., Northern District West Virginia.

Central District & Printing Telegraph Co. v. Kent et al.

19. C. C. U. S., Ninth Circuit District Montana.

Rocky Mountain Bell Telephone Co. v. Montana Federation of Labor. 156 Fed., 809. Hunt, district judge. August 7, 1907.

Restraining order issued after notice of motion and affidavits filed by both sides and argument. Facts stated in memoranda H.

20. C. C. U. S., Northern District West Virginia.

Hitchman Coal and Coke Co. v. John Mitchell et al. November 26, 1907. Dayton, judge.

Restraining order issued October 24 on filing a bill. Cause set for hearing January 14 on motion for temporary injunction. Continued to March 18, 1908, on motion of defendants because of absence of their counsel, attending State legislature, and motion made at same time to dismiss order as to certain defendants not served with process. Hearing further continued from 18th of March to fourth Tuesday in May, 1908, on defendants' motion. No demurrer filed nor argument or motion on other matters.

21. Supreme Court District of Columbia.

Buck Stove & Range Co. v. American Federation of Labor, December 17, 1907. Gould, justice. Preliminary injunction issued on depositions and argument. Appeal taken.

22. Supreme Court District of Columbia.

Bender v. Union 118, January 10, 1908.

Permanent injunction issued on testimony and argument.

103. C. C. U. S., Northern District West Virginia. November 7, 1904.

E. M. Kemmerer et al. v. Haggerty. July 15, 1905. Goff, circuit judge.

Restraining order issued November 7, 1904, by Judge Jackson. Motion for permanent order fixed for November 30, 1904. Motion to dissolve injunction by said defendants and for permanent injunction by plaintiffs heard by Judge Goff, and restraining order dissolved for lack of jurisdiction.

See memoranda.

C. C. U. S., Eastern District Wisconsin.

Farmers Loan & Trust Co. v. Northern Pacific R. R. Jenkins, judge.

MEMORANDA A.

AMES v. UNION PACIFIC.

Order of the Circuit Court, District of Nebraska, met at Lincoln, January 27, 1904, Elmer Dundy, judge:

OLIVER AMES, 2ND, ET AL. v. UNION PACIFIC ET AL.

This is an order granting petition of receivers of the Union Pacific Railroad. The petition does not accompany the order, but the portion of the order complained of declares it unlawful for any of said employees, while in the employ of the receivers, to conspire, combine, or confederate together, or if, or by, or through any labor or other organization or the officers or committees thereof, or with any other person or persons whomsoever, for the purpose and with the intention of inducing a strike.

Like language is used with reference to combinations or conspiracies to obstruct or prevent the operation of the road.

It seems that no attempt was made to secure a modification of this order, although the courts specifically provided in it for leave "to each and every of the employees of this court engaged in operating the railway and telegraph lines and conduct the business of the said receivers, to intervene in this cause by petition and to move for such modification or abrogation of such rules and regulations and schedules of this or any other order made herein, or that such further order and direction in the premises as may be just and equitable, and said employees may so appeal by petition either individually or collectively in proper person, or by or through their duly authorized representative or representatives."

It is to be further remarked that apparently in the same connection there appears in Ames v. Union Pacific, 60 Fed. Rep., 674, on February 5, 1894, twelve days after the restraining order above complained of, that Judges Hallett and Renner carefully and energetically protect the employees of the receiver from an effort to put into effect the receivers' petition for an order to sustain them in revising and rearranging the rules and regulations of employment and schedule of wages and directing the employees of receivers to refrain from conspiring with intent to strike.

The court refused to confirm any action of the receivers in reducing wages or changing the working conditions which were in force when they took over the property, which would affect the employees, until the employees had been notified of the proposed changes, and given a chance to point out any inequality or injustice threatened by such changes.

MEMORANDA B.

PLAT V. PHILADELPHIA AND READING RAILROAD.

[65 Fed. Rep., 660: Circuit Court, District of Pennsylvania, November 27, 1894, Dallas, Judge.]

This was a petition by certain employees of the Philadelphia and Reading Railroad, who were members of the Brotherhood of Railway Trainmen, for an order to restrain the receivers of said road from discharging them and other members of the union, unless they withdrew from said union.

From the court's decision it appears the Reading Railroad had adopted a rule in 1887 that no one should be employed belonging to a labor organization unless he agreed to withdraw therefrom. Every applicant for employment was required to sign an application, stating that he was not a member of the union, or, if he was, that he would withdraw. Some years later the road went into the hands of receivers, who continued the employment policy they found in force.

Certain employees thereupon petitioned the court to restrain the receivers from enforcing a notice which they had issued, stating their intention to discharge all employees who were members of labor organizations, and who did not withdraw from them by a certain date.

It appears from the petition that all of the employees had obtained employment either by withdrawing from the union or had notice of the rule and had been employed in violation of it by subordinate agents of the road without the knowledge or consent of the receivers, and no other persons differently situated asked to be made parties to the petition.

The court held substantially that the petitioners who had thus violated a known rule had no equity standing to restrain its enforcement, and that in any event the court would not undertake to direct the receivers to abrogate a rule established by the owners of the property and believed by both them and the receivers to be advantageous to its management and which rule involved nothing unlawful.

It is worth noting that Attorney-General Olney filed a statement as *amicus curiae* in favor of the petition.

MEMORANDA C.

REINECKE COAL MINING COMPANY v. WOOD.

[112 Fed. Rep., 477, Circuit Court Western District of Kentucky, Evans, District Judge.]

A restraining order was issued November 13, 1901, with a hearing fixed for November 25, 1901, on motion for preliminary injunction, said motion being granted December 23, 1901.

Certain jurisdictional questions immaterial to the complaint raised under the restraining order were disposed of, and the application heard on affidavits.

The order was issued on substantially this condition:

It appears that certain coal miners of Indiana and Illinois, members of the United Mine Workers, complained that certain miners belonging to certain organizations in Kentucky were not receiving a wage schedule, fixed at Indianapolis, and they feared they could not maintain their own scale unless that of the Kentucky miners was increased. Agents were therefore dispatched into Kentucky to bring about an increase in the pay of the union miners, and as a result of their effort operators, notably of Central City, Ky., agreed to the scale demanded, provided it was adopted in a majority of the mines in another district (Hopkins County, where nonunion men were employed). The evidence disclosed, in the opinion of the court, that the relations between the

employers and the employees in these nonunion mines were mutually satisfactory, and that for the most part the members did not wish to join the union.

Under these circumstances the defendants and others invaded the Hopkins district in great force, establishing armed camps in the vicinity of the nonunion mines, which were maintained for many months, and the roads patrolled and the approaches to the mines picketed for the purpose of coercing and intimidating miners to join the union, and cause a strike unless the union scale was adopted. Nonunion men were constantly threatened and assaulted and when defensive measures were adopted there were constant collisions and disorder.

The court finds the conditions sought to be brought about were "undesired and vigorously repelled by the employers and a vast majority of the employees." * * * "If this court can not in a case like this protect the rights of a citizen when assailed, as those of the complainant have been in this instance, there is a decrepitude in judicial power which would be mortifying to every thoughtful man."

"One gratifying thing disclosed by the evidence offered in this motion is that much good has probably resulted from that action (issuing a restraining order), although it did not prevent the assault by the United Mine Workers upon property and citizens in Webster County immediately afterwards."

MEMORANDA D.

WARASH R. R. CO. v. HANNAHAN.

[Circuit Court Eastern District Missouri, Adams, District Judge, April 3, 1903.]

In this case, without notice to defendants, a temporary restraining order was issued on the filing of a verified bill of complaint by plaintiff, alleging unlawful and malicious combination and conspiracy by the Brotherhood of Locomotive Firemen and Railway Trainmen through officers and agents, the defendants, to compel the exclusive recognition of their labor organizations and the discharge by plaintiff of all not members thereof; this purpose to be accomplished by maliciously calling a strike of defendant organization's members, inducing others to violate the laws of the United States relating to the mail service and unlawful restraints and combinations in interstate commerce, etc. It was further alleged that the plaintiff's employees were entirely satisfied as to all matters concerning their service and employment. A restraining order was issued and served on defendants commanding them to refrain from ordering and causing a strike of plaintiff's employees and from in any other way or manner interfering with the plaintiff in the discharge of its duties as a common carrier of interstate traffic and the mails of the United States. Defendants were given fifteen days in which to appear and show cause why the restraining order should be dissolved or modified.

In issuing the ad interim order the court declared it to be its imperative duty and right, reciting for its authority in re Debs, 158 U. S. 564; Arthur v. Oaks, 11 C. C. A., 209; Toledo R. R. v. Penn. R. R. Co., 54 Fed., 730; Thomas v. Cincinnati, N. O., & T. P. Ry. Co., 62 Fed., 803.

The defendants filed an answer, supported by numerous affidavits, denying the plaintiff's allegations and especially that the employees were satisfied with the existing working conditions, and further asserting that the defendants were engaged in good faith in bettering the conditions of their services and that the strike they were about to sanction was for the purpose of peacefully and lawfully accomplishing these things. Affidavits were also filed by plaintiff, who moved for a preliminary injunction until final hearing.

The court denied plaintiff's motion and vacated the restraining order, holding that the weight of evidence did not show an unlawful combination of defendants with malicious intent to injure plaintiff, but only a rightful purpose of members of the Railway Brotherhood, acting under the direction of their representatives, peacefully and lawfully quitting plaintiff's employ for the purpose of bettering their condition.

MEMORANDA E.

BOYER v. WESTERN UNION TELEGRAPH COMPANY.

[124 Fed. Rep., 246; Circuit Court U. S., Eastern District of Missouri, August 17, 1903, Rogers, District Judge.]

Complaint in this case is evidently based on the denial of a bill in equity petitioned for by the Commercial Telegraphers' Union, praying for injunctive relief. Demurrer sustained.

The petition alleged—

First. That the defendant discharged plaintiffs without notice and for no other cause than that they joined a union.

Held. That in the absence of a contract the employer has the right to discharge, or the employee to quit at will.

Second. That defendant conspired to destroy the union by discharging its members.

Held. That as in the absence of a contract the employer may discharge for any cause or no cause, there can not be a conspiracy to do this lawful thing. Hence, no such thing as an unlawful conspiracy to destroy a labor union by discharging its members or refusing to employ them.

Third. That defendant, "by threat and intimidation and coercion and otherwise, so interfered with plaintiffs and others of its employees because they united with said union."

The court decided in this regard that it does not appear from the proceedings, "what the threats, what the intimidation, or what the coercion was of which they complained. Such an allegation is not one of fact, but is one of conclusion."

Fourth. The remedy for discharge from employment is an action at law, for breach of contract and not in equity, to enjoin the discharge.

Fifth. As to the allegation that a blacklist was maintained, the court states and answers defendant's assertion in this language:

"Can a court of equity grant relief to a man who says for his cause of action that he belongs to a reputable organization and that he has been discharged solely because he did belong to it; that his employer who discharged him keeps a book in which is placed his name, and has set opposite thereto the fact that he discharged him solely because he belonged to such organization, and that he gives the information to other persons, who refuse to employ him on that account. Suppose a man should file a bill alleging that he belonged to the honorable and ancient order of Free Masons, or to the Presbyterian Church, or the Grand Army of the Republic; that his employer had discharged him solely on that account; that he had discharged other of his employees and intended to discharge all of them for the same reason; that he kept a book which contained the names of all such discharged persons, and set opposite the name of such discharged persons the fact that they had been discharged solely on the ground that he belonged

to such organization and that he had given such information to others, who refused to employ such person on that account. Is it possible a court of equity could grant relief? If so, pray on what ground? And yet that is a perfectly parallel case to this as made by the bill."

MEMORANDA F.

ATCHISON, TOPEKA AND SANTA FE V. GEE.

[139 Fed. Rep., 582; 140 Fed. Rep., 153; Circuit Court Eastern Division, Southern Division of Iowa, July 10 and October 24, 1905. McPherson, judge.]

Proceedings for contempt, growing out of violation of a restraining order issued in May, 1904.

There was, it seems, a strike of machinists against the Santa Fe road in the spring of 1904, and the court calls attention to the continuous picketing for the purpose of intimidation and coercion, accompanied by constant violence to persons and property. The court remarks "there would have been no occasion for its interference if there had been any honesty of purpose by the local authorities to maintain peace and order. Intimidation, threats, violence, and brutality were all winked at because of the belief on the part of certain police officers that they would be kindly remembered on future election days."

The restraining order was issued May 6, 1904. "The accused were solemnly warned by a writ of this court. Two of the defendants appeared June 1, 1904, in person but without counsel. None of the other defendants appeared although notified. Those two were admonished by the court, to which they kindly listened and thanked the presiding judge."

Defendants Randall, Neyer, Hult, and Manly were cited after this on contempt charges, and heard orally and by affidavit April, 1905. Motion to punish for contempt was heard July 10, 1905.

[139 Fed. Rep., 582.]

The court then considered that the points raised on behalf of and in mitigation of defendants' action and made remarks thereon, causing the same to be sent to each defendant as a solemn warning, stating that the court would pronounce judgment later and would be governed to considerable extent by the conduct of the defendants in the interim.

In the following October 27 the court reviewed the previous contempt proceedings and heard further evidence discovered that three of the defendants, Neyer, Hult, and Manly, after receiving a copy of the written opinion of the court, delivered July 10, continued to violate the court's orders, indulging in "intimidation, ugly language, ugly conduct toward the company and toward the new employees." It is true they substituted for the word "scab" another word meaning the same, and which is understood by all as meaning the same as "scab."

The court also calls attention that from the time the restraining order was first issued, no effort was made to modify or vacate it, and no objection of any character raised by counsel or defendants to its terms.

Randall, who had been guilty of previous contempt, but had heeded to the court's admonition, was fined \$25. Neyer was given four months in jail and Hult and Manly three months each.

MEMORANDA G.

ARTHUR v. OAKS.

[Circuit Court of Appeal, 63 Fed. Reporter, 319. Harlan, judge. April 6, 1894, date Jenkins's opinion.]

Petition by P. M. Arbur and others to modify certain injunctions issued in a consolidated suit brought by the Farmers' Loan and Trust Co. et al. v. Northern Pacific Railroad Co. and its receivers, 60 Fed., 803. The injunctions were only modified in part by Circuit Judge Jenkins, and petitioners appealed.

It was contended that the circuit court exceeded its powers when it enjoined the employers of the receivers "from combining and conspiring to quit, with or without notice, the service of said receivers, with the object and intent of crippling the property in their custody or embarrassing the operation of said railroad and from so quitting the service of said receivers, with or without notice, as to cripple the property, or prevent or hinder the operation of said railroad."

This clause embodies two distinct propositions; one relating to combinations and conspiracies to quit the service of the receivers with the object and intent of crippling the property or embarrassing the operation of the railroads in their charge; the other having no reference to combinations and conspiracies to quit, or to the object and intent of any quitting, but only to employees "so quitting" as to cripple the property or prevent or hinder the operation of the railroad.

The appellate court held circuit court had properly refused to strike from the writs of injunction the words "and from combining and conspiring to quit with or without notice the service of said receivers with the object and intent of crippling the property in their custody or embarrassing the operation of said railroad" (the first proposition), but should have eliminated from the writ of injunction the words, "and from so quitting the service of said receivers, with or without notice, as to cripple the property or prevent or hinder the operation of said railroad" (second proposition).

The appellate court further indulged in mild criticism of the use of the word "strike," stating that the order of injunction should describe more distinctly than it did the "strikes" which it was intended to restrain.

The injunction order complained of was therefore revised in part, the motion to strike out granted to the extent here stated, and the injunction thus modified sustained.

MEMORANDA H.

Rocky Mountain Bell Telephone Co. v. Montana Federation of Labor. Circuit Court District Montana, August 17, 1907. Hunt, district judge. Motion for a temporary restraining order; granted after argument and hearing on affidavits.

Case shows during strike against the telephone company the defendant labor organization, through its officers and members, by concerted action attempted to injure and destroy plaintiff's business by boycotting its customers, intimidating and threatening its employees, and preventing others from entering its service. To this end defendants posted and distributed a great number and variety of abusive and threatening circulars, exhorting people not to patronize plaintiff, and threatening the withdrawal of patronage from and the boycotting of all merchants who used plaintiff's line.

Intimidating circulars were especially distributed among actual female employees and applicants for employment with plaintiff. All of these things being done to compel plaintiff to accede to a wage demand made by defendant.

Under the temporary restraining order certain defendants were afterwards punished for contempt.

MEMORANDA I.

[*Kemmerer v. Haggerty et al.* C. C. U. S., Northern District West Virginia, July 15, 1905. Goff, Judge.]

This action arose out of a strike of the United Mine Workers against the Pennsylvania Consolidated Co., a West Virginia corporation, which was made the defendant with the mine workers by certain nonresident stockholders. The corporation and the miners' organization were citizens of the same State; the former seeking an injunction in the State court against members of the latter organization, were alleged to be interfering with the operation of the corporation's property, and its non-union employees during a strike. Certain Pennsylvania stockholders of the corporation sought to obtain a Federal injunction, alleging that the corporation was not protecting their interests by obtaining an injunction from the Federal court against said miners, which injunction it obviously could not obtain on account of identity of citizenship of the parties.

On the filing of stockholders' complaint with accompanying affidavits a restraining order was issued by Judge Jackson on November 7, 1904, and a motion for a permanent order set down for a hearing November 30. Judge Goff heard the motion and held the action of the non-resident stockholders to be collusive, holding further that such acts did not constitute a compliance with equity rule 94, relating to stockholders' bill, and requiring such cases should not be collusive to confer Federal jurisdiction, that the court had no jurisdiction. The order was therefore vacated.

MEMORANDA J.

[*C. C. U. S. N. D. West Virginia, National Telephone Co. v. Kent et al.*, Sept. 26, 1907. Dayton, Judge. 156 Fed. Reporter, 173.]

This action grew out of a strike against the plaintiff in which it was alleged that defendants combined and conspired to injure and interfere with the business of plaintiff by pursuing, abusing, threatening, and assaulting men who took their places. Defendants cut a great number of the plaintiff's cables and wires, drilled holes and poured acid into other cables, injured and destroyed a great amount of plaintiff's property, and intimidated and attacked plaintiff's employees whenever they attempted to repair the damage done. A restraining order was issued on filing of plaintiff's complaint with time fixed for hearing of said order, and an order entered fixing the time within which evidence could be taken by deposition to permit defendants to prepare their defense.

Immediately following the period fixed to take evidence, counsel for defendants announced in court that no evidence had been taken and defendants had decided to make no further defense, but permit plaintiffs to have perpetual injunction in the case. Decree granting such injunction was then entered.

Thereafter, an amended supplemental bill was filed by plaintiff, alleging the original averments and, further, that other persons, including the editor of the local labor paper, had joined the original conspiracy and were assisting in the execution of the same; that the editor was publishing matter obviously calculated to make the injunction granted ineffective and the boycott enjoined effective. To this bill defendants demurred on the ground that sufficient cause for preliminary injunction was not shown. The court overruled the demurrer and on the exhibits and affidavits shown and arguments made preliminary injunction was granted, on the ground that defendants through the newspaper named, and by means of circulars issued and distributed, were encouraging the unlawful acts previously enjoined and inciting the public to boycott plaintiff.

MEMORANDA K.

Restraining orders and injunction orders in all cases herein noted are along the usual line of such orders, with the exception of the injunction of Judge Jenkins, modified by Judge Harlin, in *Arthur v. Oaks*.

While we have at hand no complete injunctions issued by Judge Taft, whose orders are generally held in high esteem, there is no order herein which differs substantially from orders of injunction issued by him in *Thomas v. Cincinnati, New Orleans and Texas Pacific Company* (62 Fed. Rep., 803), or *Toledo and Ann Arbor v. Penn. Company et al.* (54 Fed. Rep., 730), as these orders are substantially stated in the course of decision. In the latter case it is stated that defendant was restrained "from issuing, promulgating, or continuing in force any rule or order of said brotherhood which shall require or command any employees of any defendant railway companies herein to refuse to handle and deliver any cars of freight in course of transportation from one State to another to the complainant, or from refusing to receive and handle cars of such freight which have been hauled over complainant road; and also from in any way, directly or indirectly, endeavoring to persuade any of the employees of the defendant railway company whose lines connect with the railroad of complainant not to extend to said company the same facilities for interchange of interstate traffic as are extended by said companies to other railroad companies."

In *Thomas v. Cincinnati* case, defendant Phelan was enjoined "from, either as an individual or in combination with others, inciting, encouraging, ordering, or in any other manner causing the employees of the receiver to leave his employ with intent to obstruct the operation of his road, and thereby compelling him not to fulfill his contract and carry Pullman cars."

It is to be observed in this case that Judge Taft enjoins the very thing which is so sharply criticised in Judge Dayton's order in the case of the *Hitchman's Coal Mining Company v. Mitchell*—that is, a conspiracy to procure a breach of contract.

In the *Taft case Phelan* and the railway men sought to procure the breach and in the *Hitchman case Mitchell* and the miners enjoined from doing the same thing.

APPENDIX E.

REPORT OF THE SUBCOMMITTEE OF THE JUDICIARY COMMITTEE OF THE FIFTY-NINTH CONGRESS AS TO THE PERSONAL AND PROPERTY RIGHTS INVOLVED IN ANTI-INJUNCTION BILLS.

Your committee, to whom has been referred these resolutions, first, whether United States courts have jurisdiction to issue injunctions to protect the exercise of personal rights as distinguished from property rights; second, whether the right to carry on business is a property right of such a character as to be entitled to the protection of injunctions in proper cases, and to make such other and further report as to them may seem right and proper in the premises, submit the following:

These resolutions were adopted by the committee to assist in arriving at conclusions in the anti-injunction bills now pending. From their phraseology it is evident nothing more was expected of us other than, if possible, to aid in obtaining the correct statement of existing

law. We have not considered ourselves justified in treating the subject separate from legal issues or recommending to you any panacea for existing evils. This it is incumbent on the committee as a whole to do, and we do not, therefore, open up collateral matters, but confine ourselves to the two legal propositions presented by the resolution.

At the outset we are confronted with a paucity of decisions upon the first branch of our inquiry. What is a personal right? To say that it appertains to the person, that it is the right of personal security and the enjoyment of life, limb, body, health, reputation, and personal liberty, still leaves us in the dark as to personal rights to labor and demand its protection by judicial process. Acts against purely personal rights are very often crimes. Injunction does not lie to prevent crimes. It has never been the practice to enjoin the commission of a crime. Such remedy would be wholly inefficient. When a right is purely personal, that is where it has associated with it no idea of property, the use of the property, or the acquirement of property, etc., then it may not be protected by the writ of injunction. But where a personal right has connected with it the idea of property, it presents a different question. The right to pursue a particular calling has associated with it the idea of handling or acquiring property. It makes it a mixed personal and property right, and such a right has the protection of the law by injunction. We can not easily separate the personal from the property character of the act. The adjudicated cases almost invariably involve the latter, and the injunction relief asked is to protect the alleged property right. Ever when other rights appear the decision turns upon the property interest, and allusions to the personal right is incidental. We are forced, therefore, to go to fundamental principles as enunciated by the courts from time to time, and upon which the fabric of human liberty has been constructed. In *Regina v. Drury* (10 Cox C. C., 592), Lord Bramwell says:

"No right of property or capital was so sacred or carefully guarded by the law of the land as that of personal liberty. That liberty was not liberty of the body only, it was also a liberty of the mind and will, and the liberty of a man's mind and will, to say how he should bestow himself, his means, his talent, and his industry, was as much a subject of the law's protection as was that of his body."

So the supreme courts of Massachusetts, New York, Illinois, and Nebraska have in various decisions touched upon this question, maintaining, for instance, that the right to enter upon and remain in the employment of any person is secured by the Constitution itself. In *Algeyer v. Louisiana* (165 U. S., 589) the Supreme Court said:

"The constitutional guaranty embraces the right of the citizen to be free in the enjoyment of all his faculties, to be free to use them in all lawful ways, to live and work where he will, and earn his livelihood by any lawful manner, to pursue any livelihood or avocation, and for that purpose to enter into all contracts that may be proper, necessary, and essential in his carrying out the purposes above mentioned."

The State courts have affirmed this doctrine, as is set forth in *State v. Stewart* (59 Vt., 273):

"The principles upon which the cases, English and American, proceed is that every man has a right to employ his talents, industry, and capital as he pleases, free from the dictation of others."

The Anthracite Coal Strike Commission, composed of men selected by agreement between the employers and the employees, referring to the rights of citizens, said:

"The right and liberty to pursue a lawful calling and to lead a peaceable life, free from molestation or attack, concerns the comfort and happiness of all men, and the denial of them means the destruction of one of the greatest, if not the greatest, of the benefits which the social organization confers."

In volume 4, American and English Encyclopedia of Law, page 608, it says:

"The labor and skill of a workman, the plant of the manufacturer, and the equipment of the farmer all are in equal sense property. Every man has a right to employ his talents, industry, and capital as he pleases, free from the dictation of others."

More emphatically is this doctrine laid down in 16 Wall., 116; 212 L., 421:

"The individual citizen, as a necessity, must be left free to adopt such callings, profession, or trade as may seem to him most conducive to that end. Without this right he can not be a free man."

Finally we quote from the address of Justice Brewer, of the United States Supreme Court, recently delivered in Virginia:

"I believe in the liberty of the individual limited only by the equal rights of his neighbor. Whatever may be the changes of the future, whatever may be the new conditions of the social, business, and political life, the time will never come when anything will justify shacking the Golden Rule or striking down the Declaration of Independence."

If, then, the sole question is the right to labor, the right to do business, to employ and be employed, to barter and sell, to contract and trade, separate from the objects to which they are directed, they are personal rights which the courts have protected so long that they may be considered fixed and fundamental. The necessity for labor is imperative. Since Adam was driven from Eden it has been an inexorable law. You might as well say that one should not breathe or eat or sleep as to say he shall not work. As unavoidable, it will receive the highest protection the law affords.

It follows, therefore, that unless one's labor militates against the public good he has a constitutional right to employ that labor wherever and whenever he chooses. If the public weal is affected, the right of one must yield to the rights of the many. His alternative is to follow other lines of labor in which the public morals, health, peace, or happiness and interests of the people are not injuriously affected. In this conclusion it would appear that both the advocates and the opponents of injunctions agree, from the fact that in the bill especially selected for approval by the latter incorporated the following, unnecessary if the law was otherwise:

"No right to continue the relation of the employer and employee or to assume or create such relation with any particular person or persons or at all, or to carry on business of any particular kind or at any particular place or at all, shall be construed, held, considered, and treated as property or as constituting a property right."

With the modifications we have referred to, we claim that the first resolution should be answered in the affirmative.

As to the second resolution the decisions are numerous and substantially agree. There are a few dissenting opinions, but dissenting opinions do not establish the law. In this controversy they are largely in criticism of existing conditions rather than a denial of the law. They recommend the equalization of rights, so that capital and labor shall have a fair field for contention, and it can not be said that the laws are more favorable to one than to another. In other words, they are ethical discussions of what should be, rather than what is. Some are indignant protests against combinations of individuals and aggregations of capital stifling competition, establishing monopolies, and

reducing the wages of the laborer. We agree with the essence of these dissenting opinions, for in substance they amount to this: That the power of capital is so gigantic that the combinations of labor should be recognized and labor legislation approved, when equal justice and equal rights are dispensed to both. We fail to find any cases whatever either in the Federal or State courts controverting the principles of law which, for convenience, can be summarized as follows:

1. Business is not lifeless or dead things, but the activities in which they are employed.
2. It is a valuable property right, entitled under the Constitution to protection from unlawful interference.
3. It embraces a right to trade, apart from contract rights.
4. The owner of a business has a pecuniary interest in it beyond its actual tangible assets.
5. The right to carry on a lawful business without obstruction is a property right.
6. A business is just as much the subject of suit as ordinary forms of real and personal property.
7. It is a substantial right which should be protected by any remedy known to the courts.
8. One has a right to carry on his business within legal limits according to his own discretion and choice.
9. It is such property that any attempt to injure or destroy it will be restrained by injunction.
10. A conspiracy to interfere with business by threats or intimidation is subject to injunction.
11. When the injury is of a continuing character to business the injunctive process applies.
12. Even threatening to bring infringement suits without intending to bring them can be enjoined.
13. Also intimidating workmen, thereby preventing them from continuing in existing employment.
14. Interference with business through fraud, misrepresentation, intimidation, obstruction, or molestation is actionable through injunctions.
15. The right to do business at a certain place and in a certain manner, or at all, is a property right of such value that it is taxable as property.
16. Corporate franchises are property.
17. The good will of a business is property.
18. Good will, under some circumstances, is a personal right.
19. Contracts and privileges are property.
20. A license to do business is a property right.
21. A man has a right fundamentally to seek or accept, reject or quit, labor whenever or wherever he sees fit to do so, if not estopped by contract.

These propositions are supported by the decisions of the State and Federal courts, the latter frequently quoting the former in indorsement of their views. See *Minnesota v. Northern Securities*, 194 U. S. 70 and 71; *Scott v. Donald*, 185 U. S. 107; *Nashville and St. Louis R. R. Co. v. McConnell*, 82 Fed. Rep. 65; *Toledo A. A. and N. M. R. Co. v. Penn. Co.*, 54 Fed. Rep. 730; *Casey v. Cincinnati Typographical Union No. 3*, 45 Fed. Rep. 135; *Cœur d'Alene Consol. Min. Co. v. Miners' Union*, 51 Fed. Rep. 260; *Emack v. Kane*, 24 Fed. Rep. 47; see also *Brautigan v. Edward*, 36 N. J. Equity, 545; *Tarleton v. McCauley*, *Peake's Nisi Prius Reports* (Drake's edition, 1795), page 270; *Adams v. Columbia Typographical Union*, pages 281, 282, and 283 of the hearings before House Judiciary Committee on anti-injunction bills in the Fifty-eighth Congress; *State v. Stewart*, 59 Vt. 273; *Barr v. R. 6 Eq. 531; *Longshore Printing and Publishing Co. v. Havill*, 26 Oreg. 527; *Jackson v. Stanfield*, 137 Ind. 502; *Doremus v. Hennessey*, 176 Ill. 608; *Hamilton Shoe Co. v. Saxly*, 131 Mo. 212, and *Brown and Allen v. Jacobs Pharmacy Co.*, 115 Ga. 438.

As to the right to do business at a certain place, in a certain manner, or at all, see *Adams Express Co. v. Ohio State Auditor*, 165 U. S. 194, and 106 U. S. 185; *People of the State of N. Y. v. Roberts*, 154 N. Y. 101, and 159 N. Y. 70.

That good will as property exists entirely separate and distinct from the physical property used in business, see *Washburn v. National Wall Paper Co.*, 31 Fed. 17; *Smith v. Gibbs*, 44 N. H. 335; *Lindemann v. Rusik* (Wis.), 104 N. W. 119; *Millspaugh Laundry v. National Bank* (Ia.), 94 N. W. 62.

The Sherman antitrust act was constructed, in part, upon the idea that business was a property right of great value, for in the seventh section thereof it is especially recognized as such, and treble damages given for injury to it. Section 74 of the Wilson tariff law expressly gives a remedy for damages to "business" as a property right, and the same provisions are substantially embodied in the Dingley Act. The opinion of one who has held an important judicial position, and who is now conspicuous in the public service, is valuable. Therefore we quote from Secretary Taft, who, discussing the question, said:

"The question at issue is whether the unlawful injury to a going commercial or transportation business is an interference or injury with either a right of property or a right of a pecuniary nature. This question would seem to answer itself in the affirmative. The good will of a business, which is really the thing a man has in the custom he has built up by his business, is so much a property right that it is frequently bought and sold. Indeed, a man's business has been frequently protected by injunctions against unfair and fraudulent competition. Even if it be conceded that property right is to be limited to one growing out of ownership of tangible property, certainly a right in a going business is a right of a pecuniary nature."

We answer the second resolution as follows:

That the right to do business is a property right and may be protected by the writ of injunction.

CHARLES Q. TIRRELL
JOHN A. STERLING.

VIEWS OF MR. BRANTLEY.

Since the foregoing report was submitted to me I have not had the opportunity of investigating the many citations nor of carefully weighing and considering the various statements of opinions and conclusions appearing therein. I must therefore content myself with a brief statement of the views entertained by me.

The two questions propounded are largely, if not entirely, academical, and for the simple reason that, regardless of how they may be answered, the protection of property and of property rights is involved in all the proposed legislation to which the questions relate.

The first question, in the way it is stated, should, in my opinion, be answered in the negative. The point in this question is that it distinguishes personal rights from property rights. A personal right may involve a property right, and if the property right so involved is taken into consideration, then a court of equity has jurisdiction in a proper case to issue an injunction to protect it; but if we assume a personal right to exist that in no way involves or includes a property right, then I do not think the United States courts have jurisdiction to issue an injunction to protect such a right. The Supreme Court said in the *Sawyer* case (124 U. S., p. 210):

"The office and jurisdiction of a court of equity, unless enlarged by express statute, are limited to the protection of rights of property."

The same court, in the *Debs* case (158 U. S., p. 593), said: "There must be some interference, actual or threatened, with property or rights of a pecuniary nature" before the jurisdiction of a court of equity arises.

The second question broadly asks whether the right to do business is a property right of such character to be entitled to the protection of injunction in proper cases. This question, it seems to me, requires an answer in the affirmative. The right to do business is a right of "pecuniary value," and according to the rule laid down in the *Debs* case this makes it a property right. An employer has no right of property in his employees, but he has the right, for the protection of his capital, his business, his plant, to carry on his business without unlawful interference from employees or anyone else. I can well understand how the right to do business may necessarily involve and include the protection of actual, tangible property, and where it does, a "proper" case is made for the injunctive process of the courts.

If a man owns property the subject of barter and sale, and is denied the right of barter and sale, he is denied a right of pecuniary nature. Unlimited capital is of no value to a man wishing to engage in business if he is denied the right to do business. The man without capital but with the right to do business is better off, so far as engaging in business is concerned, than the man with the capital but no right to use it. It is well-nigh impossible, to my mind, to separate the right to do business from the business itself. It takes both to make a business. Financial loss, and perhaps bankruptcy and ruin, awaits every man who is denied the right to carry on the business in which his capital is invested.

W. G. BRANTLEY.

The Countervailing Duty on Petroleum.

SPEECH

OF

HON. JAMES S. SHERMAN,

OF NEW YORK,

IN THE HOUSE OF REPRESENTATIVES,

Tuesday, May 26, 1908.

Mr. SHERMAN said:

Mr. SPEAKER: Availing myself of the leave to print, I desire to have inserted in the Record the following illustration on the countervailing duty on petroleum:

Much criticism has been made in recent years of the fact that the "Dingley tariff law," so called, the law now in operation, places a duty on petroleum, or mineral oil, imported from countries which impose a duty on petroleum or its products exported from the United States; and the charge has been made by the Democrats that this was placed in the Dingley tariff act at the instance of or through the secret workings of the Standard Oil Company. If this be true, it merely illustrates the danger of accepting, even in a single instance, a precedent or plan established by the Democratic party, since this proposition of placing a countervailing duty on petroleum from countries which impose duties on like products from the United States first made its appearance in the Wilson tariff act of 1894. The provisions of the Wilson and Dingley acts upon this subject are given below in parallel columns.

Tariff act of August 27, 1894 (Wilson tariff act).

Petroleum, crude or refined, free: Provided, That if there be imported into the United States crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States there shall be levied, collected, and paid upon said crude petroleum or its products so imported 40 per cent ad valorem.

Tariff act of July 24, 1897 (Dingley tariff act).

Petroleum, crude or refined, free: Provided, That if there be imported into the United States crude petroleum or the products of crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States there shall in such cases be levied, paid, and collected a duty upon said crude petroleum or its products so imported equal to the duty imposed by such country.

It will be noted by a careful examination of the above that the countervailing duty proposition of the Dingley Act is precisely that of the Wilson Act, except that the Wilson Act made the rate of duty 40 per cent irrespective of the rate enforced against American petroleum, while the Dingley Act makes the rate of duty the same as that imposed upon our petroleum by the country from which the product is imported.

Clerical Services in Department of Justice.

SPEECH

OF

HON. JOHN H. STEPHENS,
OF TEXAS,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 30, 1908.

On the joint resolution (No. 197) authorizing the employment of clerical services in the Department of Justice.

Mr. STEPHENS of Texas said:

Mr. SPEAKER: I desire to call the attention of this House and the country to the fact that the Department of Justice and the Indian Bureau (in the Interior Department) seem to consider that every Western man who seeks to avail himself of the laws regulating the disposal of public (Government) or Indian lands is inherently and by practice a criminal and therefore deserves prosecution by the Government; hence the heads of these Departments have instituted many groundless prosecutions, which have resulted in immense cost to the country and great loss of time and often ruin to the party prosecuted—most of whom have been found innocent—by the courts trying them.

To more clearly illustrate the character of these prosecutions and the waste of public money thereby I will read the following letter received by me from a very reputable member of this Congress. It is as follows:

HOUSE OF REPRESENTATIVES, UNITED STATES,
Washington, January 10, 1908.

HON. JOHN H. STEPHENS,
House of Representatives.

MY DEAR SIR: I most earnestly protest against the continued high-handed, pernicious, political persecution made by certain of the Department bureaus of the Government in this city, branding many of our most honorable, upright, and law-abiding business men of Colorado as criminals.

Their only information and authority for such malicious statements are reports made to them by nonresident special agents and "prosecutors" sent to Colorado, whose accusations against innocent men are for the sole purpose of securing personal promotion in Washington and the opportunity for the governmental bureaus here to disseminate among the press throughout the country misrepresentations as to timber land and coal thieves that do not exist in Colorado.

Judge Robert E. Lewis, of the United States district court, Denver, on December 24, 26, and 30 quashed all of the indictments against some thirty of our most worthy and reputable citizens (several of whom have been engaged actively in business in Colorado for thirty years) on the ground that the Government had absolutely failed to furnish any evidence whatever against these men—a most stinging and severe rebuke by Judge Lewis, of the United States district court (an appointee of the present Administration). Active preparations were made by certain high officials in Washington for the prosecution of these cases, and who condemn honorable men of unquestioned integrity before being found guilty of any violation of the law, or even given an opportunity of defense.

Judge Lewis's decision gives universal satisfaction to all of our people in Colorado regardless of their political affiliations, and is indorsed by a united press; in fact, every newspaper in the State most heartily commends Judge Lewis's action; the truth has been vindicated.

In this connection I beg to call attention to editorial below from the Denver Republican of December 26, 1907; also editorial of December 25, 1907, written by ex-Senator T. M. Patterson, owner and editor of the Rocky Mountain News, Denver:

[Extract from the Denver Republican, Thursday, December 26, 1907.]

A RETURN TO SANITY IN LAND AFFAIRS.

By his decision quashing indictments against a number of local lumbermen, Judge Lewis, in the United States court, struck a blow for justice and sanity where it has been needed for some time. His action was a rebuke to the idea that seems to prevail in some quarters at Washington that special agents are alone able to ferret out, punish, and prevent violations of the land laws. Incidentally, it comes as a defense of the westerner from the imputation of Departmental Washington that everyone who seeks to avail himself of the laws regulating the disposal of Government lands is inherently and by practice a criminal.

No doubt Uncle Sam of himself is just as generously disposed in the matter of giving his Western lands to men who would use them as he was when his laws were drawn to regulate their disposal; but of late there has grown in the minds of some officials in Washington the idea that every man who ever filed a claim did so with malicious intent to rob the Government and thwart the Department in its duty. As a part of that suspicion comes the thought that every Western man is in the conspiracy, and that therefore the regular agents of the Government are not to be trusted in such matters. This leads to sending West to unearth gigantic frauds special agents who, having their spurs to win, proceed to find what they are sent after.

In many cases the special agent is one whose knowledge of practical affairs is confined to holding a job in Washington. Coming West and discovering that certain individuals have made money by availing themselves of the Government's liberality in land affairs, such a man leaps promptly to the conclusion that there was fraud in acquiring the lands. His philosophy can not cover the fact that the Westerner in taking advantage of the land laws as they exist may make money and still be honest; that the laws are drawn to give him that very opportunity. To him the fact of having taken up lands and made money becomes ground enough for charging fraud, and he rushes to the courts and begins action.

When the suits dismissed by Judge Lewis were brought against some of the most reputable business men of Colorado most people understood that they were the outgrowth of this excess of zeal on the part of such

special agents. Men of the highest character were forced for a time to stand under the imputation of conspiracy to defraud the Government. They courted the fullest investigation, but the cases brought were found to have so flimsy a base that the judge refused to let them be tried. In so deciding he took pains to point out to the land officials that they had failed to show wherein a single law had been violated and reminded them that it is beyond their power to determine how the Government ought to dispose of its lands and then charge the commission of crime on that theory.

The existing land laws have stood the test of time and have been a large factor in making the West. None too liberal, they are yet calculated, and rightly so, to benefit the man who avails himself of them. Men prosper from seizing the opportunities presented just as the framers of the laws intended they should. The attitude of the Government toward settlers has not changed; the laws passed by Congress stand to-day as they have stood for years. This idea of calling a man a thief because he has made his money out of land given him to use exactly for that purpose comes not from the Government, not from Congress or the Administration, but from the overzealous special agent set to find that a fraud was committed or write himself unequal to the task. Usually the men he is set to accuse have been suspected in Washington Departments before the agent has begun even to collect evidence for the courts, and he dare not fail to make good.

The decision of Judge Lewis will go a long way toward putting a stop to such practices and bring about a return to sanity in land affairs.

[Extract from the Daily News, Denver, December 25, 1907.]

GOOD MEN CLEARED.

One of the things that added to the Christmas joy of this office was the action of Judge Lewis, of the Federal court, in quashing indictments against eleven citizens of Colorado. These men were charged with conspiracy to defraud the Government, and Judge Lewis—assuredly a man not blind to his obligations to his country—has dismissed the charges in a decision which clears the indicted men of anything that could be called an offense.

It is mightily satisfactory, for among these eleven were men like Charles D. McPhee and John J. McGinnity and Alexander T. Sullenberger. All of them are men past middle life, and their lives have been spent in upbuilding the communities which have been lucky enough to own them. All of them are men against whom no suspicion of dishonesty ever breathed. All of them have doubtless suffered more from this charge than a real criminal would have suffered from conviction and imprisonment. But at least they have the satisfaction of a vindication as complete as the law can make it. And the News frankly rejoices.

Up till last winter the Government had no right of appeal in cases like the present. Last winter a bill was passed conferring on the Government the right of appeal in criminal cases where indictments were quashed by a judge, not where the facts were passed on by a jury. But this does not mean that the indicted men will have to again stand trial. The law in question was passed simply for the purpose of getting an even, standardized construction of the law from the highest court in the land. Hitherto one judge has declared the law to be this and another one has declared with equal force that the law was that, and the Government agents have been greatly puzzled by the conflicting interpretations. The Government's new right of criminal appeal insures that the law will be uniformly construed. But even if the Supreme Court should reverse Judge Lewis on this case, it will mean only a final statement of the meaning of the points of law involved. The old provision of the Constitution, that no man shall twice be placed in jeopardy of life or limb for one offense still stands and must stand forever.

Our only regret is that the good and necessary work of running down the land frauds seems so likely to cause trouble and expense to honorable and worthy men. Perhaps this is one of those faults that can not be helped, and must even be endured with what grace one may summon. Anyway, we are glad that in this case the wrong went no further and that the decision of Judge Lewis was as sweeping as it is final.

Referring to the action taken at "the last" Cabinet meeting of the year, December 31, as to the Colorado cases, the President criticised the judiciary and authorized the Attorney-General: "The Government will use every means in its power to bring about in the higher courts disapproval of the decision rendered in Colorado by Judge Lewis."

Our citizens are willing and ready to meet the issue raised by the impulsive Administration, but as to the purpose on the part of the latter I can not comprehend, unless to continue in the "limelight," and, therefore, the country will be saved—from the bureaucrats' point of view.

The unprecedented and dictatorial encroachment of the Executive against the legislative and judicial departments of the Government is almost a daily threat to the peace and prosperity of the Republic, and should be knocked on the head by the constitutional decision of the Supreme Court of the United States.

The article in the Washington Star of December 31 quotes the Commissioner of the Land Office to say: "They will call sixty to eighty violations of the land laws in Colorado to the attention of the grand jury, and some of these may involve a number of the very persons whom Judge Lewis has discharged."

This is a subterfuge bordering on the farcical, and is disseminated to the press of the country for the purpose of misleading the public as to so-called "land frauds" that do not and have not existed in Colorado.

Our citizens in Colorado have submissively and with patience submitted to these persecutions for alleged offenses, and every fair-minded citizen should join in commendation that we have in our beloved country true judges who have the courage of their convictions and believe in justice to every citizen and a real "square deal emphasized."

In conclusion I beg to say I assume the personal responsibility for statements herein made.

Yours, sincerely,

GEO. W. COOK,
Congressman at Large, Colorado.

Mr. Speaker, I am not now and never have been an apologist for criminals, but the above indictment of the present Republican Administration does not indicate that the citizens of Colorado and of other Western States are getting a square deal. Mr. Cook is a stalwart Republican, and his statements of the outrages perpetrated by this square-deal Republican Administration is certainly entitled to full faith and credit.

Mr. Speaker, I also wish to call the attention of Congress and the country to the maladministration of the affairs of the Five

Civilized Tribes in Oklahoma. The Secretary of the Interior, on page 20 of his last annual report, states that "without doubt there are persons on the rolls who are not entitled to be there, and there are persons not on the rolls whose names should be there," and so forth. The facts of the matter are as follows:

Between March 2 and March 4, 1907, the Secretary of the Interior struck from the rolls a large number of persons. The number has been fixed at 257 and at 400. The Department knows the exact number; outsiders do not. Test cases have been brought, and the supreme court of the District of Columbia and the court of appeals have held this action on the part of the Secretary to have been erroneous and unlawful.

Many of these people, in fact most of them, had contests upon lands. They were a class of persons whose citizenship was disputed by the nation, and therefore speculators had filed upon their lands. By the act of striking them from the roll all their allotments were canceled. To remove restrictions will enable the parties who have recorded allotments upon these people's lands to transfer the same to innocent holders, complicate the title, establish an equity against the people, and instead of clearing the situation, work the reverse.

In addition to these 400 who were stricken from the rolls there were a large number of persons whose cases were identical with these people whose applications had not been acted on by the Secretary. Decisions in their favor had been rendered by the Commission. They were awaiting action in the Indian Office. This number is estimated at 400, although of all classes who ought to be enrolled we understand the number is estimated by the Secretary's office to be 1,200. A decision upon the merits of the cases now pending before the Supreme Court will apply to these, and the total number can be estimated at from 600 to 1,800 persons.

Citizenship in the Choctaw-Chickasaw country is worth at least \$6,000. The amount involved is between six millions and ten millions of dollars. The United States is now asked to provide for the distribution of surplus lands, for the distribution of trust funds, and to assume the responsibilities in this entire question and to remove the restrictions upon lands which have already been allotted, many of which are now disputed.

No business men would do this; no corporation would do it. The action to take as a primary basic action is to settle who the beneficiaries are. The only possible thing to do, as the matter has gone into court, is to await the court's determination, otherwise the United States is liable, and will assume a liability of from ten to fifty millions of dollars as the result of hasty action.

If legislative action adjudicating this matter can be secured then the other could follow, but the men who ask a distribution of this money, this land, and the removal of restrictions, oppose such legislative action. Therefore, the only possible thing to do is to await the final adjudication of these matters. It is useless to say there is no merit in it, for everyone admits there are meritorious cases.

The Secretary of the Interior, in his last annual report, on page 20, states:

"Without doubt there are persons on the rolls who are not entitled to be there, and there are persons not on the rolls whose names should be there, but," etc., and he then proceeds to say that the mistakes or cases of injustice are too few to warrant a general opening of the rolls.

The Secretary of the Interior did not, presumably at the time of the writing of this report, know that these cases were in court and that the number involved could be definitely ascertained. If injustice has been done to from 500 to 1,000 persons, admittedly so, that number is large enough to demand legislative action, and this is particularly true if it be shown that there is a recording liability, either legal or equitable, against the Government of the United States for errors committed in the administration of a trust.

The report of the Secretary is therefore incomplete, because it does not touch upon that phase of the question, nor furnish complete information; but it is complete enough to admit the existence of facts worthy of investigation.

It is foolish to say that the supreme court of the District of Columbia and the court of appeals have both presumptively erred. The decision of the courts are against the presumption, and anyone who will read the petitions and argument in the case now pending in the eighth circuit court at St. Louis, Mo., entitled "Bettie Ligon et al. v. Johnston et al.," will become convinced that a serious question is raised, and that the question is serious enough to cause legislators to hesitate with regard to the enactment of any legislation affecting these titles pending the result of this litigation.

This is not intended in any way to block progress. It is not an unfortunate situation; but a man who has an interest in that land has a right to say to Congress that his land, the land in which he claims an interest, should not be sold to outside parties until his rights thereto have been determined.

Mr. Speaker, on April 7, 1908, I wrote a letter to the Department requesting the names of Indians who were, through inadvertence, omitted from the rolls of Choctaw and Chickasaw nations, my object being to secure by special act of Congress the passage of a bill naming the Indians entitled to enrollment. I had then and now pending several special bills for this purpose—other Members of Congress have several bills of this character pending before the Committee on Indian Affairs, of which I am a member, one of them, viz, the case of the Haley heirs—introduced by Mr. CARTER, of Oklahoma—has been favorably reported. If the Secretary had given me the names of the Indians shown by the records to be entitled to enrollment, the committee could have acted intelligently. But my very courteous, just, and customary request was refused, and the concluding paragraph of that refusal is as follows, viz:

It is the view of the Department and Office that Congress should take no action looking to any revision of the rolls, either by new enrollments or eliminating names from the rolls.

This statement is an assertion that the Congress of the United States is powerless to enact laws except by the consent of the Executive Departments, thus ignoring the Constitution of the United States making each department—the legislative, ex-

ecutive, and judicial—coordinate with each other, and supreme only in exercising the powers of their own department, yet here is a clear assertion of an executive officer dictating to the legislative branch what it should or should not do. Mr. Speaker, this is paternalism or bureaucracy run mad.

The letter is as follows, viz:

DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, April 13, 1908.

Hon. JOHN H. STEPHENS,
House of Representatives, Washington, D. C.

SIR: The office is in receipt of your communication of April 7, 1908, requesting that you be furnished with a list of the names of persons who were through inadvertence omitted from the approved rolls of Choctaw and Chickasaw citizens.

In reply there is inclosed a copy of a letter written by the Secretary of the Interior on February 4, 1908, to Senator CLAPP in reply to his letter of January 24 on this same subject. The Secretary and this Office have conferred at length in regard to the matter mentioned by you, and the conclusion has been reached that any publication of these names would only be preliminary to the enactment of legislation of some sort authorizing their enrollment, and that any legislation to provide for putting names upon the rolls which were omitted, although having a meritorious claim, ought also, in all fairness, to provide for the removal from the rolls of the names of persons improperly placed thereon. If any names were omitted from the rolls which should have been placed thereon it was on account of the Department not having sufficient time in which to enroll the persons, as the law required that the rolls be completed and closed on March 4, 1907, and no legislation should be enacted authorizing the enrollment of any person omitted unless such legislation also carries the power to eliminate from the rolls the names of persons not properly thereon, and to do this would be to open up the entire subject, undo practically all that has been done, and postpone indefinitely the final settlement of the tribal estates.

It is the view of the Department and Office that Congress should take no action looking to any revision of the rolls, either by new enrollments or eliminating names from the rolls.

Very respectfully,

F. E. LEUPP,
Commissioner.

DEPARTMENT OF THE INTERIOR,
Washington, February 4, 1908.

DEAR SIR: I have given very careful consideration to your letter of January 24, asking whether this Department has any suggestion to make regarding legislation to place any additional names upon the rolls of the members of the Five Civilized Tribes.

In pursuance of the act of Congress of April 26, 1906 (34 Stat., 138), which reads as follows, the rolls were closed at midnight of March 4, 1907:

"Provided, That the rolls of the tribes affected by this bill shall be fully completed on or before the 4th day of March, 1907, and the Secretary of the Interior shall have no jurisdiction to approve the enrollment of any person after said date."

I think there can be no question regarding the wisdom of Congress in enacting such legislation. Citizenship matters had been given the most thorough and careful consideration of the Department in accordance with the various laws of Congress during nearly fourteen years. Various cases were passed upon by the Commissioners, the citizenship court, and the Department. It was necessary to definitely fix a time to close the rolls; otherwise there would have been no limit to the number or character of the claims presented by the various applicants.

The act closing the rolls was likewise just to the Indians. Without doubt there are names on the rolls which ought not to be there, and there are names omitted which ought to be there, but in view of the long period during which the rolls remained open and subject to amendment, the percentage of error on either side is presumptively very small, and the property rights of all the other citizens should not be left indeterminate or subject to further legislative action because of this small percentage who now claim the right of enrollment.

The Commissioner of Indian Affairs and I have gone over very carefully the different cases of claimants who are urging special legislation, and while there are cases of seeming individual hardship, yet we are confident that only harm will come if Congress attempts to open the rolls for individual cases.

In conference with the representatives of the different nations and with the representatives from the State of Oklahoma, I have discussed this question and stated that I did not believe it wise to attempt to deal with these individual claimants, and should urge upon Congress the necessity of not opening these rolls by special act.

Very truly, yours,

JAMES RUDOLPH GARFIELD,
Secretary.

Hon. MOSES E. CLAPP,
Chairman Committee on Indian Affairs,
United States Senate.

Mr. Speaker, having been refused the names of the Indians entitled to enrollment, I desire to state frankly that a great wrong has been done these Indians by that refusal for the following reasons, viz:

1. It is true that a number of persons found by the Dawes Commission to be entitled to enrollment never had their cases passed on by the Secretary of the Interior because of the rush of final closing of the rolls or for other reason.

2. Many cases were passed on by the Commissioner of Indian Affairs and the Secretary of the Interior in the last six weeks prior to March 4, 1907, so that it was almost impossible to do justice to each case, and it is true that hundreds of cases, because of the rush of closing the rolls, never had any fair consideration given them.

3. It is also true where several hundred persons at least have been denied enrollment where decisions in later cases of the Department show that these persons denied enrollment should have been enrolled, and had their rights denied them, and the

Department has the names of all these Indians, and these names are among those withheld from me, for fear, as the letter says, that Congress will enroll them.

4. It is also true that hundreds of cases are depending upon construction of treaties involved in suits pending in court, and these should be enrolled.

5. Justice to those persons whose cases came up in the closing days demand that the rolls should be reopened for re-adjudication of all cases passed on in the last six weeks prior to the closing of the rolls.

Mr. Speaker, on April 15 I introduced the following resolution:

Whereas many bills have been introduced in the House of Representatives during the present session of Congress providing for the enrollment of certain persons of Choctaw or Chickasaw Indian blood on the finally approved rolls of the Choctaw or Chickasaw nations or tribes, prepared under the direction of the Secretary of the Interior, and which rolls are now being used as a basis for the distribution of the tribal property of said Indians; and

Whereas said bills have been referred to and are now pending before the Committee on Indian Affairs for examination and report to the House of Representatives; and

Whereas JOHN H. STEPHENS, a Member of the House of Representatives and a member of the Committee on Indian Affairs thereof, did, on the 7th day of April, in the year 1908, address a communication to the Commissioner of Indian Affairs, Francis E. Leupp, requesting the said Commissioner to furnish him a copy of a communication addressed to the Secretary of the Interior and signed by the Commissioner to the Five Civilized Tribes, under date of November 15, 1907, transmitting a list of names of persons entitled to enrollment as members of the Choctaw or Chickasaw tribes, but whose names had been omitted from the finally approved rolls thereof through inadvertence or mistake on the part of the administrative officers charged by law with the duty of preparing complete and correct rolls of said Indians; and

Whereas the said Commissioner of Indian Affairs, Francis E. Leupp, replied thereto in an official communication under date of April 13, 1908, in part, as follows: "The Office is in receipt of your communication of April 7, 1908, requesting that you be furnished with a list of the names of persons who were through inadvertence omitted from the approved rolls of Choctaw and Chickasaw citizens. * * * The Secretary and this Office have conferred at length in regard to the matter mentioned by you, and the conclusion has been reached that any publication of these names would only be preliminary to the enactment of legislation of some sort authorizing their enrollment, and that any legislation to provide for putting names upon the rolls which were omitted, although having a meritorious claim, ought also, in all fairness, to provide for the removal from the rolls of the names of persons improperly placed thereon. * * * It is the view of the Department and Office that Congress should take no action looking to the revision of any of the rolls, either by new enrollments or eliminating names from the rolls;" and

Whereas the Secretary of the Interior, James Rudolph Garfield, in his official report for the fiscal year ending June 30, 1907, on page 20, says with reference to the finally approved Choctaw and Chickasaw rolls of citizens which are now being used as a basis for the distribution of the tribal property: "Without doubt there are persons on the rolls who are not entitled to be there, and there are persons who are not on the rolls whose names should be there;" and

Whereas the failure of the administrative officers to properly administer upon this estate and to accord to all legal beneficiaries their just share of the tribal property will result in just claims against the Government amounting to millions of dollars, which the Government will be called upon to pay; and

Whereas it is necessary, in order that the House of Representatives may take intelligent action on the bills now pending, that all the facts in the possession of the administrative officers relating to the rights of persons to share in said tribal property whose names are not on said finally approved rolls be furnished the House of Representatives; and

Whereas neither the Secretary of the Interior nor the Commissioner of Indian Affairs have any lawful authority to refuse to furnish the House of Representatives or any Member thereof with a copy of the names of persons referred to by their Department in an official report in order to prevent legislation to correct the admitted mistakes and injustice committed or resulting by or from their acts as administrative officers; and

Whereas it is the duty of the administrative officers to obey and enforce the acts of Congress, and it is not their duty to instruct Congress what to do or what not to do, as they endeavor to do in the letter above referred to, the offensive language being as follows, viz: "It is the view of the Department" (meaning the Secretary of the Interior) "and Office" (meaning the Commissioner of Indian Affairs) "that Congress should take no action looking to the revision of any of the rolls, either by new enrollments or eliminating names from the rolls;" Therefore be it

Resolved, That the Secretary of the Interior be, and he is hereby, directed to transmit without delay to the House of Representatives the report of the Commissioner to the Five Civilized Tribes under date of November 15, 1907, forwarding to the Secretary of the Interior a list of names of persons of Indian blood whose names were omitted from the finally approved rolls of the Choctaw or Chickasaw nations through inadvertence or mistake or other cause on the part of administrative officers; also a list of the names of all persons who have applied to the Commission to the Five Civilized Tribes for enrollment as citizens or members of the Choctaw or Chickasaw nations or who have been before the said Commission for examination or identification who are possessed of Choctaw or Chickasaw Indian blood as shown by the official records and who have been denied enrollment by the administrative officers; also a list of names of persons who have been erroneously or fraudulently placed on said finally approved rolls, with an explanation of how said error or fraud occurred, and the name of the officer or officers who were responsible therefor.

Mr. Speaker, this resolution was pigeonholed and never reported, but I expect to push it next winter and, if possible, secure the names requested, so as to legislate on this question, the Department to the contrary notwithstanding.

Mr. Speaker, there was created by act of Congress of date July 1, 1902, a court in the Indian Territory known as the "citizenship court," and its term of office was limited to completion of its work until December 31, 1904. This court tried, or rather pretended to try, 256 citizenship cases, involving the rights of 3,484 applicants for citizenship. The value of each allotment was fixed by the court at \$4,800, thus making the value of the property involved more than \$28,000,000. The law firm of Mansfield, McMurray & Cornish had a contract with these tribes for a fee of 9 per cent of the value of the property of each Indian whose name was left off of the roll by the citizenship court; thus their fee for preventing the enrollment of each Indian was \$432. This citizenship court refused to enroll a great majority of these 3,484 claimants and it also awarded the enormous fee of \$750,000 to said lawyers as their fee, for which actions this court had been often, by citizens of Oklahoma, openly charged with official corruption; and on January 6, 1908, I offered a resolution (No. 111) in the House of Representatives, asking for information relative to the matter. The resolution is as follows, viz:

Whereas it is alleged that on the 24th day of June, 1905, a grand jury of the United States of America duly selected, summoned, impaneled, sworn, and charged to inquire fully in and for the body of the southern district of the Indian Territory in the name and by the authority of the United States of America did upon the oaths of the members thereof find, present, and charge that one D. H. Johnson, one P. S. Mosely, one George Mansfield, one J. F. McMurray, and one Melvin Cornish, and others to the grand jurors unknown, on certain days in the year 1902, within the southern district of the said Indian Territory, did unlawfully and feloniously commit the crime of conspiracy to defraud (an offense against the laws of the United States) by defrauding the Chickasaw Nation out of the sum of \$28,876.90, the exact amounts fraudulently obtained from the Chickasaw Nation and the exact times and places where and when the said fraudulent transactions occurred being set out in said indictment; and

Whereas it is alleged that on or about the 15th day of December, 1905, the Attorney-General of the United States did direct one W. B. Johnson, then United States attorney for the southern district of the Indian Territory, to dismiss, by entering a nolle prosequi in said case, the said indictment; and

Whereas it is alleged that the said W. B. Johnson refused to dismiss the said indictments as directed by the Attorney-General of the United States; and

Whereas it is alleged that the Attorney-General of the United States on or about the 15th day of January, 1905, removed the said W. B. Johnson from office, said removal being by telegraphic communication, and said removal being based upon the refusal of the said W. B. Johnson to carry out the directions of the Attorney-General of the United States; and

Whereas it is alleged that the said Attorney-General of the United States did, on or about the 15th day of January, 1905, by telegraphic communication, reinstate the said W. B. Johnson in the office of United States attorney for the southern district of the Indian Territory; and

Whereas it is alleged that the said W. B. Johnson refused and continued to refuse to dismiss the said indictment against the said persons during his term of office; and

Whereas it is alleged that on or about the 13th day of November, 1907, the Attorney-General of the United States did send a telegram to the United States attorney for the southern district of the Indian Territory, one George R. Walker, directing him to "be sure" and dismiss the said indictment against the said persons "before the Territorial courts pass out of existence and the creation of the new State;" and

Whereas it is alleged that on or about the 14th day of November, 1907, the assistant United States attorney for the southern district of the Indian Territory (the United States attorney being absent at the time), one James E. Humphrey, did cause an order to be entered upon the records of the United States court for the southern district of the Indian Territory, sitting at Ardmore, dismissing the said indictment with the notation "by the direction of the Attorney-General of the United States." Therefore be it

Resolved, That the Attorney-General of the United States be, and he is hereby, directed to transmit to the House of Representatives a true and correct copy of the said indictment, all correspondence of every kind and description that has passed between the Department and the United States attorney or attorneys and his or their assistant attorney or attorneys for the southern district of the Indian Territory, and all correspondence of every kind and description between any officer of the United States Government and any other person or persons pertaining or appertaining to said indictment.

Sec. 2. That the Attorney-General of the United States be, and he is hereby, directed to inform the House of Representatives why said indictment was dismissed and whether it is customary for the Attorney-General to interfere with the prosecution of persons against whom an indictment or indictments have been returned in the State or Federal courts of the country, and whether other indictments have been dismissed by direction of the Attorney-General within the past five years, and if so, what indictments, and the cause therefor.

Mr. Speaker, it is clearly apparent that these attorneys have received as fees and expenses from these Indians more than \$1,000,000, and by padding the expense and other accounts against these Indians they were charged with receiving large sums of money unlawfully and feloniously, as shown in the preamble to the above resolution.

Mr. Speaker, Mr. W. B. Johnson, of Ardmore, Okla., was the United States attorney representing the Government in the prosecution of this indictment against the law firm of Mansfield & Co. Mr. Johnson is an able, honest, and efficient lawyer, and believing, as I do, that these Indians had been robbed, he desired their conviction on the indictment. Some of my personal friends, men of unimpeachable character, were on the grand

jury finding this indictment. The following letter to myself from Mr. Johnson is self-explanatory:

HON. JOHN H. STEPHENS, M. C.,
Washington, D. C.

ARDMORE, OKLA., April 1, 1908.

SIR: I inclose you under separate cover the statement regarding the Mansfield, McMurray, Cornish, and others case, as requested by you, and I hope it will answer all the purposes you desire it for. All the record evidence in this case is on file here, copy of which can be had at any time, except that portion retained by the Interior Department, which, I think, is at Muskogee.

You will observe that my connection with this entire transaction was confined to the Chickasaw tribe of Indians and did not involve the Choctaw Nation, which seemed so much to confuse the officers in the Department of Justice.

I have nowhere commented upon the guilt or innocence of the defendants, because my idea was, and is, that having been indicted by a grand jury of good and lawful men, these people should have been compelled to pursue the same course as other defendants, who were without influence in Washington and not wealthy.

Col. John S. Mosby still lives in Washington and, I am sure, will talk with you freely on this subject if you will call upon him.

I inclose copy of the only questions I propounded to the grand jury and their answers. You are at liberty to use this and the other letter as you desire.

Very respectfully,

[Inclosure.]

W. B. JOHNSON.

The questions the grand jury are requested to vote on are as follows:
1. Were the warrants (five) deposited as collateral with Joplin National Bank to secure a note of Purdom and Colbert for \$4,040 recirculated after having been paid to State National Bank of Denison? If so, was there a conspiracy between Colbert and Purdom to recirculate them?

Answer. Yes.

2. Was there a conspiracy to recirculate warrants deposited as collateral with Commercial National Bank of Kansas City, Kans.? If so, who are the parties?

Answer. Yes. E. B. Henshaw, B. H. Colbert, W. T. Ward, T. A. Teel, S. M. White, Kirby Purdom.

3. Was there a conspiracy to recirculate warrants sold to Floyd Shock & Co., of St. Louis? If so, who are the parties?

Answer. Yes. William T. Ward, B. H. Colbert, Kirby Purdom.

4. Was there a conspiracy to defraud the Chickasaw Nation out of money by paying warrants more than one time? If so, who are the parties?

Answer. Yes. Kirby Purdom, W. T. Ward, B. H. Colbert.

5. Was there a conspiracy between Governor Johnson and Mansfield, McMurray & Cornish to defraud the Chickasaw government out of funds pretended to be drawn on the contingent fund by reason of an act of the Chickasaw legislature known as the "unlimited contingent fund act?"

Answer. Yes.

6. Did there exist a conspiracy in the Bank of the Chickasaw Nation to defraud stockholders and depositors by converting the resources of the bank to private purposes? If so, who are the parties?

Answer. Yes. Kirby Purdom, B. H. Colbert, W. T. Ward.

7. Were deposits received in the bank after it was known to be insolvent by its officers, with intent to defraud such depositors?

Answer. Yes. T. A. Teel, S. M. White, Kirby Purdom, E. B. Henshaw, B. H. Colbert, W. T. Ward.

8. Were the assets of the bank fraudulently used for the benefit of individuals? If so, who were they?

Answer. Yes. W. T. Ward, B. H. Colbert, Kirby Purdom.

9. Did Kirby Purdom steal warrants and recirculate them in St. Louis, Kansas City, and Joplin?

Answer. Yes.

ARDMORE, OKLA., April 1, 1908.

HON. JOHN H. STEPHENS, M. C.,
Washington, D. C.

DEAR SIR: I have your letter of the 23d ultimo, with an inclosed copy of the report of the Attorney-General in pursuance to a resolution of the Senate of March 3, 1908, with reference to the dismissal of the indictment pending in the southern district of Indian Territory against Mansfield, McMurray, Cornish, and others.

Your request that I make a statement about this entire transaction is similar to one which I refused to make in the past. My reason for not complying with your request before was that I regarded the matters of such a confidential nature that I did not feel disposed to give publicity to them unless it was first done by the Attorney-General or by his permission. Since he has complied with the resolution and given a partial statement of the affair, I can see no harm in telling you the whole matter. I had hoped that so far as I was concerned this matter was ended long ago, for my connection with it was purely official, and I ceased to hold office more than two years ago.

In order that what I shall relate hereafter shall be fully understood, I will give a preliminary statement of my connection with the Chickasaw citizenship cases. In September, 1896, I was employed by the governor of the Chickasaw Nation to accompany a commission, consisting of four Indians by blood, viz. Judge Overton Love, ex-Governor William Bird, Richard McLish, and Martin Cheadle, who were to assist the Dawes Commission in passing upon the applications for enrollment as citizens of the Chickasaw tribe of Indians, and to give such legal advice to said Commission as they might require. This employment was to last for one year. In the fall of 1897 I was again employed to represent the Chickasaw Nation in the courts of the Indian Territory in such civil matters, including appealed citizenship cases, as that nation might be interested in. This employment was to last for two years.

There were in all about 2,500 persons asking for enrollment as citizens in the Chickasaw Nation, as I now remember. All of these applications were disposed of either for or against the applicants, and when the United States court, to which many of the cases had been appealed, had finally passed upon them, there were less than 700 applicants who had been enrolled by the court and Dawes Commission whose right to citizenship was contested. Through my efforts Senator Morgan, of Alabama, had passed through Congress a bill granting the right of appeal of either party to the Supreme Court of the United States, and all those cases in which applicants had been admitted whose right to enrollment was denied by the Chickasaws were appealed to the Supreme Court. The records and names of the applicants can be obtained from the clerk of the Supreme Court and are comprised in the sixty-six cases appealed there from this court.

When the appeals had been perfected my duties in connection with said cases ceased under my written contract with the Chickasaw Indians, and the governor of the Chickasaw Nation, by reason of a special appropriation passed by the Chickasaw legislature, employed counsel in Washington of his own selection to look after these cases pending in the Supreme Court.

In the fall of 1897 I was appointed United States attorney for the southern district of Indian Territory, and again in 1902 was reappointed by President Roosevelt. In 1899 Messrs. Mansfield, McMurray & Cornish were selected as the attorneys for the Chickasaw Nation, after I had informed the governor of that nation that it would be impossible for me to longer represent them and hold my office as United States attorney. After my employment by the Indians had ceased, I assisted in every possible way Messrs. Mansfield, McMurray & Cornish in their efforts to defeat those whom the Indians thought were wrongfully upon the rolls, because my sympathies were then, and are yet, with the Indians. At their instance I represented them many times before our court, and until they were indicted in 1905 by the grand jury our relations were always cordial and friendly. In 1902 they wrote a letter to the President indorsing me for reappointment as United States attorney.

I come now to the matter you inquired about, viz: The indictment against Mansfield, McMurray & Cornish and others, charging them with conspiracy to embezzle funds belonging to the Chickasaw tribe of Indians. In May, 1905, a gentleman called at my office and introduced himself as Mr. Jenkins, of Iowa, and talked with me a few minutes, and asked if I could see him on the following day, and left. On the next day he returned, and asked for a private interview with me, and then informed me that he was an inspector from the Interior Department. He produced a great many papers and records and told me that he had some important matters which he desired to submit to our grand jury, which was then in session. When I looked over his papers I discovered that the matters he desired investigated by the grand jury incriminated our United States marshal, B. H. Colbert, and our deputy United States clerk, William T. Ward, and other prominent citizens.

The grand jury was ready to adjourn. I held a conference with Judge Townsend, and explained the matter fully to him, after which I requested Mr. Jenkins to wait about two weeks, until I could communicate with the Department of Justice. (See my letter on p. 38 of the Attorney-General's report.) I stated in my letter to the Department that I was very busy in court, and requested that some special attorney be sent from Washington to conduct this examination before the grand jury. This, however, was not my only reason for desiring an attorney from the Department of Justice. I well knew that B. H. Colbert was a personal appointee of the President, and had been a Rough Rider, and from the evidence shown me I felt that the grand jury would probably indict, and I naturally wanted some one from the Department to know the entire evidence in the case.

Col. John S. Mosby, from the Department of Justice, was sent down in compliance with my request, and showed me a special appointment made by the Attorney-General, so that he would be authorized to appear before the grand jury.

In a day or two after I was first seen by Mr. Jenkins the grand jury was adjourned to some future date—which I do not now recall, but about two weeks off—by Judge Townsend; and when some members of the grand jury found that they would be compelled to return, seven or eight of them on various excuses obtained a final discharge from the court, so that when the grand jury was reconvened it became necessary to reorganize it and procure persons to serve in their stead. I objected to Mr. Colbert selecting these additional grand jurors, but agreed that his chief deputy might do so, which was done.

The grand jury was composed then of men many of whom you know. A list of their names and occupations can be found on page 46 of the Attorney-General's report. Two or three members have been acquainted with Mr. McMurray for almost a quarter of a century, and all of them are still living in this vicinity except one, who has since died.

We began the investigation before the grand jury on Monday morning, and the evidence was produced by Mr. Jenkins and his assistant, Mr. Taylor, an expert bookkeeper, then employed by the Dawes Commission at Muskogee. The most of this evidence related to the recirculation of Chickasaw warrants by Colbert, Ward, and others, which, for your information, I will explain was that for indebtedness of the Chickasaw Nation it had issued certain warrants payable to bearer. Mr. Ward, who was the treasurer, had redeemed the same, but failed to cancel the warrants, and, as he claimed, they were stolen from him and again put in circulation. Other evidence tended to show and did show that some of the warrants were forgeries. About the second day of this investigation, while Mr. Taylor, the expert bookkeeper, was on the stand, evidence began to crop out involving Mansfield, McMurray & Cornish, Governor Johnston, and ex-Governor Moseley, so that when the grand jury had finished their investigation against Ward and others for the recirculation of the Chickasaw warrants they immediately proceeded with an investigation against Mansfield, McMurray, and others. No sooner had this begun than every influence possible was used upon the grand jury to prevent the indictment. Judge J. M. Lindsay and J. L. Simpson, of Gainesville, Tex., came to Ardmore and personally called upon some of the grand jurors—as I have since learned—and interceded for McMurray and others. Mr. McMurray was present, as were nearly all the other defendants.

An unusual thing occurred in connection with this investigation, and that was that every defendant who requested it was permitted to appear before the grand jury and testify. There was no desire on the part of anyone, so far as I know, to wrongfully indict any person, and for that reason these defendants were permitted to appear before the grand jury, which was seldom done in this country, either before or since.

I had one assistant who was a stenographer, and all the time that I could command his services I kept him in the grand-jury room to take the evidence of certain witnesses which I desired to preserve for the trial. There was no effort made to take the testimony of all the witnesses, because it was impossible for me to keep the stenographer in the grand-jury room all of the time.

On the last day of the hearing before the grand jury, which was Saturday, Mr. McMurray was called in and permitted to testify voluntarily, and, as I remember it, before he concluded his statement he said that he had some books which he would like to show to the grand jury. When asked where his books were, he said they were in South McAlester, and that he thought he could procure them that night. No reply was given to him, as I recall it, because that was a matter which the grand jury in secret session would determine for themselves. During the day Mr. J. B. Spragins, one of the members of the jury, received a telegram that his brother was dying in Mississippi and requesting his presence. After the grand jury had heard Mr. McMurray, they excluded

every person from the room except the members thereof, and the next thing I knew I was sent for and requested to prepare an indictment, which I did.

While this investigation was going on I prepared in writing certain questions and handed them to the grand jury, so that in their investigation, and at the conclusion of the evidence, they could inform me by their answers to those questions of what offense, if any, the defendants were guilty. I inclose you herewith a copy of the questions and answers. This was done because there was a vast amount of evidence, some of which tended to show one offense and some another.

Our criminal procedure and practice was the same as is used in Arkansas, put in force here by Congress. Under that practice the prosecuting attorney appears before the grand jury only to examine witnesses and to advise them as to the law. When the grand jury is to consider whether an indictment shall be returned or not, even the prosecuting attorney is not permitted to be present, nor is he permitted to give them advice as to the weight of the evidence. So that the suggestion that I had advised this grand jury to indict anyone for any offense is without the slightest foundation. The suggestion made that the grand jury was influenced by anything except pure motives is, in my judgment, puerile. Those members of the grand jury who were acquainted with the defendants were their personal friends. The other members were absolute strangers to them. Although this case was on the docket of this court for more than two years, no motion was ever filed by the defendants for a change of venue because of prejudice against them in this country, or for any other reason.

In August following I received a telegram from the Attorney-General to come to Washington and bring all the papers in the Mansfield, McMurray & Cornish cases. I immediately complied with the request, and reached there on a Saturday morning, the date I do not remember. I immediately went to the Department of Justice, and was shown to the office of Charles W. Russell. I introduced myself, told him I had come in obedience to his telegram. He asked if I had brought the papers in the case. I told him that I had and they were at the hotel. He requested that I go and bring them at once, which I did. He took the papers and told me I could return on Monday morning. On Monday morning I was present, and was then told why I had been called there; that the President had directed the Attorney-General to investigate the case, and that he, Russell, had notified Mansfield, McMurray & Cornish to be present, and that neither of them had yet arrived.

We talked over the case, and I explained to him that the stenographic report of the evidence before the grand jury was not complete; that some of the witnesses had testified whose evidence had not been taken down. I further explained to him that the records furnished by the Interior Department were in the possession of that Department, and that Mr. Taylor, the expert bookkeeper, ought to be present. I further explained to him that I thought it unwise to show this evidence, or any part of it, or to discuss the case with the defendants. His entire demeanor, as it appeared to me, was that of a friend to the defendants. This impressed me so much from his conversation, in his efforts to justify and excuse certain acts of the defendants to which his attention was directed, that during that week I wrote to Judge Townsend, who was then in Colorado, what I was informed that I was called there for; that I was told it was to be an investigation before Mr. Russell of the charges against these defendants, but that it appeared to me more like I was appearing before an attorney for the defendants.

I was kept there nine days, waiting for the defendants to come. During all of this time Mr. Russell had the papers. Finally, Mr. McMurray and Mr. Mansfield came, and we were called into the office of Mr. Russell. He asked Mr. McMurray where his books were, which it seemed he knew they were to produce. Mr. McMurray informed him that the books were in the custody of Mr. Cornish, who had kept them, and that he was then in Colorado. Mr. Russell at that time asked the defendants several questions. Mr. Mansfield disclaimed having any knowledge of the entire transaction, and stated that his part of the work had been in the office attending to the law business, and that Mr. Cornish and Mr. McMurray had had charge of the other work, and that it was useless to have him there, because he could explain nothing. At that time it was agreed that Mr. Cornish would produce the books in Washington during the month of September, and I was to be notified to be present.

In September I received another telegram from Mr. Russell similar to the first, and I again went to Washington and met Mr. Cornish, Mr. McMurray, and Mr. Cecil Lyon, of Texas. Mr. Russell again asked the defendants for their books as soon as we had met. It was then announced to Mr. Russell that they kept no books whatever and could not produce any. Mr. Russell again took up the papers that I had brought and interrogated the defendants about them. He had previously requested me to say nothing unless he asked me a question. During all this time Mr. Lyon was present. After we had concluded the papers were returned to me and I came home. On this trip I was so thoroughly convinced that Mr. Russell, although defendants produced no records, intended to exonerate them that I wrote my clerk, R. A. Howard, "If this is not a clear case of whitewash I never heard of one."

At this meeting Mr. Lawrence, an assistant to Mr. Russell, was also present, but Col. John S. Mosby, who represented the Department before the grand jury, was never called in, although in the same building, and, as he has since told me, was never asked to make any report in the case.

In October of the same year I received a letter from Mr. Russell, dated October 14, 1905, containing his recommendations in the case, which will be found on page 37 of the Attorney-General's report. I immediately, on October 20, replied to this letter, a copy of which will be found on page 38 of said report. At that time it will be observed that Mr. Russell recommended that the cases be dismissed and an apology be offered to the defendants publicly for having had them indicted. He also included in the recommendation that we apologize to a man who was not a defendant in that case, but a witness, viz, Mr. Ward, who was then under indictment in another case.

I heard nothing more after my reply above referred to until in November I received another telegram to come to Washington and bring the papers in this case. After a short delay of about one week I complied with this request, and again was called into a conference by Mr. Russell. He stated that the Attorney-General desired to see me, and in company with him I met the Attorney-General, Mr. Moody. I talked with the Attorney-General a few minutes, and assured him that I had some additional proof which I had procured after my second trip to Washington. He asked me what it was. I told him that I had the affidavits of the clerks of the United States courts at various places, and of other people, showing that the expenses charged by Mansfield,

McMurray, and Cornish, and fees charged for services in certain cases were not legitimate; that they had not rendered the services, nor had they been present. He asked me to produce those affidavits. I retired to another room, where I had the papers, and when I returned Mr. Russell was reading something to the Attorney-General, but stopped as soon as I came in. I started to open the papers, and the Attorney-General stopped me, and remarked to Mr. Russell, "Will these defendants be willing to show the district attorney their books?" Mr. Russell replied that he did not know whether they would or not. The Attorney-General said: "You go and tell them if they refuse to show Mr. Johnson their books that this prosecution will go on and this investigation cease." He said to me: "These gentlemen have shown me their books, and, so far as I am able to judge, the books appear to be correct, and, as they claim, satisfactorily explain this entire transaction." Whereupon Mr. Russell and I left the room.

Mr. Russell sent me to his room, and he went to another part of the building. In a few minutes he returned, and informed me that Mr. McMurray and Mr. Cornish had agreed, after some persuasion on his part, to show me their books, and that he had arranged a meeting for that evening in their room in the New Willard Hotel for that purpose. At the appointed hour we were all present, including Mr. Lawrence. I should also say that Mr. Lyon was in the city, having come at the request of the defendants, as he told me, from Colorado, for that purpose, but he was not present at any of the meetings. After we met in the room of the defendants I was shown their book, and carefully went over it with them and Mr. Russell, and I am frank to say that many, in fact nearly all, of the checks and items which had appeared before the grand jury were entered on those books. It looked to me at that time as if the backbone of our case was broken, and I so stated.

Subsequently, by appointment, we all reported to the Attorney-General. By this I mean Mr. Russell, Mr. Cornish, Mr. McMurray and myself were present. I told the Attorney-General what had been done, and made the suggestion that many of the items contained in those books could be verified if they were true; that the business was shown to have been transacted through the State National Bank, of Denison, Tex., and that in order to be sure I would suggest that an opportunity be given me to make such an investigation, which I thought could be concluded in the early days of December. Mr. Russell insisted that the case should be dismissed then. The Attorney-General replied that the request of the district attorney was reasonable and would be granted.

I might say, by way of parenthesis here, that before leaving the Attorney-General shook hands with the two defendants and myself and made substantially this remark: "Gentlemen, it was the duty of the district attorney to advise the grand jury to return an indictment on the evidence they had before them. He has conscientiously performed his duty and should be commended by everybody. I will further say to you that I do not approve of this way of disposing of criminal cases, and have so advised, but have been overruled. This is not the first instance where similar actions have been taken against my judgment, and my conclusion is that however innocent a man may be, he will never be able to convince the people of the fact by being discharged in this kind of a hearing." There was more of this conversation, which referred to some particular cases, which I do not think it proper to relate.

After we retired to Mr. Russell's office, I requested Mr. McMurray or Mr. Cornish to go with me to Denison, Tex., and make this examination. Each of them refused to do so. I then requested them to write a note to the president of the bank, authorizing me to make this investigation, and this was not done. Mr. Cornish seemed to be very much offended at that time because I had objected to the order of dismissal of the cases being made at that time.

I returned home and immediately wrote Governor Johnston explaining to him what had transpired and asked him to give me permission to examine his account as governor and his individual account at the State National Bank of Denison.

To this letter he never replied. Knowing that my time was limited I went to Denison, Tex., and saw the cashier of the bank referred to. He objected to my examining these accounts, which I expected him to do. I informed him that unless he did so I would have him brought before the grand jury at Ardmore on a subpoena duces tecum, commanding him to bring all of the books of the bank. He asked me if he would have his bookkeeper make out a statement of these accounts for the period requested, and swear to it, if that would satisfy me. I told him that it would, and returned home. I waited several days and having received no statement I wired him, and in a few days more I received a partial statement. I immediately wired him that he had not complied fully with my request and requested him to do so at once, and in a few days longer I received the entire report. In the meantime I noticed in the newspapers that the Attorney-General had directed a dismissal of the cases, and a statement was published similar to the one Mr. Russell had prepared in October. About the same time, to wit, on December 6, 1905, I received the following telegram from the Attorney-General:

"Dismiss the indictment of Mansfield, McMurray, Cornish, Johnston, and Moseley unless you have since your return found some reason to the contrary."

I immediately answered the telegram, stating that the information I had sought was unavoidably delayed. On December 10, 1905, the Attorney-General again wired me to send the information in at once, and on December 17, as will be found on page 6 of the Attorney-General's report, I sent him a telegram and letter, inclosing the additional information.

On December 18 I was notified by the Attorney-General by telegram that I had been removed from office, without any explanation, and about one hour later received another telegram stating that the order removing me from office had been revoked. On the same day, December 18, after receiving these two telegrams, I wired the Attorney-General as follows:

"The high esteem I entertain for the President and yourself will not permit me to embarrass either of you. If retention in office does so I tender my resignation to take effect immediately."

On December 19 I received the following telegram from him:

"Your telegram yesterday received. Your resignation is not requested."

Later on I received a letter from the Attorney-General, dated December 22, 1905, stating, in substance: "It is the desire both of the President and myself that you should continue in office until the end of your term," etc. I continued in office until the end of my term, as requested, viz, January 31, 1906.

Of course you will understand that it is impossible in a letter of this kind to recite all of the details connected with this transaction, and I have only referred to that part which would give you a general idea of what occurred.

I want now to notice a letter published in the Attorney-General's report, commencing on page 11, dated March 29, 1907, and written by George R. Walker, my successor in office. When Mr. Walker was appointed and came to Ardmore I went over the record in this case with him on two different occasions. He told me that he knew nothing about criminal law and had never tried a criminal case, and it was with great difficulty that I was able to get him to even take any interest in finding out what the record contained. I venture the assertion now that he is unable to recite a solitary fact connected with this case; that he does not know the name of a witness who was in the case. His letter, you will observe, contains many exaggerations and inconsistent statements, showing that his knowledge, if any he had, was gained from the defendants themselves. He says, on page 12, that he investigated the books in the State National Bank at Denison, Tex., and that everything squared up with the books of the defendants. The truth is he left Ardmore one morning on the Frisco train after receiving a telegram, and could not possibly have reached Denison before 11 o'clock. The same train leaves Denison at 3 o'clock, or did at that time, which brought him home. He returned the same night, accompanied by the defendant, McMurray. How any man could investigate and compare numerous transactions which occurred during a period of four or five years in two or three hours in the bank books of any bank is beyond my comprehension. It took me two or three weeks to get the statement prepared by the bank itself, after which I had to compare the statement with the information given by the defendants themselves.

The criticism made on page 13 of said report, on the grand jury and personnel thereof, would be ridiculed by every person without regard to race, color, or condition who is acquainted with the members thereof. Some of them, Mr. J. B. Spragins, Mr. W. O. Dutton, and Mr. J. A. Bivens, were formerly from your district. One of them is president of a bank and a physician by profession, another is a large dry-goods merchant, and the third one of the proprietors of two or three large hardware stores. The other members of the grand jury, especially the foreman, is a large lumber merchant and a prominent church member. I state now, without the slightest prospect of contradiction, that this grand jury was composed of sixteen men above the average, none of whose characters can be questioned in any respect. They are men who have resided here for years and who came from many States of this Union, including Tennessee, Texas, Kansas, Alabama, Nebraska, Kentucky, Illinois, and Iowa.

The statement contained in that letter reflecting upon me and my ability as a lawyer of course I do not care to notice. I will say, however, that my record as United States attorney can be seen in the office of the Attorney-General of the United States, where it will compare favorably with that of my successor. During my term of office more than 800 men were sent to the penitentiary. During his term of office less than 10 per cent of that number were sent. During the last year of his official life he, with three assistants and two clerks, and with two judges on the bench, disposed of fifty-two criminal cases by trial, thirty-three of which were acquitted.

As to whether my services were satisfactory to the Indians, I do not propose to say, and my only answer is that I am now the attorney in some important civil litigation, representing the Indian who was, at the time I represented the tribe, governor of the Chickasaw Nation.

I call your attention now to the serious part of this letter, for it is used as the basis for subsequent investigations, and finally for the dismissal of this case. It will be observed that nowhere in this letter is any of the evidence in the case discussed. As a lawyer, you know that in a charge of conspiracy to commit a felony, if the conspiracy existed among them to commit this offense, they could and would have been sent to the penitentiary, that any evidence tending to establish a conspiracy is admissible, so that all of the evidence which was submitted to the grand jury, or which could have been obtained on the trial, tending to show that these defendants, acting together, appropriated funds belonging to the Chickasaw Nation, without authority, could have been introduced, whether the indictment covered the transaction or not. Is it not remarkable that Mr. Walker, before making his voluminous recommendation in this case, did not confer with a single witness, nor a member of the grand jury, so far as I am able to learn?

His reference there to the payment of fees to Volna Johnson, a man who is not related to me, is incorrect. Volna Johnson was employed to prepare transcripts for the appeal of the cases to the Supreme Court of the United States heretofore referred to. He was a stenographer, and as such prepared all of the transcripts, and for sixty-five cases only received \$1,300, an amount at least one-third less than would have been charged by the clerk of the court had he prepared them. I had nothing in the world to do with this employment, or his payment, more than to recommend him.

If the defendants had prepared this letter in their own defense, I have no doubt that they would have been modest enough not to have claimed credit for all that Mr. Walker gives to them.

The report signed by W. S. Gregg, contained in the report of the Attorney-General, beginning on page 18, made by him in this case on May 1, 1907, contains no new information whatever. All the acts set forth by him had previously been submitted by me to the Department of Justice. His entire information seems to have been obtained from Mr. Walker and the defendants.

I am acquainted with Mr. Gregg, saw him while he was here making the investigation, but did not know his business. Not one time did he ever ask me or any member of the grand jury, or any witness, so far as I am able to learn, anything about the case. From his report it can be seen that his information was obtained from the incomplete transcript of the evidence in the district attorney's office, from the district attorney, Mr. Walker, and from the defendants.

The report made by Mr. Charles Nagel, an attorney, of St. Louis, Mo., dated June 24, 1907, beginning on page 26 of the Attorney-General's report, as he confesses in said report, amounts to nothing. He based his entire report upon the reports made by District Attorney Walker and Inspector Gregg. He confesses that he knows but little criminal law, and the report justifies him in that conclusion.

The indictments for offenses committed in Indian Territory were very simple in form; only in capital cases was the common-law form of indictment required. In other cases the Arkansas form was in force. I mention this because Mr. Nagel seems to place some stress on the form of the indictment. The defendants in this case had representing them the ablest criminal lawyers in the Southwest. No motion was ever made to quash the indictment, and none would ever have been sustained, in my judgment.

Referring again to District Attorney Walker, he states that although he was in office from February 1, 1906, until November 16, 1907, he

never found time from his official duties to investigate this case until about the time when his letter was written on March 29, 1907. During all that time courts were in session, and the case pending on the docket for trial, as well as cases against Ward, Colbert, and others, and none of them were ever called for trial by Mr. Walker. Mr. Walker's official record here consisted in his appearing in nine criminal cases during his term of office, none of which trials he conducted, and in none of those cases were the defendants convicted. His official life was so unsatisfactory to the President that although he was indorsed by a cabinet officer for reappointment when statehood came, the President refused to appoint him, because, as he stated to one of the ex-judges, Walker had failed to make good. Ignorance and impotency have ruined many good cases before.

I have not referred to the evidence in this case for obvious reasons. First, because the case has been dismissed; second, because if you desire the evidence, which is of record, you can procure a copy of same; third, because it would make this letter too long. I do, however, invite your attention to the fact that all the citizenship cases in the Chickasaw Nation were closed in 1900, and not again reopened until the creation of the citizenship court in 1903, and that at the time this firm of attorneys was employed to represent the Chickasaw Nation there were not to exceed twenty-five cases on the dockets of the courts undisposed of relating to citizenship. You will observe, however, in the Attorney-General's report, on page 41, they continued to draw money from the Chickasaw Nation, which aggregated in five years \$94,000. It is also shown that during that time they had drawn more than \$60,000 from the Choctaw Nation, and that after the citizenship cases were disposed of by the citizenship court they claimed a balance of \$80,500 due them for expenses.

If you will examine the evidence taken before the citizenship court, now on file with the Secretary of the Interior, when that court gave a hearing for the purpose of fixing the fee of these attorneys, you will find where Mr. Cornish swore that these attorneys had paid all these expenses personally, and that therefore that fact should be taken into consideration in fixing the amount of their compensation.

I hope this letter will close this matter, so far as I am concerned, for I am tired of it and disgusted with it.

Respectfully,

W. B. JOHNSON.

Mr. Speaker, it appears that the dismissal of the indictment against the firm of Mansfield & Co., was an unheard-of proceeding, and to my mind shows that this firm have powerful friends here in high official life. This matter has provoked so much discussion and suspicion of the citizenship court and its friends the attorneys for the Indians, that on March 12, 1908, the Secretary of the Interior sent to the Senate the following letter in response to a resolution on the subject. The letter is as follows:

SECRETARY'S OFFICE,
DEPARTMENT OF THE INTERIOR,
Washington, D. C., March 12, 1908.

SIR: By direction of the President, I submit this report upon the matter contained in the following Senate resolution of March 2, 1908: "That the Secretary of the Interior be, and he is hereby, directed to inform the Senate what foundation, if any, there is for the charge which appears in the CONGRESSIONAL RECORD of February 11, 1908, that certain members of the Choctaw-Chickasaw court were bribed in connection with certain decisions rendered by them, and to transmit to the Senate all correspondence, affidavits, evidence, papers, and all other information in his possession pertaining thereto; also to inform the Senate whether he has had in his possession, as alleged, certain evidence in connection with the case, and has ordered no investigation of the matter." * * *

A thorough examination of the files of the Secretary's office and the Indian Office discloses no correspondence, affidavits, evidence, papers, or other information intimating or charging that members of the Choctaw-Chickasaw citizenship court were bribed in connection with certain decisions rendered by them.

The records show the following facts:

The citizenship court was created under the act of July 1, 1902. Its jurisdiction was continued by the act of March 3, 1903, and provision made for the completion of its work on December 31, 1904. The records of the Indian Office show that the court disposed of 256 cases involving the rights of 3,487 applicants. The court completed its work and went out of existence in December, 1904, in accordance with the statute.

Early in 1903 the law firm of Mansfield, McMurray & Cornish submitted to this Department for approval a contract between it and the chief executives of the Choctaws and Chickasaws, under which contract the said firm of attorneys was to conduct litigation for these two nations in matters connected with citizenship cases. The contract provided that the compensation of the attorneys should be 9 per cent of the value of the shares of tribal property which such of said so-called "court claimants," as hereinafter defined, as may be refused allotment or distribution of tribal property would have received in the event of allotment or distribution thereof to them, whether for past or future services to this end, and for the purpose of fixing the value upon which to compute the compensation of said attorneys the value of an allotment was fixed at \$4,800. On February 20, 1903, the Indian Office placed the following indorsement on the contract and forwarded it to the Secretary for consideration:

DEPARTMENT OF THE INTERIOR,
Washington, February 20, 1903.

The within contract is hereby approved, subject to the following conditions and modifications, to wit:

First. That the compensation of said attorneys shall be 5 per cent instead of 9 per cent, as provided in said contract.

Second. The total compensation to be paid said attorneys for services rendered and required, under said contract as herein modified, shall not exceed \$250,000.

Third. That no part of said compensation shall be paid to said attorneys until the Choctaw and Chickasaw roll or rolls of all persons entitled to allotment or distribution of tribal property shall become final.

Fourth. The conditions and modifications subject to which this approval is given must be fully accepted on or before March 1, 1903, or this approval will be without effect.

W. A. JONES,
Commissioner of Indian Affairs.

On the same day it was approved in the following language:
Approved.

E. A. HITCHCOCK, *Secretary.*

Mansfield, McMurray & Cornish were required to accept in writing the modified approval of the contract. This they declined to do. Congress, by act of March 3, 1903 (32 Stat. L., 982), authorized the citizenship court to fix the compensation of said attorneys.

The compensation fixed by the court was \$750,000.

Thereafter a suit was instituted in the supreme court of the District of Columbia by a member of one of the tribes for the purpose of enjoining the payment of the fee, but the court held that it had no jurisdiction in the matter. My predecessor, Secretary Hitchcock, objected to the payment of so large a fee, believing that the maximum amount fixed by him under the form of contract which he was willing to approve, namely, \$250,000, was sufficient. He therefore submitted to the Attorney-General the question whether he was compelled to pay the amount fixed by the citizenship court. The Attorney-General on January 5, 1905, advised him that he was without authority either to refuse to issue the warrants for the amount fixed by the citizenship court or to delay the issuance of such warrants. Thereupon Secretary Hitchcock drew his warrant for the amount fixed by the court. He had no alternative; the responsibility lies with Congress, which, by the act of March 3, 1903, upset the action of the Secretary, who, on the preceding February 20, had fixed the fee at just a third of the amount which the court, as authorized by Congress, actually did fix.

I understand that at and since the time of the payment of that fee there were rumors to the effect that attorneys representing claimants whose cases were set aside by the citizenship court alleged that the firm of Mansfield, McMurray & Cornish exerted undue or improper influence over the court.

During the summer of 1907 an attorney stated to an officer of this Department that he would offer evidence regarding these rumors, and he was urged to do so. By reference to a memorandum I find that in November this attorney brought before me a Mr. Rosenwinkle, who made statements regarding alleged improper conduct on the part of the members of the firm of Mansfield, McMurray & Cornish, and Judge Foote (deceased) and Judge Adams, of the citizenship court. He, however, declined to allow his name to be used, and refused to reduce to writing, sign, or in any way substantiate his statements.

Mr. Rosenwinkle's statements were not different from the rumors to which I have above referred. As his statements were avowedly based merely upon conjecture and hearsay, I gave the matter no further consideration. He is now quoted in the public press as saying that "he had no knowledge of the truth or falsity of the charges."

I am, therefore, unable to inform the Senate what foundation, if any, there is for the charge of bribery against certain members of the Choctaw-Chickasaw court, which appeared in the CONGRESSIONAL RECORD of February 11, 1908. The records of this office disclose no foundation for it.

Very respectfully,

JAMES RUDOLPH GARFIELD,
Secretary.

THE PRESIDENT OF THE SENATE.

Mr. Speaker, the above letter of the Secretary intimates that there was no foundation in fact for the statement of Mr. Gus Rosenwinkle, and in order that the public may judge of that matter, I make a part of my remarks a statement of Mr. W. R. Blackmore, and it is as follows, viz:

In the early part of November, 1907, I went with Mr. Gus Rosenwinkle before the Secretary of the Interior at his office in Washington, and there in the presence of the Secretary, the Assistant Attorney-General, Mr. Woodruff, Mr. Chester Howe, and myself, Mr. Rosenwinkle related to the Secretary what he knew of the charges of bribery and corruption which had been made against the members of the late citizenship court, and the firm of Mansfield, McMurray & Cornish.

Mr. Rosenwinkle said in substance, that from about the time of the creation of the citizenship court until the spring of 1907, he had been employed by the firm of Mansfield, McMurray & Cornish; at first in preparing the citizenship cases for trial, and later as the trial lawyer of that firm before the Commissioner to the Five Civilized Tribes, and in doing work in their office.

Mr. Rosenwinkle informed the Secretary of the Interior that the stenographers employed by the judges of the citizenship court were also employed by Mansfield, McMurray & Cornish and were paid for whatever work they did. This was in direct violation of the law which created the court, as that act provided that they should not receive any compensation except their salaries. He also said that a large number of the opinions rendered by the citizenship court were prepared in the office of Mansfield, McMurray & Cornish; that one of the items of expenditure which that firm sought to recover against the Choctaw and Chickasaw nations was the money paid out to these stenographers of the court and that the vouchers therefor had been filed with the Department of the Interior at Washington; that the firm of Mansfield, McMurray & Cornish used money to influence the elections in the Choctaw and Chickasaw nations; that one of the judges of the citizenship court often received sums of money from that firm; that one of the members of the firm would go to the bank and get the money, inclose it in an envelope, and give it to one of their stenographers, who was a brother-in-law to both Mr. Mansfield and Mr. Cornish; that at one time, when Judge Foot was in Memphis, he wrote to Mr. Cornish and informed him that "our friend here is broke and needs \$150;" that this money was sent to him.

He stated that Judge Adams was a man in very moderate circumstances when he was appointed as judge of the citizenship court; that he knew him intimately, and that he invested no money in the Indian Territory except in a little home in South McAlester, which he sold at the time he left the Territory for practically the sum he paid for it; that immediately after the payment to Mansfield, McMurray & Cornish of the fee of \$750,000, letters came daily addressed to Mr. Cornish in the handwriting of Judge Adams; that about a month after the payment of this fee, and shortly after the return of Mr. Cornish from the coast of Florida, where he had gone from Washington after receiving the fee, he, Mr. Cornish, met Judge Adams at Memphis and went with him to Monticello; that before Mr. Cornish left he and the other members of the firm executed checks of equal amount in large denominations, aggregating about \$25,000; that afterwards Judge Adams wrote to Mr. Cornish and informed him that he was erecting a new residence at his home in North Carolina and sent him the plans; that Adams, upon his return home and after the payment of this fee, began to invest in other property at his home in North Carolina and became in a short time regarded as one of the wealthiest men in his town.

He says that Adams had a friend to whom was conveyed without consideration a one-half interest in a certain coal mine near South McAlester and belonged to McMurray; that this was to supposedly secure Adams in the payment of his portion of the fee; that the members of the citizenship court decided at first to pay Mansfield, McMurray & Cornish a fee of \$1,000,000, but that after it was ascertained that \$750,000 was about all the available cash in the Treasury of the United States to the credit of the two nations it was decided to fix the fee at that amount, the fear being entertained that if it was for more than the amount then available the Treasury warrants to be issued could not immediately be cashed and these gentlemen might never get their fee.

He stated that the brother-in-law of Mansfield and Cornish, whose name he gave and which I do not now recall, is an employee of the Government, working on the Panama Canal at this time. Mr. Rosenwinkle informed the Secretary of a great many other instances and circumstances. The Secretary of the Interior promised Mr. Rosenwinkle, Mr. Howe, and myself, that he would use the testimony of Rosenwinkle as a basis of the investigation, but promised Rosenwinkle that his name should not be used. Mr. Rosenwinkle himself dictated to these stenographers for almost two hours. This dictation was interspersed by interrogations propounded by the Secretary and Mr. Woodruff and the answers of Mr. Rosenwinkle. There was a stenographer at each side of the Secretary's desk, and both of them took down all the statements that were made by Mr. Rosenwinkle, as well as the questions of the Secretary and General Woodruff. In this procedure Mr. Rosenwinkle was designated as "Mr. X."

In the report of the Secretary of the Interior he directly violated his agreement with Mr. Rosenwinkle in using the name of Rosenwinkle and in suppressing the evidence given by Rosenwinkle.

W. R. BLACKMORE.

Power of the Speaker of the House of Representatives.

It is all right to say the people *should* rule; it is better to say "The people *shall* rule;" but it will be infinitely better when the people really do rule.

SPEECH

OF

HON. T. D. NICHOLLS,

OF PENNSYLVANIA,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 30, 1908.

Mr. NICHOLLS said:

Mr. SPEAKER: Under the general leave to print, I desire to bring to the attention of the American people a state of affairs at Washington which results, in part, in the suppression of the privileges of a free people, and threatens the very existence of representative government. The Speaker of the House of Representatives has become the ruler of the people's representatives and the censor of the legislation proposed by them. By his leave only can they enact the legislation desired by the people.

Under the present rules, as interpreted by the Speaker, he is able to prevent absolutely the passage of legislation it is proposed to originate in the House of Representatives.

At the opening of the present Congress, arguments against the adoption of the rules were made by Representatives WILLIAMS of Mississippi, Democrat; COOPER of Wisconsin, Republican; DE ARMOND of Missouri, Democrat; during which complaints were made that too much power was concentrated in the Speaker. I have culled from these arguments, and from the Speaker's remarks on the subject, such portions as are particularly pertinent to the purpose of this address:

Mr. WILLIAMS said:

Mr. Speaker, of course I have no desire to make a useless play to the galleries. I know, of course, that the resolution is going to pass, but I do not consider it consistent with the past record of this side of the House to permit it to pass without a protest. We are of the opinion, and have been for a long time, that entirely too much power is concentrated in the hands of the Speaker of the House, and without any party spirit at all, speaking only what I think is best for the country at large, believing if my party were in the majority I would still take that same view. I want to protest against the adoption of the rules in their present drastic form, without any opportunity to the Members of the House to propose amendments and without any opportunity for the House itself to pass upon proposed amendments. We will, of course, vote against the resolution.

Mr. COOPER said:

I agree with the gentleman from Mississippi, that there is altogether too much power concentrated in the Speaker of the House of Representatives. [Applause on the Democratic side.] It is more power, gentlemen, than ought to be given to any man in any government that pretends to be republican in form and democratic in spirit. [Applause on the Democratic side.] * * * We all know his power, which compels us to go into his room if we wish to ask to be recognized for unanimous consent. [Applause on the Democratic side.] We all know that we can not get a bill passed—every man on the floor does, Republican or Democrat—by unanimous consent unless the Member presenting it first goes to the private chamber of the Speaker and asks to be recognized. The Speaker does not have to give his reasons before the House for any objection he may have. He does not rise upon the floor, but in his private chamber he objects.

Mr. Speaker, one more thing. That this is too much power ever to give to one man in the House of Representatives is demonstrated by

this fact: If the Vice-President of the United States had a similar power, then the Vice-President would appoint all of the committees of the Senate. He would appoint the Committee on Rules of that body and have the sole power of recognition. So that the Speaker of the House of Representatives and the Vice-President of the United States together could agree practically to allow or not to allow legislation to come up before either Chamber.

Mr. DE ARMOND. Mr. Speaker, I listened a very short time ago, as I have no doubt the other Members of the House did, to the carefully worded and blandly sounding address from the Speaker-elect, in which, among other things, the Members of the House and the people of the country were told that here in this House is lodged the power of the people to make known their wishes and to execute their will. It sounded well; it was expressed handsomely. But a few minutes have elapsed since that performance, and now here, with time so precious that only a few minutes can be conceded to anybody to express an opinion upon the subject, it is proposed to tie and shackle the House by rules about which a good many know nothing and about which a good many others know a great deal. Talk about the people having here representation and about here the will and wish of the American people being executed, when here, at once, out of hand, blindly, without consideration, without reading, the code of rules is designed—cunningly designed—to put the Representatives in this House, the membership of it, and the mighty interests of the people of this nation in the sacred keeping of the Speaker! What is the occasion for hurry?

The SPEAKER. The Chair, the Speaker of the House, is a Member of the House the same as any other Member. Unanimous consent being asked, it would not be granted should any Member object. The usage in many Congresses in the past was that the Chair would submit the request to the House; and it is an open secret to gentlemen who have served in some of the former Congresses that the Chair, keeping track of the business of the House as the Speaker and at the same time exercising his right as a Member, would often indicate to some Member upon the floor, by messenger or otherwise, that he desired an objection to be made. The Chair has seen that frequently occur under both Democratic and Republican Speakers. The present occupant of the chair, ever since he has occupied that position, has thought the better way and the more manly and fairer way was to exercise his right as a Member to object to a request for unanimous consent. Therefore the practice has grown up that gentlemen see the Speaker, and if he has objections, then he invariably says that it is useless to recognize the Member for unanimous consent, because if nobody else objects, the Chair in his capacity as a Member of the House would object. [Applause on the Republican side.]

Addressing the House on January 24, Representative SHACKLEFORD said:

I arise once more to challenge the autocratic authority which the Speaker has asserted over the deliberations of this body. I regret that a sense of duty calls me to the performance of this task. If I shall be made to suffer some inconveniences by those in power here because of that which I now utter, I shall try to exercise the fortitude necessary to bear it. * * * If the people of the United States knew, as you know, Mr. Chairman, and as I know and as other Members know, how the voice of the people is suppressed here, the Administration now in control would be swept out of power. [Applause on the Democratic side.]

I entertain no malevolence toward the Speaker. I have for him personally the highest regard. So impressed have I been with the successful career of this wonderful man that I have adorned the walls of my home with his picture, that there may be kept constantly before my boy and the boys of my neighbors the sublime heights which may be reached by one of such inflexible purpose as has possessed this man of iron. As an individual he is most lovable. Generous, companionable, intellectual, resourceful, persistent, and, above all, courageous, he stands a giant among men. *He is the ablest and the boldest champion of aristocracy this age has produced.* * * * I hold in my hand a magazine article written by the Hon. L. White Busbey, the genial and talented private secretary to the Speaker, from which I desire to read some extracts.

He says: "The Committee on Public Buildings and Grounds prepared an omnibus bill, and three-fourths of the Members signed a request to the Speaker asking that the Rules Committee bring in a special rule for the consideration of this bill. The Speaker refused the request. The chairman of the committee pleaded and urged. * * * As a final stroke the chairman said: 'Then, Mr. Speaker, this bill is to fail by the will of one man, who is in the chair by our votes. We have no redress from this one-man power.' 'Yes; you have,' replied the Speaker, 'you have a way to pass your bill. You placed me in the chair to shoulder the responsibility of the legislation here enacted. In my view I can not assume responsibility for this bill. You can elect a new Speaker to-day and pass your bill if you can find one who will accept that responsibility, but if you leave me in the chair your bill will not become a law.'"

No doubt my constituents will be much surprised and shocked to know that their Representative is allowed to propose for the consideration of the Members of the House of Representatives only such propositions as it may please the Speaker to recognize some Member for the purpose of moving consideration of the same. Members are at times recognized by the Speaker, but not allowed to proceed until he is informed "For what purpose does the gentleman rise?" Then, if the purpose is not agreeable to the Speaker, he states: "The gentleman is not recognized for that purpose."

Do the people agree with him, and is it the general opinion of the American people that the Speaker of the House of Representatives, who is but the chairman, is entirely responsible for legislation? If so, then blame him for the failure to have an anti-injunction law enacted, to so amend the Sherman antitrust law as to exempt trade unions and farmers' organizations, to enact an income-tax law, to enact an eight-hour law for all work done for the Government, to enact a law taking the tariff off wood pulp, to enact a postal savings bank law, and for failure to pass other meritorious measures desired by the people. If this idea prevails, then a great deal of money could be saved to the people by having the laws

so changed as to provide for the election of a Speaker of the House of Representatives, but no Members, leaving him with full power to legislate as he may see fit.

I do not, however, believe that the people are willing to give full control into the hands of any one man, be he good or bad. The rule of the people is preferable to that of the best of autocrats.

There are those who praise our free government, but in their hearts and by their acts they show that they fear to allow the people to really rule. They dare not say, however, *the people shall not rule.*

It is all right to say the people *should* rule; it is better to say "The people *shall* rule;" but it will be infinitely better when the people really *do* rule.

DEFEAT OF PROPOSED ANTI-INJUNCTION LEGISLATION.

During the term of the present Speaker the laboring men of this country have sought for legislation which would prevent the further abuse of the power of injunction by Federal judges in labor disputes, this abuse having now grown to the extent that workmen have been restrained from striking and from organizing. But owing to the hostility of the Speaker and the Republican members of the Judiciary Committee, all of whom were selected by him, all anti-injunction bills have been smothered in that committee. And in their zeal to prevent the passage of such legislation they have shown a ruthless disregard for both the spirit and letter of the rules of the House.

I read from the Manual and Digest, Rules and Practices of the House of Representatives for the present Congress, page 165, Rule XXVI:

Those who take exceptions to some particulars in the bill are to be of the committee, but none who speak directly against the body of the bill; for he that would totally destroy will not amend it. (Hakew., 146; Town., col. 208; D'Ewes, 634, col. 2; Scob., 47.)

Or, as is said (5 Grey, 145):

The child is not to be put to a nurse that cares not for it. (6 Grey, 373.)

It is therefore a constant rule—

That no man is to be employed in any matter who has declared himself against it—

and when any Member who is against the bill hears himself named of its committee he ought to ask to be excused.

But, notwithstanding this rule, the records of the Committee on the Judiciary show that every anti-injunction bill introduced during the present session of Congress was referred to a subcommittee, of which the gentleman from Maine [Mr. LITTLEFIELD] was chairman, after it was known by the Speaker and the members of the committee that the gentleman was an avowed opponent of this legislation, that gentleman having already so expressed himself in public addresses. Not only had the gentleman from Maine publicly declared his opposition to such legislation, but, to quote his own words, this legislation was an issue in his campaign for reelection in 1905, and he said that he was against this legislation, and that if elected to the House he would continue to be against it. He also said that Speaker CANNON went into his district during that campaign and declared that he stood with him in his position.

Here are some quotations from an address on anti-injunction legislation delivered by the gentleman from Maine [Mr. LITTLEFIELD] before the American Founders' Associations, and which is published in American Industries for January 1, 1907:

I said in my campaign, and I thought I might as well have a perfect understanding about it, that in the beginning I stood against that legislation and that I always should stand against it. I ought to say here, before I forget it, that not until about four and a half years after this legislation had been pending was any aid of the slightest kind received in opposing this legislation. * * * During the last four and a half years the National Association of Manufacturers, largely through the instrumentality of the distinguished gentleman sitting here this evening, Mr. Marshal Cushing, its secretary, has done a great deal before that committee to hold the Republicans of that committee, with one exception, as a united front against this legislation. Now, that, in a general way, covers that bill—4445.

I said in my campaign and I say now—I said in the beginning that I was opposed to these bills, H. R. 4445 and H. R. 18752, and I oppose them now, and that if elected to the House of Representatives I should continue to oppose them.

Some time before the House adjourned Mr. Samuel Gompers and other gentlemen, representing labor organizations, visited Washington and had an interview with a gentleman by the name of JOSEPH G. CANNON [applause], Speaker of the House of Representatives, who, I may say, entertains the same views in connection with this legislation that I entertain, and ordinarily expresses them in a manner characterized by a degree of vigor and picturesque language that would require asbestos paper for its proper preservation. [Laughter and applause.] Language, really, that would not quite bear repeating in so polite an audience as this.

And I might say that I have been acting in entire harmony with that distinguished gentleman, and while I do not indulge here in the vigorous language he uses in private on this question, I heartily approve what he says.

And here are some quotations from another address on the same subject, delivered by the gentleman from Maine a short time ago before another society made up of the captains of industry, who profit by the misuse and abuse of the power of injunction:

Do you wonder now that a man that has any self-respect of his own and has the responsibility of helping formulate Federal legislation does not hesitate to say that as long as that infamous proposition remains in his charge, as the chairman of a subcommittee of three, it never will come out and start even to be come a part of a law.

As long as I remain a Member of the House, legislation like that shall never become a part of the law of the United States if I can help it.

The campaign in my district was conducted by myself practically alone, with the exception that the distinguished Speaker of the House of Representatives, the Hon. JOSEPH G. CANNON, came in my district and declared he stood with me on these propositions.

This not only shows that the Speaker knew before he appointed the gentleman from Maine as a member of the committee to which this legislation was referred that he was opposed to it, but it also suggests an understanding between the Speaker and the gentleman from Maine that this legislation would not be reported from the committee, knowing, as they did, that if it were reported and brought before the House nothing could prevent its passage. That it would pass the House if the Members were given an opportunity to vote upon it is evidenced by the following quotation from the address of the gentleman from Maine before the American Founders' Association, to which I have before referred.

I might say now that when that legislation is reported by the Judiciary Committee of the House of Representatives, it will be passed by an overwhelming majority.

It is needless to say that the plans to smother this legislation have well carried, for up to this hour every one of the many anti-injunction bills which were introduced at this session still remains in committee, and they will likely remain there and continue to go there and be smothered just so long as those in control are continued in power, and notwithstanding that the rules of the House provide that bills shall not be referred to hostile committees.

As a further evidence of the Speaker's unfriendliness toward labor legislation before the Committee on the Judiciary, it should be known that he failed to reappoint on that committee Representative PEARRE, of Maryland, who had in the last Congress and in this session presented the anti-injunction bill which is desired by the American Federation of Labor. The activity of Representative PEARRE in favor of this measure is generally cited as the cause for his removal from the Committee on the Judiciary. The one Republican actively favoring the measure was thus put out of commission.

In view of the foregoing, is it surprising that those who profit by the abuse of the power of injunction in labor disputes applaud the names of those who have so successfully opposed the passage of laws to properly restrict the issue of injunctions?

Now, the question of the abuse of injunctions is so important that the President has advised consideration of the matter by Congress, but none has been given it. Whether the claims of abuses are well founded or not, it is only fair and businesslike to let the matter come up in the House for discussion and decision. Distrust of the Government by the masses and contempt for the proceedings of Congress may be some of the results gained by pursuing a policy which indicates distrust of the people by those controlling legislation.

The President and Injunctions.

SPEECH

OF

HON. HENRY D. CLAYTON,

OF ALABAMA,

IN THE HOUSE OF REPRESENTATIVES,

Saturday, May 30, 1908.

Mr. CLAYTON said:

Mr. SPEAKER: The President has sent many messages to the Senate and House of Representatives recommending the passage of what he deemed proper and important measures. Some of his suggestions, especially the good ones, he borrowed from Democratic platforms and other Democratic sources. In many of his messages the President reiterated his former recommendations and lectured the Congress, a Republican Congress, upon their failure or refusal to carry into legislation the measures he had urged. Inasmuch as he has not within the last few days called the attention of Congress to what Congress has left undone, nor

called an extra session, with a reiteration of demands he says are imperatively needful to be molded into legislation, it may not be amiss for me to now invite attention to some of the recommendations of the President and the failure of his party, which is in control of both branches of Congress, to enact the legislation recommended by the Republican President.

On December 3, 1906, in his message to Congress the President said:

INJUNCTIONS.

In my last message I suggested the enactment of a law in connection with the issuance of injunctions, attention having been sharply drawn to the matter by the demand that the right of applying injunctions in labor cases should be wholly abolished. It is at least doubtful whether a law abolishing altogether the use of injunctions in such cases would stand the test of the courts; in which case of course the legislation would be ineffective. Moreover, I believe it would be wrong altogether to prohibit the use of injunctions. It is criminal to permit sympathy for criminals to weaken our hands in upholding the law; and if men seek to destroy life or property by mob violence there should be no impairment of the power of the courts to deal with them in the most summary and effective way possible. But so far as possible the abuse of the power should be provided against by some such law as I advocated last year.

In this matter of Injunctions there is lodged in the hands of the judiciary a necessary power which is nevertheless subject to the possibility of grave abuse. It is a power that should be exercised with extreme care and should be subject to the jealous scrutiny of all men, and condemnation should be meted out as much to the judge who fails to use it boldly when necessary as to the judge who uses it wantonly or oppressively. Of course a judge strong enough to be fit for his office will enjoin any resort to violence or intimidation, especially by conspiracy, no matter what his opinion may be of the rights of the original quarrel. There must be no hesitation in dealing with disorder. But there must likewise be no such abuse of the injunctive power as is implied in forbidding laboring men to strive for their own betterment in peaceful and lawful ways; nor must the injunction be used merely to aid some big corporation in carrying out schemes for its own aggrandizement. It must be remembered that a preliminary injunction in a labor case, if granted without adequate proof (even when authority can be found to support the conclusions of law on which it is founded), may often settle the dispute between the parties; and therefore if improperly granted may do irreparable wrong. Yet there are many judges who assume a matter-of-course granting of a preliminary injunction to be the ordinary and proper judicial disposition of such cases; and there have undoubtedly been flagrant wrongs committed by judges in connection with labor disputes even within the last few years, although I think much less often than in former years. Such judges by their unwise action immensely strengthen the hands of those who are striving entirely to do away with the power of injunction; and therefore such careless use of the injunctive process tends to threaten its very existence, for if the American people ever become convinced that this process is habitually abused, whether in matters affecting labor or in matters affecting corporations, it will be well-nigh impossible to prevent its abolition.

On December 3, 1907, the President said, in his message to Congress:

Instances of abuse in the granting of injunctions in labor disputes continue to occur, and the resentment in the minds of those who feel that their rights are being invaded and their liberty of action and of speech unwarrantably restrained continues likewise to grow. Much of the attack on the use of the process of injunction is wholly without warrant; but I am constrained to express the belief that for some of it there is warrant. This question is becoming more and more one of prime importance, and unless the courts will themselves deal with it in effective manner, it is certain ultimately to demand some form of legislative action. It would be most unfortunate for our social welfare if we should permit many honest and law-abiding citizens to feel that they had just cause for regarding our courts with hostility. I earnestly commend to the attention of the Congress this matter, so that some way may be devised which will limit the abuse of injunctions and protect those rights which from time to time it unwarrantably invades. Moreover, discontent is often expressed with the use of the process of injunction by the courts, not only in labor disputes, but where State laws are concerned. I refrain from discussion of this question as I am informed that it will soon receive the consideration of the Supreme Court.

The Federal courts must of course decide ultimately what are the respective spheres of State and Nation in connection with any law, State or National, and they must decide definitely and finally in matters affecting individual citizens, not only as to the rights and wrongs of labor but as to the rights and wrongs of capital; and the National Government must always see that the decision of the court is put into effect. The process of injunction is an essential adjunct of the court's doing its work well; and as preventive measures are always better than remedial, the wise use of this process is from every standpoint commendable. But where it is recklessly or unnecessarily used, the abuse should be censured, above all by the very men who are properly anxious to prevent any effort to shear the courts of this necessary power. The court's decision must be final; the protest is only against the conduct of individual judges in needlessly anticipating such final decision, or in the tyrannical use of what is nominally a temporary injunction to accomplish what is in fact a permanent decision.

On January 31, 1908, in a special message to Congress, the President said:

I again call your attention to the need of some action in connection with the abuse of injunctions in labor cases. As regards the rights and wrongs of labor and capital, from blacklisting to boycotting, the whole subject is covered in admirable fashion by the report of the Anthracite Coal Strike Commission, which report should serve as a chart for the guidance of both legislative and executive officers. As regards injunctions, I can do little but repeat what I have said in my last message to the Congress. Even though it were possible, I should consider it most unwise to abolish the use of the process of injunction. It is necessary in order that the courts may maintain their own dignity and in order that they may in effective manner check disorder and violence. The judge who uses it cautiously and conservatively, but who, when the need arises, uses it fearlessly, confers the greatest service upon our people, and his preeminent usefulness as a public servant should be heartily recognized. But there is no question in

my mind that it has sometimes been used heedlessly and unjustly, and that some of the injunctions issued inflict grave and occasionally irreparable wrong upon those enjoined.

It is all wrong to use the injunction to prevent the entirely proper and legitimate actions of labor organizations in their struggle for industrial betterment, or under the guise of protecting property rights unwarrantably to invade the fundamental rights of the individual. It is futile to concede, as we all do, the right and the necessity of organized effort on the part of wage-earners and yet by injunctive process to forbid peaceable action to accomplish the lawful objects for which they are organized and upon which their success depends. The fact that the punishment for the violation of an injunction must, to make the order effective, necessarily be summary and without the intervention of a jury makes its issuance in doubtful cases a dangerous practice, and in itself furnishes a reason why the process should be surrounded with safeguards to protect individuals against being enjoined from exercising their proper rights. Reasonable notice should be given the adverse party.

This matter is daily becoming of graver importance, and I can not too urgently recommend that the Congress give careful consideration to the subject. If some way of remedying the abuses is not found the feeling of indignation against them among large numbers of our citizens will tend to grow so extreme as to produce a revolt against the whole use of the process of injunction. The ultra-conservatives who object to cutting out the abuses will do well to remember that if the popular feeling does become strong many of those upon whom they rely to defend them will be the first to turn against them. Men of property can not afford to trust to anything save the spirit of justice and fair play; for those very public men who, while it is to their interest, defend all the abuses committed by capital and pose as the champions of conservatism, will, the moment they think their interest changes, take the lead in just such a matter as this and pander to what they esteem popular feeling by endeavoring, for instance, effectively to destroy the power of the courts in matters of injunctions; and will even seek to render nugatory the power to punish for contempt, upon which power the very existence of the orderly administration of justice depends.

In a special message to Congress March 25, 1908, the President said:

I call your attention to certain measures as to which I think there should be action by the Congress before the close of the present session. There is ample time for their consideration. As regards most if not all of the matters, bills have been introduced into one or the other of the two Houses, and it is not too much to hope that action will be taken one way or the other on these bills at the present session. In my message at the opening of the present session, and, indeed, in various messages to previous Congresses, I have repeatedly suggested action on most of these measures.

Child labor should be prohibited throughout the nation. At least a model child-labor bill should be passed for the District of Columbia. It is unfortunate that in the one place solely dependent upon Congress for its legislation there should be no law whatever to protect children by forbidding or regulating their labor.

I renew my recommendation for the immediate reenactment of an employers' liability law, drawn to conform to the recent decision of the Supreme Court. Within the limits indicated by the court, the law should be made thorough and comprehensive, and the protection it affords should embrace every class of employee to which the power of the Congress can extend.

In addition to a liability law protecting the employees of common carriers, the Government should show its good faith by enacting a further law giving compensation to its own employees for injury or death incurred in its service. It is a reproach to us as a nation that in both Federal and State legislation we have afforded less protection to public and private employees than any other industrial country of the world.

I also urge that action be taken along the line of the recommendations I have already made concerning injunctions in labor disputes. No temporary restraining order should be issued by any court without notice; and the petition for a permanent injunction upon which such temporary restraining order has been issued should be heard by the court issuing the same within a reasonable time—say, not to exceed a week or thereabouts from the date when the order was issued. It is worth considering whether it would not give greater popular confidence in the impartiality of sentences for contempt if it was required that the issue should be decided by another judge than the one issuing the injunction, except where the contempt is committed in the presence of the court, or in other case of urgency.

On April 27, 1908, in a special message to Congress, the President said:

Ample appropriation should be made to enable the Interstate Commerce Commission to carry out the very important feature of the Hepburn law which gives to the Commission supervision and control over the accounting system of the railways. Failure to provide means which will enable the Commission to examine the books of the railways would amount to an attack on the law at its most vital point, and would benefit as nothing else could benefit, those railways which are corruptly or incompetently managed. Forest reserves should be established throughout the Appalachian Mountain region wherever it can be shown that they will have a direct and real connection with the conservation and improvement of navigable rivers.

There seems, however, much doubt about two of the measures I have recommended—the measure to do away with abuse of the power of injunction and the measure or group of measures to strengthen and render both more efficient and more wise the control by the National Government over the great corporations doing an interstate business.

First, as to the power of injunction and of punishment for contempt. In contempt cases, save where immediate action is imperative, the trial should be before another judge. As regards injunctions, some such legislation as that I have previously recommended should be enacted. They are blind who fail to realize the extreme bitterness caused among large bodies of worthy citizens by the use that has been repeatedly made of the power of injunction in labor disputes. Those in whose judgment we have most right to trust are of the opinion that while much of the complaint against the use of the injunction is unwarranted, yet that it is unquestionably true that in a number of cases this power has been used to the grave injury of the rights of laboring men. I ask that it be limited in some such way as that I have already pointed out in my previous messages, for the very reason that I do not wish to see an embittered effort made to destroy it. It is unwise

stubbornly to refuse to provide against a repetition of the abuses which have caused the present unrest. In a democracy like ours it is idle to expect permanently to thwart the determination of the great body of our citizens. It may be and often is the highest duty of a court, a legislature, or an executive, to resist and defy a gust of popular passion; and most certainly no public servant, whatever may be the consequences to himself, should yield to what he thinks wrong. But in a question which is emphatically one of public policy, the policy which the public demands is sure in the end to be adopted; and a persistent refusal to grant to a large portion of our people what is right is only too apt in the end to result in causing such irritation that when the right is obtained it is obtained in the course of a movement so ill-considered and violent as to be accompanied by much that is wrong. The process of injunction in labor disputes, as well as where State laws are involved, should be used sparingly, and only when there is the clearest necessity for it; but it is one so necessary to the efficient performance of duty by the court on behalf of the nation that it is in the highest degree to be regretted that it should be liable to reckless use; for this reckless use tends to make honest men desire so to hamper its execution as to destroy its usefulness.

I desire to now have printed in the RECORD the bill H. R. 69, introduced December 2, 1907, by the able lawyer and distinguished gentleman, Mr. HENRY of Texas. It is as follows:

A bill (H. R. 69) in relation to restraining orders and injunctions.

Be it enacted, etc., That no writ of injunction or temporary restraining order shall be granted in any case without reasonable previous notice to the adverse party, or his attorney, of the time and place of moving for the same: *Provided,* That nothing herein contained shall be held to authorize the issuance of any injunction or restraining order not now authorized by law.

I also desire to have printed in the RECORD the bill H. R. 76, introduced December 2, 1907, by Mr. HENRY of Texas.

A bill (H. R. 76) in relation to contempts of court.

Be it enacted, etc., That contempts of court committed during the sitting of the court, or of a judge at chambers, in its or his presence or so near thereto as to obstruct the administration of justice, are direct contempts. All others are indirect contempts.

SEC. 2. That a direct contempt may be punished summarily without written accusation against the person arraigned, but if the court shall adjudge him guilty thereof a judgment shall be entered of record in which shall be specified the conduct constituting such contempt, with a statement of whatever defense or extenuation the accused offered thereto and the sentence of the court thereon.

SEC. 3. That upon the return of an officer on process or an affidavit duly filed, showing any person guilty of indirect contempt, a writ of attachment or other lawful process may issue and such person be arrested and brought before the court; and thereupon a written accusation, setting forth clearly and succinctly the facts alleged to constitute such contempt, shall be filed and the accused required to answer the same, by an order which shall fix the time therefor, and also the time and place for hearing the matter; and the court may, on proper showing, extend the time so as to give the accused a reasonable opportunity to purge himself of such contempt. After the answer of the accused, or if he refuse or fail to answer, the court may proceed at the time so fixed to hear and determine such accusation upon such testimony as shall be produced. If the accused answers, the trial shall proceed upon testimony produced as in criminal cases, and the accused shall be entitled to be confronted with the witnesses against him; but such trial shall be by the court, or, upon application of the accused, a trial by jury shall be had as in any criminal case. If the accused be found guilty judgment shall be entered accordingly, prescribing the punishment.

SEC. 4. That the testimony taken on the trial of any accusation of indirect contempt may be preserved by bill of exceptions, and any judgment of conviction therefor may be reviewed upon direct appeal to, or by writ of error from, the Supreme Court, and affirmed, reversed, or modified, as justice may require. Upon allowance of an appeal or writ of error, execution of the judgment shall be stayed, upon the giving of such bond as may be required by the court or a judge thereof, or by any justice of the Supreme Court.

SEC. 5. That the provisions of this act shall apply to all proceedings for contempt in all courts of the United States except the Supreme Court.

Mr. Speaker, it will be remembered that a bill similar to the one just last above printed passed the Senate some years ago, when such able lawyers as David Bennett Hill, of New York, George F. Hoar, of Massachusetts, and John T. Morgan, of Alabama, were members of that body. Many of the laboring people of the country believe that these two measures, or either one of them, would largely lessen or prevent the injury sometimes done them by the injudicious and improper use of restraining orders and injunctions issued by United States courts and judges.

A number of the laboring people have advocated, before the Senate and House committees having jurisdiction thereof, the passage of the following bill, H. R. 94, introduced December 2, 1907, by Mr. PEARRE, of Maryland:

A bill (H. R. 94) to regulate the issuance of restraining orders and injunctions and procedure thereon and to limit the meaning of "conspiracy" in certain cases.

Be it enacted, etc., That no restraining order or injunction shall be granted by any court of the United States, or a judge or the judges thereof, in any case between an employer and an employee, or between employers and employees, or between employees, or between persons employed to labor and persons seeking employment as laborers, or between persons seeking employment as laborers, or involving or growing out of a dispute concerning terms or conditions of employment, unless necessary to prevent irreparable injury to property or to a property right of the party making the application, for which injury there is no adequate remedy at law, and such property or property right must be particularly described in the application, which must be in writing and sworn to by the applicant or by his, her, or its agent or attorney. And for

the purposes of this act no right to continue the relation of employer and employee or to assume or create such relation with any particular person or persons, or at all, or to carry on business of any particular kind, or at any particular place, or at all, shall be construed, held, considered, or treated as property or as constituting a property right.

Sec. 2. That in cases arising in the courts of the United States or coming before said courts, or before any judge or the judges thereof, no agreement between two or more persons concerning the terms or conditions of employment of labor, or the assumption or creation or termination of any relation between employer and employee, or concerning any act or thing to be done or not to be done with reference to or involving or growing out of a labor dispute, shall constitute a conspiracy or other criminal offense or be punished or prosecuted as such unless the act or thing agreed to be done or not to be done would be unlawful if done by a single individual, nor shall the entering into or the carrying out of any such agreement be restrained or enjoined unless such act or thing agreed to be done would be subject to be restrained or enjoined under the provisions, limitations, and definition contained in the first section of this act.

Sec. 3. That all acts and parts of acts in conflict with the provisions of this act are hereby repealed.

On January 20, 1908, Mr. CAMPBELL, of Kansas, introduced H. R. 14377, which is as follows:

A bill (H. R. 14377) providing for notice before issuance of certain orders and writs by the courts and judges of the United States courts.

Be it enacted, etc., That courts and judges of the United States circuit and district courts shall cause reasonable notice to be served upon the parties to a suit in equity to be adversely affected by any extraordinary writ asked for at the inception or during the progress of a cause before such writ is issued.

Sec. 2. That all acts and parts of acts inconsistent with the provisions of this act are hereby repealed.

On February 14, 1908, Mr. RODENBERG, of Illinois, introduced the bill H. R. 17137, which is as follows:

A bill (H. R. 17137) relating to conspiracies, restraining orders, injunctions, and contempt of court, and for other purposes.

Be it enacted, etc., That no agreement, combination, or contract by or between two or more persons to do or procure to be done, or not to do or procure not to be done, any act in contemplation or furtherance of any labor dispute between employers and employees in the District of Columbia or in any Territory of the United States, or between employers and employees who may be engaged in trade or commerce between the several States, or between any Territory and another, or between any Territory or Territories and any State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, shall be deemed criminal, nor shall those engaged therein be indictable or otherwise punishable for the crime of conspiracy, if such act committed by one person would not be actionable, nor shall such agreement, combination, or contract be considered as in restraint of trade or commerce. Nothing in this section shall exempt from punishment, otherwise than as herein excepted, any persons guilty of conspiracy for which punishment is now provided by any act of Congress, but such act of Congress shall, as to the agreements, combinations, and contracts heretofore referred to, be construed as if this section were therein contained.

Sec. 2. That no restraining order or injunction shall be granted by any court created by Congress, or any judge or judges of such court, restraining or enjoining any person or persons from entering into or carrying out any agreement, combination, or contract referred to in section 1 of this act.

Sec. 3. That no restraining order or injunction shall be granted by any court created by Congress, or any judge or judges of such court, in any case without reasonable previous notice to the adverse party, or his attorney, of the time and place of moving for the same.

Sec. 4. That contempt of court are divided into two classes, direct and indirect, and shall be proceeded against only as hereinafter prescribed. That contempts committed during the sitting of the court or of a judge at chambers, in its or his presence or so near thereto as to obstruct the administration of justice, are direct contempts. All others are indirect contempts. That a direct contempt may be punished summarily without written accusation against the person arraigned, but if the court shall adjudge him guilty thereof a judgment shall be entered of record in which shall be specified the conduct constituting such contempt, with a statement of whatever defense or extenuation the accused offered thereto and the sentence of the court thereon. That upon the return of an officer on process or an affidavit duly filed, showing any person guilty of indirect contempt, a writ of attachment or other lawful process may issue and such person be arrested and brought before the court; and thereupon a written accusation setting forth succinctly and clearly the facts alleged to constitute such contempt shall be filed and the accused required to answer the same, by an order which shall fix the time therefor, and also the time and place for hearing the matter; and the court may, on proper showing, extend the time so as to give the accused a reasonable opportunity to purge himself of such contempt. But pending the trial, and until the final trial and termination of the case, the accused shall be admitted to bail in such sum as the court may direct. After the answer of the accused, or if he refuse or fail to answer, the court may proceed at the time so fixed to hear and determine such accusation upon such testimony as shall be produced. If the accused answer, the trial shall proceed upon testimony produced as in criminal cases, and the accused shall be entitled to be confronted with the witnesses against him; but such trial shall be by the court, or upon application of the accused, a trial by jury shall be had as in any criminal case. If the accused be found guilty, judgment shall be entered accordingly, prescribing the punishment. That the testimony taken on the trial of any accusation of indirect contempt may be preserved by bill of exceptions, and any judgment of conviction therefor may be reviewed upon direct appeal to or by writ of error from the Supreme Court, and affirmed, reversed, or modified as justice may require. Upon allowance of an appeal or writ of error execution of the judgment shall be stayed upon the giving of such bond as may be required by the court or a judge thereof, or by any justice of the Supreme Court. That the provisions of this section shall apply to all proceedings for contempt in all courts of the United States except the Supreme Court; but this section shall not affect any proceedings for contempt pending at the time of the passage thereof.

On April 20 (calendar day, April 28), 1908, Mr. STERLING, of Illinois, introduced the following bill:

A bill (H. R. 21358) to regulate the granting of restraining orders and injunctions.

Be it enacted, etc., That in no case shall an injunction or a temporary restraining order be granted by the court in term, or by a judge thereof in vacation, except upon due notice to the opposite party, and after hearing, which may be ex parte, if the adverse party does not appear at the time and place mentioned in said notice: *Provided, however,* That if it shall be made to appear to the court or judge that delay will result in irreparable injury to property or property rights the court or judge shall so certify on the back of the application, and in such case the injunction or restraining order may issue without notice.

Sec. 2. That when such an injunction or restraining order is granted, the court in term, or the judge thereof in vacation, at the time of granting the same, shall fix a time, not more than five days from the time said order or injunction is granted, for final hearing of the case.

And on April 20, calendar day April 28, 1908, Mr. PAYNE, of New York, the distinguished leader of the Republican party in the House of Representatives, introduced the bill H. R. 21359, which is as follows:

A bill (H. R. 21359) relating to injunctions.

Be it enacted, etc., That hereafter no preliminary injunction or restraining order shall be granted by any judge or court without notice to the party sought to be enjoined or restrained, unless it shall appear to the satisfaction of the court or judge to whom application for such injunction or restraining order is made that the immediate issue of such injunction or restraining order is necessary to prevent irreparable damage.

Sec. 2. That any such injunction or restraining order granted shall contain a rule on the opposite party to show cause within five days why such injunction or restraining order shall not be continued.

Mr. Speaker, this last bill is, of course, only a pretense, and intended to muddy the waters. Other bills, modifying, limiting, or regulating the issuance of injunctions or restraining orders by the inferior United States courts and judges, have been introduced by the following-named gentlemen:

H. R. 4044, December 3, 1907, by Mr. SHEPPARD, Democrat, Texas.

H. R. 9195, December 16, 1907, by Mr. HENRY, Democrat, Texas.

H. R. 14275, January 17, 1908, by Mr. HACKNEY, Democrat, Missouri.

H. R. 14372, January 17, 1908, by Mr. HACKNEY, Democrat, Missouri.

H. R. 14377, January 20, 1908, by Mr. CAMPBELL, Republican, Kansas.

H. R. 15944, January 31, 1908, by Mr. THOMAS, Democrat, North Carolina.

H. R. 16622, February 7, 1908, by Mr. GARRETT, Democrat, Tennessee.

H. R. 16758, February 10, 1908, by Mr. PATTERSON, Democrat, South Carolina.

H. R. 20823, April 6, 1908 (calendar day April 14), by Mr. SMALL, Democrat, North Carolina.

H. R. 21454, April 20, 1908 (calendar day April 30), by Mr. CHANEY, Republican, Indiana.

H. R. 21489, April 20, 1908 (calendar day May 1), by Mr. HUBBARD, Republican, West Virginia.

H. R. 21498, April 20, 1908 (calendar day May 1), by Mr. FOSTER, Republican, Indiana.

H. R. 21539, April 20, 1908 (calendar day May 2), by Messrs. BOYD and MADISON, Republicans.

H. R. 21629, May 4, 1908 (calendar day May 6), by Mr. BONYNGE, Republican, Colorado.

H. R. 22010, May 12, 1908 (calendar day May 19), by Mr. HEPBURN, Republican, Iowa.

Mr. Speaker, none of these bills which I have inserted in the RECORD suggest anything very novel in the legislative and judicial history of the United States. The act of March 2, 1793, provided:

Nor shall such writ (injunction) be granted in any case without reasonable previous notice to the adverse party, or his attorney, of the time and place of moving for the same.

I here insert in the RECORD part of the act of March 2, 1793, which is as follows:

Sec. 5. *And be it further enacted,* That writs of ne exeat and of injunction may be granted by any judge of the Supreme Court in cases where they might be granted by the Supreme or a circuit court; (a) but no writ of ne exeat shall be granted unless a suit in equity be commenced, and satisfactory proof shall be made to the court or judge granting the same that the defendant designs quickly to depart from the United States; nor shall a writ of injunction be granted to stay proceedings in any court of a State; nor shall such writ be granted in any case without reasonable previous notice to the adverse party, or his attorney, of the time and place of moving for the same.

Note the part of this good and sound, if old, law about "staying proceedings in a State court" and about "reasonable previous notice" in all cases. Under this law our courts worked for seventy-odd years.

And I also insert in the RECORD section 719 of the Revised Statutes, which shows the requirements of previous notice to have been omitted:

Sec. 19. (Injunctions.) Writs of injunction may be granted by any justice of the Supreme Court in cases where they might be granted by the Supreme Court; and by any judge of a circuit court in cases where they might be granted by such court. But no justice of the Supreme Court shall hear or allow any application for an injunction or restraining order in any cause pending in the circuit to which he is allotted, elsewhere than within such circuit, or at such place outside of the same as the parties may stipulate in writing, except when it can not be heard by the circuit judge of the circuit or the district judge of the district. And an injunction shall not be issued by a district judge, as one of the judges of a circuit court, in any case where a party has had a reasonable time to apply to the circuit court for the writ; nor shall any injunction so issued by a district judge continue longer than to the circuit court next ensuing, unless so ordered by the circuit court.

Note that the old law of 1793 was repealed by omission by codifiers in revising the Statutes, and never openly, bravely, or expressly. Yet we are charged as "revolutionists" because we wish virtually to reenact it.

Mr. Speaker, the justice of the demand for legislation on the lines suggested in the bills which I have printed in the RECORD and those referred to is manifest. The President has repeatedly called attention to the importance of such legislation, particularly so during the present Congress. Even Secretary Taft has acknowledged that such legislation ought to be had. He said, in a letter to Ohio labor organizations, not very long ago, that he favored such legislation. I quote what he said:

Second. You ask me what I think of a provision that no restraining order or injunction shall issue except after notice to the defendant and a hearing is had. This was the rule under the Federal statutes for many years, but it was subsequently repealed. In the classes of cases to which you refer I do not see any objection to the reenactment of that Federal statute. Indeed, I have taken occasion to say in public speeches that the power to issue injunctions ex parte has given rise to certain abuses and injustices to the laborers engaged in a peaceful strike. Men leave employment on a strike, counsel for the employer applies to a judge, and presents an affidavit averring fear of threatened violence and making such a case of the ex parte statement that the judge feels called upon to issue a temporary restraining order. The temporary restraining order is served upon all the strikers; they are not lawyers; their fears are aroused by the process with which they are not acquainted, and, although their purpose may have been entirely lawful, their common determination to carry through the strike is weakened by an order which they have never had an opportunity to question, and which is calculated to discourage their proceeding in their original purpose. To avoid this injustice, I believe, as I have already said, that the Federal statute might well be made what it was originally, requiring notice and a hearing before an injunction issues.

Third. In answer to your third question it would seem that it is unnecessary to impose any limitation as to the time for a final hearing if, before an injunction can issue at all, notice and hearing must be given. The third question is relevant and proper only should the power of issuing ex parte injunctions be retained in the court. In such cases I should think it eminently proper that the statute should require the court issuing an ex parte injunction to give the person against whom the injunction was issued an opportunity to have a hearing thereof within a very short space of time, not to exceed, I should say, three or four days.

Mr. Speaker, notwithstanding the President's recommendations, the opinion of many Republicans and Democrats, as evidenced by the bills introduced into Congress by them, by the letter of Secretary Taft, by the numerous petitions of labor organizations, and by the testimony gathered in the committee hearings of Congress, this Republican Congress, which has been in session since the first Monday in December last, and can remain in session until December next, has determinedly failed and refused to enact any law on this important subject—has turned a deaf ear to all the urgent demands and has done nothing.

The failure to do anything to meet just demands on this question is in keeping with the general inactivity and shifty evasions of this Republican Congress, which has been too cowardly to meet squarely any issue of acute public interest.

The Washington Post of May 21, 1908, said:

INJUNCTION TALK FAILS—REPUBLICANS OBLIGED TO ADJOURN CONFERENCE—WILL DEBATE AGAIN TO-NIGHT—LITTLEFIELD OPPOSES NEW LEGISLATION, QUOTING LETTER FROM REPRESENTATIVE TOWNSEND THAT PRESENT LAWS WORK NO HARDSHIP—FRIENDS OF CHANGE DESIRE IT MOSTLY AS A PARTY MEASURE.

After three hours of debate on the proposition for an anti-injunction law, the House Republican conference adjourned last night without having reached any decision, to meet again to-night at 8 o'clock to still further discuss the matter.

Friends of the anti-injunction bills declared, after last night's meeting, that undoubtedly the Republicans would decide upon some measure to remedy alleged abuses due to injunction laws on the statute books, but they were not sure that a straight law would be advocated. In fact, it was pretty well conceded that a measure similar to the Payne bill, which will leave the laws practically as they are, would be the outcome of the conference. It was admitted that an anti-injunction measure would not stand a ghost of a show in the Senate at this session.

PROVOKES SPIRITED DISCUSSION.

Nearly all anti-injunction bills introduced at this session and now reposing in the Judiciary Committee unreported were brought to the attention of the conference and more than a dozen amendments were tentatively offered. The discussion was at times spirited, but no dispositions. Representatives LITTLEFIELD, of Maine; JENKINS, of Wisconsin, and PARKER, of New Jersey, argued against any legislation; HUBBARD, of Iowa; TOWNSEND, of Michigan; MADISON, of Kansas, and STEELING, of Illinois, took the opposite side.

BEYOND THE POWER OF CONGRESS.

Mr. LITTLEFIELD said that any attempt to restrain the power of the court with reference to the question of notice and hearing as to the time during which a restraining order should remain in effect would, in his judgment, be beyond the power of Congress; that there was no occasion for legislation on the ground that the courts had abused the power to issue writs of injunction; that the official reports showed that in the last five years only 328 injunctions had been issued, twenty of these only being in labor cases, and five of those were issued after notice and hearing.

There was nothing in the books, he said, to show that the court in any instance had exceeded or improperly exercised its power. He stated that within the last week or so the American Federation of Labor had filed with him twenty-three different injunctions, covering a period from 1893 up to date, but had filed no criticism in connection with any, and that only one of them appeared to have been modified by the court—the Jenkins injunction, issued in 1893, and that was modified in only one particular.

TOWNSEND FAVORS WRITS.

Bearing upon this point he read an extract from a letter written by Representative TOWNSEND, of Michigan, as follows: "After looking over the history of this writ in the United States I have been unable to find a single case where it has been issued improperly."

Representative TOWNSEND and other advocates of legislation for restriction of the courts in the matter of restraining orders or injunctions strongly urged action. Their argument, simmered down, amounted to nothing more or less than the contention that some people demanded it and that it should be done on the ground of political expediency.

RECOGNIZES PRESENT PRACTICES.

The Payne bill, which is expected to prove the ultimate compromise on this question, merely accords statutory recognition of the present practices of the Federal courts. The Hepburn bill differs from it in a number of particulars. It provides that no injunction or restraining order shall be granted in any case without reasonable previous notice to the adverse parties or such of them as may be found within the jurisdiction of the court, and after hearing, which hearing may be ex parte if the adverse party does not appear at the time and place mentioned in the notice of the court.

It provides further that, if it shall clearly appear to the satisfaction of the court that irreparable injury is imminent in case notice be given, or in case of delay until notice can be given, and that the application for an injunction has not been unduly delayed, a judge may grant a restraining order, which order shall state the time for dispensing with notice, and shall fix a time not exceeding five days thereafter.

MUST GIVE BOND FOR INJUNCTION.

There is also a provision in the Hepburn bill that no injunction or restraining order shall take effect until the party applying for it shall give bond in such penalty as may be prescribed in the order, and conditioned to pay all such costs as may be awarded against the person obtaining the order or injunction and also such damages as shall be incurred or sustained by the person enjoined or restrained in case such order or injunction be dissolved or such order expire without a preliminary injunction being granted.

If the second conference shall decide to-night that a bill should be passed, a measure will be reported by the Committee on the Judiciary. That committee adjourned yesterday, subject to the call of its chairman, Representative JENKINS, of Wisconsin, who is opposed to anti-injunction legislation.

The Washington Post of May 22, 1908, published the following:

INJUNCTION BILLS DEAD—CONFERENCE OF REPUBLICANS ADJOURN WITHOUT ACTION—CANNON ATTACKS GOMPERS—SPEAKER OF HOUSE ASSAILS LABOR LEADER AT CONFERENCE—VOTE ON MOTION TO DISCONTINUE FURTHER CONSIDERATION OF THE LEGISLATION DEMANDED BY PRESIDENT ROOSEVELT WAS 75 TO 63.

There will be no legislation changing the injunction laws at this session of Congress. This was decided by the House Republican conference held last night for the purpose of thrashing out this matter. The conference after three hours' debate, adjourned sine die by a vote of 75 to 63, and, so far as the House is concerned, the matter is a dead issue for this session. It was admitted that such a measure would not meet with approval in the Senate at this time.

While the vote taken by the House Republicans amounted, in the final analysis, to a vote against any anti-injunction legislation at this session, it also showed the fact that no agreement could be reached upon any of the measures under consideration. A number of the members of the conference favored all of the bills, from the Hepburn measure to the Payne bill, but a sufficient number of them could not agree upon any one of these propositions.

During the debate the House Chamber was excessively hot, and Representative FASSETT, of New York, fainted from the effects of the heat. He was taken to the lobby and quickly resuscitated. He went back to the conference and stayed to the end.

FIRST VOTE TAKEN.

Three votes were necessary to reach an adjournment, and the first, taken early, upon a motion by Representative FASSETT, showed sixty-nine Members opposed to adjourning without deciding upon some measure, and sixty-eight in favor of an immediate adjournment.

Later, Representative TAWNEY, of Minnesota, moved a final decision be deferred until to-night. This was lost by a vote of sixty-four to sixty-two. The discussion was resumed, and, in the meantime, a hurry call was sent to absent Members. Representative SHERMAN then made the sine die motion, which was carried.

In the course of the conference Speaker CANNON made a severe attack on Samuel Gompers, president of the American Federation of Labor, one of the most ardent supporters of the bill. The argument of the opponents of the proposed legislation was that it was dangerous to the interests of the country.

Representatives TOWNSEND, of Michigan, and ESCH, of Wisconsin, talked in favor of anti-injunction legislation, as well as a number of others, but their effort proved in vain.

The failure of the conference to adopt an anti-injunction measure clears the way still more for an early adjournment of Congress. Had the Republicans decided upon such a measure and passed it through the House and a fight had been made on it in the Senate, considerable time would have been needed to finally dispose of it.

Mr. Speaker, from this record we may be justified in concluding that some in high official places have been attempting to

play politics with the laboring people. Strong and insistent utterances were indulged in in their behalf, and then, when favorable action could have been had, nothing was said by the President. So far as we know, he was silent when the Republicans were holding three separate caucuses to consider the advisability of passing such legislation; and when the Republican Members of the House of Representatives resolved not to pass any such legislation, although fifty-one Republican Members of the House agreed to support it, the President said nothing. It would seem that he either desired no action or else he preferred to have it fail rather than to have it passed by the cooperation of the Democratic Representatives with the fifty-one Republican Representatives who favored such legislation.

INJUNCTIONS AGAINST OPERATION OF STATE LAWS.

Mr. Speaker, I here insert in the RECORD the following excerpt from the proceedings of the National Association of Attorneys-General of the United States:

THE NATIONAL ASSOCIATION OF ATTORNEYS-GENERAL OF THE UNITED STATES.

On August 12, 1907, there was held in the city of St. Louis a meeting of the attorneys-general of Indiana, Ohio, Illinois, Kansas, Mississippi, Tennessee, Texas, and Missouri for the purpose of considering the advisability of calling a general convention of the attorneys-general of the United States for the discussion of questions of mutual interest, and to arrange for such measure of cooperation in litigation of public interest as might be advisable or practicable.

In accordance with the decision had at this meeting, a call was issued by Charles T. Cates, Jr., attorney-general of Tennessee; F. S. Jackson, attorney-general of Kansas; James Bingham, attorney-general of Indiana; Herbert S. Hadley, attorney-general of Missouri; R. V. Davidson, attorney-general of Texas; R. V. Fletcher, attorney-general of Mississippi; Wade H. Ellis, attorney-general of Ohio, and W. H. Stead, attorney-general of Illinois, for a meeting of the attorneys-general of the United States at St. Louis on September 30, 1907.

At this meeting there were present:

Alexander M. Garber, attorney-general, Alabama.
William H. Dickson, attorney-general, Colorado.
James Bingham, attorney-general, Indiana.
F. S. Jackson, attorney-general, Kansas.
Dana Malone, attorney-general, Massachusetts.
Edward T. Young, attorney-general, Minnesota.
R. V. Fletcher, attorney-general, Mississippi.
W. T. Thompson, attorney-general, Nebraska.
Wade H. Ellis, attorney-general, Ohio.
S. W. Clark, attorney-general, South Dakota.
R. V. Davidson, attorney-general, Texas.
Herbert S. Hadley, attorney-general, Missouri.
Russell Jackson, assistant attorney-general, Wisconsin.
J. T. Dempsey, assistant attorney-general, Illinois.
P. W. Dougherty, assistant attorney-general, South Dakota.
George T. Simpson, assistant attorney-general, Minnesota.
Jewel P. Lightfoot, assistant attorney-general, Texas.
James S. Dawson, assistant attorney-general, Kansas.
N. T. Gentry, assistant attorney-general, Missouri.
Rush C. Lake, assistant attorney-general, Missouri.

The attorneys-general of a number of other States signified that they were in sympathy with the object of the meeting, and expressed regret that prior engagements and press of official duties prevented their attendance.

The papers included in this publication were read and discussed, and are here published, in accordance with the direction of the association.

By unanimous vote it was decided to effect a permanent organization under the name of "The National Association of Attorneys-General of the United States," and the following officers were elected for the ensuing year:

President, Hon. Herbert S. Hadley, Missouri.
Vice-president, Hon. Dana Malone, Massachusetts.
Secretary and treasurer, Hon. William H. Dickson, Colorado.
The following members were selected by the president as the executive committee of the association:
Hon. R. V. Davidson, Texas.
Hon. F. S. Jackson, Kansas.
Hon. James Bingham, Indiana.

On motion of Attorney-General Davidson, of Texas, a committee was appointed to draft a scheme of antitrust legislation, in order that the same might be submitted to the attorneys-general of the several States, and by them recommended to the legislative departments for enactment. The committee selected was as follows:

Hon. R. V. Davidson, Texas.
Hon. Wade H. Ellis, Ohio.
Hon. F. S. Jackson, Kansas.
Hon. S. W. Clark, South Dakota.
Hon. R. V. Fletcher, Mississippi.

On motion of Attorney-General Edward T. Young, of Minnesota, a committee was appointed to submit a resolution expressive of the sense of those present as to the enactment of a law by Congress by which threatened conflicts between State and Federal authorities arising out of injunctions against the enforcement of State laws by United States circuit courts could be avoided. This committee, composed of Attorney-General Edward T. Young, Minnesota; Attorney-General Dana Malone, Massachusetts; Attorney-General A. M. Garber, Alabama; Attorney-General William T. Thompson, Nebraska; and Attorney-General Herbert S. Hadley, Missouri, submitted the following resolution, which was unanimously adopted:

"Resolved by the convention of attorneys-general of the several States here assembled, That we earnestly recommend to the favorable consideration of the President and the Congress of the United States the enactment of a Federal law providing that no circuit court of the United States or any judge exercising the powers of such circuit judge shall have the jurisdiction in any case brought to restrain any officer of a State or any administrative board of a State from instituting in a State court any suit or any other appropriate proceedings to enforce the laws of such State or to enforce any order made by such administrative board; but allowing any person or corporation asserting in any such action in a State court any right arising under the Constitution or any law of the United States to have the decision of the highest

court of the State reviewed by the Supreme Court of the United States, as now provided by law. We also recommend that suits in Federal courts instituted by persons interested in corporations to restrain such corporations from obeying the law of the State in which they are doing business be prohibited."

A motion was carried to the effect that the secretary of the association be notified by the members thereof of the institution of any anti-trust proceedings, in order that such information might be in turn furnished to any member of the association by the secretary.

The selection of the time and place for the holding of the next meeting of the association was referred to the officers and executive committee of the association, and while no definite action was taken in reference thereto, it was the expression of those present that the meeting be held in the month of August, 1908, in the city of Denver.

Mr. Speaker, on December 12, 1907, Mr. CLAYTON, of Alabama, introduced in the House the bill H. R. 7636, which is as follows:

A bill (H. R. 7636) to limit the authority of circuit and district courts and circuit and district judges in granting injunctions and restraining orders.

Be it enacted, etc., That hereafter it shall be unlawful for any circuit or district court of the United States or any circuit or district judge of the United States to issue any injunction or order prohibiting or restraining the execution of any State law in all cases except where final trial has been had and final judgment or final decree has been rendered declaring such State law to be in violation of the Constitution, laws, or treaties of the United States.

SEC. 2. That hereafter it shall be unlawful for any circuit or district court or any circuit or district judge of the United States to issue any injunction or restraining order prohibiting or restraining any State officers or any persons from executing any State law in all cases except where final trial has been had and final judgment or final decree has been rendered declaring such State law to be in violation of the Constitution, laws, or treaties of the United States.

The Senate passed the following bill (S. 3732), which was, on April 17, 1908 (Calendar day, April 18), referred in the House of Representatives to the Committee on the Judiciary:

An act (S. 3732) regulating injunctions and the practice of the district and circuit courts of the United States.

Be it enacted, etc., That no temporary or interlocutory injunction, or temporary restraining order, or decree suspending or restraining the enforcement, operation, or execution of any statute of any State by restraining the action of any officer of such State in the enforcement or execution of such statute shall be issued or granted by any circuit or district court of the United States or by any judge or justice thereof upon the ground of unconstitutionality of the statute, unless the application for the same shall be presented to a circuit judge and shall be heard and determined, upon issue made and proof taken by affidavit or otherwise, by three judges, of whom two shall be circuit judges, and the third may be either a circuit or a district judge, and unless a majority of said three judges shall concur in granting such application. Whenever such application, as aforesaid, is presented to a circuit judge he shall immediately call to his assistance, to hear and determine the application, one circuit judge and one district judge or another circuit judge. Said application shall not be heard and determined until five days' notice of the hearing has been given to the governor and attorney-general of the State and such other persons as may be defendants in the suit: *Provided*, That if a majority of said judges are of the opinion, at the time notice of said hearing is given as aforesaid, that irreparable loss and damage would result to the applicant unless a temporary restraining order, pending the period of the required notice, is granted, a majority of said judges may grant such order, but the same shall only remain in force until the hearing and determination of the application, upon due notice as aforesaid, has taken place. That an appeal may be taken directly to the Supreme Court of the United States from any order or decree granting or denying, after notice and hearing, a temporary or interlocutory injunction or restraining order in such case; and the hearing of such appeal shall take precedence over all other cases except those of a similar character and criminal cases.

Mr. Speaker, the far-reaching effect of the decision of the Supreme Court in what is known as the "Minnesota case" is so well understood by the public that comment here is scarcely necessary. In connection with the bills H. R. 7636 and S. 3732 I desire to submit the following letters:

OFFICE OF ATTORNEY-GENERAL,
Topeka, Kans., February 4, 1908.

DEAR SIR: Your letter of February 1, inclosing copy of House bill 7636, is received. I find on examination that it is in conformity with the resolution passed by the Association of Attorneys-General mentioned in your letter. I therefore give it my recommendation and sincerely hope that you may succeed in securing the passage of the law.

Very truly, yours,

F. S. JACKSON, Attorney-General.

HON. H. D. CLAYTON,
Washington, D. C.

OFFICE OF ATTORNEY-GENERAL,
Lincoln, Nebr., February 5, 1908.

HON. HENRY D. CLAYTON,
Washington, D. C.

DEAR SIR: Your letter of February 1 received, also copy of your bill limiting the jurisdiction of Federal courts in the matter of the issuance of temporary injunctions.

I have carefully examined your bill and am disposed to think it may be too sweeping to pass the Congress. If you would be unable to secure the passage of a measure of this character, it may be you could secure the passage of the bill so amended as to prevent Federal courts from granting temporary injunctions restraining the law officers of the States from commencing actions in State courts to enforce the provisions of State statutes.

To my mind the greatest infringement on rights of the States is that Federal courts have authority, or at least have assumed, to grant injunctions restraining prosecuting attorneys and attorneys-general from going into the courts of the States to enforce the statutes enacted by

the legislatures of the States and thereby effectively enjoin the States. By this method it seems to me the inhibition of the eleventh amendment to the Federal Constitution is circumvented.

Wishing you success in your undertaking, I am,
Very truly, yours,

W. T. THOMPSON,
Attorney-General.

STATE OF MISSOURI,
LEGAL DEPARTMENT,
Jefferson City, Mo., February 5, 1908.

Hon. HENRY D. CLAYTON,
House of Representatives, Washington, D. C.

DEAR SIR: I beg to acknowledge receipt of your letter of February 1, inclosing copy of House bill No. 7636, with a request for my opinion concerning the same. I think that this bill if enacted into a law would tend to accomplish the result of carrying out the purpose and intent of the people of the United States in the adoption of the eleventh amendment. It was certainly never the intention of the people of that time that it should be within the power of a United States circuit court to suspend by injunction the operation of State laws. Such a situation would have been abhorrent to their ideas of State sovereignty. While I think it is within the power of Congress to enact a law denying the United States circuit courts jurisdiction to enjoin State officers from enforcing State laws, yet, as there is a difference of opinion among leading lawyers upon this question, I think that it is the most advisable course to secure the passage of your bill.

Very truly, yours,

HERBERT S. HADLEY.

OFFICE OF THE ATTORNEY-GENERAL,
Columbus, Ohio, February 5, 1908.

Hon. H. D. CLAYTON,
Committee on the Judiciary,
House of Representatives, Washington, D. C.

DEAR SIR: I have given careful consideration to your letter of February 1, and also the bill you inclose, to limit the authority of the United States circuit and district courts and judges in granting injunctions and restraining orders. The bill seems to meet the complaint made by the attorneys-general. I did not personally take part, however, in the study of this question, having given attention to other subjects at the meeting of the attorneys-general, and I suggest that Attorney-General Young, of Minnesota, will be better prepared to discuss the questions involved.

Thanking you very much for the courtesy of your letter, I am,
Very truly, yours,

WADE H. ELLIS.

ATTORNEY-GENERAL'S OFFICE,
Jackson, Miss., February 5, 1908.

Hon. H. D. CLAYTON, M. C., Washington, D. C.

MY DEAR SIR: I have your valued favor of the 1st instant, in regard to a bill which you have introduced for the purpose of prohibiting Federal courts from interfering by injunction with the efforts of State officers to enforce State statutes. I have examined this measure with some care and give it my unqualified approval. In my judgment no more important measure could be enacted.

It was suggested at the session of the Association of Attorneys-General, in conference in St. Louis last summer, that a measure such as you have proposed would go far toward avoiding unfortunate conflicts constantly arising between the State and Federal judiciary.

I trust that you will be able to secure the passage of the bill.

Yours, very truly,

R. V. FLETCHER, Attorney-General.

OFFICE OF THE ATTORNEY-GENERAL,
St. Paul, Minn., February 5, 1908.

Hon. H. D. CLAYTON,
House of Representatives, Washington, D. C.

MY DEAR SIR: I am in receipt of your favor of February 1, inclosing copy of H. R. 7636, the same being a bill to limit the authority of circuit and district courts, and as soon as I can find time will write you more at length in relation thereto.

Yours, truly,

GEORGE T. SIMPSON.

OFFICE OF ATTORNEY-GENERAL,
Redfield, S. Dak., February 7, 1908.

Hon. HENRY D. CLAYTON,
House of Representatives, Washington, D. C.

DEAR SIR: I have your favor of the 1st instant, inclosing copy of bill introduced by you, H. R. 7636. I am in entire sympathy with legislation of this character and, from a hasty consideration of the bill, it seems to me that it would be effective to accomplish the desired end. I hope that you may be successful in your effort. I have not talked this matter over with our Members of Congress, but I hope that they may give their approval to some measure of this character.

Yours, very truly,

S. W. CLARK.

OFFICE OF ATTORNEY-GENERAL,
Topeka, Kans., February 8, 1908.

Hon. HENRY D. CLAYTON,
House of Representatives, Washington, D. C.

DEAR SIR: I am in receipt of your favor of February 1 inclosing a copy of H. R. 7636, being a bill to limit the authority of circuit and district courts and circuit and district judges in granting injunctions and restraining orders.

I beg to say that the purposes of this bill have my hearty indorsement. I have had no experience in preparing bills to be introduced or considered by the National Congress, but if this were a proposed act for the Kansas legislature, I would say that it was defective in this: That while the issuance of such injunctions is made unlawful, no punishment or penalty is prescribed for the violation of the provisions of the act. Of course, if this bill is enacted into law, it will be generally obeyed by the Federal judges, but for that matter the spirit of the eleventh amendment of the United States Constitution has been generally obeyed without this bill, and it is on account of the usurpations and lawless practices of certain Federal judges that such a bill as H. R. 7636 has become necessary, and, according to my line of rea-

soning, a Federal judge who will violate the spirit of the eleventh amendment by issuing an injunction against an attorney-general or a county attorney to restrain him from commencing a suit in the name of the State to enforce the State law, will not hesitate to violate H. R. 7636 when there are no penalties. I am not unaware that there is a general penalty of impeachment and removal from office for official misfeasance, but such a penalty is so remote and shadowy that it is not worthy of consideration.

I inclose you a clipping from the Kansas City Times, which covers part of the remarks which I had occasion to make in a public address some days ago.

I remain, sir, with sincere respect,
Yours, very truly,

JOHN S. DAWSON,
Assistant Attorney-General.

[Inclosure.]

One of the gravest and most regrettable situations has arisen in the last year or two where the hands of State officers have been stayed in the execution of State laws by judges of inferior Federal courts. A notable case, or series of cases, may be pointed out in Missouri, where the State legislature enacted a maximum freight-rate law three years ago and a Federal district judge of that State issued a "temporary" injunction against the State officers who were charged with its enforcement, and that was the end of the freight-rate law.

Somewhere it appears that the fathers of 1787 or the fathers of 1868 slipped a joker into the Federal Constitution which has just come to light and which clothes an inferior Federal judge with the veto power over State laws. It is no answer to say that the State laws are often unwise or unfair or unconstitutional. Of course they frequently are. Lawmakers are not constitutional lawyers. Let that be decided on the final submission of the case. Let such objections be made in the regular course of the particular case before the court, and there are no law books nor other sources of legal lore accessible to judges of the lowest Federal courts which are denied to the great and deservedly honored supreme courts of the several States.

Moreover, there is above these the Supreme Court of the United States where unconstitutional decrees may be corrected. I have neither opportunity nor wish nor talents to serve in the national Congress—I'd have a row with the Speaker before I was there forty-eight hours—but the seats of some who are there would sit just as firmly if they would examine with care and prayer and meditation whether or not the statutes made in pursuance of the fourteenth amendment have been given a construction which leaves free scope for the use and operation of the wise and necessary provisions of the eleventh amendment, which guarantee that a State shall not be sued without its consent.

I am aware that this subject is only serious at this time among those who have something to do with the enforcement of State laws, but we are going to hear more of it before long if the correction of corporate misdoings is not merely a passing fad. Suppose this legislature should pass a number of strong laws against foreign corporations doing business in Kansas and make it the duty of the attorney-general to enforce them. If the power of the Federal district court, or of any court, high or low, to enjoin the attorney-general from instituting suits to compel obedience to the law be conceded, how easily an attorney-general can shirk his duty. It would never be difficult to find some person who would make the affidavit necessary to secure a "temporary" injunction from a Federal court, and the attorney-general's ready excuse for non-performance of his duty would be, "I was ready and willing to enforce the law, but I was enjoined from doing it by the court."

If any court desires to continue in the esteem and affection of the people, the use of an injunction as a mere substitute for the veto power will be shunned and avoided.

DEPARTMENT OF THE ATTORNEY-GENERAL,
Boston, February 11, 1908.

H. D. CLAYTON, Esq.,
House of Representatives, Washington, D. C.

DEAR SIR: I have your letter in reference to H. R. 7636, a bill to limit the authority of circuit and district court judges, etc. I have not had time to carefully consider the whole bill, but think it merits the careful consideration of the Committee on the Judiciary. A committee was appointed by the attorneys-general of the United States at St. Louis in reference to the matter, from whom you will probably hear.

Very truly, yours,

DANA MALONE, Attorney-General.

OFFICE OF THE ATTORNEY-GENERAL,
St. Paul, February 17, 1908.

Hon. H. D. CLAYTON,
House of Representatives, Washington, D. C.

DEAR SIR: I have your recent favor relating to H. R. 7636, introduced by you, relating to the jurisdiction of the district and circuit courts of the United States in cases where the enforcement of State laws is sought to be prevented.

I think your bill would fully cover all cases where the enforcement of a State law is involved, but as now worded it would not be broad enough, it seem to me, to cover the case of orders made by State railway commissions. Most of the injunction suits against State officers are brought to prevent the enforcement of orders made by administrative boards with reference to railroad rates. The fixing of rates by commissions is a far safer and more reasonable process than is the fixing of such rates by an act of the legislature. These boards, exercising delegated legislative powers, can make investigations and try the questions of fact, that ought to be determined in advance, as to the reasonableness of rates much more perfectly than can a legislative committee or the legislature itself. It seems to me, therefore, that when railroad rates are fixed by authority of the State through the instrumentality of a commission the order made by the commission fixing such rates ought to have the same protection as a State law, and the enforcement of such an order in the proper tribunals of the State ought not to be preventable by means of a Federal injunction any more than the enforcement of a statute. In all cases, so far as I know, such administrative orders can be enforced only by mandatory proceedings brought in the proper courts having general common-law jurisdiction, and in such proceedings the carrier may interpose its defense and have the question of the reasonableness of the rate tried as effectually and far more speedily than in the Federal courts.

In all such cases, if the rate is confiscatory, and for that reason in violation of the fourteenth amendment to the Federal Constitution, the carrier can always obtain relief by writ of error from the highest court of the State, and have the matter reviewed by the United States Supreme Court. This course of procedure is an ample protection, and

It would leave the administration of the order in the hands of the State tribunal until a decision should be rendered by the highest court of the State. This is the procedure pointed out in the case of *Fitts v. McGhee* (172 U. S.), and in many other cases decided by the Federal Supreme Court.

It would be a great step in the direction of restoring harmony between the two sovereignties, and would in no manner interfere with the rights of any carrier if your bill could be made to apply as well to the administrative orders that I have referred to as to cases arising under statute.

I have a case pending in the Federal Supreme Court—in which we hope to obtain a decision when the court resumes its sittings on the 24th—which involves the right of the Federal court to restrain a State officer from enforcing a State law.

I believe no greater benefit could be conferred on all of the great interests affected than to have such a measure as yours become a law.

Yours, truly,

E. T. YOUNG, Attorney-General.

DELL RAPIDS, S. DAK., February 17, 1908.

HON. HENRY D. CLAYTON,
Washington, D. C.

DEAR SIR: I received in due course your letter of the 1st instant inclosing House bill No. 7636, which has for its object the limiting of the jurisdiction of the United States circuit and district courts and circuit and district judges to issue temporary restraining orders and temporary injunctions against the execution of any State laws.

I assume that the object in sending this bill to the different attorneys-general throughout the United States is to obtain their opinion as to what a law of this kind should provide.

There are two methods of executing the laws of a State, one through the office of the attorney-general and another through administrative boards, such for instance as the board of railroad commissioners of the State of South Dakota. In the case of legislative rate bills such as were passed in Minnesota and Missouri, and, if I remember rightly, also in your State, this act, were it permitted to become a law, would render some assistance, but in those States where no legislative-rate bill has been passed and authority has been conferred upon administrative boards, such as our board of railroad commissioners, to make schedules of maximum rates for the transportation of both passengers and freight, there is nothing in this law which would prevent a United States court or a United States judge from enjoining the administrative board.

On the 20th day of last September, after a protracted hearing, the board of railroad commissioners of this State issued an order fixing the rate and fare of charges for the transportation of passengers within this State, including ordinary baggage not exceeding 150 pounds, at 2½ cents per passenger per mile. When the attorney-general and the writer returned from St. Louis, where we had been attending the convention of the attorneys-general of the United States on the 30th of September and the 1st day of October, we found in Sioux Falls a number of railroad attorneys preparing bills of complaint, temporary restraining orders, etc., in eight actions to enjoin the board of railroad commissioners and the attorney-general from putting into effect this 2½-cent rate. Now, it can not be said that the order of these administrative boards are State laws, and consequently the bill before me would not prevent a United States court or judge from enjoining the administrative board from putting into effect its schedules of passenger rates.

I am certainly in favor of permitting railroads and all corporations to have their day in court just the same as any other litigant, but I am unalterably opposed to the exercise of jurisdiction by United States courts in actions brought against State officers to enjoin such State officers from the performance of their duties under State laws. A great many of the States, and in fact all of the States, have administrative boards of one kind or another, with power to regulate common carriers and other public utilities. The members of these boards are State officers, and perform their duties under the law as they understand it should be performed, and I am unalterably opposed to the theory that a United States court has jurisdiction to enjoin such a board from the exercise of its discretion in the performance of its duty. I believe that all jurisdiction should be withdrawn from United States courts over suits in which State officers are made parties defendant for the purpose of enjoining them from putting into effect any of their orders. If the railroad companies or other owners of public utilities believe that the acts of the board are unconstitutional, and that their orders, if put into effect, will be confiscatory, then they have a complete remedy in the State courts. If the trial courts of the State find adversely to them they have a right to appeal then to the supreme court of the State, and if the supreme court of the State decide against them then they have a right to have the entire record reviewed by the highest court of the land, the Supreme Court of the United States.

The members of these administrative boards selected in the different States are selected by the people because they have confidence in their ability to serve all of the people, including the owners of public utilities, fearlessly and impartially. One of the reasons why nonresidents and foreign corporations do not wish to try cases involving property rights in the State courts is that in such actions they do not wish the decision to be influenced by local prejudice. Of course this argument can only have application to jury trials where the people in the immediate vicinity may be so prejudiced as to render it doubtful whether a nonresident can have a fair and impartial trial. In all of the cases, however, where the question is as to whether or not the orders of these administrative boards are confiscatory, and where injunctions are sought for the purpose of restraining State officers from the performance of their duties as they understand them under the statute, and from putting into effect orders and rates made by them, the trials are to the court and not to a jury, as they are all equity cases, and consequently the plea of local prejudice does not avail.

I hope that at no very distant day Congress will pass an act withdrawing from United States courts jurisdiction of all suits brought against State officers. There is no question whatever but that the judges of our State courts are just as fearless in the administration of justice as are the judges of the United States courts, and the exercise of jurisdiction by the United States courts and judges in these actions creates an unnecessary friction between the State and Federal governments.

I am firmly of the opinion that the regulation of public utilities under our present system can be better accomplished by withdrawing from the United States circuit and district courts and judges jurisdiction in this class of cases, and in writing this I do not mean or intend any reflection, even the slightest, upon our United States district judge, who is eminently able, honest, and fearless in the administration of justice.

Very respectfully,

P. W. DOUGHERTY,
Special Assistant Attorney-General.

Address of Edward T. Young, attorney-general of Minnesota, before the National Association of Attorneys-General, held at St. Louis, Mo., September 30 and October 1, 1907, on the subject of conflict between State and Federal courts.

In order to understand the jurisdiction of the State and Federal courts it will be necessary to examine the relation and character of the two sovereignties.

Our Government is unique and not easy to understand, because it is carried on under a dual instead of a single system. We have a Federal Government and State governments, each independent of the other, and each intended to be supreme in its sphere. The American States were evolved by natural growth directly from and were the legitimate and immediate successors of the English colonies. By what might be called a process of inheritance, the people of the several States succeeded to all of the powers exercised on this continent by the English Government prior to the severance of the tie between it and the colonies. Immediately after the Declaration of Independence the people of each colony formed a State government and endowed it with power to carry on all ordinary functions of government, through the instrumentality of a legislature, executive officers, and a system of courts having general common law and equity jurisdiction administered in accordance with the rules prevailing in the common law courts and the high court of chancery of England, respectively. The American States can, therefore, trace their governmental lineage back to the foundations of English civilization. But their environments, as well as their aspirations, made necessary a form of government which would enable the citizens of the several States to work out their destiny as one people.

There had been several attempts at federation between the colonies prior to the Revolution, and they had done much toward the accomplishment of their independence under the imperfect organization of the Continental Congress. In order to strengthen this unity during the Revolution the Articles of Confederation were prepared and adopted, but the government so formed was entirely inefficient for the reason that it lacked the power of self-maintenance and had neither courts nor executive officers to enforce its laws.

It was apparent that no Federal Government could successfully administer the affairs of a general character which were necessary to the public welfare unless it was endowed with exclusive power over such subjects, coupled with the power to raise the necessary revenues for its own maintenance and to enforce its mandates through its own tribunals. In order to form such a government it was necessary that the people should withdraw from their several States some of the powers theretofore delegated to them, and should redelegate those powers to the General Government. This alteration by the people of the fundamental form of their government was possible, because of the principle first established here, that the essence of sovereignty is in the people, and that the creation of government is merely the delegation of such of the powers of sovereignty as are necessary for the administration of public affairs. In American politics the people are omnipotent, and the organized government is merely the administrative agent of the people; it has only such powers as it receives by grant from the body politic, and has no original or inherent authority. Political equality is preserved by the joint tenancy of the people in the sovereignty. From that equality it follows that no individual can, as a matter of right, exercise any authority over anyone else. Authority can only be acquired officially, as a trust, or, in other words, only by the consent of the governed.

In American political philosophy the feudal idea of hereditary inequalities which runs through the jurisprudence of England, as well as the favorite doctrine of Sir William Blackstone, that there can be no government without a superior, was entirely repudiated.

The framers of the Federal Constitution no doubt fully realized the delicacy of the undertaking and the dangers of conflict between the States and the new Federal sovereignty. It was apparent that in each State both governments, with the two sets of tribunals necessary for making, construing, and executing these laws, should operate at the same time upon the same persons and property. But with the States already in existence the task of the fathers was to form a National Government without destroying the States.

In framing the Federal Government under these circumstances, it was necessary to enumerate in the Constitution the powers granted to it, and to prohibit the exercise of those powers by the States. The powers not granted by the Federal Constitution were to remain in the States as before. This purpose was afterwards formally stated in the tenth amendment in these words:

"The powers not delegated to the United States by the Constitution, or prohibited by it to the States, are reserved to the States respectively, or to the people."

There is a marked difference in character between the Federal Constitution and the constitutions of the respective States. When the original States were organized it was the understanding of the people that the Government so brought into being possessed all the powers of a nation except such as might be expressly withheld by the people. These powers were so numerous as to be incapable of enumeration, and they were not attempted to be enumerated in any of the State constitutions, but the powers withheld were stated. The State constitutions were in a sense intended as limitations on the otherwise unrestricted delegation of power—while the Federal Constitution was an affirmative grant of enumerated powers.

It is clear that at the time of the formation of the Government the people could bestow on each sovereignty such powers as it saw fit. The people may also at any time by constitutional amendment readjust any of the powers so granted by transferring them from one sovereignty to the other, so as better to equip their Government for the accomplishment of its purposes. The people intended that the two sovereignties, of which our system is so composed, should, together, constitute one complete Government; and if authority to deal with any situation or subject of governmental cognizance can not be found in the sovereignty whose powers are enumerated, it necessarily exists in the other sovereignty which possesses all unenumerated powers.

Under this system the citizens of each State are also citizens of the nation. The Federal Constitution and laws are the laws of each State on the subject to which they relate. The powers possessed by each sovereignty are distinct from those possessed by the other, and neither is intended to be clothed with any authority over the other. Each occupies an exclusive field and is supreme within its sphere, and if the functions assigned to either government are not performed by it, they can not be performed by the other.

It is provided in Article VI of the Federal Constitution that that instrument, and the laws and treaties of the United States made in pursuance thereof, shall be the supreme law of the land. This provision does not mean that the Federal Government was intended to have any authority over the States. It only amounts to saying that within

its sphere the Federal power is exclusive, and that no law or constitution of a State shall have any validity in the domain assigned to the Federal Government.

The converse of this is also true. No act of Congress is valid if in excess of the powers granted in the Federal Constitution.

The States started in their governmental career with the common law as their rich and exclusive heritage; the Federal Government, being an artificial creation, started with only the Constitution. Although the main body of the rights of the people of this country rest upon and are governed by English common-law principles, there is no common law of the United States. When we speak of the common law we refer to the law of the States as it has been adopted by statute or recognized by the courts as the foundation of legal rights.

No part of the police power of the States was surrendered when the nation was formed, and the Federal Government has no police power except where its jurisdiction is exclusive, as in the District of Columbia.

It is very properly provided that the Federal Supreme Court shall have the right to construe the Federal Constitution and to determine the boundaries of Federal authority whenever the question arises, and the determination of that boundary fixes the validity or invalidity of the Federal or State laws that may be involved. Within the limits of its authority, however, the government of each State is also supreme and exclusive. Within the borders of the State its law, statute and common, relating to domestic affairs is the supreme law of the land.

This extended reference to their origin and relationship is given in order to show the completeness and independence of each sovereignty and how necessary it is for each to keep within its own orbit and not interfere with the other. The structure and powers of the Federal courts are provided for in the third article of the Federal Constitution, which, so far as here material, is as follows:

"The judicial power of the United States shall be vested in one Supreme Court and in such inferior courts as the Congress may from time to time ordain and establish. * * *

"The judicial powers shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and * * * to controversies between citizens of different States."

It will be noted that the Supreme Court is the only one whose existence and jurisdiction are provided for by the Constitution; all other Federal courts are created, and their jurisdiction is prescribed—and may be changed—by Congress.

Under the judiciary act of 1789 Congress created the circuit courts of the United States, and, among other things, conferred upon them original jurisdiction over actions at law or in equity "arising under the Constitution or laws of the United States" and over controversies "between citizens of different States," whether the cause of action arose under Federal or State laws, in cases, as the law now stands, and where the amount in controversy exceeds \$2,000.

It is out of the foregoing two branches of jurisdiction conferred on the Federal circuit courts by Congress that most of the friction between State and Federal authority has arisen, and in most cases it has been with reference to the control of commerce or where a foreign corporation was a party. It will be noted that by the second subdivision above the Federal circuit courts were given a jurisdiction in the administration of State laws coordinate with, but independent of, the State courts, where the specified jurisdictional amount is in controversy and the citizenship is diverse, with this single limitation, that in the trial of such common law actions the statutes of the State shall be made the rule of decision where they apply. This jurisdiction was given under what I believe to be a mistaken notion that in cases where a nonresident of a State was a party the State courts would be so swayed by local prejudice as not to do justice. If in the early days any ground for such a belief existed it has long ago disappeared. The high character of the judiciary in the several States at the present time assures every suitor a fair and impartial trial, regardless of his place of residence, and it would seem that a tribunal which has exclusive jurisdiction of cases arising under the law of this State involving less than \$2,000 ought not to be held disqualified by local prejudice where the case involves more than \$2,000.

This branch of Federal jurisdiction has incited much bitterness between individuals and corporations, and in many States statutes have been enacted attempting to impose heavy penalties and forfeitures on foreign corporations for instituting suits in the Federal courts. The chief trouble under this provision arose when the Federal Supreme Court extended its application beyond its literal terms and held that corporations of other States were within the reason of the rule creating a tribunal that would presumably be above local influence, and that they should have the same privilege as citizens of the State of their creation. The court had held, in *Paul v. Virginia*, 8 Wall., 168, that under Article IV, section 2, of the Constitution, a corporation was not a citizen; but under the judiciary act, in order to give corporations the privilege of suing in Federal courts and having suits brought against them by individuals removed to such courts, it was held, after evolving the doctrine by degrees, that there is an indisputable presumption that a State corporation is composed of citizens of the State which created it—and this without regard to whether a single one of the incorporators live in such State—and that it should be endowed in its corporate name with the right to sue in a Federal court as the aggregate of the citizens composing it. By reason of this rule it is the common practice of large corporations in all cases where the amount involved permits it to ignore the State courts and resort to the Federal courts for the trial of cases in which they are interested, and as a result of this practice, on account of the remoteness and the expense of reaching and producing his witnesses before such court, the private citizen considers he is at a disadvantage in his own State by being deprived of the privilege of having his rights passed upon by its tribunals.

There has been much recent conflict under the other branch of this jurisdiction arising out of the regulation of public-service corporations by States. The States prescribe these regulations under their police powers, and, as a rule, the corporations resist such regulations under the fourteenth amendment. There have been so many actions of a strikingly similar character commenced in various States recently as to indicate united action by the public-service corporations to cripple the power of the States, and the most striking feature of the contest is that so many of the Federal circuit courts have, at least temporarily, assumed an attitude hostile to the enforcement of these State laws. I do not want to be understood as reflecting on the Federal courts. The eminent members of the Supreme Court of the United States and the great majority of the judges of the inferior Federal courts are men of the highest character. Their official fidelity to the Constitution and the highest national ideals has given both dignity and stability to our institutions. But in some of the rulings recently made with reference to the power of Federal courts over the officers of States by some of the inferior Federal judges, there seems to have been not

only a departure from the line of decisions of the highest court, but an apparent unwillingness to recognize the true relations between the State and Federal sovereignties. They seem especially to forget or ignore the eleventh amendment, which forbids the institution of a suit against a State in any court.

Before referring to the nonsuability of a State I want to call attention for a moment to the fourteenth amendment, which prohibits the States from denying to any person within their jurisdiction the equal protection of the law, or taking from any person life, liberty, or property without due process of law. The corporations seem to assume that in this amendment they have found a weapon with which to successfully combat all regulatory laws passed by States. They ignore the fact that the constitutions of the various States contain the same prohibition against depriving any person of life, liberty, or property without due process of law. That provision in the fourteenth amendment is cumulative, so far as the State courts are concerned. The prohibitions of both constitutions are binding on the State; it is as much the duty of the State courts to uphold the Constitution of the United States as that of the State.

The Supreme Court of the United States has held that the question of whether a State law violates the State constitution is exclusively for the supreme court of the State; but that if the question of conflict between such a law and the Federal Constitution arises, while the State court is competent to consider and decide it, its decision is to that extent subject to review by the Federal Supreme Court. Following this reasonable rule, it will be seen that the only legitimate effect of the adoption of the fourteenth amendment was to confer on the Federal Supreme Court the power to review the decisions of the several State supreme courts, when the question of whether the State law operated unequally or whether the State procedure amounted to due process of law was raised.

In *re Kemmler* (136 U. S., 436) the Federal Supreme Court repudiates the idea that any control over the States or any neutralization of their police powers was intended by this amendment. The court says:

"The fourteenth amendment did not radically change the whole theory of the relations of the State and Federal governments to each other and both governments to the people. * * * Protection of life, liberty, and property rests primarily with the States; the amendment furnishes an additional guaranty against any encroachment by the States upon those fundamental rights which belong to citizenship, which the States' governments were created to secure."

The statement in the foregoing opinion that "protection of life, liberty, and property rests primarily with the States" emphasizes the obvious incorrectness and danger of the practice which permits a corporation or an individual to go into a Federal circuit court and procure an injunction suspending the operation of a State law, relating to life, liberty, or property, in advance of any finding that it is void, on the mere assertion that it does not operate equally or afford in its enforcement due process of law. All laws relating to life, liberty, or the regulation of property arise out of the exercise of the police power; and if an interested party is to be allowed to suspend a rate law in advance of a trial and finding of its invalidity, then an interested party may also by Federal injunction procure the suspension of a law prescribing punishment for murder or any other crime.

By the continuance of this practice the primary power to protect life and liberty and to regulate the use of property would be denied to the States, which in effect means that the power would be destroyed altogether, because there is nowhere any provision for the primary exercise of power over these subjects by the Federal authorities. Outside of the fourteenth amendment the power to suspend the operation of State laws by Federal courts has never been claimed.

In the foregoing opinion the Supreme Court says that the original relations of the State and Federal governments were not changed by that amendment; it therefore follows that the practice is wholly unjustifiable.

There is a strong presumption of verity and constitutionality due to the enactment of a sovereign government. It can not legitimately be claimed that such presumption is overcome by the mere assertion of a private complainant who seeks its suspension. Even if a State could be sued, such a course would be unwarranted. The only justifiable practice, consistent with the dignity of the State as an independent government and the safety of the people who must look to that government for the protection of most of their rights, is to require questions affecting the validity of State laws to be first passed upon by the State courts. If they are declared valid by the highest court of the State, the question of their validity under the Federal Constitution can then be taken for review to the Federal Supreme Court.

In the case of *Fitts v. McGhee* (172 U. S., 516), where an action was brought in a Federal circuit court to restrain the enforcement of a State law claimed to be void under the fourteenth amendment, the court, in refusing to entertain the action until the matter had been passed upon by the State court, said:

"Under the view we take of the question, the citizen is not without an effective remedy when proceeded against under a legislative enactment, void for repugnancy to the supreme law of the land; for whatever the form of the proceeding against him, he can make his defense on the ground that the statute is unconstitutional and void. And that question can be ultimately brought to this court for final determination."

But the audacity of such practice is apparent when we consider the terms of the eleventh amendment, to which I now invite attention.

THE ELEVENTH AMENDMENT.

It is a matter of familiar history that in the convention which framed the Constitution, when the clause was under consideration defining the extent of the judicial power of the United States, the question was raised and discussed as to whether or not a suit might be brought by an individual against a State. It was at that time contended with great vigor by Alexander Hamilton and other patriotic scholars, who were members of the Convention, that in the nature of things a State was, under the rules of the common law, exempt from suit by virtue of its sovereignty. According to the universal practice of mankind, the rule had been established that the sovereign might be petitioned but not sued.

But the first constitutional question coming before the Supreme Court of the United States was a suit commenced in that court by Alexander Chisholm against the State of Georgia, reported in 2 Dal., 219; the chief controversy was the suability of the State. After careful consideration the court held that it had jurisdiction and that the suit might be maintained, although the dissenting opinion of Justice Iredell in that case was one of the most vigorous in the history of the court. That decision caused such a shock of surprise throughout the country that on the very next day the eleventh amendment was proposed, providing that the judicial power of the United States should not be construed to extend to any suit in law or equity prose-

cuted against a State by a citizen of any other State or foreign country. The amendment was publicly proclaimed to be intended to reverse the decision of the Supreme Court in the *Chisholm* case and was duly adopted with that understanding. In deference thereto that eminent court, immediately after its adoption, ordered dismissed all cases then pending against the various States. Soon after the adoption of that amendment it was held by Mr. Chief Justice Marshall that a State was exempt from suit only when it was a party of record. That doctrine, however, soon gave way to the more rational one that a suit was not maintainable against the officers of a State when it was plain that they were made parties solely in their official capacity to prevent the performance of official duties constitutionally imposed on them, where it appeared that the State was the one upon whom the judgment would effectually operate.

Notwithstanding the clearness of the language of the eleventh amendment and the avowed purpose of its adoption, there has grown up in the Federal decisions a differentiation between different classes of State officers, until the doctrine seems to be now well established that where a common carrier claims that a schedule of rates prescribed by a railway commission of any State is obnoxious to the fourteenth amendment, a suit may be maintained in equity against such administrative board to try the question of their reasonableness, even though in prescribing the rates in controversy they acted solely as officers of the State. The theory upon which such a board is held to be suable is that its duties are ministerial instead of discretionary.

But the railroad companies have for many years been industriously endeavoring to still further limit the operation of the eleventh amendment and to exalt the fourteenth. They are especially anxious to secure a construction which will permit the bringing of a suit against the attorney-general of a State to prevent him from instituting actions in the local courts in the State's name and for its benefit, for the enforcement of its laws, or the enforcement of orders made by such administrative boards whenever it is claimed by the plaintiff that such law is obnoxious to the fourteenth amendment. While, as I have heretofore stated, some of the inferior Federal courts have asserted and have attempted to exercise such jurisdiction in some of the States by restraining the Attorney-General from performing his official duties, the decisions of the Supreme Court of the United States do not warrant such assumed jurisdiction, but, on the contrary, that court has repeatedly denied its existence.

Perhaps the controlling case on this subject is that entitled in re *Ayers* (123 U. S., 448), which arose in the State of Virginia under a statute making it the duty of the attorney-general to commence proceedings for the recovery of taxes for the payment of which the parties holding certain outstanding bonds had been authorized by a prior law to tender the interest coupons. The coupons had been tendered and refused. In the attempt which was made to restrain the attorney-general, a temporary injunction was issued prohibiting him from prosecuting the suits referred to. He disobeyed this injunction and was fined for contempt by the court, whereupon he sued out a writ of habeas corpus from the Federal Supreme Court, and that court, in a very exhaustive opinion, decided that the proceedings in which the injunction was issued were void for want of jurisdiction, and that, therefore, the contempt proceedings for its violation were equally void. The court *inter alia*, said:

"It follows, therefore, in the present case that the personal act of the petitioners sought to be restrained, * * * reduced to the mere bringing of an action in the name of and for the State against taxpayers, who, although they may have tendered the tax-receivable coupons, are charged as delinquents, can not be alleged against them as an individual act in violation of any legal or contract rights of such taxpayers."

"The relief sought is against the defendants not in their individual but in their representative capacity, as officers of the State."

"The acts sought to be restrained are the bringing of suits by the State, * * * in its own name and for its own use. If the State had been made a defendant to this bill by name charged according to the allegations it now contains—supposing that such a suit could be maintained, it would have been subject to the jurisdiction of the court by process served upon its governor and attorney-general according to the precedents in such cases. * * * If a decree could have been rendered enjoining the State from bringing suits against its taxpayers, it would have operated upon the State only through the officers who, by law, were required to represent it in bringing such suits, viz., the present defendants, its attorney-general and the Commonwealth's attorneys for the several counties. * * * The nature of the case as supposed, is identical with that of the case as actually presented in the bill, with a single exception that the State is not named as a defendant. How else can a State be forbidden by judicial process to bring actions in its name, except by constraining the conduct of its officers, its attorneys, and its agents? And if all such officers, attorneys, and agents are personally subjected to the process of the court, so as to forbid their acting in its behalf, how can it be said that the State itself is not subjected to the jurisdiction of the court as an actual and real defendant?"

"The very object and purpose of the eleventh amendment were to prevent the indignity of subjecting a State to the coercive process of judicial tribunals at the instance of private parties. It is thought to be neither becoming nor convenient that the several States of the Union, invested with that large residuum of sovereignty which had not been delegated to the United States, should be summoned as defendants to answer the complaints of private persons, * * * or that the course of their public officers should be subject to and controlled by the mandates of judicial tribunals without their consent and in favor of individual interests."

The doctrine so clearly promulgated in the *Ayers* case seemed to be somewhat departed from in the well-known case of *Smyth v. Ames* (169 U. S.), known as the "Nebraska freight rate case." In that case a suit was brought to restrain the transportation board from enforcing a schedule of rates prescribed by the legislature, and which it was the special duty of the board of transportation to enforce. The attorney-general of that State was a member of said board, and under the rule which applied to suits maintained against such administrative boards, he was included, not as attorney-general, but as a member of the board.

The apparent departure in the *Ames* case from the rule was explained by Mr. Justice Harlan in the subsequent case of *Fitts v. McGhee* (172 U. S., 516), which involved a schedule of rates prescribed for a toll bridge in the State of Alabama, and in which it was sought to restrain the attorney-general from bringing civil or criminal actions for the purpose of enforcing the penalties therein provided. In the latter case, the court, after reviewing all the authorities, distinguished the *Ames* case by calling attention to the fact that the particular duties of the attorney-general which were enjoined were ministerial, because he was a member of the transportation board, specially charged with the enforcement of the law, and that it was not intended in that case to hold

that under any circumstances a governor or attorney-general of a State may be prevented by injunction from performing his discretionary duties. On this subject the court said:

"Upon examination it will be found that the defendants in each of those cases were officers of the State specially charged with the execution of a State enactment alleged to be unconstitutional, but under the authority of which it was averred they were committing, or were about to commit, some specific wrong or trespass, to the injury of the plaintiffs' rights. There is a wide difference between a suit against individuals holding official positions under a State to prevent them, under the sanction of an unconstitutional statute, from committing by some positive act a wrong or trespass and a suit against officers of a State merely to test the constitutionality of a State statute in the enforcement of which those officers will act only by formal judicial proceedings in the courts of the State. In the present case, as we have said, neither of the State officers named held any special relation to the particular statute alleged to be unconstitutional. They were not expressly directed to see to its enforcement. If, because they were law officers of the State, a case could be made for the purpose of testing the constitutionality of the statute by an injunction suit brought against them, then the constitutionality of every act passed by the legislature could be tested by a suit against the governor and the attorney-general, based upon the theory that the former, as the executive of the State, was, in a general sense, charged with the execution of all its laws, and the latter, as attorney-general, might represent the State in litigation involving the enforcement of its statutes. That would be a very convenient way for obtaining a speedy judicial determination of questions of constitutional law which may be raised by individuals, but it is a mode which can not be applied to the States of the Union consistently with the fundamental principle that they can not, without their assent, be brought into any court at the suit of private persons. If their officers commit acts of trespass or wrong to the citizens, they may be individually proceeded against for such trespasses or wrong. Under the view we take of the question, the citizen is not without effective remedy when proceeded against under a legislative enactment void for repugnancy to the supreme law of the land, for, whatever the form of proceeding against him, he can make his defense upon the ground that the statute is unconstitutional and void. And that question can be ultimately brought to this court for final determination."

The question came again before the Supreme Court in the case of *Prout v. Starr* (188 U. S.), which was a proceeding ancillary to the case of *Smith v. Ames*, being an attempt on the part of a succeeding attorney-general, after the decision in the *Ames* case, to reopen the same issues and to enforce the terms of the law which in the *Ames* case had been declared unconstitutional. In the latter case an injunction was issued against the attorney-general, and was sustained in accordance with the well-known rule that the Federal court, having rendered a decree in a case over which it has jurisdiction, will, in support of its decree, prevent by injunction the reopening of the same issues in a subsequent case.

A case similar to that of *Prout v. Starr* is *Gunter v. A. C. L. R. Co.* (200 U. S., 273). In the latter case the court states that by exercising its power for the protection of its former decree, it did not intend to overrule or trench upon the doctrine of the *Ayers* case or *Fitts v. McGhee*.

The immunity of the Attorney-General from suit under the eleventh amendment was reaffirmed in the case of *Cotting v. Goddard* (183 U. S., 79).

One of the most instructive discussions of the subject in an inferior Federal court is found in the recent decision by Judge Trieber, in the circuit court for the eastern district of Arkansas, in the case of *Western Union Telegraph Company v. Andrews*, reported August 22, 1907. An injunction was sought in that case against the district attorneys, who represented the State in the several districts into which the State is divided, to prevent the enforcement of the State law relating to foreign corporations, which the company claimed was void under the fourteenth amendment.

The court said:

"Is this an action against the State within the prohibition of the eleventh amendment of the Constitution? Counsel for both parties have cited numerous cases to sustain their respective contentions. A careful examination of those cases shows that the supposed conflicting views of the Supreme Court of the United States, as well as those of the national courts inferior to that tribunal, are not real, and that, considering carefully the facts in each case, there is little trouble in reconciling these supposed divergent views, and arriving at a correct conclusion as to what is now the settled law as declared by the Supreme Court of the United States. * * *

"A careful examination of the many authorities on this subject leads to the following conclusions as to when an action is against the State or not such a suit within the meaning of the eleventh amendment of the national constitution.

"No suit can be maintained in the courts of the United States against the officers of a State when the State, though not named in the pleadings, is the real party against which the relief is asked, and the judgment will operate."

"A proceeding against officers of a State merely to test the constitutionality of a State statute, in the enforcement of which the officers will act only by formal judicial proceedings in the courts of the State as attorneys for the State, is, in effect, a suit against the State. The allegations in the bill show that this is an attempt to prevent the State of Arkansas, through its officers, who, by its laws, are merely its attorneys to represent it in all legal actions in its favor, or in which it is interested, from instituting and prosecuting suits for recovery of penalties incurred for alleged violations of its laws, actions which can only be instituted in the name of the State and for its use and benefit."

"To hold that a court may assume jurisdiction of an action against the attorneys of a party and enjoin them from instituting suits for their client, when it is expressly prohibited from exercising such jurisdiction against the client, would be, to say the least, novel. In fact, how can a court of equity proceed against an attorney affecting the right of his client without having the client before it as a party to the suit?"

One of the chief objects of the public service corporations in endeavoring to emasculate the eleventh amendment and to bring actions in the Federal circuit courts to enjoin the enforcement of State rates, is to secure the advantage of suspending the operation of such rates pending the litigation.

Every student of the subject realizes the futility of public regulation unless, after there has been a hearing and determination of the reasonableness of a rate by the proper board or commission, such a rate shall be put into effect and remain in operation until it is found to be confiscatory by the proper decision of a court, after trial.

In a proper sense the question that is involved when the propriety of a railroad rate is taken into court, is the question of its constitutionality. The rate-making power must not make rates so low as to deprive the property devoted to the public service of the equal protection of the law. Rate making is legislative in its character, whether undertaken by a commission or by the legislature itself, and does not become judicial when the question of the reasonableness of rates is taken into court. The only question the court can consider is whether the rates are confiscatory, and if they are, it must hold that the legislative authority was exceeded in prescribing them, and it must either uphold or condemn the rates accordingly.

The court can not prescribe any other rate to take the place of the one found to be confiscatory. Mr. Justice Brewer, in the *Reagan* case (154 U. S.), put the matter tersely when he said that when a court finds a rate to be confiscatory it has no more right to prescribe another rate to take its place than it has when a law is found to be unconstitutional, to enact an unobjectionable law in its stead.

Inasmuch as rates can be regulated much more fairly and intelligently by a commission than by the legislature, the final orders of such commissions ought to stand on the same level as State laws, so far as immunity from restraining their enforcement is concerned. The distinction which has been made in the Federal decisions between State officers composing such administrative boards, and the general executive officers of a State, so far as immunity from suit under the eleventh amendment is concerned, has no real foundation. Every State officer while performing his official duties comes within the meaning of the rule, making a State immune from suit; if any State officer can be enjoined, then the conduct of the State government is to that extent interfered with.

There can be no danger of injustice resulting to any carrier if the right to suspend the taking effect of such rates by Federal injunction is taken away, because such orders can only be enforced by mandatory proceedings in the courts of the State, where all the rights of the carrier can be protected. If the hands of the State can be tied with reference to such orders by Federal injunctions, thus not only suspending the operation of the orders, but prohibiting the institution of proper proceedings for their enforcement in the local courts, the State governments are hopelessly handicapped and the rights of the public are completely subordinated to the private rights of the carriers.

Such practice offers a premium upon dilatory suits by railroad companies; delay is greatly to their advantage, as they enjoy the benefit of old rates while they are contesting the new. This is especially true in view of the insidious practice which has recently been adopted of having these injunction proceedings instituted by stockholders, instead of by the corporations themselves. In such cases the corporations, as well as the State officers sought to be restrained, are joined as defendants, and an injunction obtained prohibiting the corporation from obeying the law, as well as prohibiting the State officers from enforcing it. This makes the proceedings a two-edged sword; it suspends the rate pending the suit, and protects the corporation from all punishment if the injunction suit is unsuccessful, and the rates are found to be valid, because it is thought that the command of the Federal court to the corporation to disobey the law or order will be a sufficient justification of its disobedience to protect it and its officers from criminal proceedings or from penalties or forfeitures which may be prescribed as punishment for the violation. This form of procedure, therefore, places corporations, in a large measure, above the law and clothes them with immunities and privileges not enjoyed by individuals. If an individual disobeys the law of a State, he does so at his peril. If there are penalties prescribed for its violation, he takes his chances of having them imposed. He can not go into court and procure an injunction prohibiting himself from obeying the law he desires to violate, as it seems corporations can. This form of action is disapproved by the Federal Supreme Court in the case of *Corbus v. Gold Mining Company* (187 U. S., 455), but the ninety-fourth rule in equity seems to have been framed to encourage such actions. It is clear that, unless this palpable debasement of State government by the abuse and misapplication of the forms of law is ended, respect for the courts will be lost.

No private suitor can claim that he is deprived of the guarantees afforded by the fourteenth amendment so long as he has the ultimate right, whatever the form of proceeding that may be brought against him, of having his case finally reviewed by the Federal Supreme Court. On the other hand, it is plain on its face that the efficiency of a State government is not only impaired, but in a large measure destroyed by the practice of taking the administration of its laws entirely out of its hands and suspending their operation at the demand of private parties, till their validity is tested in a foreign jurisdiction.

There is no question now before the American people which overshadows this in importance. The validity of particular laws is of only local importance, but the question of the right of the States to perform their governmental functions without Federal interference goes to the very foundation of the social compact. There seems to be no doubt but that the Supreme Court of the United States will adhere to its uniform ruling that under the eleventh amendment actions can not be maintained to enjoin the attorney-general of a State from performing his constitutional duties, by private suitors, but action must be taken to relieve the members of administrative boards from such suits also.

There is no demand for any enlargement of the powers of the States, but it seems to me the demand of the hour is that they be permitted to exercise the powers they now have.

There seems to be but one simple and effective remedy for existing evils in this unwarranted clash of authority, and that is by changing the law under which the abuse has grown up. Both governments should be left in a position to exercise to the fullest extent all the powers vested in them by the people. This can be accomplished and the existing friction removed by an amendment to the judiciary act withdrawing from the Federal circuit courts jurisdiction over controversies arising between State officers and private parties, under what might be called the negative side of the Federal Constitution—the portion which limits the powers of the States—leaving that branch of jurisdiction, which is supervisory and conservative rather than remedial in its nature, to be exercised only by the Federal Supreme Court in reviewing the decisions of the highest courts of the States on such subjects. Only by this course can the primary powers of the States over the fundamental rights of the citizen be preserved and the harmony between the two sovereignties, which is necessary to the continued existence of our dual system of government, be maintained.

Mr. Speaker, in what is generally called the "Minnesota case," the United States circuit court adjudged the attorney-general in contempt, and he applied to the Supreme Court of the United States for a writ of habeas corpus. The issue upon that

hearing was whether the State of Minnesota, which admittedly was beyond the jurisdiction of the United States circuit court, and could not be directly proceeded against in any manner in the Federal court, could be indirectly affected with the same result brought about through restraining its attorney-general, through whom only could suit in its own courts be instituted to enforce the provisions of the State laws. The suit seemed to be a direct and glaring invasion of the rights of the States to proceed in its own courts to regulate a corporation doing business within its borders, which its legislative branch had determined required such regulation.

It is not my purpose to criticize the conclusions of the court. Proper respect for the highest judicial tribunal of any land, coupled with observance of the fact that this Republic is essentially a Government of law, forbids that; but I earnestly commend the forceful utterances of Mr. Justice Harlan, not the least eminent of that body, to the thoughtful consideration of every citizen who loves liberty and justice more than expediency.

Of course no one will contend that any corporation ought not to have its fair day in court. The rights of the railway company in this case would have been fully secured by the trial of the case in the State court or by appeal from the court of last resort in the State to the Supreme Court of the United States.

Sometimes the dissenting opinion of a great judge, noted for his broad-minded treatment of subjects affecting the national life, is valuable for the opportunity it affords the people to view how the tendencies of the times are taking us further and further away from the landmarks of the fathers, especially the constitutional reservation to the States of all the powers not granted away from them by the adoption of the Federal Constitution. As an example, I beg to quote the dissenting opinion of Mr. Justice Harlan, in *ex parte* Edward T. Young, the "Minnesota case," decided at the October term of the Supreme Court of the United States, under date of March 23, 1908.

Mr. Young was attorney-general of the State of Minnesota, and in his official capacity as such attorney-general, for and in the name of the State, had filed a petition for an alternative writ of mandamus in one of the courts of the State and obtained an order from that court September 24, 1907, directing the writ to issue as prayed for against the defendant named—the Northern Pacific Railway Company.

This was one day after a citizen of Iowa and Minnesota, stockholders in said railway company, had obtained an order from the circuit court of the United States for the district of Minnesota temporarily restraining the railway company from publishing certain rates, and from reducing its tariff to the figures set forth in a law of Minnesota, and restrained the attorney-general from taking any steps against the railroads to enforce the remedies or penalties specified in the State law.

In this suit it was sought to shut out the State of Minnesota from proceeding in its own courts to carry out its own laws, which Mr. Justice Harlan says could not be done indirectly by restraining the only officials of the State having the power and authority and whose duty it was to execute its laws. His dissent is as follows:

Ex parte: In the matter of Edward T. Young, petitioner. Petitions for writs of habeas corpus and certiorari and motion for leave to file same. March 23, 1908. Mr. Justice Harlan dissenting.

Although the history of this litigation is set forth in the opinion of the court, I deem it appropriate to restate the principal facts of the case in direct connection with my examination of the question upon which the decision turns. The question is whether the suit in the circuit court of the United States was, as to the relief sought against the attorney-general of Minnesota, forbidden by the eleventh amendment of the Constitution of the United States, declaring that "the judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by citizens of another State, or by citizens or subjects of any foreign State." That examination, I may say at the outset, is entered upon with no little embarrassment, in view of the fact that the views expressed by me are not shared by my brethren. I may also frankly admit embarrassment arising from certain views stated in dissenting opinions heretofore delivered by me which did not, at the time, meet the approval of my brethren, and which I do not now myself entertain. What I shall say in this opinion will be in substantial accord with what the court has heretofore decided, while the opinion of the court departs, as I think, from principles previously announced by it upon full consideration. I propose to adhere to former decisions of the court, whatever may have been once my opinion as to certain aspects of this general question.

The plaintiffs in the suit referred to, Perkins and Shepard, were shareholders of the Northern Pacific Railway Company and citizens, respectively, of Iowa and Minnesota. The defendants were the railway company, Edward T. Young, attorney-general of Minnesota; the several members of the State railroad and warehouse commission, and certain persons who were shippers of freight over the lines of that railway.

The general object of the suit was to prevent compliance with the provisions of certain acts of the Minnesota legislature and certain orders of the State railroad and warehouse commission, indicating the rates which the State permits to be charged for the transportation of passengers and commodities upon railroads within its limits; also, to prevent shippers from bringing actions against the railway company to enforce those acts and orders.

The bill, among other things, prayed that Edward T. Young, "as attorney-general of the State of Minnesota," and the members of the State railroad and warehouse commission (naming them) be enjoined from all attempts to compel the railway company to put in force the rates or any of them prescribed by said orders, and "from taking any action, step, or proceeding against said railway company, or any of its officers, directors, agents, or employees, to enforce any penalties or remedies for the violation by said railway company of said orders or either of them;" and that said Young, "as attorney-general," be enjoined from taking any action, step, or proceeding against the railway company, its officers, agents, or employees, to enforce the penalties and remedies specified in those acts.

The court gave a temporary injunction as prayed for. The attorney-general of Minnesota appeared specially and, without submitting to or acknowledging the jurisdiction of the court, moved to dismiss the suit as to him, upon the ground that the State had not consented to be sued, and also because the bill was exhibited against him "as, and only as, the attorney-general of the State of Minnesota," to restrain him, by injunction, from exercising the discretion vested in him to commence appropriate actions, on behalf of the State, to enforce or to test the validity of its laws. He directly raised the question that the suit as to him, in his official capacity, was one against the State, in violation of the eleventh amendment.

In response to an order to show cause why the injunction asked for should not be granted the attorney-general also appeared specially and urged like objections to the suit against him in the circuit court.

After hearing the parties the court made an order, September 23, 1907, whereby the railway company, its officers, directors, agents, servants, and employees, were enjoined until the further order of the court from publishing, adopting, or putting into effect the tariffs, rates, or charges specified in the act of April 18, 1907. The court likewise enjoined the defendant Young, "as attorney-general of the State of Minnesota," from "taking or instituting any action, suit, step, or proceeding to enforce the penalties and remedies specified in said act or either thereof, or to compel obedience to said act or compliance therewith or any part thereof." A like injunction was granted against the defendant shippers.

On the next day, September 24, 1907, the State of Minnesota, "on the relation of Edward T. Young, attorney-general," commenced an action in one of its own courts against the Northern Pacific Railway Company—the only relief sought being a mandamus ordering the company to adopt, publish, keep for public inspection, and put into effect, as the rates and charges to be maintained for the transportation of freight between stations in Minnesota, those named and specified in what is known as chapter 232 of the Session Laws of Minnesota for 1907. That was the act which it was the object of the Perkins-Shepard suit in the Federal court to strike down and nullify. An alternative writ of mandamus, such as the State asked, was issued by the State court.

The institution in the State court by the State, on the relation of its attorney-general, of the mandamus proceeding against the railway company having been brought to the attention of the Federal circuit court, a rule was issued against the defendant Young to show cause why he should not be punished as for contempt. Answering that rule, he alleged, among other things, that the mandamus proceeding was brought by and on behalf of the State, through him as its attorney-general; that in every way possible he had objected to such jurisdiction on the ground that the action was commenced against him solely as the attorney-general for Minnesota in order to prevent him from instituting in the proper courts civil actions for and in the name of the State to enforce or test the validity of its laws; that there is no other action or proceeding pending or contemplated by this defendant against said railway company except said proceedings in mandamus hereinbefore referred to. Defendant expressly disclaimed any intention to treat this court with disrespect in the commencement of the proceedings referred to, "but believing that the decision of this court in this action, holding that it had jurisdiction to enjoin this defendant, as such attorney-general, from performing his discretionary official duties, was in conflict with the eleventh amendment of the Constitution of the United States, as the same has been interpreted and applied by the United States Supreme Court, defendant believed it to be his duty as such attorney-general to commence said mandamus proceedings for and in behalf of the State, and it was in this belief that said proceedings were commenced solely for the purpose of enforcing the said law of the State of Minnesota."

The rule was heard, and the attorney-general was held to be in contempt, the order of the Federal court being: "Ordered further, That said Edward T. Young forthwith dismiss or cause to be dismissed the suit of the State of Minnesota on the relation of Edward T. Young, attorney-general, plaintiff, v. Northern Pacific Railway Company, defendant, heretofore instituted by him in the district court of the county of Ramsey, second judicial district, State of Minnesota. Ordered further, That for his said contempt said Edward T. Young be fined the sum of \$100 and stand committed in the custody of the marshal of this court until the same be paid and until he purge himself of his contempt by dismissing or causing to be dismissed said suit last herein mentioned."

The present proceeding was commenced by an original application by Young to this court for a writ of habeas corpus. The petitioner in his application proceeds upon the ground that he is held in custody in violation of the Constitution of the United States. The petition set out all the steps taken in the suit in the Federal court, alleging, among other things—

"That your petitioner's office as attorney-general of the State of Minnesota is established and provided for by the constitution of the said State, section 1 of Article V thereof providing as follows, to wit: 'The executive department shall consist of a governor, lieutenant-governor, secretary of state, auditor, treasurer, and attorney-general, who shall be chosen by the electors of the State.' That neither by statute nor otherwise is your petitioner charged with any special duty of a ministerial character in the doing or not doing of which complainants in the said bill of complaint or the said Northern Pacific Railway Company had any legal right, and that whatever duties your petitioner had or has with respect to the several matters complained of in the said bill of complaint are of an executive and discretionary nature. That in no case could your petitioner, even though it was his intention so to do, which it was not, deprive the said complainants or the said Northern Pacific Railway Company, or either of them, of any property, nor could he trespass upon their rights in any particular, and that all he could do as attorney-general as aforesaid and all that it was his duty to do in that capacity, and all that he intended to do or would do, was to commence formal judicial proceedings in the appropriate court of Minnesota against the said Northern Pacific Railway Company, its officers, agents, and employees, to compel the

said company, its agents and servants, to adopt and put in force the schedule of freight rates, tariffs, and charges prescribed by said chapter 232, laws 1907, of the State of Minnesota." He also renewed the objection that the suit instituted by Perkins and Shepard, in so far as the same is against him, was a suit against the State to prevent his commencing the proposed action in the name of the State, and was in restraint of the State itself, "and that the said suit is one against the said State in violation of the eleventh amendment to the Constitution of the United States, and that therefore the same is and was, so far as your petitioner is concerned, beyond the jurisdiction of the said circuit court," and so forth.

This statement will sufficiently indicate the nature of the question to be now examined upon its merits.

Let it be observed that the suit instituted by Perkins and Shepard in the circuit court of the United States was, as to the defendant Young, one against him as, and only because he was, attorney-general of Minnesota. No relief was sought against him individually, but only in his capacity as attorney-general. And the manifest, indeed the avowed and admitted, object of seeking such relief was to tie the hands of the State so that it could not in any manner or by any mode of proceeding, in its own courts, test the validity of the statutes and orders in question. It would therefore seem clear that, within the true meaning of the eleventh amendment, the suit brought in the Federal court was one, in legal effect, against the State—as much so as if the State had been formally named on the record as a party—and therefore it was a suit to which, under the amendment, so far as the State or its attorney-general was concerned, the judicial power of the United States did not and could not extend. If this proposition be sound, it will follow—indeed, it is conceded that if, so far as relief is sought against the attorney-general of Minnesota, this be a suit against the State—then the order of the Federal court enjoining that officer from taking any action, suit, step, or proceeding to compel the railway company to obey the Minnesota statute was beyond the jurisdiction of that court and wholly void, in which case that officer was at liberty to proceed in the discharge of his official duties as defined by the laws of the State, and the order adjudging him to be in contempt for bringing the mandamus proceeding in the State court was a nullity.

The fact that the Federal circuit court had, prior to the institution of the mandamus suit in the State court, preliminarily (but not finally) held the statutes of Minnesota and the orders of its railroad and warehouse commission in question to be in violation of the Constitution of the United States was no reason why that court should have laid violent hands upon the attorney-general of Minnesota and by its orders have deprived the State of the services of its constitutional law officer in its own courts. Yet that is what was done by the Federal circuit court; for the intangible thing called a State, however extensive its powers, can never appear or be represented or known in any court in a litigated case except by and through its officers. When, therefore, the Federal court forbade the defendant, Young, as attorney-general of Minnesota, from taking any action, suit, step, or proceeding whatever looking to the enforcement of the statutes in question, it said in effect to the State of Minnesota:

"It is true that the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively or to its people, and it is true that under the Constitution the judicial power of the United States does not extend to any suit brought against a State by a citizen of another State or by a citizen or subject of a foreign State, yet the Federal court adjudges that you, the State, although a sovereign for many important governmental purposes, shall not appear in your own courts, by your law officer, with the view of enforcing or even for determining the validity of the State enactments which the Federal court has, upon a preliminary hearing, declared to be in violation of the Constitution of the United States."

This principle, if firmly established, would work a radical change in our governmental system. It would inaugurate a new era in the American judicial system and in the relations of the National and State governments. It would enable the subordinate Federal courts to supervise and control the official action of the States as if they were "dependencies" or provinces. It would place the States of the Union in a condition of inferiority never dreamed of when the Constitution was adopted or when the eleventh amendment was made a part of the supreme law of the land. I can not suppose that the great men who framed the Constitution ever thought the time would come when a subordinate Federal court, having no power to compel a State, in its corporate capacity, to appear before it as a litigant, would yet assume to deprive a State of the right to be represented in its own courts by its regular law officer. That is what the court below did, as to Minnesota, when it adjudged that the appearance of the defendant Young in the State court, as the attorney-general of Minnesota, representing his State as its chief law officer, was a contempt of the authority of the Federal court, punishable by fine and imprisonment. Too little consequence has been attached to the fact that the courts of the States are under an obligation equally strong with that resting upon the courts of the Union to respect and enforce the provisions of the Federal Constitution as the supreme law of the land and to guard rights secured or guaranteed by that instrument. We must assume—a decent respect for the States requires us to assume—that the State courts will enforce every right secured by the Constitution. If they fail to do so, the party complaining has a clear remedy for the protection of his rights; for he can come by writ of error, in an orderly, judicial way from the highest court of the State to this tribunal for redress in respect of every right granted or secured by that instrument and denied by the State court. The State courts, it should be remembered, have jurisdiction concurrent with the courts of the United States of all suits of a civil nature, at common law or equity involving a prescribed amount, arising under the Constitution or laws of the United States. (25 Stat., 434.) And this court has said:

"A State court of original jurisdiction, having the parties before it, may consistently with existing Federal legislation determine cases at law or in equity arising under the Constitution or laws of the United States or involving rights dependent upon such Constitution or laws. Upon the State courts, equally with the courts of the Union, rests the obligation to guard, enforce, and protect every right granted or secured by the Constitution of the United States and the laws made in pursuance thereof, whenever those rights are involved in any suit or proceeding before them; for the judges of the State courts are required to take an oath to support that Constitution, and they are bound by it and the laws of the United States made in pursuance thereof, and all treaties made under their authority, as the supreme law of the land, 'anything in the constitution or laws of any State to the contrary notwithstanding.' If they fail therein, and withhold or deny rights, privileges, or immunities secured by the Constitution and laws

of the United States, the party aggrieved may bring the case from the highest court of the State in which the question could be decided to this court for final and conclusive determination." (Robb v. Connolly, 111 U. S., 624, 637.)

So that an order of the Federal court preventing the State from having the services of its attorney-general in one of its own courts, except at the risk of his being fined and arrested, can not be justified upon the ground that the question of constitutional law, involved in the enforcement of the statutes in question, was beyond the competency of a State court to consider and determine, primarily, as between the parties before it in a suit brought by the State itself.

At the argument of this case counsel for the railway company insisted that the provisions of the act in question were so drastic that they could be enforced by the State in its own courts with such persistency and in such a manner as, in a very brief period, to have the railway officers and agents all in jail, the business of the company destroyed, and its property confiscated by heavy and successive penalties before a final judicial decision as to the constitutionality of this act could be obtained. I infer from some language in the court's opinion that these apprehensions are shared by some of my brethren. And this supposed danger to the railway company and its shareholders seems to have been the basis of the action of the Federal circuit court when, by its order directed against the attorney-general of Minnesota, it practically excluded the State from its own courts in respect of the issues here involved. But really no such question as to the State statute is here involved or need be now considered; for it can not possibly arise on the hearing of the present application of that officer for discharge on habeas corpus. The only question now before this court is whether the suit by Perkins and Shepard in the Federal court was not, upon its face, as to the relief sought against the attorney-general of Minnesota, a suit against the State. Stated in another form, the question is whether that court may, by operating upon that officer in his official capacity, by means of fine and imprisonment, prevent the State from being represented by its law officer in one of its own courts? If the Federal court could not thus put manacles upon the State so as to prevent it from being represented by its attorney-general in its own court and from having the State court pass upon the validity of the State enactment in question in the Perkins-Shepard suit, that is an end to this habeas corpus proceeding, and the attorney-general of Minnesota should be discharged by order of this court from custody.

It is to be observed that when the State was in effect prohibited by the order of the Federal court from appearing in its own courts, there was no danger, absolutely none whatever, from anything that the attorney-general had ever done or proposed to do, that the property of the railway company would be confiscated and its officers and agents imprisoned, beyond the power of that company to stay any wrong done by bringing to this court, in regular order, any final judgment of the State court, in the mandamus suit, which may have been in derogation of a Federal right. When the attorney-general instituted the mandamus proceeding in the State court against the railway company there was in force, it must not be forgotten, an order of injunction by the Federal court which prevented that company from obeying the State law. There was consequently no danger from that direction. Besides, the mandamus proceeding was not instituted for the recovery of any of the penalties prescribed by the State law, and therefore no judgment in that case could operate directly upon the property of the railway company or upon the persons of its officers or agents. The attorney-general, in his response to the rule against him, assured the Federal court that he did not contemplate any proceeding whatever against the railway company except the one in mandamus. Suppose the mandamus case had been finally decided in the State court, the way was open for the railway company to preserve any question it made as to its rights under the Constitution, and, in the event of a decision adverse to it in that court, at once to carry the case to the highest court of Minnesota and thence by a writ of error bring it to this court. That course would have served to determine every question of constitutional law raised by the suit in the Federal court in an orderly way without trampling upon the State, and without interfering, in the meantime, with the operation of the railway property in the accustomed way. Instead of adopting that course—so manifestly consistent with the dignity and authority of both the Federal and State judicial tribunals—the Federal court practically closed the State courts against the State itself when it adjudged that the attorney-general, without regard to the wishes of the governor of Minnesota, and without reference to his duties as prescribed by the laws of that State, should stand in the custody of the marshal, unless he dismissed the mandamus suit. If the Federal court could thus prohibit the law officer of the State from representing it in a suit brought in the State court why might not the bill in the Federal court be so amended that that court could reach all the district attorneys in Minnesota and forbid them from bringing to the attention of grand juries and the State courts violations of the State act by the railway company? And if a grand jury was about to inquire into the acts of the railway company in respect of the matter of its rates, why may not the Federal court, proceeding upon the same grounds on which it has moved against the attorney-general, enjoin the finding or returning of indictments against the railway company? If an indictment was returned against the railway company, and was about to be tried by a petit jury, why could not the Federal court, upon the principles now announced, forbid the jury to proceed against the railway company, and if it did, punish every petit jurymen as for contempt of court? Indeed, why may it not lay its hands on the governor of the State and forbid him from appealing to the courts of Minnesota in the name of the State to test the validity of the act in question? And why may not the Federal court lay its hands even upon the judge of the State court itself, whenever it proceeds against the railway company under the State law?

The subject-matter of these questions have evidently been considered by this court, and the startling consequences that would result from an affirmative answer to them have not been overlooked; for, in its opinion, I find these observations: "It is proper to add that the right to enjoin an individual, even though a State official, from commencing suits under circumstances already stated, does not include the power to restrain a court from acting in any case brought before it, either of a civil or criminal nature, nor does it include power to prevent any investigation or action by a grand jury. The latter body is part of the machinery of a criminal court, and an injunction against a State court would be a violation of the whole scheme of our government. If an injunction against an individual is disobeyed, and he commences proceedings before a grand jury or in a court, such disobedience is personal only, and the court or jury can proceed without incurring any penalty on that account. The difference between the power to enjoin an individual from doing certain things, and the power to enjoin courts from proceeding in their own way to exercise jurisdiction

is plain, and no power to do the latter exists because of a power to do the former." If an order of the Federal court forbidding a State court or its grand jury from attempting to enforce a State enactment would be "a violation of the whole scheme of our Government," it is difficult to perceive why an order of that court, forbidding the chief law officer and all the district attorneys of a State to represent it in the courts, in a particular case, and practically, in that way, closing the doors of the State court against the State, would not also be inconsistent with the whole scheme of our Government, and therefore beyond the power of the court to make.

Whether the Minnesota statutes are or are not violative of the Constitution is not, as already suggested, a question in this habeas corpus proceeding. I do not, therefore, stop to consider whether those statutes are repugnant to the Constitution upon the ground that by their necessary operation, when enforced, they will prevent the railway company from contesting their validity, or upon the ground that they are confiscatory and therefore obnoxious to the requirement of due process of law. While the argument at the bar in support of each of these propositions was confessedly of great force and persuasiveness, those points need not be now examined. I express no opinion about them. Their soundness may, however, be conceded for the purposes of this discussion. Indeed, it may be assumed for the purposes of this discussion that these State enactments are harsh and intemperate and, in some of their features, invalid. But those questions are wholly apart from the present proceeding. If we now consider them we must go out of our way in order to do so. We have no evidence in this proceeding as to the effect which the statutes, if enforced, would have upon the value either of the railway property or of the bonds or stocks of the railway company. The question of their validity has not been finally decided by the circuit court, and we have not before us even the evidence upon which its preliminary injunction was based. The essential and only question now before us or that need be decided is whether an order by the Federal court, which prevents the State from being represented in its own courts by its chief law officer, upon an issue involving the constitutional validity of certain State enactments, does not make a suit against the State within the meaning of the eleventh amendment. If it be a suit of that kind, then, it is conceded the circuit court was without jurisdiction to fine and imprison the petitioner and he must be discharged, whatever our views may be as to the validity of those State enactments. This must necessarily be so, unless the amendment has less force and a more restricted meaning now than it had at the time of its adoption, and unless a suit against the attorney-general of a State, in his official capacity, is not one against a State under the eleventh amendment when its determination depends upon a question of constitutional power or right under the fourteenth amendment. In that view I can not concur. In my opinion the eleventh amendment has not been modified in the slightest degree as to its scope or meaning by the fourteenth amendment, and a suit which, in its essence, is one against the State remains one of that character, and is forbidden even when brought to strike down a State statute alleged to be in violation of that clause of the fourteenth amendment, forbidding the deprivation by a State of life, liberty, or property without due process of law. If a suit be commenced in a State court, and involves a right secured by the Federal Constitution, the way is open under our incomparable judicial system to protect that right, first, by the judgment of the State court, and ultimately by the judgment of this court, upon writ of error. But such right can not be protected by means of a suit which, at the outset, is directly or in legal effect, one against the State whose action is alleged to be illegal. That mode of redress is absolutely forbidden by the eleventh amendment and can not be made legal by mere construction or by any consideration of the consequences that may follow from the operation of the statute. Parties can not, in any case, obtain redress by a suit against the State. Such has been the uniform ruling in this court, and it is most unfortunate that it is now declared to be competent for a Federal circuit court, by exerting its authority over the chief law officer of the State, without the consent of the State, to exclude the State, in its sovereign capacity, from its own courts when seeking to have the ruling of those courts as to its powers under its own statutes. Surely, the right of a State to invoke the jurisdiction of its own courts is not less than the right of individuals to invoke the jurisdiction of a Federal court. The preservation of the dignity and sovereignty of the States, within the limits of their constitutional powers, is of the last importance, and vital to the preservation of our system of government. The courts should not permit themselves to be driven by the hardships, real or supposed, of particular cases to accomplish results, even if they be just results, in a mode forbidden by the fundamental law. The country should never be allowed to think that the Constitution can, in any case, be evaded or amended by mere judicial interpretation, or that its behests may be nullified by an ingenious construction of its provisions.

The importance of the question under consideration is a sufficient justification for such a reference to the authorities as will indicate the precise grounds on which this court has oftentimes proceeded when determining what is and what is not a suit against a State within the meaning of the eleventh amendment. All the cases agree in declaring the incapacity of a Federal court to exercise jurisdiction over a State as a party. But assaults upon the eleventh amendment have oftentimes been made in cases in which the effort has been, without making the State a formal party, to control the acts of its officers and agents, by such orders directed to them as will accomplish, by indirection, the same results that could be accomplished by a suit directly against the State, if such a suit were possible. It will be well to look at some of the principal adjudged cases.

The general question was examined in *Cunningham v. Macon and Brunswick Railroad Company* (109 U. S., 446-451), where the court said that it was conceded in all the cases, and "may be accepted as a point of departure unquestioned, that neither a State nor the United States can be sued as defendant in any court in this country without their consent, except in the limited class of cases in which a State may be made a party in the Supreme Court of the United States by virtue of the original jurisdiction conferred on this court by the Constitution." The court has not in any case departed from this constitutional principle. In *Pennoyer v. McConaughy* (140 U. S., 1, 9), it said that "this immunity of a State from suit is absolute and unqualified, and the constitutional provision securing it is not to be so construed as to place the State within the reach of the process of the court. Accordingly, it is equally well settled that a suit against the officers of a State, to compel them to do the acts which constitute a performance by it of its contracts, is, in effect, a suit against the State itself."

In *Cunningham v. Macon and Brunswick Railroad Company*, just cited, the distinction was drawn between a suit in which the State

is the real party in interest, although not technically a party on the record, and one in which "an individual is sued in tort for some act injurious to another in regard to person or property, to which his defense is that he has acted under the orders of the Government;" in which last case, the court observed, the defendant "is not sued as, or because he is, the officer of the Government, but as an individual, and the court is not ousted of jurisdiction because he asserts authority as such officer." Let it not be forgotten that the defendant Young was sued, not as an individual or because he had any personal interest in these matters, but as, and solely because he is, an officer of the State charged with the performance of certain public duties.

In *Hagood v. Southern* (117 U. S., 52, 67, 68), which involved the validity of certain scrip alleged to have been issued by the State of South Carolina, it appeared that the State having denied its obligation to pay, the plaintiff sought relief by simply suing certain State officers, as such, without making the State a formal party. The court said:

"These suits are accurately described as bills for the specific performance of a contract between the complainants and the State of South Carolina, who are the only parties to it. But to these bills the State is not in name made a party defendant, though leave is given to it to become such, if it chooses; and, except with that consent, it could not be brought before the court and be made to appear and defend. And yet it is the actual party to the alleged contract the performance of which is decreed, the one required to perform the decree, and the only party by whom it can be performed. Though not nominally a party to the record, it is the real and only party in interest, the nominal defendants being the officers and agents of the State, having no personal interest in the subject-matter of the suit, and defending only as representing the State. And the things required by the decrees to be done and performed by them are the very things which, when done and performed, constitute a performance of the alleged contract by the State. The State is not only the real party to the controversy, but the real party against which relief is sought by the suit, and the suit is, therefore, substantially within the prohibition of the eleventh amendment to the Constitution of the United States, which declares that 'the judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by citizens of another State, or by citizens or subjects of any foreign State.'"

Again:

"If this case is not within the class of those forbidden by the constitutional guaranty to the States of immunity from suits in Federal tribunals, it is difficult to conceive the frame of one which would be. If the State is named as a defendant, it can only be reached either by mesne or final process through its officers and agents, and a judgment against it could neither be obtained nor enforced, except as the public conduct and government of the ideal political body called a State could be reached and affected through its official representatives. A judgment against these latter, in their official and representative capacity, commanding them to perform official functions on behalf of the State according to the dictates and decrees of the court, is, if anything can be, a judicial proceeding against the State itself. If not, it may well be asked, What would constitute such a proceeding? In the present cases the decrees were not only against the defendants in their official capacity, but, that there might be no mistake as to the nature and extent of the duty to be performed, also against their successors in office." Is it to be said that an order requiring the attorney-general of a State to perform certain official functions on behalf of the State is a suit against the State, while an order forbidding him, as attorney-general, not to perform an official function on behalf of the State is not a suit against the State?

The leading case upon the general subject, and one very similar in many important particulars to the present one, is *In re Ayers* (123 U. S., 443, 496, 497, 505). The facts in that case were briefly these: The legislature of Virginia, in 1887, passed an act which holders of sundry bonds and tax-receivable coupons of that Commonwealth alleged to be in violation of their rights under the Constitution of the United States. They instituted a suit in equity in the circuit court of the United States against the attorney-general and auditor of Virginia, and against the treasurers and Commonwealth attorneys of counties, cities, and towns in Virginia, the relief asked being a decree enjoining and restraining the said State officers, and each of them, from bringing or commencing any suit provided for by the above act of 1887, or from doing anything to put that act into operation. The circuit court entered an order, enjoining the attorney-general of Virginia and each and all the State officers named "from bringing or commencing any suit against any person who has tendered the State of Virginia tax-receivable coupons in payment of taxes due to said State, as provided for and directed by the act of the legislature of Virginia, approved May 12, 1887." Subsequently the circuit court of the United States was informed that the attorney-general of Virginia had disobeyed its order of injunction. Thereupon that officer was ruled to show cause why he should not be fined and imprisoned. He responded to the rule, admitting that after being served with the injunction he had instituted a suit in the State circuit court against the Baltimore and Ohio Railroad Company to recover taxes due the State, and alleging "that he instituted the said suit because he was thereunto required by the act of the general assembly of Virginia aforesaid, and because he believed this court had no jurisdiction whatever to award the injunction violated." He disclaimed any intention to treat the court with disrespect, and stated that he had been actuated alone by the desire to have the law properly administered. He was, nevertheless, adjudged guilty of contempt, was required forthwith to dismiss the suit he had brought, was fined \$500 for contempt of court, and committed to the custody of the marshal until the fine was paid, and until he purged himself of his contempt by dismissing the suit in the State court. The attorney-general then applied directly to this court for a writ of habeas corpus, which was granted, and upon hearing he was released by this court from custody. The order for his discharge recited that the suit in which the injunctions were granted was "in substance and in law a suit against the State of Virginia," and "within the prohibition of the eleventh amendment to the Constitution;" that it was one "to which the judicial power of the United States does not extend;" that the circuit court was without jurisdiction to entertain it; that all its proceedings in the exercise of jurisdiction were null and void; that it had no authority or power to adjudge the attorney-general in contempt; and that his imprisonment was without authority of law. In the opinion in the *Ayers* case the court said:

"It follows, therefore, in the present case, that the personal act of the petitioners sought to be restrained by the order of the circuit court, reduced to the mere bringing of an action in the name of and for the State against taxpayers, who, although they may have tendered tax-receivable coupons, are charged as delinquents, can not be alleged against them as an individual act in violation of any legal or contract rights of such taxpayers."

Again:

"The relief sought is against the defendants, not in their individual, but in their representative capacity as officers of the State of Virginia. The acts sought to be restrained are the bringing of suits by the State of Virginia in its own name and for its own use. If the State had been made a defendant to this bill by name, charged according to the allegations it now contains—supposing that such a suit could be maintained—it would have been subject to the jurisdiction of the court by process served upon its governor and attorney-general, according to the precedents in such cases." (*New Jersey v. New York*, 5 Pet., 284, 288, 290; *Kentucky v. Dennison*, 24 How., 66, 96, 97; *Rule 5 of 1884*, 108 U. S., 574.)

If a decree could have been rendered enjoining the State from bringing suit against its taxpayers, it would have operated upon the State only through the officers who by law were required to represent it in bringing such suits, viz, the present defendants, its attorney-general, and the Commonwealth's attorneys for the several counties. For a breach of such an injunction, these officers would be amenable to the court as proceeding in contempt of its authority, and would be liable to punishment thereof by attachment and imprisonment. The nature of the case, as supposed, is identical with that of the case as actually presented in the bill, with the single exception that the State is not named as a defendant. How else can the State be forbidden by judicial process to bring actions in its name, except by constraining the conduct of its officers, its attorneys, and its agents? And if all such officers, attorneys, and agents are personally subjected to the process of the court, so as to forbid their acting in its behalf, how can it be said that the State itself is not subjected to the jurisdiction of the court as an actual and real defendant?"

Further:

"The very object and purpose of the eleventh amendment were to prevent the indignity of subjecting a State to the coercive process of judicial tribunals at the instance of private parties. It was thought to be neither becoming nor convenient that the several States of the Union, invested with that large residuum of sovereignty which had not been delegated to the United States, should be summoned as defendants to answer the complaints of private persons, whether citizens of other States or aliens, or that the course of their public policy and the administration of their public affairs should be subject to and controlled by the members of judicial tribunals without their consent, and in favor of individual interests. To secure the manifest purposes of the constitutional exemption guaranteed by the eleventh amendment requires that it should be interpreted, not literally and too narrowly, but fairly, and with such breadth and largeness as effectually to accomplish the substance of its purpose. In this spirit it must be held to cover not only suits brought against a State by name, but those also against its officers, agents, and representatives where the State, though not named as such, is nevertheless the only real party against which alone in fact the relief is asked, and against which the judgment or decree effectively operates. But this is not intended in any way to impinge upon the principle which justifies suits against individual defendants, who, under color of the authority of unconstitutional legislation by the State, are guilty of personal trespasses and wrongs, nor to forbid suits against officers in their official capacity either to arrest or direct their official action by injunction or mandamus, where such suits are authorized by law, and the act to be done or omitted is purely ministerial, in the performance or omission of which the plaintiff has a legal interest."

It is said that the *Ayers* case is not applicable here, because the orders made by the Federal circuit court had for their object to compel Virginia to perform its contract with bondholders, which is not this case. But that difference between the *Ayers* case and this case can not affect the principle involved. The proceeding against the attorney-general of Virginia had for its object to compel, by indirection, the performance of the contract which that Commonwealth was alleged to have made with bondholders—such performance, on the part of the State, to be effected by means of orders in a Federal circuit court directly controlling the official action of that officer. The proceeding in the *Perkins-Shepard* suit against the attorney-general of Minnesota had for its object, by means of orders in a Federal circuit court, directed to that officer, to control the action of that State in reference to the enforcement of certain statutes by judicial proceedings commenced in its own courts. The relief sought in each case was to control the State by controlling the conduct of its law officer against its will. I can not conceive how the proceeding against the attorney-general of Virginia could be deemed a suit against that State, and yet the proceeding against the attorney-general of Minnesota is not to be deemed a suit against Minnesota, when the object and effect of the latter proceeding was, beyond all question, to shut that State entirely out of its own courts and prevent it through its law officer from invoking their jurisdiction in a special matter of public concern, involving official duty, about which the State desired to know the views of its own judiciary. In my opinion the decision in the *Ayers* case determines this case for the petitioner.

More directly in point, perhaps, for the petitioner Young is the case of *Fitts v. McGhee* (172 U. S., 516, 528, 529, 530). That suit was brought by the receivers of a railroad company against the governor and attorney-general of Alabama. Its object was to prevent the enforcement of the provisions of an Alabama statute prescribing the maximum rates of toll to be charged on a certain bridge across the Tennessee River. The statute imposed a penalty for each time that the owners, lessees, or operators of the bridge demanded or received any higher rate of toll than was prescribed by it. The relief asked was an injunction prohibiting the governor and attorney-general of the State and all other persons from instituting any proceeding against the complainants, or either of them, to enforce the statute. An injunction as prayed for was granted. In the progress of the cause the solicitor of the district in which the case was pending was made a defendant and the injunction was extended to him. By amended pleadings it was made to appear that the tollgate keepers at the public crossing of the bridge were indicted for collecting tolls in violation of the statute. In the progress of the cause the plaintiffs dismissed the case as to the State, and the cause was discontinued as to the governor. But the case was heard upon the motion to dismiss the bill upon the ground that the suit was one against the State in violation of the Constitution of the United States.

After stating the principles settled in the *Ayers* case and in other cases, this court said: "If these principles be applied in the present case there is no escape from the conclusion that, although the State of Alabama was dismissed as a party defendant, this suit against its officers is really one against the State. As a State can act only by its officers, an order restraining those officers from taking any steps, by means of judicial proceedings, in execution of the statute of February 9, 1895, is one which restrains the State itself, and the suit is consequently as much against the State as if the State were named as a party defendant on the record. If the individual defendants held pos-

session or were about to take possession of or to commit any trespass upon any property belonging to or under the control of the plaintiffs, in violation of the latter's constitutional rights, they could not resist the judicial determination, in a suit against them, of the question of the right to such possession by simply asserting that they held or were entitled to hold the property in their capacity as officers of the State. In the case supposed, they would be compelled to make good the State's claim to the property, and could not shield themselves against suit because of their official character. (*Tindal v. Wesley*, 167 U. S., 204, 222.) No such case is before us."

Again, in the same case:

"It is to be observed that neither the attorney-general of Alabama nor the solicitor of the eleventh judicial circuit of the State appears to have been charged by law with any special duty in connection with the act of February 9, 1895. In support of the contention that the present suit is not one against the State reference was made by counsel to several cases, among which were *Polindexter v. Greenhow* (114 U. S., 270); *Allen v. Baltimore and Ohio Railroad* (114 U. S., 311); *Pennoyer v. McConnaughy* (140 U. S., 1); *In re Tyler* (140 U. S., 164); *Reagan v. Farmers' Loan and Trust Company* (154 U. S., 362, 388); *Scott v. Donald* (165 U. S., 58), and *Smyth v. Ames* (169 U. S., 466). Upon examination it will be found that the defendants in each of those cases were officers of the State, especially charged with the execution of a State enactment alleged to be unconstitutional, but under the authority of which, it was averred, they were committing or were about to commit some specific wrong or trespass, to the injury of the plaintiff's rights. There is a wide difference between a suit against individuals holding official positions under a State to prevent them, under the sanction of an unconstitutional statute, from committing by some positive act a wrong or trespass, and a suit against officers of a State merely to test the constitutionality of a State statute, in the enforcement of which those officers will act only by formal judicial proceedings in the courts of the State. In the present case, as we have said, neither of the State officers named held any special relation to the particular statute alleged to be unconstitutional. They were not expressly directed to see to its enforcement. If, because they were law officers of the State, a case could be made for the purpose of testing the constitutionality of the statute by an injunction suit brought against them, then the constitutionality of every act passed by the legislature could be tested by a suit against the governor and attorney-general, based upon the theory that the former, as the executive of the State, was, in a general sense, charged with the execution of all its laws, and the latter, as attorney-general, might represent the State in litigation involving the enforcement of its statutes. That would be a very convenient way for obtaining a speedy judicial determination of questions of constitutional law which may be raised by individuals, but it is a mode which can not be applied to the States of the Union consistently with the fundamental principle that they can not, without their assent, be brought into any court at the suit of private persons. If their officers commit acts of trespass or wrong to the citizen, they may be individually proceeded against for such trespass or wrong. Under the view we take of the question, the citizen is not without effective remedy when proceeded against under a legislative enactment void for repugnancy to the supreme law of the land, for, whatever the form of the proceeding against him, he can make his defense upon the ground that the statute is unconstitutional and void. And that question can be ultimately brought to this court for final determination." I am unable to distinguish that case in principle from the one now before us. The *Fitts* case is not overruled, but is, I fear, frittered away or put out of sight by unwarranted distinctions.

Two cases in this court are much relied on to support the proposition that the *Perkins-Shepard* suit in the circuit court is not a suit against the State. I refer to *Reagan v. Farmers' Loan and Trust Company* (154 U. S., 362), and *Smyth v. Ames* (169 U. S., 466, 472). But each of those cases differs in material respects from the one instituted by *Perkins and Shepard* in the court below. In the *Reagan* case it appears that the very act under which the railroad commission proceeded authorized the railroad company or any interested party, if dissatisfied with the action of the commission in establishing rates, to bring suit against that commission in any court, in a named county, with right of appeal to a higher court. This court, when combating the suggestion that only the State court had jurisdiction to proceed against the commission and give relief in respect of the rates it established, said:

"It may be laid down as a general proposition that whenever a citizen of a State can go into the courts of a State to defend his property against the illegal acts of its officers, a citizen of another State may invoke the jurisdiction of the Federal courts to maintain a like defense. A State can not tie up a citizen of another State having property rights within its territory invaded by unauthorized acts of its own officers to suits for redress in its own courts. Given a case where a suit can be maintained in the courts of the State to protect property rights, a citizen of another State may invoke the jurisdiction of the Federal courts. * * * It comes, therefore, within the very terms of the act. It can not be doubted that a State, like any other government, can waive exemption from suit."

The declaration of the court in the *Reagan* case that that suit was not, within the true meaning of the eleventh amendment, to be regarded as a suit against the State, must therefore be taken in connection with the declaration in the same case that the State having consented that the commission might be sued in one of its own courts in respect of the rates established by the statute, must be taken to have waived its immunity from suit in the circuit court of the United States sitting in Texas. In *Smyth v. Ames*, above cited, which was a suit in a circuit court of the United States involving the constitutional validity of certain rates established for railroads in Nebraska, it appeared that the statute expressly authorized any railroad company claiming that the rates were unreasonable to bring an action against the State before the Supreme Court in the name of the railroad company or companies bringing the same. Thus the State of Nebraska waived its immunity from suit, and having authorized a suit against itself in one of its courts, in respect of the rates there in question, it could not, according to the decision in the *Reagan* case, deny its liability to like suit in a court of the United States. It is true that this court, in its opinion in *Smyth v. Ames*, did not lay any special stress on the fact that Nebraska, by the statute, agreed that it might be sued, but it took especial care in its extended statement of the case to bring out that fact. Its silence on that point is not extraordinary in view of the fact, as appears from the opinion of this court, that the question whether that suit was to be deemed one against the State was not discussed at the bar by the Nebraska State Board. We there quoted from the *Reagan* case these words:

"Whenever a citizen of a State can go into the courts of a State to defend his property against the illegal acts of its officers, a citizen

of another State may invoke the jurisdiction of the Federal courts to maintain a like defense. A State can not tie up a citizen of another State, having property rights within its territory invaded by unauthorized acts of its own officers, to suits for redress in its own courts." That the *Reagan* and *Smyth* cases did not go as far as is now claimed for them is made clear by the later case of *Fitts v. McGhee*, already referred to, in which the doctrines of *In re Ayers* were reaffirmed and applied.

We may refer in this connection to *Gunter v. Atlantic Coast Line* (200 U. S., 273, 291), in which case one of the points made was that the circuit court of the United States had no power to restrain the attorney-general of South Carolina and the counsel associated with him from prosecuting in the State courts actions authorized by the laws of the State, and hence that the court erred in awarding an injunction against said officers. This court said: "Support for the proposition is rested upon the terms of the eleventh amendment and the provisions of section 720 of the Revised Statutes, forbidding the granting of a writ by any court of the United States to stay proceedings in any court of a State, except in cases where such injunction may be authorized by any law relating to proceedings in bankruptcy. The soundness of the doctrine relied upon is undoubted. In *re Ayers* (123 U. S., 443); *Fitts v. McGhee* (172 U. S., 516). The difficulty is that the doctrine is inapplicable to this case. Section 720 of the Revised Statutes was originally adopted in 1793, whilst the eleventh amendment was in process of formation in Congress for submission to the States, and long, therefore, before the ratification of that amendment. The restrictions embodied in the section were, therefore, but a partial accomplishment of the more comprehensive result effectuated by the prohibitions of the eleventh amendment. Both the statute and the amendment relate to the power of courts of the United States to deal, against the will and consent of a State, with controversies between it and individuals. None of the prohibitions, therefore, of the amendment or of the statute relate to the power of a Federal court to administer relief in causes where jurisdiction as to a State and its officers has been acquired as a result of the voluntary action of the State in submitting its rights to judicial determination. To confound the two classes of cases is but to overlook the distinction which exists between the power of a court to deal with a subject over which it has jurisdiction and its want of authority to entertain a controversy as to which jurisdiction is not possessed."

Counsel for the railway company placed some reliance on *Pennoyer v. McConnaughy* (140 U. S., 1, 18), in which the previous cases on the general subject of suits against the States were classified. That case was a suit in equity against certain parties "who, under the constitution of Oregon, as governor, secretary of state, and treasurer of that State, comprised the board of land commissioners of that State, to restrain and enjoin them from selling and conveying a large amount of land in that State to which the plaintiff asserted title." That suit, in view of the nature of the relief asked, and of the relations of the defendants to the matters involved, was held not to be one against the State within the meaning of the eleventh amendment. But after a review of the facts the court, as explanatory of the conclusion reached by it, took especial care to observe: "In this connection it must be borne in mind that this suit is not nominally against the governor, secretary of state, and treasurer as such officers, but against them collectively, as the board of land commissioners." The present suit is, in terms, against Young "as attorney-general of Minnesota," and the decree was sought against him as such officer, not against him individually as a mere administrative officer charged with certain duties.

One of the cases cited in support of the decision now rendered is *Missouri, Kansas and Texas Railway Company v. Missouri Railroad and Warehouse Commissioners* (183 U. S., 53, 58, 59). But although that particular suit was held not to be one against the State, the case, in respect of the principles announced by the court, is in harmony with the views I have expressed. For the court there says:

"Was the State the real party plaintiff? It was at an early day held by this court, construing the eleventh amendment, that in all cases where jurisdiction depends on the party, it is the party named in the record. *Osborn v. United States Bank* (9 Wheat., 738). But that technical construction has yielded to one more in consonance with the spirit of the amendment, and in *re Ayers* (123 U. S., 443) it was ruled upon full consideration that the amendment covers not only suits against a State by name but those also against its officers, agents, and representatives where the State, though not named as such, is nevertheless the only real party against which in fact the relief is asked, and against which the judgment or decree effectively operates. And that construction of the amendment has since been followed."

In the present case the State, although not named on the record as a party, is the real party whose action it is sought to control.

There are other cases in this court in which the scope and meaning of the eleventh amendment were under consideration, but they need not be cited, for they are well known. They are all cited in *In re Ayers* (123 U. S., 443, 500). "The vital principle in all such cases," this court said in the *Ayers* case, "is that the defendants, though professing to act as officers of the State, are threatening a violation of the personal or property rights of the complainant, for which they are personally and individually liable," or cases in which the officer sued refused to perform a purely ministerial duty, about which he had no discretion and in the performance of which the plaintiff had a direct interest. The case before us is altogether different. The statutes in question did not impose upon the attorney-general of Minnesota any special duty to see to their enforcement. In bringing the mandamus suit he acted under the general authority inhering in him as the chief law officer of his State. He could not become personally liable to the railway company simply because of his bringing the mandamus suit. The attorney-general stated that all he did or contemplated doing was to bring the mandamus suit. The mere bringing of such a suit could not be alleged against him as an individual in violation of any legal right of the railway company or its shareholders. In *re Ayers* (123 U. S., 443, 496). The plaintiffs recognized this fact, and hence did not proceed in their suit upon the ground that the defendant was individually liable. They sued him only as attorney-general, and sought a decree against him in his official capacity, not otherwise.

Some reference has been made to *ex parte Royall* (117 U. S., 241) and other cases that affirm the authority of a Federal court, under existing statutes, to discharge upon habeas corpus from the custody of a State officer one who is held in violation of the Federal Constitution for an alleged crime against a State. Those cases are not at all in point in the present discussion. Such a habeas corpus proceeding is *ex parte*, having for its object only to inquire whether the applicant for the writ is illegally restrained of his liberty. If he is, then the State officer holding him in custody is a trespasser, and can not defend

the wrong or tort committed by him by pleading his official character. The power in a Federal court to discharge a person from the custody of a trespasser may well exist, and yet the court have no power in a suit before it, by an order directed against the attorney-general of a State, as such, to prevent the State from being represented by that officer, as a litigant in one of its own courts. The former cases, it may be argued, come within the decisions which hold that a suit which only seeks to prevent or restrain a trespass upon property or person by one who happens to be a State officer, but is proceeding in violation of the Constitution of the United States, is not a suit against a State within the meaning of the eleventh amendment, but a suit against he trespasser or wrongdoer. But the authority of the Federal court to protect one against a trespass committed or about to be committed by a State officer in violation of the Constitution of the United States is very different from the power now asserted and recognized by this court as existing, to shut out a sovereign State from its own courts by the device of forbidding its attorney-general, under the penalty of fine and imprisonment, from appearing in such courts in its behalf. The mere bringing of a suit on behalf of a State, by its attorney-general, can not (this court has decided in the *Ayers* case) make that officer a trespasser and individually liable to the party sued. To enjoin him from representing the State in such suit is, therefore, for every practical or legal purpose, to enjoin the State itself. This court, in the *Debs* case (158 U. S., 564, 584), said:

"Every government intrusted, by the very terms of its being, with powers and duties to be exercised and discharged for the general welfare, has a right to apply to its own courts for any proper assistance in the exercise of the one and the discharge of the other, and it is no sufficient answer to its appeal to one of those courts that it has no pecuniary interest in the matter. The obligation which it is under to promote the interest of all, and to prevent the wrongdoing of one resulting in injury to the general welfare, is often of itself sufficient to give it a standing in court. This proposition in some of its relations has heretofore received the sanction of this court."

If there be one power that a State possesses which ought to be deemed beyond the control in any mode of the National Government or of any of its courts, it is the power by judicial proceedings to appear in its own courts, by its law officer or by its attorneys, and seek the guidance of those courts in respect of matters of a justiciable nature. If the State court, by its judgment in such a suit, should disregard the injunctions of the Federal Constitution, that judgment would be subject to review by this court upon writ of error or appeal.

It will be well now to look at the course of decisions in other Federal courts.

Attention is first directed to *Arbuckle v. Blackburn* (113 Fed. Rep., 616, 622), which was a suit in equity, one of the principal objects of which was to restrain the enforcement of an act of the Ohio legislature relating to food products, particularly of a named coffee in which the plaintiffs were interested. The circuit court of appeals held that the bill was properly dismissed, saying, among other things:

"What, then, is the object of the injunction sought in this case? It is no more or less than to restrain the officer of the State from bringing prosecutions for violations of an act which said officer is expressly charged to enforce in the only way he is authorized to proceed—by bringing criminal prosecutions in the name of the State. This is virtually to enjoin the State from proceedings through its duly qualified and acting officers. If the food commissioner may be enjoined from instituting such prosecution, why may not the prosecuting attorney, or any officer of the State charged with the execution of the criminal laws of the State? While the State may not be sued, if the bill can be sustained against its officers, it is as effectually prevented from proceeding to enforce its laws as it would be by an action directly against the State. This view of the case, in our judgment, is amply sustained by the cases above cited and by the later case of *Fitts v. McGhee* (172 U. S., 516). In so far as this action seeks an injunction against the respondent from proceeding to enforce by prosecution the provisions of the statutes of Ohio above cited, the courts of the United States are deprived of jurisdiction by the eleventh amendment to the Constitution."

In *Union Trust Company v. Stearns* (119 Fed. Rep., 790, 791-2, 795), the circuit court of the United States for the district of Rhode Island had occasion to consider the scope of the eleventh amendment. The case related to a statute regulating the hours of labor of certain employees of street railways, and imposing a fine for a violation of its provisions. The court upon an elaborate review of all the cases in this court dismissed the action. The defendants *Stearns* and *Greenough* were, respectively, the attorney-general and assistant attorney-general of the State. They were not named in the act, nor charged with any special duty in connection therewith. The court said:

"The purpose of the present bill, in substance and effect, is to enjoin the State of Rhode Island from the enforcement of a penal statute. Indictments under the act are brought in the name and on behalf of the State for the protection of the State. These defendants, the attorney-general and his assistant, merely represent the State in such proceedings. They are simply the officers and agents of the State. It is not as individuals, but solely by virtue of their holding such offices, that they prefer and prosecute indictments in the name of the State. A State can only act or be proceeded against through its officers. If a decree could be entered against the State of Rhode Island enjoining prosecutions under this act, it could only operate against the State through enjoining these defendants. An order restraining the attorney-general and his assistant from the enforcement of this statute is an order restraining the State itself. The present suit, therefore, is as much against the State of Rhode Island as if the State itself were named a party defendant."

After referring to *In re Ayers*, and *Fitts v. McGhee*, and upon a review of the cases, the court proceeded:

"The defendants *Stearns* and *Greenough* hold no special relation to the act of June 1, 1902. They are not specially charged with its execution. They are not thereby constituted a board or commission with administrative powers, nor are they as individuals, and apart from the official authority under which they act, threatening to seize the property of the complainant, or to commit any wrong or trespass against its personal or property rights. They have no other connection with this statute than the institution of formal judicial proceedings for its enforcement in the courts of the State in the name and behalf of the State. Upon reason and authority the present bill is a suit against the State of Rhode Island, within the meaning of the eleventh amendment to the Constitution of the United States."

In *Morenci Copper Company v. Freer* (127 Fed. Rep., 199, 205), which was an action in equity to restrain and inhibit the defendant, in his official capacity as attorney-general of West Virginia, from proceeding to institute an action in the State court for forfeiture of the charter of the plaintiff corporation for a failure to pay a license tax

imposed by a State statute, and which statute was alleged to be in violation of the Federal Constitution, the circuit court reviewed the decision of this court upon the question as to what and what were not suits against the State. The circuit court held that it had no jurisdiction of the case, saying:

"But it may be said, if the court holds that no remedy of this sort will lie in the circuit court of the United States to prevent this breach of a contract by the State of West Virginia by means of the machinery of a law violative of the Constitution of the United States, how are the rights of corporations to be preserved? The answer is that such alleged unconstitutionality is matter of defense to any suit brought for the forfeiture of complainant's charter, and could be set up as an answer and defense to any bill brought for that purpose, and, if the highest court of the State ruled adversely to that contention, appeal would lie to the Supreme Court of the United States. Or the case can be removed to the circuit court of the United States if it presents a case arising under the Constitution or laws of the United States."

A well-considered case is that of *Western Union Telegraph Company v. Andrews* (154 Fed. Rep., 95, 107). In that case the telegraph company sought by bill to enjoin the prosecuting attorneys of the various judicial circuits of Arkansas from instituting any proceeding for penalties for its failure or refusal to comply with the provisions of an act of the legislature of Arkansas relating to foreign corporations doing business in that State and fixing fees, etc. The bill charged that the various prosecuting attorneys would, unless restrained, institute numerous actions for the recovery of the penalties prescribed by the act, which was no less than \$1,000 for each alleged violation. The defense was, among other things, that the action was one against the State, and therefore prohibited by the Constitution. After a careful review of the adjudged cases in this court and in the subordinate Federal courts, the circuit court held the action to be one against the State, forbidden by the eleventh amendment, saying among other things:

"The allegations in the bill show that this is an attempt to prevent the State of Arkansas, through its officers, who by its laws are merely its attorneys, to represent it in all legal actions in its favor or in which it is interested, from instituting and prosecuting suits for the recovery of penalties incurred for alleged violation of its laws, actions which can only be instituted in the name of the State and for its use and benefit."

Upon the fullest consideration and after a careful examination of the authorities, my mind has been brought to the conclusion that no case heretofore determined by this court requires us to hold that the Federal circuit court had authority to forbid the attorney-general of Minnesota from representing the State in the mandamus suit in the State court, or to adjudge that he was in contempt and liable to be fined and imprisoned simply because of his having, as attorney-general, brought that suit for the State in one of its courts. On the contrary, my conviction is very strong that, if regard be had to former utterances of this court, the suit of Perkins and Shepard in the Federal court, in respect of the relief sought therein against Young, in his official capacity, as attorney-general of Minnesota, is to be deemed—under the *Ayers* and *Fitts* cases particularly—a suit against the State of which the circuit court of the United States could not take cognizance without violating the eleventh amendment of the Constitution. Even if it were held that suits to restrain the instituting of actions directly to recover the prescribed penalties would not be suits against the State, it would not follow that we should go further and hold that a proceeding under which the State was, in effect, denied access, by its attorney-general, to its own courts, would be consistent with the eleventh amendment. A different view means, as I think, that although the judicial power of the United States does not extend to any suit expressly brought against a State by a citizen of another State without its consent or to any suit the legal effect of which is to tie the hands of the State, although not formally named as a party, yet a circuit court of the United States, in a suit brought against the attorney-general of a State may, by orders directed specifically against that officer, control, entirely control, by indirection, the action of the State itself in judicial proceedings in its own courts involving the constitutional validity of its statutes. This court has heretofore held that that could not be done, and that such a result would, for most purposes, practically obliterate the eleventh amendment and place the States, in vital particulars, as absolutely under the control of the subordinate Federal courts as if they were capable of being directly sued. I put the matter in this way, because to forbid the attorney-general of a State (under the penalty of being punished as for contempt) from representing his State in suits of a particular kind, in its own courts, is to forbid the State itself from appearing and being heard in such suits. Neither the words nor the policy of the eleventh amendment will, under our former decisions, justify any order of a Federal court the necessary effect of which will be to exclude a State from its own courts. Such an order attended by such results can not, I submit, be sustained consistently with the powers which the States, according to the uniform declarations of this court, possess under the Constitution. I am justified, by what this court has heretofore declared, in now saying that the men who framed the Constitution and who caused the adoption of the eleventh amendment would have been amazed by the suggestion that a State of the Union can be prevented by an order of a subordinate Federal court from being represented by its attorney-general in a suit brought by it in one of its own courts; and that such an order would be inconsistent with the dignity of the States as involved in their constitutional immunity from the judicial process of the Federal courts (except in the limited cases in which they may constitutionally be made parties in this court) and would be attended by most pernicious results.

I dissent from the opinion and judgment.

Mr. Speaker, I shall not dwell on the necessity for the legislation suggested by the bill H. R. 7636, that I introduced, and by the bill S. 3732, which passed the Senate, both of which are printed in this RECORD. The autonomy of the States is threatened. The right of each State to carry on local self-government was never further encroached upon. The Federal judiciary has asserted astonishing doctrine. It is clearly within the power of Congress to limit the power and to regulate the practice of inferior United States courts and judges. This ought to be done in the interests of public justice and to prevent that disaster which Jefferson predicted would come from the work of "sappers and miners of the Constitution."
